☞ Work has been commenced on the Ware River (Mass.) Railroad Extension, several gangs being already engaged above Gilbertville, and a larger force will soon be employed all along the line to Winchendon. The contract provides that the road shall be completed within two years.

Chicago, Rock Island and Pacific Railroad.

This company have declared a dividend of four per cent., free of United States tax, payable on the 17th day of October, to shareholders who shall be registered as such on the closing of the transfer-books. The transfer-books will be closed on the afternoon of the 8th day of October and opened on the 2d day of November next.

The capital stock of the company has been increased one million dollars, in conformity with the proceedings of the stockholders at their meeting in June, 1869, and the same is offered to stockholders in the proportion of one additional share to each sixteen shares held by them on the closing of the transfer-books, said stock to be subscribed and paid for on or before the 1st day of November next, at which date negotiable scrip will be issued, entitling the holder to convert the same into shares of stock on and after 1st December next, when presented in sums of one hundred dollars, or any multiple of the same.

Stockholders not having complied with the above requirements by the 1st day of November next will be considered as having waived their right to subscribe, and the stock will be otherwise disposed of.

Brinckerhoff, Turner & Polhemus.

The attention of Railroad Companies, Master Car Builders, and Car Builders in general, is called to the advertisement of Messrs. BRINCKERHOFF, TURNER & POLHEMUS, on our second page. This old established and reliable firm are manufacturers of and dealers in all kinds of Cotton Duck for Car Coverings and Car Seats. They also manufacture all kinds of Cotton Canvas, Sail Ducks, Felting Ducks, Awning Stripes, &c. They are also agents of the "United States Bunting Company." A full supply of all articles in their line can be found always on hand, at their large and extensive stores, Nos. 13 and 15 Lispenard St., N. Y. The members of this firm, which comprise E. A. BRINCKERHOFF, J. SPENCER TURNER, THEODORE POLHEMUS, and H. D. POLHEMUS *special*, are old and established merchants of this city.

☞ The Baltimore *Sun* says that a company of Northern capitalists have taken charge of the road from Port Royal, the great harbor between Charleston and Savannah, and announce their purpose to have a continuous air line road from Port Royal through Memphis to Kansas City. This road from the Atlantic passes Opelika, Tuscumbia and across Alabama to Memphis. Its resources and fortunes are discussed with great interest by the press of Central Alabama.

☞ The new contractors, Messrs. Irwin & Sons, of Baltimore, commenced work on the Queen Annie's and Kent railroad on Wednesday of last week, having a force of hands grading from Centreville to Carville's Corner; also another force laying track from Sudlersville. The prospect for the completion of the road is really cheering.

☞ John R. Burnett, formerly collector of the Morris Canal and Banking Co., has been elected secretary of the company, vice John Rogers, deceased.

☞ The completion of the Colorado Central Railroad, from Denver to Golden City was celebrated at the latter place on the 27th ult.

List of U. S. Patents.

Issued for Improvements relating to Railroad Construction, Rolling Stock, &c., for the week ending Sept. 20, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

No.

107,472.—Locomotive, William A Foster, Fitchburg, Mass.

107,478.—Lubricator, John Gates, Portland, Oregon.

107,492.—Adjustable Arms for working Slide-Valves, Hubbard Hendrickson, Red Bank, N. J.

107,505.—Balanced Rock Valve, John C. King, New York, N. Y., assignor to himself, George W. Woodward and George A. Blood, same place.

107,511.—Locomotive Attachment, Clark Lewis, Caseville, N. Y.

107,524.—Double Piston Engine, Albert W. Morrell, Niles, Mich., assignor of one-half his right to Perley Hale, Jr.

107,571.—Car-Coupling, William Walker, Woodside, Cal., assignor to himself and Robt. O. Tripp.

107,576.—Bridge, Isaac H. Wheeler, Sciotaville, Ohio.

107,601.—Electro-Magnetic Railroad Signal Apparatus, Alexander J. Elder, Chicago, Ills.

107,602.—Art of Manufacturing Spikes, David Eynon, Richmond, Va., assignor to the Tredegar Co., same place.

107,603.—Exhaust Nozzle, A. Fober Du Faur, New York, N. Y.

107,605.—Exhaust Nozzle, Wm. A. Foster, Fitchburg, Mass.

107,609.—Nut Lock, Robert Gilliland, Hudson, Mich.

107,620.—Preserving and Hardening Wood, Benjamin R. Nickerson, San Francisco, Cal.

107,623.—Apparatus for Coupling Cars, Richard F. Randolph, Jr., East Palestine, Ohio.

107,631.—Car-Axle Lubricator, Thomas Sayles, Chicago, Ills.

107,643.—Railway, Charles H. White, Emmett township, Mich.

Extension.—Improvement in repairing Railway Bars, Geo. Johnson, of Marshall, Mich., administrator of Joseph D. Cawood, deceased—Letters Patent, No. 15,687, dated Sept. 9, 1856.

Issued for the week ending Sept. 27, 1870, and each bearing that date.

107,649.—Metallic Roof, Wm. M. Barry, Nashville, Tenn.

107,688.—Dumping Car, Edward C. Hegeler, La Salle, Ills., assignor to "F. W. Malthiesson and Hegeler," same place.

107,702.—Friction Locomotive, Thomas S. Minnis, Meadville, Pa. (Antedated Sept. 17, 1870.)

107,704.—Nut Lock, James Moorecroft, Newport, R. I.

107,715.—Furnace Grate, Abraham L. Pennock, Upper Darby, Pa.

107,716.—Car Ventilator and Refrigerator, Wm. E. Phelps, Elmwood, Ills.

107,728.—Steam Engine, Wm. F. Richardson, Pittsburg, Pa.

107,739.—Lubricator, Ernest Von Jelnsen, San Francisco, Cal.

107,746.—Automatic Cut-off for Steam Engine, Daniel C. Woodbury, Rochester, N. Y.

107,748.—Steam Engine Condenser, Harrison Anderson, Peoria, Ills.

107,780.—Grate for Furnace, Reuben A. Hutchinson, Bergen, N. J.

107,798.—Railway Rail, Richard Montgomery, New York, N. Y.

107,814.—Car-Coupling, Bennett R. Rose, Kansas City, Mo.

107,826.—Lubricator, Levi F. Smith, Philadelphia, Pa.

107,837.—Car-Coupling, Geo. B. Terry, Pittsford, and Warren G. Hawley, Gorham, N. Y.

107,840.—Steam Generator, William Weston, Wm. R. Weston, Nathaniel Weston, and Burt Brett, Stevens' Point, Wis.

107,841.—Pump Valve, James T. Whipple, Chicago, Ills.

REISSUES.

4,131.—Lubricator, Henry A. Daniels, Waterbury, Conn., assignor to the Daniels, Nichols and Gaylord Manufacturing Co., same place. Patent No. 92,283, dated July 6, 1869.

4,134.—Composition for Covering Steam Boilers, &c., John Riley and Chas. W. Bissell, Troy, N. Y. Patent No. 95,617, Oct. 5, 1869.

Tax on Dividends Declared in 1869 Payable in 1870.

In the United States Circuit Court, Philadelphia, on the 19th ult., Justice Strong delivered an opinion in the case of the Philadelphia and Reading Railroad Company *vs.* Wm. H. Barnes, Collector of Internal Revenue *et al.*, but involving all the railroad companies in the question of a tax upon dividends declared payable after January 1, 1870. The plea of the plaintiffs set forth the real question as follows:

That the plaintiffs, who are a railroad company, declared a dividend on their capital stock to their stockholders on the 22d of December, 1869, as part of their earnings, incomes and gains made and accrued between July 1, 1869, and December 1, 1869, and that the dividend was declared payable to the stockholders on and after the 17th of January, 1870. The plea further avers that a return thereof was afterwards made to the assessor of internal revenue of the United States, and a tax of five per cent. of the amount of the dividends was assessed by him upon the plaintiffs, which was due and payable on or before March 31, 1870; that notice of the assessment was duly given, and a demand for payment was made upon the plaintiff by the district collector; that the tax was not paid in response to the demand, whereupon the defendants, who were the collector and deputy collectors, on the 5th of May, 1870, made a distress for the tax, together with five per cent. additional thereto, and the interest accrued thereon, and that this was the supposed trespassor.

Judge Strong stated the real question to be whether the act of June 30, 1864, as amended, authorizes the levy and collection of a tax upon dividends declared by railroad companies in 1869, but declared to be payable at a time after December 31 of that year, and therefore not receivable by the stockholders until the year 1870. The Judge holds that the tax in question is a part of the five per cent. tax imposed upon all incomes which, under the 116th section of the act, were to be assessed and collected "for the year ending the 31st day of December next preceding the time for levying, collecting and paying said duty."

It is true that in the provisions made by Congress for estimating or ascertaining the gains, profits, and income of any person, there are certain apparent exceptions. The 117th section, as amended by the act of 1867, required that there should be included in the estimate, *inter alia*, the share of any person of the gains or profits of all companies, whether incorporated or partnership, who would be entitled to the same if divided, whether divided or otherwise, "except the amount of incomes received from institutions or corporations whose officers, as required by law, withhold a per centum of the dividends made by such institutions, and pay the same to the officer authorized to receive the same, and except that portion of the salary or pay received for service in the civic, military, or naval, or other service of the United States, including Senators, representatives, and delegates in Congress, from which the tax has been deducted." But these exceptions recognize the dividends and interest received from such companies, and the gains from the salaries or pay of United States officers as a part of the tax payer's income. They are obviously introduced as a guide to the return of income, which the next following section requires to be made to the Assistant Assessor, and because a special mode of collecting the tax on such dividends, interest and salaries was intended to be provided.

There is nothing to warrant the belief that Congress intended to impose a burden upon income derived from one species of property greater or longer continued than that imposed upon income from other property, or that they intended to discriminate against Federal officers and compel them to pay a tax on their salaries after taxes on all other salaries had ceased. The dividends received by a shareholder of a railroad company, or a canal, turnpike or slackwater navigation company, or of a banking, trust, or insurance company, are, in every sense, as much his income as are the dividends he may receive from any other company, for example, a bridge or a manufacturing corporation. So is the interest received for loans to a railroad company as truly income of a bondholder as is the interest received by him on permanent loans to any other corporation, or natural persons. I must regard the 120th, 121st, 122d and 123d sections, not as imposing a distinct tax upon the subjects mentioned in them, but as having only the purpose to prescribe a peculiar mode of securing the collection of a portion of the tax previously imposed by the 116th section.

Accepting then the conclusion that the tax on railroad dividends, &c., is only a part of the tax on income generally imposed by the 116th section, and that the purpose of the 122d was not to impose a distinct tax, but to designate collectors and provide a special mode of collection, I proceed to consider what is the effect of the limitation clause in the 119th section. The 119th section imposes no tax. The reference must, therefore, be to taxes on income imposed by other sections of the act, to all of them, as well as those on railroad dividends, &c., as those on dividends made by telegraph companies, or gains received from any other source.

The clause also manifests a clear intent that the income to which it refers should not be subject to a tax unless derived or received prior to January 1, 1870. This appears clearly, when construed in connection with the 116th section, as it must be. That section enacted, as has already been noticed, that the tax therein provided for, including the tax on income from any source whatever, should be assessed, collected and paid upon the gains, profits and incomes for the year ending the thirty-first day of December next preceding the time for levying, collecting and paying said tax.

This provision must be assumed to have been in the mind of Congress when the 119th section was framed. Therefore, though the last tax was required to be levied on the first of March, 1870, it was designed to be a tax on the income of 1869; for unless the time of the levy had been in 1870 a large proportion of the income of 1869, probably much the largest portion, would have escaped the tax entirely. Then the provision that the taxes on income should be levied on the

first day of May in each year until and including the year 1870, and no longer, must mean that the income of 1870 should not be subject to taxation. If the income referred to was all income, as I have shown it was, in terms, it is difficult to avoid the conclusion that the act of Congress authorizes no tax upon any income accrued, derived or received from any source during the present year. The only doubt I entertain in regard to the soundness of this interpretation is raised by the fact that the limitation mentioned in the 119th section is applied to the time of the levy, and that no express mention is made of taxes on railroad dividends, etc. But upon reflection I think such express mention would have been superfluous, except, perhaps, to solve a doubt, which does not appear to have been in the mind of Congress.

It seems to me that light is thrown upon the subject by observing what must have been the course of thought in the legislative mind when the system of income taxation was devised and expressed in the statute. The first thought was that of an annual tax upon all annual income. That was embodied in the 116th section. Next arose the inquiry whether the tax should be upon the income of the current year or upon that of the year next preceding its collection. That was answered in the same section. Obviously the inquiry then arose, how shall the income be ascertained? and for that, provision was made in the 117th and 118th sections. Then followed the 119th, which provided for three things: 1st. At what time in each year the levy should be made and the tax become payable. 2d. How long the tax should continue; and, 3d. How it should be collected. Upon the whole, in view of these considerations, I am of opinion that, except as to the time and mode of collection, Congress had no intention of placing the tax on those species of income mentioned in the 120th, 121st, 122d and 123d sections on any different footing from the tax on all other income, and that the statute does not impose upon it a burden greater or longer continued than is laid upon income generally.

Is then a dividend declared December 22, 1869, but declared to be payable January 17, 1870, income of 1869 or of 1870, within the meaning of the act of Congress? I think it must be income of the latter year. True it was earned by the company in 1869, but it was not available to the stockholders. The act speaks of income derived from any kind of property, etc. It seems to contemplate a tax upon income received or receivable, something out of which the tax can be paid. If it were not so, the tax might be exacted for that which never came and never could come into the hands of the tax-payer.

The language of the 122d section is also significant. In speaking of the companies therein mentioned, it declares they "shall be subject to and pay a duty of five per centum on the amount of all such interest or coupons, dividends or profits, whenever the same shall be payable." In other words, the duty arises when the dividend is payable. And such is the construction that has been given to the act, in accordance with which the taxes have been collected. Prior to the act of 1864, there was a tax on dividends at the rate of three per cent., and when by that act the rate was raised to five per cent., the Commissioners of Internal Revenue issued a circular, dated July 1st, 1864, declaring that "all dividends payable on and after July 1st, 1864, no matter when declared, are subject to the duty of five per centum." I am not aware that any different construction of the act has ever prevailed. My opinion, therefore, is that the dividend declared by the plaintiffs must be regarded as income of the stockholders for the year in which it became payable. It follows that the assessor was without authority to assess a tax upon it, and that the plea of the defendants does not justify the distress they made to enforce its payment by the plaintiffs, together with the payment of a five per cent. additional penalty.

Judgment on the demurrer is therefore directed against the defendants.

Missouri, Kansas and Texas Railroad.

I passed over the Sedalia Division, (known as the Tebo and Neosho railroad,) in a special train, provided by Manager Stevens, and in the company of Superintendent Hale. At Clinton we were joined by a number of railway men, among whom was Col. A. P. Ladue, a director of the Tebo and Neosho Railroad Company, who acts as the general agent of the Missouri, Kansas and Texas Railroad Company, in the prosecution of its various enterprises in this State. He returned with us to this place, and will accompany me throughout the trip over the other lines of the company, as Mr. Stevens has arranged.

The cars are now running—two regular trains, daily—to Montrose, fifty-four miles from Sedalia; and the track is laid about fifteen miles beyond, to within two or three miles of the Osage river. Track is being laid at the rate of one and a half miles daily. We visited the "front," which presented an animated and interesting scene. The number of men engaged in track-laying is 160. A train accompanies them, on which they eat and sleep. Following this, is the surfacing "gang"—thirty-five men, engage in levelling up the track, and bringing it to line. These live in a commodious tent, which changes its location once a week. Scattered all along the road to Sedalia are piles of ties, rails, joints, &c., awaiting transportation to the front. The loading of them upon cars keeps twenty-five men constantly at work. The ties (of oak and walnut) are laid 2 500 to the mile; the rail (56 lbs. English iron) is joined with the fish-splice; all the culverts are of the best stone masonry, as are the piers of the bridges, (Post patent,) of which there are but two of any importance—those across the Grand and the Osage—both built by Boomer. The road is first-class in construction, and is in excellent condition for the traffic, already large, and growing very heavy as Fort Scott is approached.

The location of the line must commend itself to the judgment, not only of the professional engineer, but of those who look upon a railway in the light of a legitimate money investment, and regard its proper management as strictly a business matter. The road has not been taken a half mile out of the most direct practicable line between its principal points, in order to bring it through a village, or secure local aid. The wisdom of this course, while it will be commended by results, is already verified by the fact that two or three outlying villages are removing *en masse*, inhabitants and buildings, to the nearest station—in one instance, more than two miles away. The grades are very easy, the curves few and low, and the tangents long—in one instance, thirteen miles.

As to the country along the line—while its general aspect is the same as that of Eastern Kansas, it is better supplied with timber. If possible, the soil is richer. I was surprised at the amount of land under cultivation. Although, after leaving Sedalia, you go further and further away from railway market, (previous to the building of this line,) you encounter a country more and more settled for forty miles; and, beyond Clinton, are never out of sight of thrifty farms. A prettier agricultural district I have never seen; the farms have all been settled since the war; and the houses are new and generally commodious and neat. The towns, too, are fresh, wide awake and attractive. Sedalia has grown, since the war, from a few hundreds, to 5,000 or 6,000 people; Clinton, from 300 to 2,800; and among the attractions of these, and others, are numerous comely churches and spacious, well designed school-buildings.

Manager Stevens, in behalf of the Missouri, Kansas and Texas Railroad Company, took hold of this line about the middle of June last, and has devoted himself to its earliest possible completion with his characteristic energy and accustomed success. The "end of the track" is now carried seventy miles; grading is entirely completed to Nevada, and nearly to Fort Scott, to which point it is expected to have the cars running by Oct. 15; and connection with the Neosho Division ("Neosho Valley Railroad") of the Missouri, Kansas and Texas Railroad will be made at the earliest possible day, the distance to the point fixed being 160 miles.

Among other enterprises that Mr. Stevens has in hand, (all of which will be hereafter described,) mention should be made of the road from the City of Holden, Mo., (on the Missouri Pacific Railroad,) westward through Harrisonville to the State line. The grading and bridging are completed to this point, and track-laying is in active progress to Harrisonville. In Kansas, grading is under way to Paola, and the line is located to Ottawa—from which point it will intersect the Neosho Division at Council Grove or Emporia.—*Cor. Chicago Railway Review.*

Tax on Gas.

In reply to recent inquiries, the acting commissioner of internal revenue states that the tax on illuminating gas imposed by the act of June 30th, 1864, as subsequently amended, is still in force. This tax is a specific tax of fifteen, twenty or twenty five cents per thousand cubic feet, according to the general average of the monthly product for the year preceding the return required by law to be made. The act of March 31, 1868, which repealed the specific and ad valorem taxes imposed on manufactureres generally, made an exception of illuminating gas, distilled spirits, tobacco, snuff and cigars, &c. The act of July 14, 1870, repeals the several taxes on sales imposed by the internal revenue laws, except such as are paid by stamps, and the taxes on sales of leaf tobacco, manufactured tobacco, snuff, cigars, foreign and domestic distilled spirits and wines, after the first day of October, 1870. By neither of these acts was the tax repealed on illuminating gas. All gas companies are still required to make monthly returns and pay tax on their products as before stated.

☞ On and after October 1, 1870, the following taxes are discontinued, being repeated as of that date, by the act of July 14, 1870, viz: All taxes on gross receipts and on sales except those of tobacco, spirits and wines. Also the tax on legacies and successions on property passing by death occurring after that date. Stamps will no longer be required on promissory notes for less than one hundred dollars; nor on receipts for any amount. Stamps are still required on checks and all other documents (with the above exception) heretofore taxed.

☞ The interest coupons of the first mortgage bonds of the Chicago, Danville and Vincennes Railroad Company, due October 1, 1870, will be paid in gold on and after that date, upon presentation at the office of the Company, No. 28 Pine street.

☞ Work on the Canada Air Line railway has commenced at St. Thomas. Mr. Henry Yates, of Brantford, has the contract. A large number of men are in demand now to push forward the work at the highest speed.

☞ The Hartford and New Haven Railroad Company has declared a quarterly dividend of $2 on each share of full stock, and $1 50 on each share of scrip stock, payable October 1.

☞ The Philadelphia, Germantown and Norristown R. R. Co. have declared a dividend of five per cent., payable clear of taxes on and after October 1, 1870.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

Saturday, October 1, 1870.

Stock Exchange and Money Market.

Money has been in much better supply in the local market, the recent free disbursements of the Government through the Sub-Treasury here adding largely to the floating offerings. The demand has not been active for speculative purposes and call loans have been quoted quite easy at 4@6, generally 4@5 per cent. per annum. The mercantile inquiry has been pretty brisk, in connection with the increasing volume of the Fall trade, and choice to good business paper has been rated at from 7@10, generally at 8@9 per cent. per annum. The city banks, in their last weekly return, reported a gain of $355,404 of legal tender notes; with a further loss of $2,413,714 of deposits, and $1,846,427 of specie. They contracted their loan and discount averages $1,321,083; and diminished their circulation slightly. Their legal tender average is now a little under 49½ millions, as against 61⅝ millions on the 28th of May (the highest average of the current year, thus far). Their deposits are now a trifle over 191 millions, as against nearly 234½ millions on the 16th of July. Their specie average is about 14⅝ millions against 41⅛ millions July 16th. The U. S. Sub-Treasury lost $2,402,346 of its currency balance; and $19,481, of its coin reserve during the week.

The specie reserve of the city banks according to the latest return is $14,670,724, against $13,968,481 same time last year. The city bank deposits are now $191,066,202, against $180,230,793 week ending Sept. 25, 1869. The legal tender reserve amounts to $49,417,936, against $50,025,081 same time last year. The circulation now stands at $32,733,046, against $23,996,081 same time last year. The loans are now $267,087,617, against $263,441,828 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $73,566,643 a day, against a daily average of $69,961,551 the preceding week. The current weeks' exchanges average about 67½ millions a day. The city banks, last week, reported a loss of $1,846,427 of specie, and of $2,413,714 of deposits, with a gain of $355,404 legal tender notes. They reduced their loans, $1,321,083; and their circulation, $17,680.

The city bank exchanges on Wednesday were about 63⅜ millions.

The coin reserves of the Treasury Department on Monday were $97,290,420, including $16,798,000 on deposit on private account; currency balances, $30,855,940.

National Bank notes to the amount of $338,420 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $329,275,694, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $29,715,548 leaving, with the existing 1,612 banks, (having an aggregate capital of $427,235,701,) an actual circulation at this date, of $299,560,146. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,384,250; and for the public deposits, $16,261,500—making a total of $358,645,750. The Treasury Department last week redeemed and destroyed $500,000 of worn and mutilated fractional currency, and issued $806,015 of new.

The U. S. Sub-Treasury receipts, week ending with Sept. 24, were $3,513,386 in coin, (including $3,909,000 from customs duties,) and $3,407,730 in currency; payments, $3,532,867 in coin, (including $256,920 of coin interest,) and $5,810,076 in currency; balance at the close of the week, included $60,628,183, of coin, against $60,647,663 the preceding Saturday, and $6,650,742 of currency, against $9,053,087 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $758,100 in coin, (including $630,239 from customs,) and $284,064 in currency; payments $72,949 of coin (including $67,150 of coin interest), and $283,199, of currency. On Tuesday, receipts, $1,080,871 in coin (including $670,198 from customs), and $1,266,072 in currency; payments, $50,545 in coin (including $47,500 of coin interest) and $316,508 of currency. The balance at the close of business on Tuesday included $7,539,102 of currency, and $62,343,660 of coin, against a balance a week

previous of $8,920,817 currency, and $61,728,977 coin.

The aggregate receipts of the U. S. Sub-Treasury in August were $53,001,692, including $15,645,267 from customs; aggregate payments, $55,169,424, including $2,221,753 of coin interest, and $129,213.

The U. S. Sub-Treasurer issued in August $872,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $2,676,495 of coin certificates, received for customs.

Government revenues have been yielding moderately since our last. The excises, during the week yielded about two and a-half millions; customs at the port of New York, $2,987,495, and at the outports about a million (in coin) more, making the grand total income for the week equal to about $7,025,802 in currency. The income of the Government, from excises, since July 1, 1870, has been $49,674,884.

There has been rather more activity in the dealings in Gold, since our last, chiefly in the speculative line, and there have been somewhat wider fluctuations in the price, influenced in part by the varying tenor of the advices from Europe, relative to peace prospects. The range has been from 112⅝@114⅛, and the closing quotation on Wednesday was 114, against 113⅞ the preceding Wednesday. Government closed its Gold sales for September on Wednesday. The export drain was rather heavier last week having been up to $1,345,408 against less than a million week ending with Sept. 17; 1⅜ millions week ending Sept. 10; 1⅛ millions week ending Sept. 3; 2¼ millions week ending with Aug. 27th, about three millions the week ending with August 20th, 3⅞ millions the week ending with Aug. 13th, and nearly 7 millions the week ending with Aug. 6th. On Wednesday Government marketed a million of Gold at 113.33@113.56. The aggregate of the bids was $3,555,000. The shipments thus far this year have been about 48⅞ millions, against 25⅝ millions same time in 1869; nearly 66 millions same time in 1868; 41⅛ millions same time in 1867; over 53⅝ millions same time in 1866; and 21¾ millions same time in 1865. On Wednesday of the current week, the specie exports were $189,489. The exchanges at the Gold Exchange Bank, which were only 24⅝ millions on Thursday of last week, run up to 59¼ millions on Saturday, and were about 50 millions on Monday of this week, and 45⅛ millions on Tuesday. On Wednesday they were 87½ millions.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $61,380,840.

The customs demand for Gold last week, averaged $514,834 a day; thus far, this week, it has averaged $650,268 a day, or equal to a weekly aggregate of $3,901,608. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $156,998; and since Jan. 1, 1870, $8,057,430, against $11,091,436 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $104,735,221 against $100,420,855, same time in 1869.

The exports of specie, from this port, last week, were $1,345,408 against $1,073,654 same week last year; and since Jan. 1870, $48,764,812, against $25,587,186 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $256,920; and since Jan. 1, 1870, $66,440,347 against $68,797,662 same time in 1869.

The customs revenue of the port on Wednesday was $636,000; and the coin interest disbursements were $30,818.

The customs revenue at the port of San Francisco, from Jan. 1 to Sept. 19th, was $6,476,000, against $6,216,000 same time last year.

The specie exports by steamer and railway from San Francisco, from Jan. 1, 1870 to Sept. 12, were $25,179,000, against $27,814,000 same time last year.

Foreign Exchange has been in better supply and lower, on moderate business, closing very heavily. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109½; sight bills on London, 109⅞@110¼. The offerings of produce bills have been moderate. The week's exports of domestic produce have been to the currency value of $3,364,536, and since January 1, 1870, $133,726,889, against $141,680,284 same time in 1869.

Government securities have held their own well as to price, during the week, but have been without remarkable animation in the dealings. There have been no heavy offerings of bonds reported in the open market at the current rates. On Thursday of last week, Government bought in three millions of Five twenties, out of the aggregate offerings of $8,741,800. On Thursday of the current week, the Department closed its September purchases of Five twenties, with the acceptance of a million at about the open market prices.

U. S. sixes of 1881 closed here on Wednesday of the current week at 114⅛@114¼; U. S. Five-Twenties of 1862, 112⅞@113; U. S. Five-twenties of 1864 at 111½@111¾; U. S. Five-Twenties of 1865 at 111¾@112; U. S. Five-twenties of 1865 consolidated, 110½@110⅝; U.S. Five Twenties of 1867, 110½@110⅝; U. S. Five-twenties of 1868, 110½@110¾; U. S. Ten-forties at 106⅜@106½; U. S. Six per cent. currency bonds, 111⅛@111½.

State bonds have been less freely sought after but the changes in price have not been very important.

The coupons of the 7 per cent. Land Grant Bonds of the Union Pacific Railroad Company, due 1st October, 1870, will be paid on and after that date at the office of the Company, 46 Sears Building, Boston, or at the banking house of Morton, Bliss & Co., 30 Broad street, New York.

Railway bonds have been in good request, for home and foreign investment purposes at buoyant prices, including Central Pacific Sixes, which closed on Wednesday firmly at 90@90¼. The gross earnings of the Central Pacific in the first fortnight of September were $423,335, and from Jan. 1 to Sept. 15, they amounted to $5,540,841. As compared with the same months last year, the earnings of the road show an increase of 25@30 per cent. The increase thus far has been sufficient to justify the expectation that the gross earnings of the company for the whole year will reach $8,000,000. The Union Pacific Sixes closed briskly and firmly on Wednesday at 83@83⅛. The registered First Mortgage bonds of the Chesapeake and Ohio Railroad have been in demand at 90 per cent. and accrued interest.

Railway and miscellaneous share property has been in moderate speculative demand at variable prices, closing strong, but dull.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 14.	Sept. 21.	Sept. 28.
Consols	92⅛	92⅜	91¾
U. S. 5-20's of 1862	90	90½	90½
U. S. 5-20s, 1865	89¼	89½	89¾
" 1867	88¼	88¼	88⅝
" 10-40s	85	85½	85
Erie	18	18	17¾
Ill. Central	112½	113	113
At. and Gt. West	23½	23½	26

At Frankfort on Wednesday, U. S. Five Twenties were quoted at 94⅜.

General business has been moderately active in the line of domestic produce, but at prices, in most instances, more favorable to purchasers. Middling upland cotton closed quite heavily on Wednesday at 16⅞ cts. per lb., under increasing arrivals at the ports. The stock of cotton now here is given at about 17,500 bales. The receipts at the port this week, have averaged about 5,100 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 71,868 bales, against 89,285 bales same time in 1869-'70; exports same time 22,109 bales, against 8,905 bales same time in 1869-'70; stock on hand at latest dates, 70,325 bales, against 54,610 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870 have been 12,484 pkgs., against 16,755 pkgs., same time in 1869. From Boston, 4,928 pkgs. in 1870, against 6,218 pkgs. same time in 1869.

At the auction sales of Scranton Coal on Wednesday 90,000 tons were disposed of at from $4@$5 35 per ton 2240 lbs., showing a slight decline.

At the Live Stock markets, this week, Beeves of good quality have been in less confident demand and heavy; we quote the range at from 6½@16½c. per lb.; week's receipts, 9,831. Milch cows continue very quiet at $40@$100 each, receipts, 49. Veal calves have been in less demand at from 4@13c. per lb.; receipts, 3,964. Sheep have been in slack request at from 3@6½c.; lambs at 6@7½c. per lb.; receipts, 38,357. Hogs have been quiet and cheaper at 8⅞@9¼c. per lb., all live weight; receipts, 20,488.

There has been fairly active business reported in foreign goods, and prices of seasonable stocks have been well supported. The dry goods entries at this port, last week, were $2,782,518, making with the general merchandise imports, a total of $6,631,063.

Ocean freights have been moderately active, but quoted lower and irregular. For Liverpool we quote flour at 1s. 9d. by sail, and 2s. by steamer per bbl.; grain at 5½@6d. by sail, and 6@6¼d. by steamer per bushel; cotton at $\frac{3}{16}$d. by sail and ¼d.@$\frac{3}{8}$d. by steamer per lb.; and heavy goods 15s.@27s. 6d. by sail, and 17s. 6d.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 468.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending September 27, and since the beginning of the year:

	1869.	1870.
For the week	$3,807,082	$3,864,536
Previously reported	137,873,202	130,362,363
Since Jan. 1	$141,680,284	$133,726,899

The imports for the week ending Sept. 24, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,650,928	$2,782,518
Gen. merchandise	2,883,103	3,848,545
Total for the week	$4,534,031	$6,631,063
Previously reported	226,495,494	217,819,481
Since January 1	$231,029,525	$224,450,544

The following quotations of sales of Railway and other securities are n addition to those given elsewhere in our columns:—

New York.—North Carolina 6s, special tax, 23½; do. Fund Act, 1868, 40; South Carolina 6s, new, April and Oct., 70; do. Jan. and July, 68; Louisiana 6s, 70; do. 6s, new, 66¼; do. 6s, Levee bonds, 76; do. 8s, Levee bonds, 87; New York State 7s, Bounty Loan, reg., 108; Alabama 8s, 100; California 7s, 112; Connecticut 6s, 101½; Ohio and Miss. consol. bonds, 88; North Missouri R. R., 21; do. 1st mort., 85; Morris and Essex const. bonds, 88; Pacific R. R. 7s, guar. by Mo., 96; Quincy and Toledo 1st mort., 83; South Side R. R. 1st mort., 88¾; Great Western (Ills.) 1st mort. 1868, 105; Milwaukee and St. Paul 1st mort., Iowa Division, 88; New York and New Haven R. R., 150; do. scrip., 139; New Jersey R. R., 115; Union Pacific R. R., 24; Western Union Telegraph, 86¼; do. 7s, 92; U. S. Exp., 37½; Adams Exp., 66¼; Am. Mer. Union Exp., 41½; Central gold, 0.18; Grass Valley gold, 0.31.

Philadelphia.—Oil Creek and Allegheny River R. R., 45½; do., bonds, 80½; West Philadelphia R. ☞ The attention of our subscribers in this Country and Europe is called to the advertisement of the old established house of Messrs. CAMMANN & Co., No. 8 Wall St. This firm transact a General Banking Business, and give particular attention to the purchase and sale of Government, State and Railroad Securities at home and abroad.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND FINANCIAL AGENTS
OF THE CENTRAL PACIFIC RAILROAD,
AND ALL ITS BRANCHES.
No. 5 NASSAU ST.,
NEW YORK, Sept. 29, 1870.

☞ FIVE-TWENTY BONDS ARE SELLING to-day at an average of 111½, and at this price—if the Government should allow them to run five years—they pay only three and three quarter per cent. per annum.

SIXES OF 1881, TEN-FORTIES AND CURRENCY, at present prices, pay only four and a half per cent. interest per annum.

CENTRAL PACIFIC SIXES, into which so many are now wisely converting their Five-twenties and other Government bonds are to-day selling at 90 to 90¼ flat, that is—the three months' interest now accrued goes to the purchaser—pay, at this rate, seven per cent. per annum.

We say "wisely," and for the following reasons: The main line is finished, fully equipped, with no floating debt, and is worth over one hundred million dollars; the sixes are a first mortgage on this property; they cannot be increased, and the amount is only $28,620,000; the gross earnings from Jan. 1 to Sept. 1, were $5,017,505 72, and for the first fifteen days in September reached $423,335, and will reach fully the enormous sum of $8,000,000 this year; the net earnings on their local business alone are enough to pay the interest on these bonds without taking into account at all their immense through business; their receipts this year for corresponding months are twenty-five to thirty per cent. more than last year, and we have no doubt the increase will be fully in this proportion the coming year.

We have known all about the affairs of the road from its commencement, and that the men connected with it are careful and prudent business men; and, in short, we have no hesitation in recommending holders of Government bonds to make the exchange.

The difference of about 22 per cent. is a sure profit.

The bonds bear interest six per cent., January and July, both principal and interest payable in New York City, dollar for dollar, in United States gold coin. FISK & HATCH.

☞ The coupons due October 1st on ARKANSAS STATE BONDS issued to Railroad Companies, will be paid on and after that date on presentation at the Banking House of FARNHAM, GILBERT & CO., No. 8 Wall street.

D. B. SICKLES,
Financial Agent, State of Arkansas.

☞ The City Passenger Railway Company of Montreal was declared a dividend for the six months ending the 30th September, 1870, of six per cent. upon the Capital Stock of the company with a bonus of two per cent., payable at the company's offices on and after the seventh day of October.

☞ At the last meeting of the Board of Directors of the Wellington, Grey and Bruce Railroad Company, it was determined to proceed with the survey and location of the line from Harrison to Southampton.

Journal of Railroad Law.

COMMON CARRIERS—LIABILITY FOR GOODS CARRIED "FREE."

The late case of Pierce *vs.* The Milwaukee and St. Paul Railway Company, (23 Wis., 387,) was an action to recover the value of eight bundles of bags, which had been in use for two seasons in transporting grain from Lake City, Minnesota, to Genoa, Wisconsin, by way of the river and the defendant's railway.

Verdict and judgment for the plaintiff: from which the defendant appealed.

The following is the opinion of the Court delivered by

PAINE, J.—After carefully considering the original briefs of counsel and the arguments upon the rehearing, I have come to the conclusion that the carrying of the bags of the plaintiff by the company cannot be considered as gratuitous, whether the custom was only to return bags free that had gone over the road filled, or whether it was a general custom to carry the bags of customers free both ways, without regard to the question whether, at any particular time, they were running from a trip on which they had passed over the road, filled or not. If such relation were created by an express contract, instead of being based upon a custom, it would seem clear that there would be a sufficient consideration for the agreement to carry the bags. If a written contract should be signed by the parties, in which the one should agree to give the company the transportation of his grain at its usual rates, and the company should agree in consideration thereof to carry the grain at those rates, and also to carry the bags both ways whenever the customer might desire it, without any further charge, there can be no doubt that the giving to the company his business, and the payment of the regular freight, would be held to constitute the consideration for this part of the agreement on the part of the company. But if it would be so in such a case, it is equally so when the same understanding is arrived at through the means of a customer. The company, by establishing such a custom, makes the proposition to all persons, that if they will become its customers, it will carry their bags both ways without any other compensation than the freight upon the grain. Persons who become its customers in view of such a custom, do so with that understanding. And the patronage and the freights paid are the consideration for carrying the bags. The company in making such a proposition, must consider that this additional privilege constitutes an inducement to shippers to give it their freight. And it must expect to derive a sufficient advantage from an increase of business occasioned by such inducement, to compensate it for such transportation of the bags. And it ought not to be allowed, when parties have become its customers with such an understanding, after losing their bags, to shelter itself under the pretext that the carrying of the bags were a mere gratuity, and is therefore liable only for gross negligence.

It makes no difference that the custom is described as being to carry the bags free. In determining whether they are really carried "free" or not, the whole transaction between the parties must be considered. And when this is done, it is found that all that is meant by saying that the empty bags are carried free, is, that the customers pay no other consideration for it than the freight derived from the business they give the company. But this, as already seen, is sufficient to prevent the transportation of the bags from being gratuitous. Smith *vs.* R. R. Co., 24 N. Y., 222; see also Bissel *vs.* Railroad Co., 25 id., 442. It will be seen that in that case a majority of the Court held, that where a passenger expressly agreed to take certain risks of injury upon himself, for a consideration, the agreement was valid and binding. But Denio, Wright and Sutherland dissented, and Denio, J. in his opinion on pages 455 and 456, states what seems to be the true construction and effect of such a contract, holding that a person riding in charge of cattle, under a contract to carry them at a specified price per car load and to carry a person "free" to take charge of them, was not a gratuitous passenger. The other two dissenting justices doubtless agreed with him on this point. And it is evident from the remarks of Selden, J. on page 447, that he did not hold the opposite view, but rested his decision upon the ground that the plaintiff was bound by the contract to take the risk, whether he was a gratuitous passenger or not. See also Steamboat *New World vs.* King, How., (U. S.) 469, in which it was held, that, under a general custom of steamboats to carry "steamboat men" free, a steamboat man, riding on a free ticket, was not to be regarded as a gratuitous passenger, but that the consideration was to be found in those advantages which induced the establishment of the custom—a doctrine which seems directly applicable to the question under consideration.

I can see no ground for any such difficulty as that suggested by the appellant's counsel on the re-argument. He said if this undertaking to return bags free was to be considered a matter of contract on the part of the company, it would be unable to collect its freights on delivering grain, upon the ground that its contract was not then completed. But this could not be so. The company, on delivering the grain, parts with the possession of the property to the shipper or his consignee. And on doing that, it is, of course, entitled to its freight. As its agreement to return the bags without further charge, or to carry them free both ways whenever its customer should deliver them empty for that purpose, could not have the effect of destroying this right, the contract would be construed according to the intention of the parties. See Angell on carriers, § 399, note 3, and cases cited. And here it would be very obvious that neither of the parties contemplated any relinquishment by the company of its right to freight on delivering the grain. The transaction for that purpose would be distinct. Here the defendant's evidence showed that the plaintiff was a "customer." The company claims that he had complied with the custom on his part, so as to make it applicable to him. But if he had done so, as that constitutes a sufficient consideration to prevent the carrying of his bags from being gratuitous, the company is liable.

It is immaterial, therefore, whether the instruction excepted to was strictly accurate or not, in assuming that there was evidence tending to show that the bags were on a return trip, after having gone over the road filled; as neither in that case, nor on the custom as claimed to have been shown by the appellant, would the transportation be gratuitous.

The judgment is affirmed.

International Bridge Co.

AN ACT to authorize the construction and maintenance of a bridge across the Niagara river.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any bridge and its appurtenances which shall be constructed across the Niagara river, from the city of Buffalo, New York, to Canada, in pursuance of the provisions of an act of the legislature of the State of New York, entitled "An act to incorporate the International Bridge Company," passed April the seventeenth, one thousand eight hundred and fifty-seven, or of any act or acts of said legislature now in force, amending the same, shall be lawful structures, and shall be so held and taken, and are hereby authorized to be constructed and maintained as provided by said act and such amendments thereto, anything in any law or laws of the United States to the contrary notwithstanding; and such bridge shall be, and is hereby, declared to be an established post road for the mails of the United States; but this act shall not be construed to authorize the construction of any bridge which shall not permit the free navigation of said river to substantially the same extent as would be enjoyed under the provisions of said act and the amendments thereto, heretofore enacted and now in force: *Provided, nevertheless*, That the location of any bridge, the construction of which is hereby authorized, shall be subject to the approval of the Secretary of War, but not to be located south of Squaw Island: *And provided further*, That such bridge shall have at least two draws of not less than one hundred and sixty feet in width in the clear between the piers, which shall be located at the points best calculated to accommodate the commerce of the said river; and the piers of said bridge shall be parallel to the current of said river.

Section 2. *And be it further enacted*, That the bridge herein named shall be subject, in its construction, to the supervision of the Secretary of War of the United States, to whom the plans and specifications, relative to its construction, shall be submitted for approval. And all railway companies desiring to use the said bridge shall have and be entitled to equal rights and privileges in the passage of the same and in the use of the machinery and fixtures thereof and of all the approaches thereto, under and upon such terms and conditions as shall be prescribed by the district court of the United States for the northern district of New York, upon hearing the allegations and proofs of the parties in case they shall not agree.

Section 3. *And be it further enacted*, That the right to alter or amend this act so as to prevent or remove all material obstructions to the navigation of the said river, by the construction of the said bridge, is hereby expressly reserved.

Approved June 30, 1870.

☞ Since the settlement of the dispute over the question of extending a railroad into the Cherokee country from Kansas, the road has been pushed forward very actively. The cars are now running a distance of ten miles into the nation. Considerable quantities of coal are carried out by rail into Kansas. It is said the road will reach the Arkansas River within sixty days. It will cross at Frozen Rock, fifty miles above Fort Smith. Two thousand hands are at work on it.

☞ The directors of the Sherbrooke, Eastern Townships, and Kennebec Railway purpose laying the track on their line at once, and procuring an engine and rolling stock. A further portion of five miles is nearly located, and tenders will be asked for grading in a short time.

Arkansas Midland Railroad.

The terms of the contract between the above company, and Col. H. F. Hale, of Junction City, Kansas, in the name of J. H. Seager & Co., are that the grading is to be done to Clarendon by November 1st, 1871, iron, rolling stock and every thing complete by March 31st, 1872. The contractors are to receive the Phillip county and Helena bonds, and we suppose the State aid. The directors to raise one hundred thousand dollars in money, a portion of which is already subscribed—get 100,000 acres of land subscribed, and ten acres of land in or near the corporation of the City of Helena.

A corps of engineers will go to work at once and commence the grading as soon as ten miles have been located. The city is confident that the grading will commence on or before the first of November, and be completed to White river by the first of June, or before the hot weather commences next year.—*Helena Clarion.*

National Finances.

The following statement showing the net receipts and expenditures of the government during the eighteen months from September 1, 1867, to March 1, 1869, and from the latter date to September, 1, 1870, was prepared at the Treasury Department:

RECEIPTS.

	18 m'ths from Sept. 1, 1867, to March 1, 1869.	18 m'ths from March 1, 1869, to Sept. 1, 1870.
From customs ..	$251,963,708 19	$294,725,139 21
" lands.....	8,491,378 58	5,310,894 78
" int. reven'e	246,133,845 74	299,897,764 89
" miscellan's	54,716,270 51	44,095,169 74
Total.....	$556,315,208 02	$643,528,968 62

EXPENDITURES.

	18 m'ths, from Sept. 1, 1867, to March 1, 1869.	18 m'ths, from Mar. 1, 1869, to Sept. 1, 1870.
For Congress....	$5,064,467 45	$6,398,235 85
Expe's of the Post Office Departm't (mail transp.)..	7,189,107 21	8,615,123 14
Expen's of foreign intercourse....	1,854,502 83	1,935,808 81
Executive & miscel. expenses...	23,952,322 37	19,044,091 02
Expens's of public buildings and gro'nds in Washington....	2,194,613 65	1,529,605 28
Expenses of collecting the revenue fr'm cust'ms	9,364,504 52	9,225,487 83
Miscellane'us exp. of customs, includ'g buildings	10,910,971 53	12,443,632 26
Expenses of assessing and collecting internal revenue	11,797,679 73	10,975,724 40
Miscellaneous expenses, internal revenue.....	3,752,736 47	2,752,811 18
Expen's of United States Courts..	2,576,488 40	3,341,136 81
Miscellaneous expens's under Interior Departm't	4,610,519 80	4,762,451 04
Expenses of War Department....	162,836,593 19	82,619,058 81
Expenses of Navy Department....	36,746,544 07	31,205,615 71
Expens's of Indian Department....	8,721,899 60	7,215,650 60
Expenses of Pension Departm'nt	37,192,739 51	43,848,196 38
	$328,765,689 89	$245,912,629 12

By the foregoing statements it will be seen that the amount gained by increase of receipts and decrease of expenditures has been as follows:

From increase of receipts.....	$87,213,765 60
From decrease of expenses.....	82,853,060 77
Total.....	$170,066,826 37

REDUCTION IN INTEREST ACCOUNT.

The amount of interest paid from September 1, 1867, to March 1, 1869, was.....	$211,221,716 68
The amount of interest paid from March 1, 1869, to Sept. 1, 1870, was.....	193,421,155 00
Showing a net decrease on interest account of	$17,800,561 68

REDUCTION OF PUBLIC DEBT.

The reduction of the public debt from Sept. 1, 1867, to March 1, 1869, was.....	$1,383,460 67
The reduction of the public debt from March 1, 1869, to Sept. 1, 1870, was.....	169,542,109 60
Showing an increase in the reduction of the public debt of.....	$168,158,648 93

During the eighteen months from March 1, 1869, to September 1, 1870, the amount of reduction in the public debt has been, as above shown, $169,542,109 60, most of which has been in the purchase and cancellation of bonds bearing interest in coin, and in the payment of obligations overdue and convertible into interest-bearing bonds and certificates.

The amount of interest which will hereafter be saved to the government on the debt actually paid, is about $8,745,596 08 annually, or $728,799 67 monthly, mostly in gold.

There has also been a constant improvement in the decrease of the debt during the six months since March 1 of this year over the corresponding six months of 1869, to the following extent:

	1869.	1870.
March.....	$266,798 27	$5.766,349 43
April.....	6 399,070 65	11,697,793 39
May	13,384,777 97	14,301,962 57
June.....	16,410,132 54	20,203,772 04
July.....	7,435,744 29	17,034,123 74
August.....	5,604,234 79	13,403,325 59
	$49,500,758 51	$82,407,326 76

And the decrease of the debt for the past six months, as compared with the twelve preceding months, is as follows:

Decrease of public debt for the 12 months preceding March 1, 1870.	$86,934,782 84
For the six months since that date.	82,407,326 76

The foregoing is a correct comparison of the financial operations of the government during the periods named, made from the official records of this Department.

WM. A. RICHARDSON, Acting Secretary.
Treasury Department, Sept. 5, 1870.

☞ The Lexington and St. Louis railroad company is constructing a railroad from Sedalia, on the Pacific railroad, northwest to Lexington on the Missouri river, a distance of 58 miles. The grading is nearly completed, and the company has nearly iron enough for the track. The directors of the Pacific railroad company have voted to take up the bonds of the Lexington Co., in order to enable it to complete its road.

☞ The Quebec and Gosford Wooden Railway is to be opened on the 10th of October. The line is 25½ miles in length. The bridge over the Jaques Cartier River is 68 feet and the trestle from 20 to 45 feet in height, while both together are 1,400 feet in length. The weight of the engines to be used is 21 tons, with four driving wheels of 42 inches in diameter.

Finances of Memphis, Tenn.

A short time since the city councils of Memphis, Tenn., passed an ordinance, which was subsequently approved by the popular vote, authorizing the issue of $500,000 of gold bonds by the municipality for the purpose of funding its floating debt, including past due coupons on its present bonds. For the purpose of availing of the advantages of this ordinance, John J. Johnson, Esq., the mayor of that city, and O. J. Prescott, Esq., chairman of the finance committee, are now at the North, with a view of conferring with the holders of the bonds. Under the present municipal administration of Memphis strenuous and systematic efforts have been made to bring order into its finances and place the operations of the city on a cash basis, and so far the success has been quite encouraging. Since January 1, 1870, some $190,000 of the floating debt of $811,000 has been paid, but in the mean time $107,000 of interest (for July) has accrued on the bonds. The whole bonded debt August 1st was $3,585,000, exclusive of $300,000 bonds of Memphis and Little Rock Railroad Company assumed by the city, and which is offset by mortgage on navy-yard property. The total valuation of the taxable property of Memphis is $24,783,190, on which an interest tax is laid of $239,049 57½; city general tax, $173,482 39, and school tax, $74,349 51. The tax is $2 on the $100, of which $1 is for interest. The prosperity of Memphis is indicated by the increase of population, which, having been 22,623 in 1860, is now, by the census of 1870, shown to have increased to 40,230, exclusive of 6,451 in the suburbs.

Albany and Susquehanna Railroad.

If we may judge from present appearances, numerous improvements are to be added to this road, showing that the directors intend to have a perfect road, and have it supplied with every accessory necessary for convenience and the rapid transition of freight and passengers. A large well is being constructed under the water tank at Oneonta. Another side track is to be laid on the north side of the main track, east of the depot. Preparations are being made to widen out the culverts, abutments, etc., for the second track on the eastern division of the A. and S. road. New side tracks are being put down at several important stations. Water tanks are being built. The second wire has been put up as far as Central Bridge, and is still coming this way. Iron has been delivered over a large portion of the eastern division. A large demand is made for more rolling stock. Extra trains are running night and day. Everything shows that this road is to be one of the best and busiest in the State. Oneonta is striving to secure the location at that point of the new round house, and other buildings which will be erected at some central point along the road the present fall.—*Albany Journal.*

☞ The bond and shareholders of the Morris Canal will be glad to learn that that work has been put in most excellent order along the whole line—and added to all this the President of the Company has paid off the last note against the Company, and it is now free from debt, a thing that has never occurred before since its organization.

☞ This earnings of the Union Pacific Railroad for August, 1870, were $664,050 83, against $617,585 38 for the corresponding month in 1869. This shows a steady and large increase of business, as the rates for freight and passengers have been largely reduced.

Green Bay and Lake Pepin Railroad.

We stated last week that the contract for building the first forty miles of the Green Bay and Lake Pepin railroad had been awarded to Milwaukee parties. This was correc as matters then stood. The award was originally made to the parties named, but when the final arrangements came to be fixed upon they declined to bind themselves in as definite a manner as the contractors wished. Under the circumstances the officers of the road concluded to contract with home parties under terms more satisfactory, and accordingly, on Saturday afternoon the job was given to Messrs. R. P. Harriman and Co., of this city. The contractors evinced commendable enterprise in making ready and at 1 o'clock Monday afternoon 100 men commenced operations on the road. This has been steadily increasing during the week, and to-day 200 men are busily plying axe, pick and shovel.—*Green Bay Gazette.*

Proposed Railroad Across the Andes.

The engineer, Mr. Rosetti, appointed by the Government of the Argentine Republic to survey the passes of the Andes with reference to the construction of a railroad between that republic and Chili, reports that the most eligible pass, under the circumstances, is the Planchon or Teno, and he indicates the route from Buenos Ayres to the Teno station on the Santiago and Curico railway. The elevation is 3,300 metres. The most difficult part is that of the Vargara ravine, where there is a difference of level of 790 metres in a distance of ten kilometres, which gives a grade of 70 in 1,000. The length of the road by the line indicated will be 1,651 kilometres, and its cost is calculated at $26,000,000 for the Argentine division, and $6,000,000 for the Chilian, and the time requisite to complete the work is estimated at four years.

☞ Articles of association of the Indianapolis, Peru and Silver Lake railroad have been filed. It is designed to construct a road running from Peru, Miami county, to Silver Lake, Kosciusco county, and passing through the county of Wabash; length, twenty six miles. The capital stock is $500,000, divided, 10,000 shares, of $50 each.

☞ The Tredegar Works at Richmond, Va., in addition to their other great enterprises, have undertaken the business of freight-car building, and they are now sending these cars South at the rate of three per day. This new industry, so successfully introduced by this company, now gives employment and support, directly and indirectly, to over five hundred persons.

☞ Work was commenced on the Chicago, Pekin and Southwestern Railroad at Eureka, Ills., on the 26th ult. The contractors expect to complete the work the coming winter.

☞ The Ogdensburg and Lake Champlain Railroad Company will pay a semi annual dividend of 4 per cent. on the preferred stock on and after Oct. 1.

☞ The Rensselaer and Saratoga R. R. Co. have declared a dividend of 3½ per cent., payable October 1, 1870, at the National Bank State of New York.

☞ The Uniontown *Genius of Liberty* says that the Cumberland and Pennsylvania railroad company are about to purchase the railroad of the Somerset Coal and Iron Co., extending from Barrelsville to Wellersburg. They purpose to put the road in running order, and also to extend it across the mountain to Myers' Mills and Elklick coal regions, for the purpose of conveying coal east and ore to their furnace at Mt. Savage. If this extension is made, the distance from Myers' Mill coal region to Cumberland will be at least fifteen miles shorter by this route than by the Pittsburg and Connellsville road.

Machinery For Sale.

1 9 ton Condie Hammer.
1 2½ ton Nasmyth Hammer.
2 1½ ton Nasmyth Hammer.
5 No. 10 Dempefell Blowes.

THE NEW JERSEY STEEL AND IRON COMPANY,

TRENTON, N. J.,

And 17 Burling Slip, NEW-YORK,

Would call special attention to their

MARTIN STEEL,

Acknowledged by all who have used it to be the best material now made for

Firebox Plates, Locomotive Crank Pins, Piston Rods, Axles,

And all the finer machine purposes, such as

Rollers for Cotton Machinery, Lathe Screws, Sewing Machine Work, &c., &c.

The special features of this Steel are its ***Remarkable Toughness,*** its softness and entire freedom from hard spots, which obviate the necessity for annealing before turning.

The process by which this Steel is made differs entirely from any other in use, enabling it to be sold at lower prices than any other good steel, while it possesses properties hitherto unknown, and which are of the greatest importance for many uses.

TO CONTRACTORS.

THE AMERICAN AND MEXICAN RAILROAD AND TELEGRAPH COMPANY, at No. 71 Broadway, Room 31, New York, having secured the approval of the Government of Mexico of their surveyed routes from Guaymas to Hermosilla and through the States of Sonora and Chihuahua to the Rio Grande, are prepared to receive proposals for grading the road, furnishing and laying cross ties from Guaymas to Hermosilla, a distance of 80½ miles.

The proposals must be handed in on or before the first day of November next, and be made *for sections* and include excavations of rock and earth, and bridging, and be so made as to enable the Company to ascertain the cost per section as laid down on the Company's map and profile, which are now in their office for inspection. The Company reserves the right to reject any bids which in their udgment they deem advisable.

Per order of the Board of Directors.

Office hours 10 A. M. to 3 P. M.

THE UPRIGHT PATENT TRUNK

Does not have to be removed from the wall to open it. Instead of trays to lift out, it is arranged with drawers made very light and strong.

It is much stronger as only a small portion opens, whereas in the old style the whole top comes off.

The same room in the bottom of the trunk for dresses and heavy clothing as in the old style.

THE UPRIGHT PATENT TRUNK CO.,

No. 6 Barclay Street,

next door to the Astor House.

Intercolonial Railway.

THE Commissioners appointed for the construction of the Intercolonial Railway give Public Notice that they are prepared to receive Tenders for the three remaining Sections of the Line, all in the Province of New Brunswick.

Section No. 21 will begin at the easterly end of Section No. 20, one and three-quarter miles east of the River Miramichi, and will extend to station No. 1640, three thousand feet westerly from the River Kouchibouguacis, a distance of about 25 miles.

Section No. 22 will extend from the easterly end of Section No. 21 to Station No. 1180, at the crossing of the River Buctouche, a distance of about 25 miles.

Section No. 23 will extend from the easterly end of Section No. 22 to the European and North American Railway, at Moncton Station, a distance of about 22 miles.

The Commissioners also give Public Notice that they are prepared to receive Tenders for reletting Section No. 10, the Contract for which has been annulled.

Section No. 10 is in the Province of New Brunswick and extends from the centre of the Chaplin Island Road, near the Court House at Newcastle, towards Bathurst, a distance of 20 miles in length.

Tenders for Section No. 10 will be made upon the basis of the quantities specified in the original Bill of Works for this Section; and in drawing the New Contract there will be deducted from the amount of the accepted Tender a percentage sum equivalent to the percentage of the whole work which the Chief Engineer shall report to have been executed by the first Contractors.

These Contracts to be completely finished by the first day of July, 1872.

Plans and Profiles with Specifications and Terms of Contract will be exhibited at the Offices of the Commissioners in Ottawa, Toronto, Quebec, Rimoushi, Dalhousie, Newcastle, Halifax and St. John, on and after the 15th September next, and Sealed Tenders addressed to the Commissioners of the Intercolonial Railway, and marked "Tenders," will be received at their Office in Ottawa, up to six o'clock P. M. on Wednesday, the 5th day of October next.

Sureties for the completion of the Contract will be required to sign the Tender. The names in full, occupation and address of each surety should also be given.

A. WALSH,
ED. B. CHANDLER,
C. J. BRYDGES,
A. W. McLELAN,
Commissioners.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Panama Railroad.

At a regular meeting of the Board of Directors of this Company, held this day, a resolution was adopted to the effect that it is considered expedient to return to the system of semi-annual dividends which existed prior to the year 1862, and in explanation of such action, the undersigned was directed to present the following statement to the stockholders.

During the last eighteen months the revenue of the Company has materially diminished. The causes of this are well understood, and are as follows:

1. The diversion of the most profitable part of the passenger and specie traffic from the Isthmus route, consequent upon the opening of the Pacific Railroad.

2. The establishment of a steamship line between England and the west coast of South America, through the Straits of Magellan.

3. The reduction in rates for passengers and freight, rendered necessary by this competition.

4. The temporary and exceptional increase in the per centage of working expenses upon gross earnings, due to the impossibility of curtailing the former as fast as the latter fell off.

5. The decline in the premium on gold, in which the greater part of the Company's receipts consist.

Against these adverse influences, the full effect of which it is believed may now be appreciated, is to be put, with reference to the future:

1. The results to be derived from a rigidly economical administration—to which matter the attention of the directors was given at an early day, with results which are already apparent and highly satisfactory.

2. The effect of the reduction in rates for passengers and freight in increasing business and net earnings, which the receipts of the last three months, as compared with the four months preceding, justify the directors in hoping will be more and more apparent.

3. The demonstration afforded by experience that transportation of freight between New York and San Francisco *via* the Isthmus of Panama can be satisfactorily carried on in competition with the Pacific Railroad, both in respect to rates and time, and even at rates below those now charged by the latter.

4. The organization, independently of this company, of new enterprises for the development of traffic for the Panama route, in connection with steamship lines between German and other ports and the Isthmus, some of which will soon be put in operation with the certain result of increasing the business of the Railroad.

5. The subject, which the directors have under consideration, of the establishment, in co-operation with other companies interested in the Isthmus trade, of new important steamship lines on the Pacific.

6. The condition of the Company's Central American trade, which is now in its hands exclusively, under contracts with the Republics of Costa Rica, Nicaragua, Salvador, Honduras and Guatemala, from all which Governments important advantages are enjoyed, with cash subsidies from four of the number.

The gross earnings of the road for the nine months ending Sept. 30th, were—collected		$955,218 92
Parts of August and September, for which returns are not received—estimated		150,000 00
		$1,105,218 92
From which deduct—		
Subsidy to Colombian Government	$187,500 00	
Interest on bonds	162,828 74	
Working expenses, (corresponding period of 1869—$784,071)	388,870 96	
Office expenses	25,138 67	
		764,358 07
Net for nine months		$340,860 85

The present condition of the Company is as follows:

Cost of railroad including payments for extended contract		$9,500,000 00
Am't in bank and loans on demand	$455,563 92	
U. S. 6s, 1881, at par	100,000 00	
In hands of bankers and agents	191,905 00	
		$747,498 92
Four steamers in the Central American trade, and amount paid on an additional one now building		550,000 00
Steam tugs and iron launches in Bay of Panama, sailing vessels, &c.		250,000 00
Real estate in the City of Panama, and one-half ownership of islands in the bay, at cost		73,140 00

Vacant lands on the Isthmus, amounting to about 300,000 acres, the value of which it is difficult to estimate.

The capital stock is $7,000,000.

There is no floating debt.

The bonded indebtedness of the Company is as follows:

Payable in 1872—£152,775 at $4.85			$740,958 75
" 1875— 19,350	"		93,847 50
" 1897— 597,800	"		2,899,330 00
£769,925			$3,734,136 25

To meet this a sinking fund has been provided, which is invested as follows:

$100,000 U. S. 6s, 1865, at 112		$112,000 00
$100,000 " 1867, " 110.50		110,500 00
$200,000 consolidated bonds of the Ohio and Miss. R. R. Co., at 87½		175,000 00
1,500 shares Panama R.R. Co., at 77½		116,250 00
Loans on collaterals—cash in Trust Co., and accrued interest		675,654 00
		$1,189,404 00

Which, with accumulations, will retire the bonds at maturity.

DAVID HOADLEY, *President.*

New York, September 24, 1870.

Macon and Augusta Railroad.

The contractors had confidently expected to finish this road by the first of October, but disappointment by the non-arrival of the vessel having on board the iron necessary to its completion, will delay the work beyond that period. The contractors have sufficient force to lay the remaining portion of the track, about five miles, in a short time, as soon as the iron arrives. The vessel by which the iron is expected is now more than three weeks overdue. The road is open to the public for some ten miles beyond Milledgeville.—*Augusta Chronicle.*

Memphis and Charleston Railroad.

The earnings of this road for the years ending June 30, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$690,544 37	$818,903 65
" freight	478,133 25	638,658 22
" mail	34,371 53	34,373 99
" express, etc	69,710 07	57,154 53
	$1,182,759 22	$1,549,090 39
Expenses, viz:		
Conducting transp	$254,125 91	$303,129 55
Motive power	241,257 22	366,750 82
Maintenance of way	200,013 26	272,316 92
Maintenance of cars	86,149 88	138,232 14
	$781,546 27	$1,080,429 48
Net earnings	$401,212 95	$468,660 96

From the above expenses of 1870 should be deducted the sum of $70,157 79 for extraordinary expenditures, charged to operating by resolution of the stockholders, which while they add to the permanent value of the property of the company, cannot be charged to the proper accounts, as heretofore, the construction and equipment account being closed. Deducting this sum, will leave the actual operating expenses $1,010,271 64—an increase over the previous year of $228,725 27; which deducted from the increase in earnings, $366,331 17, will leave a net increase over 1869 of $137,605 80. The increase in receipts has been, from passengers, $218,359 28, of which $136,040 25 is local, and $82,319 03 is through. From freights $160,524 97, of which $24,447 35 is local, and $136,077 62 is through. Increase from mails, $2 46. Decrease has been, from express $2,028 49, and from rents and privileges $10,529 07. The operating expenses are 65¼ per cent., and the gross expenses 80½ per cent. of gross receipts.

A comparison of receipts and expenses per mile of road operated in 1869 and 1870, exhibits the following result:

	1869.	1870.
Receipts per mile of road	$4,078 48	$5,341 69
Expenses " "	2,694 98	3,483 69
Net " "	$1,383 50	$1,858 00
Receipts per mile run	$1 44.84	$1 83.89
Expenses "	97.71	1 19.93
Net "	$0 47.13	$0 63.96

The movement of cotton during the past and preceding years compare as follows:

Number of bales received at	1868.	1870.
Memphis	61,610	64,422
Grand Junction	5,660	1,297
Decatur	5,461	11,270
Stevenson	465	1,202
Chattanooga	45,410	35,142
All other points	1,038	717
Totals	119,639	114,050
Number bales shipped from		
Memphis	31,989	20,902
Mississippi Central R. R	22,598	27,074
Nashville and Decatur R. R	3,559	479
Local points	61,493	65,595
	119,639	114,050
Showing decrease in through cotton	9,691 bales.	
Less increase in local cotton	4,102 "	
Decrease in 1869–'70	5,589 bales.	

The President in his report says:

The Report of the General Superintendent, accompanying this, contains all the information necessary to a satisfactory understanding of the operations of the transportation department, and from which it will be seen that the receipts are | $1,549,090 39.

Operating expenses	$1,010,271 64	
Extraordin'y expenses, charged to operating	70,157 79	
Construction six m'ths to January 1st	163,400 48	
		1,243,829 91
Actual net		$305,260 48
From which we had to pay—		
Interest on funded debt, taxes, etc		303,453 67
Actual surplus		$1,806 81

Comparing the operations of this with the previous fiscal year, it will be seen that our condition is improved:

Receipts 1868–9		$1,182,759 22
Operating expenses	$781,546 27	
Construction	226,592 93	
		1,008,189 20
Actual net		$174,620 02
Increase in actual net 1869–'70 over 1868–'9		$130,640 46

During the first six months of the fiscal year just ended, we expended for permanent work and charged to construction account, for

Bridges and trestles, mainly Florence bridge	$62,702 58
Freight cars	29,690 32
Real estate (timber land on line of road)	22,903 15
New passenger cars, locomotives, new iron, etc	48,104 43
Total	$163,400 48

While for the last six months our extrordinary expenses (charge to operating by resolution of stockholders) were only | 70,157 79

Showing decrease in favor of past six months | $93,242 69

With a view of decreasing our expenses, it was determined on the 12th of June to take off one through passenger and one through freight train, the receipts from these additional trains not justifying the expense of running them. We have continued running the double daily passenger train at a loss, hoping, however, that the roads east of us would make the double daily connection through to Eastern cities. Becoming satisfied that it was uncertain as to when they would put on the second train, we determined to withdraw ours.

The increase in through freight business, over the preceding year is	$136,077 62
While local freight business increases	24,447 35
Total	$160,524 97

The increase being almost entirely in through business, at comparatively low rates, left us but little net profit, owing in part to our not having engines of proper size and capacity to move such freight to advantage. To remedy this, we are now having built, to be delivered this fall, six heavy freight engines, of the best pattern and with the latest improvements, for this business, which we trust will, in future, give us larger net profits from it. We are also having built one hundred and fifty heavy box cars. These two purchases will be paid for out of the receipts of the coming year. They will add largely to our ability to do all business that may offer, preventing blockades of freight, which have heretofore restricted our operations, and in that way effected our net earnings.

In the last annual report it was stated that the receipts of the road might greatly increase without adding proportionately to the expenses. This, however, has not been the case, as anticipated, for while everything entering into the expenses, especially labor, has increased in cost, the large through freight and passenger business has been done at lower rates than heretofore obtained—resulting from heavy competition. The policy of the company hereafter should be to do no business that does not pay a fair profit, and with this view we have made changes in our local freight tariff, increasing the rates for short distances, effecting the greater portion of our local business, while for greater distances we decrease rates, in order to compete with roads intersecting ours and drawing local business from, and yielding us decreased revenue.

The report of the chief engineer in charge of the roadway department states fully its condition, the details of his operations, and an itemized statement of new and permanent improvements in roadway. His report shows there was spent

In permanent work during first six months and charged to construction and equipment	$163,400 48
And for the same kind of work during the last six months of the year charged to operating expenses	70,157 79
Making total outlay for permanent work	$233,558 27
Against fiscal year ending June 30, 1869	226,592 93
An increase of	$6,965 34

Florence bridge was rebuilt during the past year, and its cost accounts for a large portion of the amount charged to construction during the first six months and about one-third the amount of the extraordinary expenses of the last six months. Besides this we have added to the value of the company's property in putting down two and a half miles of new iron rails, repaired six miles of old rails, put in many new frogs of improved pattern, ballasted five miles of track, filled many trestles, extended sidings, ditched cuts, etc., all contributing greatly to permanently improving the road, and a future reduction of expenses in this department, while the present condition of the track is unsurpassed by that of any road in the South, the principle being to spend more money for permanent work, rather than to make temporary repairs or put up structures requiring frequent renewals at a greater ultimate cost.

We have purchased, for delivery in October, six hundred and fifty tons of steel rails, costing one hundred and twenty dollars per ton placed in the track, to replace worn out iron, the renewal of which with iron would cost ninety dollars per ton. It is expected, however, that the durability of the former will more than doubly compensate for the difference in cost. This, with the building of Flint river bridge, and ballasting two to three miles of track, will embrace the principal expenditures proposed in this department the coming year.

The Treasurers' Condensed Balance Sheets of the Eastern and Western Divisions, show the entire cost of road equipment, property and other assets of the company, as well as liabilities of every kind, and an examination of it will give all the information necessary to an understanding of the financial condition of the company.

The percentage of expenses to receipts of the road for the next twelve months will be much less than that of the past; and taking into consideration the condition of the entire property, we feel great confidence in the future.

There has been no material change in the condition of the several proposed connections since the last annual report. Several roads south of the Tennessee river are progressing slowly in the direction of us. We have recently made a survey of the route from Baxter, a point on the Winchester and Alabama Railroad, *via* Fearn's Switch and Huntsville, to Gunter's Landing on Tennessee river. We feel assured that, with the aid of the City of Huntsville, county of Madison and individual subscription, we will be able to build the line with small aid from this company—provided the road south meet us at the Tennessee river. With this as an outlet to Atlanta we will save at least $30,000 per annum now paid as tolls on freight to N. & C. R. R., and greatly decrease the

distance of haul, and at the same time give us more net revenue.

The completion of the Decatur and Montgomery road will give us a decided advantage in competing for freights to Southwestern Georgia and Alabama that now go *via* Nashville and Atlanta on the one hand, and New Orleans or Vicksburg on the other.

The roads to the west of us progress slowly. The Little Rock road is completed, excepting the gap of fifteen miles between St. Francis and White rivers, and the bridge over the latter. The St. Louis and Iron Mountain Railroad Company are now locating their line. The Memphis and Kansas City line, *via* Springfield, Mo., has not yet been located through the State of Arkansas. We have reports of its rapid progress in Missouri; when completed it will be one of our best feeders, bringing the products of Missouri for shipment over our road to the country south and east of us. This road, in connection with that proposed to Atlanta, before mentioned, will form a much shorter line from the south Atlantic seaboard to Kansas City than any other route.

Feeling satisfied that the improvements of the roadbed made within the past year, and the addition of rolling stock which is now being made, will add greatly to your net earnings, we trust the time is not far distant when you may look for regular dividends.

Your board takes pleasure in acknowledging the fidelity with which the various departments of the company have been managed during the year.

The receipts and disbursements for the fiscal year, ending June 30, 1870, were as follows:

RECEIPTS.

Cash on hand 30th June, 1869	$66,040 67
Gross earnings for year ending 30th June, 1870	1,549,090 39
Collected on amount due from connecting roads	2,592 92
Collected on amount due from individuals	22,730 95
Sale of coupon bonds	77,500 00
Sam Tate receiver—payment on account	2,532 56
United States—decrease of account.	1,533 53
Sale of stocks	65,200 00
Loan of banks and bankers	195,430 00
Increase of amount due on coupons	1,125 25
Increase of United States taxes due.	5,412 27
Increase of amount due railroads	5,622 33
	$1,994,810 87

DISBURSEMENTS.

Road expenses for year ending 30th June, 1870	$1,080,429 43
Interest on State bonds for the year ending 30th June, 1870	113,541 18
Interest on company bonds for year ending 30th June, 1870	160,510 00
Interest and exchange acc't for year ending June, 1870	3,560 85
United States, State and county taxes for year ending 30th June, 1870	20,185 41
Suspense account for year ending 30th June, 1870	16,162 10
Paid out on construction for year ending 30th June, 1870	163,400 48
Increase of materials for road	68,110 53
Increase of amount due from agents	8,191 47
Bills payable—account reduced	19,005 00
Pay rolls—account reduced	6,988 31

Individual—dues reduced	63,298 32
Bills receivable—account increased.	5,351 72
State and city coupons on hand	26,512 38
Difference in profit and loss account	86,288 52
Cash on hand 30th June, 1870	87,165 50
	$1,994,810 87

The company have 43 locomotives, of which 31 are in good order, 6 in running order, 4 in shops undergoing repairs, and 2 require general repairs. They have also the following cars on the road: 2 Palace sleeping cars, 24 first class and 9 second class coaches, 4 postal and 7 baggage cars. Also, 403 box, 210 platform, 19 stock, 1 pay, 1 wrecking and 1 street car. Number of miles run with passenger trains, 444,484; with freight trains, 397,876; with other trains, 112,150—total miles run by locomotives, 954,510, at an average cost per mile run of 26.2. Number of local passengers carried eastward, 130,497: do., westward, 124,963; commutation, 44,801—total, 300,261. Number of through passengers carried eastward, 22,940; do., westward, 33,532—total, 56,472.

Chief Engineer.—NILES MERIWETHER.

☞ Large quantities of iron are being received in Montgomery, Ala., for the Montgomery and Eufaula railway. Eight hundred hands are at work on the road between Eufaula and Union Springs.

Complicated Railroad Litigation.

A suit involving millions of dollars and many intricate points of law is now pending in the Clark county (Indiana) Court of Common Pleas.

The facts in the case are alleged to be as follows: The Fort Wayne and Southern Railroad Company was chartered in 1849, with terminal points at Fort Wayne and Jeffersonville, Indiana. The company owned valuable real estate, upon which it depended for the construction of the road. The roadbed was mortgaged for $2,500,000 before it was commenced. The real estate bonds went up, as did the road. A few miles of grade, cuts and fills were made, and there the work ceased. The real estate got into the hands of different parties, a Mr. John C. Parker being largely interested in it, and, it is said, he manipulated matters pretty much to suit himself, but failed to make a success of the road or to enrich himself.

Finally an Englishman named Wagstaff came to Parkers relief. They organized a new company, called the "Indiana Southern Railway Company," Wagstaff subscribing $10,000,000 and a few friends a few hundred dollars each, so as to form a directory. Parker was to place the road in Wagstaff's hands, and Wagstaff was to pay Parker two or three million dollars. The latter brought suit in the Clark County Court of Common Pleas in the name of J. B. Merriweather and others, who he said were stockholders. Judgment by consent was entered for the sale of the road and its franchises. The sale took place and Wagstaff became the purchaser of the road, and the sheriff's deed for it was given. A mortgage was then given and bonds issued to the amount of $10,000,000. Wagstaff shortly afterward disappeared with the bonds, and Parker was left without any portion of his two or three millions. The bonds have not yet turned up.

Parker then concluded to wipe out old scores and begin anew. The judgment of the court was reversed, and another was entered in his favor for an amount something less than $1,000,000. He then procured some of the old bonds of the Fort Wayne and Southern Railroad Company and undertook to sell the road-bed to the Ohio and Mississippi Railroad Company at one end and to the Fort Wayne, Muncie and Cincinnati Railroad Company at the other, leaving a middle portion unsold.

The judgment of the court upon which the rule had been made to Wagstaff was "expunged from the record as a fraud upon the court." The sale was then made to the Ohio and Mississippi railroad, and Parker received about $1,000,000. The Ohio and Mississippi Railroad Company built a road upon the bed from North Vernon to Jeffersonville at an expenditure of two millions. The Fort Wayne, Muncie and Cincinnati Railroad Company built a road from Muncie to Fort Wayne at a cost of $1,000,000. Then the London, Liverpool and Globe Insurance Company, of London, raked up a suit in the Clark County Common Pleas Court, which had been commenced some three years ago. They moved to set aside the expunging order formerly made by the judge. Before this motion was made, however, the plaintiffs had asked a change of venue, which was granted by the court; but, upon forther deliberation, they concluded to let the trial go on in the Clark County Common Pleas Court. So the case was reinstated. The motion to set aside the expunging order was granted, and the fraudulent order was restored.

Then Wagstaff's bondholders brought in a cross petition, praying that the road, including the new road constructed by the Ohio and Mississippi Railroad Company, and the Fort Wayne, Madison and Cincinnati Railway Company, be sold to pay the $10,000,000 named in Wagstaff's bonds. It seems that Parker was working in the interest of his old friend Wagstaff, having obtained a share of his bonds, and was working against the companies who had expended three millions after paying him his price upon the faith of his representations that he had a good title to the road.

On motion of the plaintiffs, the Ohio and Mississippi Railway Company, and the Fort Wayne, Madison and Cincinnati Railroad Company were dismissed out of court in spite of their objections, leaving the Fort Wayne and Southern Railroad Company and the Wagstaff Company the only defendants in the case. The attorneys of the Fort Wayne and Southern Railroad Company were now in the way of the further progress of the case; so the power of these attorneys was revoked by order of Mr. Fogg, the president of the concern, and another attorney was appointed. Then the Fort Wayne, Madison and Cincinnati and the Ohio and Mississippi Companies filed petitions praying to be made parties. The directory of the Fort Wayne and Southern Railroad repudiated President Fogg's order revoking their attorney's power, and presented the paper to the court, but it was not allowed to be filed.

The Wagstaff party made a motion to appoint a receiver to take charge of the two roads and run them in the interest of Wagstaff. This would probably have been granted, but the court and parties to the suit could not agree upon the person to be appointed receiver.

At this stage of the proceedings the court adjourned till November 14, taking time to consider. —*Louisville Courier-Journal.*

The Iron Interest.

The manufacture of iron in Pittsburgh was commenced in the year 1813, by Christopher Cowan. This mill was intended to manufacture sheet iron, nail and spike rods, shovels and tongs, spades, scythes, hoes, axes, and a large variety of domestic hardware.

The second rolling mill was established on the banks of the Monongahela river, in 1818–19, and contained a train of eight-inch rolls, a nail factory, four puddling furnaces and rolls for rolling nail, plate or band iron. This is claimed to be the first mill in which puddling was successfully introduced in Pittsburgh. In the years 1824–25, no less than three large rolling mills—the Sligo, Juniata, and Dowlais—were erected, the first two named being yet in operation.

The machinery of the mills in Pittsburgh may be summed up as follows: number of boiling furnaces, five hundred and twenty-four; number of heating furnaces, one hundred and seventy-two; nail, tack and spike machines, four hundred and ninety seven; railroad spike machines, thirteen; steam hammers, sixty-nine; steam engines employed, one hundred and ninety-five; the steam hammers, of which twenty-six are of English make, twenty-two of Eastern, and twenty-one of Pittsburgh manufacture, vary in weight from five hundred pounds to sixteen thousand pounds. The largest of these steam hammers strikes a blow equal to sixty and seventy tons, are easily operated, and with such precision, by a skilful mechanic, that the crystal of a watch may be touched and not broken. These are the tools used to forge the stupendous shafts employed in the ocean screw propellers.

The rolls employed in the mills of Pittsburgh are of various sizes. They vary in weight from five hundred pounds to ten tons. The large rolls are employed in the manufacture of plate iron. The plates rolled under these for naval use vary from ten to fifteen feet in length, by four in width, and from one and a half to three inches thick. Should occasion require, however, plates twenty feet long, four and six in width, and seven inches thick, can be made in these large plate mills, several of which have a capacity of eighty tons per week.

As an illustration of the immense power employed in reducing iron, it may be stated that the largest rolls draw between them a mass of heated iron varying from one to twelve tons, reducing it to a uniform thickness in less time than it takes to describe it.

The value of the annual products of the iron mills of Pittsburgh is estimated at twenty million dollars. The actual sales of the past year, as exhibited by the United States Assessor's books, aggregated sixteen millions, seven hundred and eight thousand, two hundred and eighty-nine dollars. In addition to this, there is to be taken into consideration the amount sold in eastern and western cities by the agents of Pittsburgh firms, of which we have no account, and which will probably aggregate four millions. This exhibit is made in a year in which the trade was depressed, the unsettled condition of the financial market having much to do with that state of affairs. In favorable seasons the value of the products will not fall short of twenty-four million dollars.

There are now seven furnaces in successful operation, the largest of which has a fourteen feet bosh, fifty feet stack, and a capacity of one hundred and seventy five tons per week. The total capacity of the seven furnaces is estimated at fifty-four thousand tons per annum, and the actual production at forty-eight thousand tons. The sales of pig iron in this market ranges from one hundred and fifty thousand to one hundred and eighty thousand tons per annum, which, added to the home production, will give a fair idea of the consumption of raw irons by the mills. It is safe to say that in active seasons the amount of iron worked up in the mills of Pittsburgh exceeds *one thousand tons per day.*

The first patent nail machine was introduced into Pittsburgh in 1814, and was operated in Mr. Cowan's mill. Previous to that time "wrought nails" were in general use. In the progress made in this branch of iron manufacture from that period to the present time, Pittsburgh enjoys an enviable distinction. From the single nail machine in 1814 have grown up ten large nail manufactories, operating four hundred and sixty machines, and employing about two thousand five hundred persons. The value of the products of the nail and spike manufactories is estimated at three millions and a half of dollars.

Next in importance in the iron trade, to the manufacture of iron and nails, is the foundry business. The first foundry was erected in Pittsburgh in 1803, on the site of the present Postoffice. It was first employed in the manufacture of cast iron pots, kettles, domestic utensils, and mill irons, but in a few years was called upon to cast cannon balls for the government. In 1811–12 the first cannon made west of the Allegheny Mountains were turned out of the Pittsburgh foundry, and the establishment was kept busily employed in furnishing the government with cannon and shot until the close of the war in 1814. The first water pipe and the first rolls were made at this foundry. It was in this foundry that the valuable invention of making chilled rolls was discovered by a moulder, James Harley. This invention gave to Pittsburgh almost an entire monopoly of the business of making chilled rolls, this city furnishing seven-eighths of all the rolls of that description in use in the country. At the present time, Pittsburgh sends all over the Union trains of rolls, fitted complete, and ready to make all kinds of iron when erected, the whole sometimes having a solid bed plate of one piece, from twenty-three to thirty feet long. The second foundry was established in Pittsburgh in 1810, and was employed in the manufacture of light articles, such as hinges, buckles for saddlery, and small brass castings.

The total number of foundries in the city is forty eight. A single establishment boasts a cupola with a capacity of fifty tons, which melts metal at the rate of twelve tons per hour, the molten metal being conveyed from the cupola to the pit on a railway track. Another foundry employs six furnaces and two cupolas, with a total capacity of one hundred and eighty-five tons. The largest furnace melts forty tons at a single heat. One establishment employs fifteen cranes, and works up eight thousand tons of metal annually.

The product of these foundries embrace everything in the range of mill castings, cannon, plows, machine castings, chilled wheels and rolls, hollow ware, stoves, grates, and domestic hardware. The aggregate production of these establishments amounted in value, last year, to upwards of four millions of dollars. The number of men employed is estimated at twenty-five hundred. The increase in the foundry business during the past twelve years is equal to fifty per cent. of what it was in 1858.

In the three branches of the iron trade referred to in the foregoing, namely, the manufacture of merchant iron, nails and castings, is employed a capital of not less than fifty millions of dollars. The aggregate value of their annual products will not fall below twenty-eight millions.

In the distribution of the products of the iron mills and foundries of Pittsburgh, the West comes in for four-fifths of the whole amount. Ohio is the heaviest patron, Illinois next, and Missouri, Indiana and Michigan follow in order. Nearly all the territories east of the Pacific coast receive their iron supplies from this city.—*Pittsburgh Chronicle.*

Chicago and Alton Railroad.

The earnings of this road for the years ending December 31, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$1,305,570 16	$1,891,597 48

Preferred	2,425,400	2,425,400
Totals	$7,576,200	$7,570,400
Bonded debt:		
Sinking fund bonds	$402,000	$356,000
First mortgage bonds	2,400,000	2,383,000
Income bonds	1,100,000	1,087,000
Totals	$3,902,000	$3,826,000

It has heretofore been the practice of this Company to represent what may be properly called

its working capital, (invested in materials for repairs, fuel, stationery and supplies of various kinds required for the operation and repair of its railway,) in the statements of its income account, in which the cost of the same has been from time to time charged as purchases have been made, and the proper credits given as the materials have been consumed or put to their proper use.

The value of such supplies necessarily kept on hand at all times to insure the prompt and efficient working and repair of your railway, is very great. It is, however, not the same at all seasons of the year, but the average amount is about $500,000.

In referring to annual statements heretofore made, many stockholders have assumed that the balances appearing at the credit of the income account (which have embraced the cost of supplies), were available for the purpose of dividends, notwithstanding the fact that a more careful reading of the reports would in all cases have shown them their error. To avoid any possible future misapprehension on that point, it has been decided to open a new account to be called the supply account, to which a transfer of $500,000 has been made from the income account, as appears in the foregoing statements.

The gross receipts of your line for the year exceed those of the preceding year, $172,919 84, or 3.8 per cent. The increase is found to be from the following sources: From passenger traffic, $86,027 27, or 6.6 per cent. From freight traffic, $112,514 34, or 3.8 per cent.

The aggregate receipts from express companies, from the United States for transporting the mails, and from miscellaneous sources, are reduced, as compared with 1868, about 1 per cent., or $25,621 77.

The coal traffic of your line continues to increase rapidly. Commencing in 1865, six thousand tons were transported; 1866, seventy-one thousand and ninety tons; 1867, one hundred and forty-six thousand and fifty tons; 1868, one hundred and sixty-six thousand nine hundred and eighty-six tons; and in 1869, two hundred and sixty-six thousand and ninety-six tons. The supply of coal upon your line is inexhaustible, and its influence, directly and indirectly, in augmenting your traffic, can scarcely be over-estimated. Its transportation is already becoming an important part of your traffic. The aggregate tonnage of freight transported during the year shows an increase over 1868 of 15 per cent., 90.7 per cent. of the whole amount being local, and 9.3 through.

The number of passengers transported during the year amounted to 731,553, an increase over 1868 of 122,679, or 20.3 per cent. Of the number transported, 689,852, or 94.3 per cent., were way, and 41,701, or 5.7 per cent., through. The average amount of fares paid by way passengers was one dollar and forty-nine cents. The average in 1868 was one dollar and sixty-eight cents. The foregoing statements show that more than nine-tenths of your entire traffic is local, which cannot be seriously affected by competition.

Not a single passenger was injured during the year.

The operating expenses, including taxes, amount to 57.17 per cent. of gross receipts, being an increase of 2.57 per cent. over 1868.

It will be seen from the foregoing statements that, notwithstanding the number of passengers transported during the year was more than 20 per cent. greater, and the tonnage of freight transported was increased 15 per cent. as compared with the preceding year, the net receipts were about $40,000 less.

This result is in consequence of the fact that it was found necessary to accept lower rates for transportation, owing to the general reduction of values and especially the reduction in the value of agricultural products, upon which your traffic so largely depends, without being able to make a corresponding reduction in operating expenses. It is a well-known fact that when the price of labor has been increased from any extraordinary cause in a county so sparsely populated as the West, it requires time to reduce it to its proper level, when the causes for its advance no longer exist. At the time of writing this report the cost of labor is less than the average of the past year, and will probably continue to bear a less ratio to the receipts of your Company during the year 1870 than during the preceding year.

The condition of your property has been not only fully maintained, but, as a whole, it has never been at any time in the past equal to that of the present.

During the year, fifty miles, or 18 per cent. of the main line, has been relaid with new and re-rolled iron.

Five and one-eighth miles of additional side tracks have been constructed. The second, or double track has been extended from Braceville to Gardiner, and grading for extending the same nearly completed from Gardiner to Dwight. Other important improvements and additions to bridges, superstructure, etc., have been made.

A foundry, 60x180 feet, with wheel room 40x50 attached; blacksmith shop, 100x200; engine house for 14 engines; dry house, 19x63; and a two-story store house, 60x120; have been built of stone, with roofs of iron and slate (being fire-proof), as additions to the Bloomington system of shops.

Eleven locomotives have been added to the ninety-seven on hand at the commencement of the year, ten by purchase and one constructed at the shops of the Company—the cost of the latter being included with operating expenses, and embraced in the aggregate before given.

The condition of the engines has been fully maintained, at a cost per mile of about 10 per cent. less than that of the preceding year.

The condition of your cars has been greatly improved. Two baggage cars, eighty-nine house cars, sixteen stock cars, and twenty-nine platform cars have been built at the shops of the Company and the cost charged in the account of operating expenses. One mail and baggage car, two tool cars, and one hundred platform cars have also been built at the shops of the Company, the cost of which has been charged in the improvement account.

The company have 108 locomotives, of which 20 have been employed running passenger trains, 47 freight trains, 11 construction trains, 1 wood train, 1 paymaster's train and special service, 18 performing switching service, and 10 (as a general average) in shop for repairs. The number of miles run on passenger trains has been 584,518; on freight trains, 1,435,506; on construction trains, 189,183; on wood trains, 31,339; on switching trains, 302,851—total, 2,543,397. Total cost per mile run, 28.94. An increase of 405,816 in the mileage, and a decrease of 7.86 per cent. in the average cost per mile run.

The car equipment of the line, at the close of the year, consisted of 11 Pullman Sleeping and 3 Pullman Dining cars, 42 passenger coaches, 21 mail and express, 2,038 freight, 1 paymaster's, and 4 tool and wrecking cars—in all, 2,116 cars.

Number of passengers carried, 731,553—of whom 41,701 were through and 689,852 way passengers. Pounds of through freight transported, 201,044,017; do. way freight, 1,952,711,977—total, 2,153,755,994. Increase in passengers, 122,679. Increase in freight, 223,382,491 pounds.

The gross earnings include those of the Jacksonville Division for the entire year; in 1868, they embraced those of the Jacksonville Division for only seven months.

During the year, 5,127 tons of new and re-rolled iron, 163 tons steel rails, 3,900 tons repaired iron, 190,343 ties were used for repairs. There are now upwards of 800 tons of steel rails in the track, all of which are proving very durable.

GENERAL BALANCES, December 31, 1860.

Cost of road and equipment		$11,484,323 32
Machinery and tools		152,716 45
L. H. Meyer and S. J. Tilden, Trustees, bonds, etc., in their hands.		37,813 39

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal

Saturday, October 8, 1870.

Stock Exchange and Money Market.

Money has been in fair demand for mercantile use, but has been in less urgent request for speculative purposes. The offerings of funds have been unusually liberal for the season; and rates have been quoted easy for responsible borrowers at 4@6 per cent. on call, and 7@9 per cent. per annum in the discount form The city banks, in their last weekly return, reported a gain of $1,666,156 of legal tender notes; with a further loss of $10,628 of deposits, and $1,397,743 of specie. They contracted their loan and discount averages $801,016; and diminished their circulation slightly. Their legal tender average is now a little over 51 millions, as against 61⅝ millions on the 28th of May (the highest average of the current year, thus far). Their deposits are now a trifle over 191 millions, their loans 266¼ millions, and their specie reserve 13¼ millions.

The specie reserve of the city banks according to the latest return is $13,272,981, against $15,902,849 same time last year. The city bank deposits are now $191,055,574, against $183,124,508 week ending Oct. 2 1869. The legal tender reserve amounts to $51,084,092, against $54 209,088 same time last year. The circulation now stands at $32,718,199, against $34,169,409 same time last year. The loans are now $266,286,601, against $255,239,649 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $75 080,839 a day, against a daily average of $73,566,643 the preceding week. The current weeks' exchanges average about 87 millions a day. The city banks, last week, reported a loss of $1,397,743 of specie, and of $10,628 of deposits, with a gain of $1,666,156 legal tender notes. They reduced their loans, $801,016; and their circulation, $14,847.

At the annual election of the Bank Clearing House, the general officers chosen were as follows: John Q. Jones, Chairman; Alex. Masterton, Secretary; W. A. Camp, Manager. The operations of the year were reported as follows: Exchanges for the year, $27,804,539,405 75; Average exchanges per day, $90,274,487 59; Balances for the year, $1,036,484,821 79; Average balances per day, $3,365,210 46. The Clearing House transactions from Oct. 11, 1853, to Oct. 1, 1870, have been as follows: Total exchanges, $273,661,150,141 93; Total balances, $11,207,433,048 31.

The city bank exchanges on Wednesday were about 67¾ millions.

The coin reserves of the Treasury Department on Monday were $96,061,662, including $13,571,300 on deposit on private account; currency balances, $32,088,505.

National Bank notes to the amount of $4,079,543 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $338,355,237, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,265,601 leaving, with the existing 1,612 banks, (having an aggregate capital of $427,235,701,) an actual circulation at this date, of $300,089,636. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,833,850; and for the public deposits, $16,111,500—making a total of $358,945,350. The Treasury Department last week redeemed and destroyed $583,200 of worn and mutilated fractional currency, and issued $167,337 of new.

The U. S. Sub-Treasury receipts, week ending with Oct. 1, were $4,388,036 in coin, (including $3,289,000 from customs duties,) and $5,402,687 in currency; payments, $3,961,724 in coin, (including $337,382 of coin interest,) and $4,689,383 in currency; balance at the close of the week, included $61,054,494, of coin, against $60,628,183 the preceding Saturday, and $7,864,046 of currency, against $6,650,742 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $437,231 in coin, (including $391,157 from customs,) and $300,809 in currency; payments $102,070 of coin (including $66,583 of coin interest), and $491,948, of currency. On Tuesday, receipts, $858,958 in coin (including $801,287 from customs), and $705,117

in currency; payments, $58,727 in coin (including $52,009 of coin interest) and $234,826 of currency. The balance at the close of business on Tuesday included $7,643,204 of currency, and $62,189,886 of coin, against a balance a week previous of $7,539,102 currency, and $62,343,660 coin.

The aggregate receipts of the U. S. Sub-Treasury in September were $45,989,731, including $14,704,035 from customs; aggregate payments, $57,093,400, including $3,988,005 of coin interest.

The U. S. Sub-Treasurer issued in September $1,137,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $2,865,601 of coin certificates, received for customs.

Government revenues have been up to a fair average yield, since our last. The excises, during the week yielded about 2¼ millions; customs at the port of New York, $3,162,601, and at the outports about a million (in coin) more, making the grand total income for the week equal to about $7,047,000 in currency. The income of the Government, from excises, since July 1, 1870, has been $51,776,586. The internal revenue rsceipts for the month of September, were $12,902,003 36, against $13,022,303 87 for the same month last year, being a decsease of $120,300 51, though nearly $4,000,000 more than for the corresponding month in 1868. The receipts for the quarter ending Oct. 1, are $51,776,586 36, against $49,621,060 02 for the same quarter in 1869, a gain of $2,155,526 34, and against $40,650,831 81, being a gain over that quarter of that year of $11,125,754 55. It is expected that the large reductions of special taxes which took effect Oct 1, will at once show a very considerable falling off in receipts as compared with last year.

Gold has been moderately active, since our last, within a range of from 113@114, closing on Wednesday at 113⅛. The speculative inquiry has been fair. The export drain has been light. The customs call has been liberal. Government has announced that it will sell four millions of Gold in October, as follows: Wednesday, Oct. 5, $1,000,000; Wednesday, Oct. 12, $1,000,000; Wednesday, Oct. 19, $1,000,000; Wednesday, Oct. 26, $1,000,000. And buy in eight millions of Five Twenties as follows: Thursday, Oct. 6, $2,000,000; Thursday, Oct. 13, $2,000,000; Thursday, Oct. 20, $2,000,000; Thursday, Oct. 27, $2,000,000. Secretary Boutwell has authorized the U. S. Assistant Treasurer to anticipate the payment of the five per cent. bonds due Jan. 1, 1871, upon an adjustment of the interest at the rate of six per cent. per annum. These bonds were issued under the act of June 22, 1860, and amount to $7,022,000. Thus far, over a million of these bonds have been redeemed, under the order. On Wednesday Government sold a million of Gold at from 111@113 10. The bids reached $3,610,000.

The export drain last week was only $465,260, against $1,345,408 week ending Sept. 24, less than a million week ending with Sept. 17; 1⅜ millions week ending Sept. 10; 1⅛ millions week ending Sept. 3; 2¼ millions week ending with Aug. 27th, about three millions the week ending with August 20th, 3⅞ millions the week ending with Aug. 13th, and nearly 7 millions the week ending with Aug. 6th. The shipments thus far this year have been about 49¼ millions, against 26⅝ millions same time in 1869; 66⅛ millions same time in 1868; 42⅛ millions same time in 1867; 53¾ millions same time in 1866; and 22¾ millions same time in 1865. On Wednesday of the current week, the specie exports were unimportant. The exchanges at the Gold Exchange Bank, which were 62⅞ millions on Thursday of last week, were 55¼ millions on Saturday, 29¼ millions on Monday of this week, and 38¼ millions on Tuesday. On Wednesday they were 45⅛ millions.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $61,838,547.

The customs demand for Gold last week, averaged $548,166 a day; thus far, this week, it has averaged $596,222 a day, or equal to a weekly aggregate of $3,577,332. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $182,459; and since Jan. 1, 1870, $8,239,889, against $11,202,442 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $111,030,136 against $103,119,535, same time in 1869.

The exports of specie, from this port, last week, were $465,260 against $265,196 same week last year; and since Jan. 1870, $49,230,072, against $26,660,840 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $337,382; and since Jan. 1, 1870, $66,777,739 against $69,315,243 same time in 1869.

The customs revenue of the port on Wednesday was $749,000; and the coin interest disbursements were $65,905.

The customs revenue at the port of San Francisco, from Jan. 1 to Sept. 22d, was $6,044,019, against $6,032,410 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Sept. 22, were $25,626,110, against $28,936,427 same time last year.

Foreign Exchange has been depressed and lower, closing heavily. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 109⅝@110. The offerings of produce bills have been fair. The week's exports of domestic produce have been to the currency value of $3,257,780, and since January 1, 1870, $136,984,679 against $146,691,726, same time in 1869.

Government securities have been in less demand, closing rather less firmly, though not offered freely.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113⅞@114; U. S. Five-Twenties of 1862, 112⅜@112⅞; U.S. Five-twenties of 1864 at 111⅛@111⅝; U. S. Five-Twenties of 1865 at 111⅝@111⅞; U.S. Five-twenties of 1865 consolidated, 110¼@110⅜; U.S. Five Twenties of 1867, 110¼@110⅜; U. S. Five-twenties of 1868, 110⅜@110½; U. S. Ten-forties at 106⅛@106¾; U. S. Six per cent. currency bonds, 111⅛@111⅜.

State bonds have been less active but have varied materially in price.

Railway bonds have been in fair request, for investment purposes at full prices, including Central Pacific Sixes, which closed on Wednesday firmly at 90¼@90½. The Union Pacific Sixes closed firmly on Wednesday at 83½@83⅝. The registered First Mortgage bonds of the Chesapeake and Ohio Railroad have been in demand at 90 per cent. and accrued interest.

Railway and miscellaneous share property has been in less active speculative demand at variable prices, closing weak and irregular.

The latest quotations at the London Stock Exchange compare as follows with former returns:

At. and Gt. West....	23½	26	26

At Frankfort on Wednesday, U. S. Five Twenties were quoted at 94⅜.

General business has shown less animation in the line of domestic produce. Breadstuffs and Provisions closed rather heavily. Middling upland cotton closed firmly on Wednesday at 16¼ cts. per lb. The stock of cotton now here is given at about 25,000 bales. The receipts at the port this week, have averaged about 5,700 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 122,962 bales, against 143,913 bales same time in 1869-'70; exports same time 30,000 bales, against 18,700 bales same time in 1869-'70; stock on hand at latest dates, 106,000 bales, against 86,654 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870 have been 12,602 pkgs., against 16,871 pkgs., same time in 1869. From Boston, 4,946 pkgs. in 1870, against 6,241 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves of good quality have been in less request and heavy; we quote the range at from 6½@16½c. per lb.; week's receipts, 8,069. Milch cows continue very quiet at $40@$100 each, receipts, 53. Veal calves have been quiet at from 4@13c. per lb.; receipts, 3,802. Sheep continue in slack request at from 3@6½c.; lambs at 6@8½c. per lb.; receipts, 35,798. Hogs have been quiet at 8¾@9¼c. per lb., all live weight; receipts, 22,405.

Foreign merchandise has been moderately active, and prices havebeen fairly supported. The dry goods entries at this port, last week, were $2,871,801, making with the general merchandise imports, a total of $7,058,078.

Ocean freights have been less active and irregular. For Liverpool we quote flour at 1s. 9d. by sail, and 2s.@2s. 3d. by steamer per bbl.; grain at 5½@6d. by sail, and 6½@6¾d. by steamer per bushel; cotton at ¼d. by sail and ⅜d.@½d. by steamer per lb.; and heavy goods 15s.@27s. 6d. by sail, and 17s. 6d.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 462.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending October 4th, and since the beginning of the year:

	1869.	1870.
For the week.....	$5,011,442	$3,257,780
Previously reported..	141,680,284	133,726,899
Since Jan. 1	$146,691,726	$136,984,679

The imports for the week ending Oct. 1, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,680,538	$2,871,801
Gen. merchandise..... ..	3,702,666	4,186,277
Total for the week.....	$5,383,204	$7,058,078
Previously reported....	231,029,525	224,450,544
Since January 1.....	$236,412,729	$231,508,622

☞ The Acting Commissioner of Internal Revenue gives notice that where persons hold more two cent revenue stamps than they will need, they can exchange them for other stamps at any Collector's office by paying 2½ per cent. on the amount exchanged.

☞ The St. Louis division of the Toledo, Wabash and Western Railway was opened for regular business on the 3d of October.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST.,
NEW YORK, Oct. 1, 1870.

☞ THE PRICE OF THE LAST ISSUES OF Five-twenties to-day is 110½—that is a $1,000 bond will bring, in cash, $1,105.

The price of Central Pacific bonds to day, is 90¼—that is, a $1,000 bond can be bought for $902 50.

The Central Pacific Railroad is well and economically managed, and its revenues are large, certain and constantly increasing, as is shown by the following statement of its earnings since its beginning:

	Gross.	Op. Expenses.	Net.
1865..	$401,941 92	$121,669 53	$280,272 39
1866..	864,917 57	200,710 61	664 206 96
1867..	1,470,653 50	430,913 33	1,139,740 17
1868..	2 300,767 17	843,166 54	1,457,600 63
1869..	5,670,822 25	2,993,523 19	2,677,299 06

The earrings of the main line for the current year will exceed $8,000 000, and are as follows:

January	$413,104 41	May.....	$768,719 77
February....	394,176 47	June	729,274 46
March.....	488,332 91	July.....	784,099 64
April.....	633,758 06	August...	806,040,00

The bonds are dealt in with the same facility as Five-twenty Bonds, and have a market at all the great money centres in the world, such as London, Frankfort, Amsterdam, and at the New York Stock Exchange. We unhesitatingly advise our friends and customers, who may be thinking of making investments, or exchanging their Five-twenties, to take these bonds as suitable, safe and advantageous.

We buy and sell Government Securities and Central Pacific Bonds, make collections, and allow interest on deposits. FISK & HATCH.

☞ The tax upon Broker's sales is not removed. The act of July 14, 1870, provides that on and after the 1st day of October, 1870, the taxes on sales, saving and excepting such taxes on sales as are by existing laws paid by stamps and the taxes on sales of leaf tobacco, manufactured tobacco, snuff, cigars, foreign and domestic distilled spirits and wine, are thereby repealed. The tax on Broker's sales is paid by stamps and therefore falls within the exception and remains unchanged.

☞ The railroad from New Orleans to Mobile, 138 miles in length, is rapidly approaching completion, 58 miles of the eastern and 22 miles of the western end being finished and in running order. The extensive workshops of the railroad are situated at Mobile, and cover five squares of ground. They are fitted up with all the modern lathes and planing machines, which are driven by an engine of forty horse power. In the locomotive shed are nine forty-ton locomotives, built in Paterson, N. J.

☞ The coupons for interest of the 7 per cent. bonds of the Sunbury and Erie Railroad Company, and of the first mortgage bonds of the Huntingdon and Broad Top Railroad are now in course of payment in gold.

☞ The survey of the Northern Pacific railroad is completed to Puget Sound. The route is entirely practicable.

Movements of Produce.

The Receipts of certain articles of domestic produce at the port of New York for nine months from January 1st, were:

	1869.	1870.

☞ The Cowansville *Observer* says that the contract for grading that portion of the Clyde River and Missisquoi Railroad uniting the two sections of the South Eastern Counties Junction Railway, through the adjoining town of Richford, has been taken and operations commenced by sub-contractors Webster and Johnson.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURY TO PERSON CAUSING DEATH MEASURE OF DAMAGES—STATUTORY DIFFERENCE BETWEEN NEW YORK AND WISCONSIN LAW.

The case of Woodward Admr. *vs.* The Chicago and Northwestern Railway Company, (23 Wis., 400,) was an action commenced in Rock County, by Edmund H. Woodward, administrator, under sections 12 and 13 Chapter 135 R. S., to recover damages resulting from the death of his intestate, Julia B. Woodward, charged by the complaint to have been killed in December 1864, by the negligence of the defendant. The complaint alleged the survivorship of William P. Woodward, the husband of the deceased, and Horace W. Woodward their only child, and claimed special damages to the said William P. Woodward. After this Court had reversed a decision of the Circuit Court sustaining a demurrer to the complaint, (21 Wis., 309,) the defendant answered denying negligence on its part and charging negligence on the part of the deceased, and procured a change of venue to Jefferson county. In the meantime William P. Woodward died, and the defendant filed a supplementary answer, stating the fact, and claiming that by reason thereof the cause of action (if any) had abated. The action came on fo trial in February, 1868, the Court holding that it had not abated. After the plaintiff had closed his evidence, the defendant obtained a non-suit, on the ground that it appeared from the plaintiff's own showing that the negligence of Julia B. Woodward contributed to the accident which caused her death. Judgment for costs in favor of the defendant; from which plaintiff appealed. The following is the opinion of the Court delivered by

DIXON, C. J.—With respect to the persons to be benefited by the money recovered in an action of this nature, the statute of this State differs materially from that of New York, and from the English statute, 9th and 10th Victoria, chapter 93. The New York statute provides, that "the amount recovered shall be for the exclusive benefit of the widow and next of kin, and shall be distributed in the proportions provided by law in relation to the distribution of perconal property left by an intestate." The English statute declares "that every such action shall be for the benefit of the wife, Husband, parent, and child of the person whose death shall have been so caused." The statute of this State reads as follows: "And the amount recovered shall belong and be paid over to the husband or widow of such deceased person, if such relation survive him or her, but if no husband or widow survive the deceased the amount recovered shall be paid over to his or her lineal descendants, and to his or her lineal ancestors in default of such descendants, and in every action the jury may give such damages, not exceeding five thousand dollars, as they shall deem fair and just in reference to the pecuniary injury resulting from such death to the relations of the deceased specified in this section." By all the statutes, the action must be brought in the name of the personal representative of the deceased, that is, the executor or administrator. Now, while it is apparent, under the English and New York statutes, that the right of action vests at once for the bene fit of each and all of the persons entitled to receive any part of the money recovered, and may

maintained so long as any one of such persons survives, it is equally apparent by our statute, that it vests only for the benefit of the husband or widow, in case the deceased leaves such surviving relative, and if no such relative survives at the time of the death, the action may be prosecuted for the benefit of lineal descendants of the deceased; and in default of these, then for the benefit of his or her lineal ancestors. And it seems hardly necessary to add, that if the deceased leaves no relatives of the kind described in the statute, then no action whatever can be maintained. As observed by DUER, J., in Safford *vs.* Drew, 3 Duer, 633, the facts that there are persons entitled by law to claim the indemnity, and that they have sustained a loss justifying their claim, must be proved upon the trial in order to warrant a recovery; and when these facts are not proved, the foundation of the action fails, and the complaint must be dismissed. The language of the statute is so plain, that there seems to be no room for argument as to its meaning.

In this case, the deceased, who was a married woman, left a husband who survived until some time after this action was commenced. Upon her death, therefore, the right of action, by the statute, vested solely and exclusively for the benefit of her husband. He alone was entitled to the amount to be recovered, and could hold and dispose of the same at pleasure. The lineal descendants and ancestors of the deceased had no interest whatever in the action, and the damages to be recovered could not be estimated with reference to the pecuniary injury, if any, resulting to them, or any of them. The damages must have been given in reference to the pecuniary injury and loss of the husband alone; and such is the obvious interpretation of the words in the last clause—"with reference to the injury resulting from such death to the relatives of the deceased specified in this section"—which are to be understood distributively, and not collectively, as counsel seem to suppose.

The question then arises as to the effect of the death of the husband. Did the action abate thereby, or does it survive, so that it may still be prosecuted for the benefit of the infant child of Mrs. Woodward? In answering this question we are first to consider the nature of the action, whether it is one sounding in tort or contract. Upon this point it does not seem to us that there can be two opinions. It is clearly an action of tort. It is an action given to recover damages for an injury caused by the wrongful act, neglect, or the default of another. It can only be maintained where the deceased, if death had not ensued, would have been entitled to sue for and recover damages in respect of the same injury. It is founded upon an injury to the person of the deceased, which could only be redressed in an action of tort. By the common law, the death was a bar to any recovery against the guilty or negligent party, and the legislature, by declaring he shall remain liable to an action, notwithstanding the death, may, in some sense, be said to have declared that the same cause of action shall survive, though based on a somewhat different principle, and with a right of recovery in some respects beyond that which the deceased would have if she had lived.

It being, therefore, an action of tort, and the sole party in interest having died, the next inquiry is, whether it falls within the general rule of the common law, that such an action does not survive the death of the party in whose favor it existed. It is very clear to our minds that it is not distinguishable in this particular from other actions of tort, and that the common law rule must govern, unless it has been taken out of the operation of that rule by some express provision of statute. We know of no such provision. The statute declaring what actions shall survive in addition to those which survive by the common law, is section 2 of chapter 135 of the Revised Statutes; and this is clearly not one of them.

They are actions for the recovery of personal property, or the unlawful conversion thereof; action for Assault and Battery, or for false imprisonment, or for goods taken and carried away; and actions for damages done to real or personal estate. The provisions of statutes allowing actions of tort to survive are strictly construed, so as not to extend the exceptions beyond the clear intent of the legislature, 14 Gray, 183; 19 Pick., 47; 5 Cush., 543, 9 id., 108.

The position that the action does not abate because the nominal plaintiff, the administrator, still lives, and is ready and willing to prosecute it, seems scarcely worthy of serious thought. The administrator is a mere trustee, so made by the statute, with power to sue for the benefit of his *cestui qui trust*, or the person beneficially interested. He has no right except in virtue of the right of the real party in interest, and if the right of that party is lapsed or lost, so that no recovery can be had upon it, it follows that the action can be no longer maintained. As already observed, whether there is a person in being entitled, under the statute, to the money recovered, and whom the administrator represents, is one of the facts in issue, which must be proved before any recovery can be had. It appears that the person so entitled died, and that the right of action expired with him, and for that reason, if for no other, the judgment of non-suit must be affirmed.

Judgment affirmed.

☞ The Boston *Advertiser* says there is now a strong prospect that the Montpelier and Wells River Railroad will be built. The estimated cost is $1,200,000. Of this amount, Montpelier has raised by bonds and private subscriptions $250,000. By bonds of other towns and other subscriptions, $115,000 more are secured. The directors have a guaranty from responsible parties that if the entire subscription can be raised to $400,000, the road shall be built, and it requires only $35,000 more to insure success.

☞ A meeting was recently held at Bachman's Mills to build a railroad from New Freedom, on the Northern Central Railroad, to Westminster, via the Chestnut Hill iron ore banks. Money was subscribed to make the preliminary survey from the Chestnut Hill ore banks to Westminster, the road being already located from New Freedom to the Chestnut Hill ore banks. The survey will begin October 12.

☞ Work has again been commenced on the Eel River Railroad, between Manchester and Columbia City. The Union Construction Company have contracted to have the road completed from Logansport to Butler, DeKalb county, Indiana, by the 1st of November, 1871.

The Public Debt Statement.

The following is a recapitulation of the public debt statement September 30, 1870:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$221,589,300 00
Six per cent. bonds	1,739,562,750 00
Total	$1,961,152,050 00
Accrued interest	41,092,753 50
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$45,135,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Total	$59,135,000 00
Interest	579,557 03
Debt on which interest has ceased since maturity	$3,437,067 35
Interest	$450,936 11
DEBT BEARING NO INTEREST.	
Demand and legal tender notes	$356,103,971 00
Fractional currency	39,541,184 48
Certificates of gold deposited	13,571,300 00
Total	$409,216,455 48
Total amount outstanding	$2,432,940,572 83
Total interest	42,123,246 64
Total debt, principal and interest, to date, including interest due and unpaid	$2,475,063,819 47
AMOUNT IN TREASURY.	
Coin	$96,061,661 89
Currency	32,088,505 30
Total	$128,150,167 19
Debt less amount in Treasury	$2,346,913,652 28
Debt less amount in Treasury September 1, 1870	2,355,921,150 41
Decrease of debt during the past month	$9,007,498 13
Decrease of debt since March 1st, 1869	$178,549,607 73

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,236,512	$408,547 68
Kansas Pacific, late Union Pacific, Eastern division	6,303,000	94 545 00
Sioux City and Pacific	1,628,320	24,424 80
Central Pacific	25,881,000	388,215 00
Central Branch Union Pacific—assignees of Atchison and Pike's Peak	1,600,000	24,000 00
Western Pacific	1,970,000	29,550 00
Totals	$64,618,832	$969 282 48
Interest paid by United States		$8,815,345 49
Interest repaid by transportation of mails, etc.		2,293,287 55
Balance of interest paid by United States		6,522,057 94

☞ The stockholders of the Mississippi River Railway have elected H. S. McComb, John Overton, J. S. King, E. Norton, F. M. White, S. H. Bernard, A. T. Lacy and John L. Norton, directors; A. T. Lacy, president, and John L. Norton, Secretary.

☞ The officers of the Connecticut Valley Railroad Company, recently chosen at Hartford, are: President, J. C. Walkley; Vice-president, Luther Boardman; Secretary, Levi Woodhouse; treasurer, O. D. Seymour; engineer, Seth E. Marsh; attorney, H. H. Barbour, Esq.

Commerce of New York.

The foreign imports at New York for the month of August 1869 and 1870, are officially stated as follows:

	1869.	1870.
Entered for consumpt'n.	$15,895,735	$18,722,822
Do. for warehousing	10,008,548	9,965,682
Free goods	1,322,924	1,141,295
Specie and bullion	159,927	430,726
Total entered at port...	$27,387,134	$30,260,025
Withdrawn fr. wareh'use	11,706,290	11,305,475

The foreign imports at New York for the eight months from January 1, were:

	1869.	1870.
Entered for consumpt'n.	$109,111,441	$112,178,072
Do. for warehousing...	93,824,564	85,387,812
Free goods	10,409,867	8,571,485
Specie and bullion.....	10,373,674	7,788,675
Total entered at port...	$223,719,546	$213,926,044
Withdrawn fr. wareh'se	72,845,055	80,203,700

The revenue from customs at New York for eight months from January 1, were:

	1869.	1870.
6 months	$63,467,409 94	$67,581,811 10
In July.....	10 045,078 14	10,592,841 37
August.....	13,845,030 69	15,078,512 90
Eight months.....	$87,357,518 77	$93,253,165 37

The exports from New York to foreign ports in the month of August, were:

	1869.	1870.
Domestic produce.....	$17,976,524	$12,599,436
Foreign free goods.....	54,356	484,152
Do. dutiable.....	594,339	808,944
Specie and bullion.....	3,027,940	10,087,040
Total exports	$21,652,159	$23,979,572
Do. exclusive of specie.	18,624,219	13,892,532

The exports from New York to foreign pors for eight months from January 1, were:

	1869.	1870.
Domestic produce.....	$118,218,016	$111,264,616
Foreign free goods....	238,246	782,480

Specie and bullion.....	24,954,457	43,850,091
Total exports.....	$147,933,075	$162,751,310
Do. exclusive of specie .	122,978,618	118,901,219

Richelieu, Drummond and Arthabaska Railroad.

The Montreal *Gazette* says that this company has got over the little difficulties formerly in the way of its commencing work satisfactorily, and the road is now to be made as soon as possible. The tender of Mr. Senecal, M. P., who resigned his post as Director and Vice-President of the Company, and offered to construct the road, put on a certain amount of rolling stock, build stations, workshop, bridges, &c., (with the exception of the bridge over the river Yamaska, which is to be extra,) at the rate of $5,000 per mile of road, has been accepted by the Board, and a contract signed in accordance with its terms. Mr. Senecal guarantees that the road shall be constructed in time to take advantage of the Colonization Railway Act, and includes with his contract a lease of the road from the time of its construction to 1st December, 1873, paying as rent 6 per cent. upon the cost. Dr. Fortin, M. P., for Yamaska, was elected Director and Vice President in the stead of Mr. Senecal. In consequence of Mr. Butler's removal to Melbourne to reside, that gentleman resigned his post as Secretary and Treasurer of the Company, and A. C. Wurtele, Esq., of River David, was elected to succeed him.

☞ The Greencastle (Pa.) *Echo* says that work on the Southern Pennsylvania railroad is being rapidly pushed forward by the energetic contractors, Messrs. Rice, Rebill & McTague. The piers for the bridge at Hawbecker's mill are completed, and the work has commenced on those for the bridge over the Conococheague, on the Fredericks farm.

THE Firm of WM. J. YOUNG & CO., MATHEMATICAL INSTRUMENT Makers, consisting of WM. J. YOUNG & CHAS. S. HELLER, was dissolved shortly before the death of Wm. J. Young. The undersigned, the late Partner of said Firm, (who was with Mr. Young continuously for 15 years), will continue in the same line of business at No. 33 North Seventh Street, (corner of Filbert).

CHARLES S. HELLER.

Philadelphia August 1, 1870.

To Contractors.

THE line of the Portsmouth, Great Falls and Conway Railroad will be ready for examination on and after the 10th inst. Proposals will be received at the Eastern Railroad Office, Causeway street, Boston, until Thursday noon, 20th inst. Profiles, maps and specifications may be seen at same office after 10th inst. The right to reject any and all bids is reserved.

GEO. M. BROWN, President.

To Contractors.

PROPOSALS will be received until Monday October 10, at twelve o'clock noon, for the graduation, masonry and bridging of the Shepaug Valley Railroad, extending from Litchfield to Hauleyville, in the State of Connecticut, a distance of about 32 miles. Plans, profiles and specifications may be seen at the office of the chief engineer in Litchfield; payments will be made ninety per cent. in cash and ten per cent. in the stock of the company at par; contractors will be required to give security for the faithful performance of their contracts; the right is reserved to reject any or all bids not considered advantageous for the company.

J. DEMING PERKINS, President.

D. N. BEARDSLEY, Wholesale Dealer in Railroad Ties, Hemlock Timber, Chestnut Posts and Wood. Office, 251 West Street, near Hubert Street, New York. N. B.—Cargoes sold on commission. Advances made on consignments.

THE NEW JERSEY STEEL AND IRON COMPANY,

TRENTON, N. J.,

And 17 Burling Slip, NEW-YORK,

Would call special attention to their

MARTIN STEEL,

Acknowledged by all who have used it to be the best material now made for

Firebox Plates, Locomotive Crank Pins, Piston Rods, Axles,

And all the finer machine purposes, such as

Rollers for Cotton Machinery, Lathe Screws, Sewing Machine Work, &c., &c.

The special features of this Steel are its ***Remarkable Toughness,*** its softness and entire freedom from hard spots, which obviate the necessity for annealing before turning.

The process by which this Steel is made differs entirely from any other in use, enabling it to be sold at lower prices than any other good steel, while it possesses properties hitherto unknown, and which are of the greatest importance for many uses.

TO CONTRACTORS.

THE AMERICAN AND MEXICAN RAILROAD AND TELEGRAPH COMPANY, at No. 71 Broadway, Room 31, New York, having secured the approval of the Government of Mexico of their surveyed routes from Guaymas to Hermosilla and through the States of Sonora and Chihuahua to the Rio Grande, are prepared to receive proposals for grading the road, furnishing and laying cross ties from Guaymas to Hermosilla, a distance of 80½ miles.

The proposals must be handed in on or before the first day of November next, and be made *for sections* and include excavations of rock and earth, and bridging, and be so made as to enable the Company to ascertain the cost per section as laid down on the Company's map and profile, which are now in their office for inspection. The Company reserves the right to reject any bids which in their udgment they deem advisable.

Per order of the Board of Directors.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Lake Superior and Mississippi Railroad.

The opening of the Lake Superior and Mississippi Railroad is an event the most important and auspicious that has transpired in the history of St. Paul and Minnesota. It connects the greatest lake and the greatest river on the continent by an easy stretch of railroad, and makes St. Paul, in addition to its commanding position at the head of navigation on the Mississippi, almost a port on Lake Superior. The travel and trade over this line of road must always be enormous in amount for it is far from probable that any other railroad will be built in competition with it for many years to come. When the St. Paul and Sioux City railroad and the link to the southwestward that will connect with the Union Pacific are completed, still greater importance will be given to this highway of travel and trade, and still greater wealth and prosperity will be made to flow along this continental channel of commerce.

The completion of this road confirms the position of Duluth, and renders its future one of promise and splendor, without an equal among the young cities of the West. Its place is not that of a rival to St. Paul, but they will mutually share in the harvest of unbounded prosperity that is dawning upon them, and every stride in advance that either makes in wealth and greatness will be timed to the forward progress of the other. There can be no set back or delay in the growth of either, for they have both surmounted the first and most difficult steps to be taken, and the broad, unobstructed onward road lays before them. Duluth will be the largest city on Lake Superior, possibly upon any of the chain of lakes, with the exception of Chicago, and St. Paul, St. Louis and New Orleans will be the great cities of the Mississippi. The iron pathway makes us neighbors to the city on the lake shore, and no distant neighbors either; and the intimate relations that we shall hold to each other will be full and fruitful of lasting mutual benefits.

As yet the most sanguine can hardly compute the measure of the prosperity that this railroad will bring to these two cities, or the importance that it will occupy as a highway of travel and commerce. It now runs across a sparsely settled country and its connections are with but fragments of incomplete lines of railway. But the near future will see vast trains loaded with merchandise and with the product of our unrivaled fields thronging its course, and travel will crowd its entire length as it crowds no other thoroughfare in the West. It will be the outlet of the great Northwest to the seaboard, and carry tribute from the upper Missouri, from the golden mountains of Montana, and from the far Saskatchewan. It will have no rival or competing line, and will monopolize the traffic of many parallels of latitude and longitude, will convey away the abundance of their harvests, and bring to them the supplies that they require from the markets of the world. A great future is opened to-day, and its compass can scarcely be excelled by the rosiest dreams that the human fancy may invent.—*St. Paul Dispatch.*

Refunding the National Debt.

The Secretary of the Treasury has issued the following circular defining his plan for commencing the work of funding the five-twenty bonds under the law passed at the last session of Congress:

TREASURY DEPARTMENT,
WASHINGTON, D. C., Oct. 8, 1870.

The Secretary of the Treasury, in anticipation of a proposal to be issued by him for subscriptions to the national loan, under the act approved July 14, 1870, entitled "An act to authorize the refunding of the national debt," gives notice of the terms and conditions on which such proposal will be issued. The proposed loan comprises three classes of bonds, namely:

First—Bonds to the amount of $200,000,000, payable at the pleasure of the United States after ten years from the date of their issue, and bearing interest, payable semi-annually, in coin at the rate of five per cent. per annum.

Second—Bonds to the amount of $300,000,000, payable at the pleasure of the United States after fifteen years from the date of their issue, and bearing interest, payable semi annually in coin, at the rate of four and a half per cent. per annum.

Third—Bonds to the amount of $1,000,000,000, payable at the pleasure of the United States after thirty years from the date of their issue, and bearing interest, payable semi annually in coin, at the rate of four per cent. per annum.

Banks and responsible bankers will be designated for the negotiation of the loan and paid commission upon the amounts negotiated by them respectively.

Subscribers to the loan will have preference in the following order, namely:

First—Subscribers for equal amounts of the first and third classes of bonds.

Second—Subscribers for equal amounts of each class of bonds.

Third—Subscribers for five per cent. bonds according to the per cent. of premium offered or at par in the order of the date of subscribing.

When a subscription is made subscribers will be required to deposit two per cent. of the amount thereof, to be accounted for by the government when the bonds are delivered, and payment may be made either in coin or in bonds of the United States known as five-twenty bonds at their par value. The coin received in payment will be applied to the redemption of five-twenty bonds. The bonds will be registered or issued with coupons, as may be desired by the subscribers, and in denominations of $50, $100, $500, $1,000, $5,000 and $10,000. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer or designated depository of the government. The bonds of the several classes aforesaid and the interest thereon are exmpt from the payment of all taxes or dues of the United States, as well as taxation in any form, by or under State, municipal or local authority. After maturity the bonds last issued will be first redeemed by classes and numbers, as may be designated by the Secretary of the Treasury.

GEO. S. BOUTWELL, Secretary.

Bridge over the Mississippi River.

The immense bridge over the Mississippi river, to be built for the Toledo, Wabash and Western, and the Hannibal and Naples, Hannibal and Moberly and North Missouri railroads, is now under contract. The bridge will cross the Mississippi at Hannibal, and give the Toledo, Wabash and Western Railway connection with each of the roads named above, and, when completed, will be one of the most stupendous structures of the kind in the United States. The bridge is by contract to be completed and ready for use by August 1, 1871. The bridge proper begins with an abut-

ment on the East bank of the main channel of the river. From thence it consists of four fixed spans of 180 feet each; one fixed span of 250 feet; one pivot draw span of 360 feet; and one fixed span of 250; in the order named, a total of 1,580 feet.

Cincinnati, Sandusky and Cleveland R. R.

The gross earnings of this road for the years ending June 30, 1869 and 1870, were as follows:

	1869.	1870.
From freight	$479,779 31	$498,186 77
" passengers	229,054 72	241,508 69
" mail	21,300 00	17,599 69
" express	40,394 73	28,696 95
" mileage	21,145 10	20,518 76
" miscellaneous	3,795 14	3,965 68
	$795,469 00	$810,476 54
Ordinary expenses and renewals	650,064 21	538,044 60
	$145,404 79	$272,431 94
Interest on bonds and preferred stock and taxes	$207,179 08	
Sinking fund	10,000 00	
		217,179 08
Balance		$55,252 86
Add avails of assessments on Cincinnati, Dayton and Eastern stock		4,889 60
Leaving abalance of		$60,142 46

The balance of $60,142 46 has been expended towards paying liabilties for new work and re-construction expenses due at commencement of fiscal year. The extraordinary expenses have been continued during the year in new works, bridges, station houses and machinery, much of it rendered necessary by the great flood of 1869. The report says:

Since my last annual report the business of the road has shown a stability which, under the great competition to which we have been subjected, is gratifying. The volume of our business has increased, but rates have been so low that the gross increase of earnings has not been as great as would otherwise have resulted.

We now compete at Sandusky with the Baltimore and Ohio Railroad Company, who have a Lake Erie Division, by a perpetual lease of the Sandusky, Mansfield and Newark Railroad, which line the former company commenced operating July 1st, 1869, and which company has made most extraordinary exertions for business over its line to and from Sandusky; yet, notwithstanding this diversion of some of the business formerly transacted over our road, our earnings show an increase for the fiscal year of $15,007 54, as will be seen by reference to the report of the Treasurer herewith.

The expenses of operating the road have necessarily been increased with the volume of business, and the lower rates which have prevailed for doing the same, have diminished the ratio between the income and expenses.

The great flood of January last also greatly damaged our track, washing away road bed and culverts, and rendering it necessary to construct a new bridge over Buck Creek. These expenses were absolutely indispensable, and have, during the whole season, required a gravel as well as a construction and wood train, upon the road, one of which trains, in September next, we expect to dispense with, and continue, only at intervals, the construction and wood trains.

These extraordinary and unexpected expenditures, together with the continual and necessary improvement of your road bed and property and fencing the road, with our interest and sinking fund obligations have used more than all the earnings of the road and delayed a dividend to the stockholders, which in our report a year ago, we reasonably anticipated would be made during the past fiscal year.

The condition of your property is such at this time that, excepting fencing, and masonry required by the City of Tiffin to cover two streets, one on each side of Sandusky river, no more than the usual expenses of maintaining your property, will, hereafter, in all human probability, be required; and we can safely speak of your road and property as comparing favorably with any first class line in the country.

We have made very great efforts, the past year, to interest the roads east of us, in our route, and arrangements have been concluded for the fast freight line, known as the "Red Line," to be extended to Cincinnati over our road and the Cincinnati, Hamilton and Dayton Road.

Our freight car equipment will have to be considerably enlarged to accommodate this business; but the results will, no doubt, warrant us in the increased outlay.

During the year an important arrangement has been concluded, being ratified by a large vote of our stockholders, for the completion of the road between Springfield and Columbus, Ohio, and for its perpetual lease to this company.

The road is to be completed by September 1st, 1871, and it is anticipated that it will bring a large increase of business to our main line. We shall then have the best and most attractive route between Cincinnati and Columbus, offering to the tourist, or mercantile traveler, the inducements of such cities as Springfield, Dayton, Middletown and Hamilton, and traversing the most beautiful farming country in Ohio.

In entering Cincinnati we shall have a great advantage by reason of the location of the railroad depot, readily approached without running through streets, and trains not delayed by restrictions to speed, and, at the same time, most accessible to the city railroads and carriages.

We must control between the terminal points, a great proportion of the local travel which is now large and rapidly increasing.

During the past year we have settled the suits so long pending, affecting the title to the very valuable depot grounds of the company in the City of Dayton, which had been held only under a contract by which the use of the grounds were restricted to railroad purposes and under which a forfeiture was claimed as against our company; By this settlement, costing us in all about $15,000, we obtain the title in fee of that most valuable property.

The travel over our road shows a fine increase, and during the year not a single passenger has been injured or killed.

Our relations with the Cincinnati, Hamilton and Dayton Railroad are quite satisfactory and with all our connecting roads (except the Little Miami Road because we give our Cincinnati business chiefly to the C. H. & D. Road) are more satisfactory than heretofore.

The channel of Sandusky Bay is being improved and deepened, so that the commercial importance of our lake port is increasing.

Put-in-Bay and the Islands of Lake Erie more accessible from Sandusky than from any other point, are becoming popular and favorite places of resort for the summer.

Large and convenient hotels, for the accommodation of the traveling public, have been and are being erected, and these attractions are adding to the passenger travel over our road, which would increase more rapidly than it does, if we had better steamboat facilities for the Islands, and it is worth serious consideration whether we ought not to give such assistance to some proper party, as to induce the building of a new steamer to run, specially in connection with our trains, to and from the Islands.

The road between Carey and Findlay which was commenced the last, has, during the present year, been completed and is being operated with satisfactory results, justifying the wisdom of the expenditure.

The employees and subordinate officers have exercised care and fidelity in their various duties, and are commended.

The company have 26 locomotives, 31 passenger, sleeping, mail and baggage, 335 box, 66 stock, 165 flat, and 2 old baggage cars used as freight cabooses. The service of engines during the past year is 603,581 miles, at a cost of 6.19 cents for repairs, and 10.24 cents for fuel per mile run. Tonnage of way freight, 162,758; do. through freight, 73,179. During the year 560 tons of new rail and 7½ miles of repaired iron have been put in the track. The relaying of Findlay Branch with T rails has been completed, and all culverts on the same have been rebuilt. A new Howe Truss Bridge of 128 feet span has been built at Buck Creek.

Ass't Superintendent.—E. S. QUINTARD.

From the Bellefontaine Press, Sept. 29.

Homesteads for Soldiers and Sailors.

Some weeks ago we published the law of Congress giving to soldiers homesteads in alternate reserved sections of public lands along our Western railroads. There has been much call for a copy of that law since, and we again print it below, with the instructions of the Commissioner of the General Land Office at Washington. We also publish a letter from the Commissioner to Judge Lawrence, giving a list of all the land grant railroads in the United States, along which there are "alternate reserved sections," in which soldiers can select their homesteads.

HOMESTEAD ACT OF JULY 15, 1870.

"DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE, Aug. 6, 1870.

"'GENTLEMEN: The following is the 25th section of the act of Congress approved July 15, 1870, entitled "an act making appropriations for the support of the army for the year ending June 30, 1871, and for other purposes," viz.:

"SECTION 25. *And be it further enacted*, That every private soldier and officer who has served in the army of the United States, during the rebellion, for ninety days, and remained loyal to

the Government, and every seaman, marine, and officer or other person, who has served in the navy of the United States or marine in the corps, or revenue marine, during the rebellion, for ninety days and remained loyal to the Government, shall, on payment to the fee or commission to any register or receiver of any land office required by law, be entitled to enter one quarter section of land, not mineral, of the alternate reserved sections of public lands along the lines of any one of the railroads or other public works in the United States wherever public lands have been or may be granted by acts of Congress, and to receive a patent therefor under and by virtue of the provisions of the act to secure homesteads to actual settlers on the public domain, and the acts amendatory thereof, and on the terms and conditions therein prescribed, and all the provisions of said acts, except herein modified, shall extend and be applicable to entries under this act, and the Commissioner of the General Land Office is hereby authorized to prescribe the necessary rules and regulations to carry this section into effect, and determine all facts necessary therefor.'

"By these provisions, the Homestead Law of May 20, 1862, and the acts amendatory thereof, are so far modified as to allow entries to be made by the parties mentioned therein, of the maximum quantity of one quarter section, or one hundred and sixty acres of land held at the double minimum price of $2 50 per acre, instead of one-half quarter section, or eighty acres, as heretofore.

"In case of a party desiring to avail himself thereof, you will require him to file the usual homestead application for the tract desired, if legally liable to entry, to make affidavit according to the form hereto annexed instead of the usual homestead affidavit, and on his doing so, allow him to made payment of the $10 fee stipulated in the act of May 20, 1862, and the usual commissions on the price of the land at $2 50 per acre, the entry to be regularly numbered and reported to this office in your monthly homestead returns.

"Regarding settlement and cultivation, the requirements of the law in this class of entries are the same as in other homestead entries.

"Very respectfully, your obedient servant,
Jos. S. Wilson, Commissioner."

LIST OF LAND GRANT RAILROADS.

"Department of the Interior,
"General Land Office, Sept. 19, 1870.

"*Hon. Wm. Lawrence, Bellefontaine, O.:*

"Sir—Pursuant to your request of the 12th instant, I have the honor herewith to present a statement showing land grant railroads in the following named States and Territories, along which there are alternate reserved sections subject to entry under the Homestead and Pre-emption Laws, as well as an estimate of the quantity subject thereto along each line of road:

MICHIGAN.

	Acres.
Jackson, Lansing and Saginaw Railroad, from Hillsdale to Traverse Bay; estimated quantity of reserved alternate sections undisposed of	450,000
Port Huron and Milwaukee and Detroit and Milwaukee Railroads, from Port Huron to Grand Haven; estimated quantity undisposed of	75,000
Flint and Pere Marquette Railroad, from Flint to Marquette; estimated quantity undisposed of	200,000
Grand Rapids and Indiana Railroad, from Fort Wayne, Indiana, to Traverse Bay; estimated quantity undisposed of	300,000
Marquette and Ontonagon Railroad, from Marquette to Ontonagon; estimated quantity undisposed of	250,000
Chicago and Northwestern Railroad, from Marquette to mouth of Menomonee river; estimated quantity undisposed of	275,000
Total acres	1,550,000

IOWA.

Iowa Falls and Sioux City Railroad, from Dubuque to Sioux City; estimated quantity undisposed of	150,000
McGregor and Sioux City Railroad, from McGregor to a point in O'Brien county; estimated quantity undisposed of	200,000
Sioux City and St. Paul Railroad, from Sioux City to St. Paul, Minnesota; estimated quantity undisposed of	125,000
Sioux City and Pacific Railroad, from Sioux City to Fremont, Nebraska; estimated quantity undisposed of	25,000
Total acres	500,000

WISCONSIN.

West Wisconsin Railroad from Tomah to Lake Superior; estimated quantity undisposed of	600,000
St. Croix and Lake Superior Railroad and branch to Bayfield, from St. Croix to Superior and branch to Bayfield; estimated quantity undisposed of	550,000
Chicago and Northwestern Railroad, from Fond du Lac to Green Bay; estimated quantity undisposed of	300,000
Portage, Winnebago and Superior Railroad, from Portage City to Bayfield, and thence to Superior; estimated quantity undisposed of	1,200,000
Total acres	2,650,000

MINNESOTA.

St. Paul and Pacific Railroad from St. Paul to mouth of Siouxwood river; estimated quantity undisposed of	650,000
Branch of St. Paul and Pacific Railroad from St. Paul to Crow Wing; estimated quantity undisposed of	800,000
Minnesota Central Railroad from St. Paul to Iowa State line, range 18 west; estimated quantity undisposed of	400,000
Winona and St. Peter Railroad from Winona to St. Peter; estimated quantity undisposed of	750,000
St Paul and Sioux City Railroad from St. Paul to Sioux City Iowa; estimated quantity undisposed of	500,000
Lake Superior and Mississippi Railroad from St. Paul to Duluth; estimated quantity undisposed of	550,000
Minnesota Southern Railroad from Houston to Big Sioux Lake; estimated quantity undisposed of	400,000
Hastings and Dakota River Railroad from Hastings west to a point on State line; estimated quantity undisposed of	300,000
Total acres	4,850,000

MISSOURI.

Hannibal and St Joseph Railroad from Hannibal to St. Joseph; estimated quantity undisposed of	150,000
Atlantic and Pacific Railroad from St. Louis *via* Springfield to State line; estimated quantity undisposed of	200,000
Cairo and Fulton Railroad from Cairo to State line of Arkansas; estimated quantity undisposed of	50,000
Total acres	400,000

ARKANSAS.

Cairo and Fulton Railroad, from point on State line in Randolph county, *via* Little Rock to State line of Texas; estimated quantity undisposed of	550,000
Memphis and Little Rock Railroad, from Memphis to Little Rock; estimated quantity undisposed of	250,000
Little Rock and Fort Smith Railroad, from Little Rock to Fort Smith; estimated quantity undisposed of	400,000
Total acres	1,200,000

KANSAS AND NEBRASKA.

Kansas Pacific Railroad, from Omaha to a point near Ogden, in Utah; estimated quantity undisposed of	9,000,000
St. Joseph and Denver City Railroad, from St. Joseph to Denver City, Colorado Territory: estimated quantity undisposed of	1,000,000
Kansas and Neosho Valley Railroad, from eastern terminus of Union Pacific to a point on Red river; estimated quantity undisposed of	1,200,000
Southern Branch of Union Pacific, from Fort Riley to Fort Smith, Arkansas; estimated quantity undisposed of	850,000
Total acres	12,050,000

NEVADA.

Central Pacific Railroad from a point near Ogden in Utah to Sacramento, California; estimated quantity undisposed of	8,500,000

CALIFORNIA.

Central Pacific Railroad from a point near Ogden in Utah to Sacramento; estimated quantity undisposed of	1,000,000
Western Pacific Railroad from Sacramento to San Jose; estimated quantity undisposed of	800,000
California and Oregon, from Roseville to Portland, Oregon; estimated quantity undisposed of	1,200,000
Southern Pacific, from San Jose to a point on Colorado river; estimated quantity undisposed of	300,000
Stockton and Copperopolis; estimated quantity undisposed of	250,000
Total acres	6,250,000

OREGON.

Oregon and California Railroad from Portland to Roseville, California; estimated quantity undisposed of	1,250,000

COLORADO TERRITORY.

Kansas Pacific Railroad from a point on Missouri river in Kansas to Denver City; estimated quantity undisposed of	2,000,000
Denver Pacific Railroad from Denver City to connect with Union Pacific in Wyoming Territory; estimated quantity undisposed of	2,600,000
Total acres	4,600,000

UTAH TERRITORY.

Kansas Pacific to a point near Ogden	2,500,000
Also statement showing the estimated quantity of alternate reserved sections now and to be hereafter made subject to homestead entries as the surveys on the line of the Northern Pacific Railroad progresses, as follows: Estimated quantity for that portion of road in Wisconsin	1,000,000
Estimated quantity for that portion of road in Minnesota	2,000,000
Estimated quantity for that portion of road in Oregon	1,500,000
Estimated quantity for that portion of road in Washington Territory	3,800,000
Total acres	8,800,000

"Herewith I have the honor to inclose several of our circulars dated August 9, 1870, containing the amendment of July 15, 1870, the Homestead law, which provides that soldiers and sailors can make homestead entries of alternate reserved sections along the several railroad lines, each to the extent of 160 acres, the law not, however, relaxing in any respect the requirements of the Homestead statutes as to actual *bona fide* continuous settlement and cultivation.

"The foregoing estimates are the result of a cursory examination, which of course are ap-

proximate and liable to change in an exact adjustment.

"Very respectfully, your obedient servant,
"Jos. S. Wilson, Com."

Central Railroad and Banking Company of Georgia.

The earnings of this road for the years ending November 30, 1868 and 1869, were as follows:

	1868.	1869.
From up freights....	$567,332 72	$849 838 44
" down freights.	1,064,976 65	952,591 55
" through pass'ge	122,889 42	145,053 86
" way passage...	224 353 77	273,510 98
" U. S. mails....	29,168 75	26,925 00
	$2,008,721 81	$2,247,919 78
Expenses, viz:		
Transportation....	$314,362 57	$299,514 63
Motive power....	347 947 22	409,219 09
Cars	164,385 85	171,208 35
Repairs of road....	378,759 66	252,780 19
Stock killed....	8,565 25	9,599 50
Incidentals	36,654 46	51,095 63
Repairs of buildings..	26 569 16	29,792 63
Construction....	6,820 90	....
	$1,284,065 10	$1,323,210 02
Net earnings....	$724,656 21	$924,709 76

It will be seen that while the earnings of the road have been $239,198 47 greater than the previous year, the expenses have only increased $39,144 92, notwithstanding an expenditure of $111,020 38 for rails, engines and tools for the machine shops, paid for during the year over and above what was paid in 1868.

The gross earnings of the road for the past fiscal year have been....	$2,247,919 78
And the earnings of the Bank.....	77,280 42
Total Road and Bank.....	$2,325,200 20
Road expenses of all kinds.... $1,323,210 02	
Bank expenses..... 20,231 78	
	1,343,441 80
Leaving net....	$981,758 40
Appropriated as follows:	
Interest on bonds.... $54,950 00	
Dividend in June, 1869, 5 per cent.... 233,340 00	
Government tax on same 11,667 00	
Dividend Dec., 1869, 5 per cent.... 233,340 00	
Government tax on same 11,667 00	
Rent A. and S. R. R. .. 73,000 00	
Rent E. B. Railroad.... 14,000 00	
Paid for Bank in liquidation 14,630 07	
Paid for depot lots and right of way to new depot in the City of Macon 184,404 75	
Paid for steamboats Julia St. Clair and Baudy Moore 56,964 14	
Paid for contingent exp. 19,050 00	
Appropriated for rails.. 124,000 00	
	981,012 96
Leaving a balance of	$745 44

after paying all expenses on account of the Road and Bank. In this connection it is proper to remark that, under the head of expenditures on account of the road, there is included the purchase of new engines, cars and rails; and payments have been made for Bank in liquidation, depot lots and right of way to new depot in the City of Macon, purchase of steamboats Julia St. Clair and Bauuy Moore, contingent expenses and appropriated for rails to be delivered, the sum of $349,048 96; leaving nothing that is known to be paid at a future day, and thus placing the Company upon a more substantial basis than ever before since the war.

Looking to the completion of other lines, which may not only become competitors for the business heretofore passing over your road, but seeking to carry it from our port, the Board have, under an Act of the Legislature of the State of Georgia, approved the 22d day of January, 1852, leased the Southwestern Railroad upon the following terms and conditions, viz:

1st. The lease to continue during the entire corporate existence of the Southwestern Railroad Company.

2d. the Central Railroad and Banking Company of Georgia to exercise all rights, privileges and control over the Southwestern Railroad, except as to the organization of that Company, which is to be kept up by the election of a President, Directors, Secretary and Treasurer, as heretofore: the expenses necessary to keep up this organization to be paid by the Central Railroad and Banking Company of Georgia.

3d. Possession and control of the Southwestern Railroad by the Central Railroad and Banking Company of Georgia to take effect from and after the 24th day of June last. After the 1st day of December, 1869, the commencement and termination of the fiscal year of the Southwestern Railroad to be the same as that of the Central, and to that end a dividend of two dollars and fifty cents per share is to be paid to the stockholders of the Southwestern Railroad up to 30th November, 1869.

4th. From and after the 1st day of December, 1869, the Central Railroad and Banking Company of Georgia is to pay to the Southwestern Railroad Company dividends which shall bear to the dividends declared and paid to its stockholders at the rate of eight to ten—that is to say, eight dollars to each share of Southwestern Railroad stock for every ten dollars declared and paid to each share of its own stock; and no semi-annual dividend to the stockholders of the Southwestern Railroad Company shall be less than at the rate of seven per centum per annum on the par value of their stock.

5th. Should any additional dividend or division of assets or accumulations be declared, paid or made, then such dividends, divisions of assets or accumulations shall be made in the same proportion of eight to ten. All dividends to be paid to the stockholders of the Southwestern Railroad Company at Macon and Savannah free from tax to the stockholders.

6th. The Central Railroad and Banking Company of Georgia to pay the current expenses incident to the working and management of the Southwestern Railroad, and all debts and bonds, including the bonds of the Muscogee Railroad, and interest on said bonds at the times and places specified therein.

7th. The Central Railroad and Banking Company of Georgia are to keep the road bed, station houses, engines, cars, and everything appertaining to the interest of the Southwestern Railroad in as good condition as when received, and any failure or neglect to pay any interest on bonds, or bonds at maturity, or failure to pay dividends within six months after the same may be due, then the Southwestern Railroad Company has the right, at its option, to annul the contract of lease, and enter upon its property as though no lease had ever been made.

This lease was made after the most careful consideration of the whole subject by the Directors of the two companies, and it is confidently believed to be just and fair to each. The Southwestern Railroad having been built under the auspices, and to a very considerable extent, by the means of the Central Railroad, it was considered but reasonable that the heretofore close alliance between the two companies should be continued, and it was foreseen that this could not be guaranteed in any other way than by a lease. There was no desire on the part of this Company to exact any more than a fair and liberal arrangement, nor was it expected that the lease would ever operate injuriously to the patrons of either road, or the towns tributary to them. On the contrary, it is confidently believed that the interest of all will be subserved. Notwithstanding this expectation on the part of the Board, there has been an injunction granted to restrain us from "consummating" the lease. The final result of this injunction cannot, of course, be known, but it is not perceived how we can be restrained from doing that which has already been done, for this Company have not only been in possession of the Southwestern Railroad since the 24th of June last, but have made, and are yet making, very considerable improvements, involving an actual expenditure of large sums of money, all of which has been done under and by virtue of an Act of the Legislature of the State of Georgia, passed for the express purpose of allowing the parties to do exactly that which has been done.

In the original construction of the road, the citizens of Macon, by a vote in town meeting, expressed their opposition to the road crossing the Ocmulgee River, and the Company, although persuaded that the interest of all parties would be promoted by a different course, acquiesced in the expression of their wishes. More recently the sentiment of that city has undergone a very decided change, and early in the year 1868 the Board determined to cross to the west bank of the river and locate a new freight depot, so soon as an eligible site and the right of way, with the necessary privilege from the city could be procured. At the time this was determined upon, it was supposed that the improvement would cost not far from two hundred and fifty thousand dollars. We have now obtained a site (the old Court House Square) upon which to locate the depot, and the City Council have granted the privilege of crossing the streets to it. The purchase of the Court House Square and the necessary lots to approach it, with the right of way on the east bank of the river necessary to make the change, except from one party, has been obtained. The cost of this property thus far has been, as before stated, $134,404 75. This is considerably more than it was expected we should have to pay, and, with the work necessary to be done, including a warehouse and offices, will probably swell the entire cost of the improvement to near three hundred thousand dollars. From this, however, may be deducted the value of property that will not be required for depot purposes. This may amount to as much as one hundred thousand dollars, especially if, as we believe, that part of the city improves by the establishment of the depot in it.

In order to give time to make these improvements of the most substantial character, and spread the payments so as not to interfere with the regular dividends, a temporary structure has been erected, and we are now transacting the business of the road terminating at Macon on the west bank of the river. To do this it became necessary to deliver goods at the domicil or place of business of the consignee. This has been in operation since the 1st day of November, and has been found to work very satisfactorily.

In the last annual report reference was made in general terms to competition that might be looked to from the construction of rival lines, as well as those then in existence. To those remarks exception was taken by parties that considered themselves aggrieved, and at the time considerable feeling was engendered in the public mind against this Company for taking steps to protect itself from a ruinous competition; but, as the acts of this Company were never intended to be aggressive, this feeling has measurably subsided, and it is now believed that those who were the most violent in their denunciation of our acts, have come to see that we only sought to protect investments already made, without in any way oppressing either the public or other lines of transportation. With reflecting minds it has become a well settled principle that all internal improvements ought not only to be self-sustaining, but pay a reasonable return to the parties making the investment, and whenever this principle is acted upon by lines in competition with us, the

Board have no hesitation in saying that your road will be one of the best paying institutions of the country. It is true that madness may rule the hour, but this must be an exception, as the law of nature is in opposition to such a course, and whenever reason is allowed to act free from all feeling, prices will be charged for transportation commensurate with the cost, including a reasonable return for the capital invested.

In the report heretofore referred to, a concise statement was made as to the aid given, in connection with the Southwestern Railroad, to the Montgomery and West Point, as well as the Western railroads of Alabama, and inasmuch as there have been exceptions taken to the terms and conditions upon which this aid was given, it may not be out of place to state here that prior to the war the two lines—that is, the one via Charleston and Augusta and your Company—agreed to subscribe to the stock of the Western Railroad of Alabama, and endorse its bonds jointly. This aid, with private subscription, would enable that Company to build the connecting link between Montgomery and Selma, thus forming a continuous line from the Atlantic at Charleston and Savannah with the Mississippi river at Vicksburg. Since the termination of the war application was made by the President of the Western Railroad to the two lines for a renewal of their original promise of aid to make this most important connection. After due deliberation this Company agreed to join with the line via Charleston and Augusta and give the aid asked. But the line from Charleston declined. Thus the matter stood for some months, when upon a further application from C. T. Pollard, Esq., President of the Western Railroad of Alabama, for the necessary aid, in consideration of important advantages to this line, it was agreed by this Company and the Southwestern Railroad Company to give the aid as stated in the last annual report, and thus ensure the construction of this important connecting link between the Atlantic Ocean and the Mississippi river. After these arrangements had been made, sundry vague complaints against the policy of this Company found circulation through the public prints, reflecting upon the course adopted by this Company to aid in the completion of the line referred to. Feeling that those complaints were entirely without foundation, an offer was made some months since to the line via Charleston to come in, even now, jointly with this Company and the Southwestern Railroad, to the aid of the Montgomery and West Point and Western railroads of Alabama, and in consequence of such joint aid to enjoy an equal property-interest, and equal privileges with us for all business from Montgomery and beyond. To this proposition no positive response has been made until within a very few days, when a meeting was had and views interchanged, looking to a joint obligation on the part of the two lines, and equal privileges to the two ports of Charleston and Savannah. What will be the final result of this negotiation, the Board are now unable to say. Should it be an agreement to bear equally the burthens, and share alike the benefits of this connection, then of course there will be an end to all further complaint. On the contrary, if the line via Charleston and Augusta should think it to their interest to decline to come into an arrangement so eminently just and liberal, then it must forever remove the pretended ground of complaint against the policy of this Company.

The company have 52 locomotives, 27 first class and 14 second class passenger cars, 9 mail, 23 baggage and package, 3 express, 22 conductor's, 444 box, 170 platform, 14 stock and 3 provision cars. Miles run by locomotives, 953,711; by cars, 8,325,163. Total number of passengers carried, 152,474, an increase as compared with the previous year of 57,468. Bales of cotton transported, 360,580, against 388,127 in 1868—an increase of 2,453. Pounds of guano, salt and lime carried, 88,764,310, an increase of 62,977,909.

New Bridge over the Harlem River.

Travelers by the New Haven and Harlem Railroads will doubtless feel gratified to learn that a new, handsome and substantial iron bridge is to be constructed over the Harlem River at the head of Fourth-avenue, during the present Fall and approaching Winter months. The work of erecting piers of solid masonry for the new bridge has been carried on during the close of navigation in Winter for several years past, but as the work thus far completed makes no show to the casual passer-by in the trains, very few are aware of the progress made.

The four stone piers already erected for the support of the stationary spans are oblong in form, each forty by fourteen feet on the face. The centre pier for the draw or swing-span will be octagonal in form, thirty-three feet across the face.

Each of the stationary spans of the bridge will be 161 feet long. The draw or swing span will be 200 feet long, so that, after deducting the width of the centre pier, upon which the draw will turn, and those portions of the two piers on which the ends of the draw will rest when closed, there will be a clear opening on each side of the draw for the passage of vessels 85 feet wide. Steam will be used as the motive power in opening and closing the draw.

The entire work will be done in the most thorough manner, according to plans prepared by I. C. Buckout, Esq., Engineer-in-Chief and Superintendent of the Harlem Railroad. The piers being of solid masonry, it is believed that they will last for ages.

The expense incurred for the erection of the piers, notwithstanding their durable character, and the difficulties encountered in doing the work without interrupting the passage of trains, will not exceed $80,000, while the iron columns, filled with concrete, of the new iron bridge over the Harlem River, at the upper terminus of the Third avenue, less durable than stone, cost the city about $500,000.

The superstructure of the new railroad bridge will be built of iron, upon the most approved principles. It will weigh about 25,000 pounds to the lineal foot, and is estimated to sustain a weight of 6,000 pounds per lineal foot. The construction of the stationary spans of the bridge will be commenced immediately, and the draw or swing span and the centre pier at the close of navigation on the Harlem River above the bridge, as the opening of the draw will not then be required before the completion of the work.

New Railroad from Pittsburg to Chicago.

The securing of a new and independent route, direct to Chicago and the great Northwest, has been claiming the attention of the Baltimore and Ohio Railroad Company for some time. This it is proposed to accomplish by building a line from Pittsburg to Chicago, north of the Pittsburg, Fort Wayne and Chicago Railroad. A considerable portion of the route has already been surveyed, and wherever the line runs the people are enthusiastic upon the project, and say they are determined to assist the company in putting the line through in the shortest possible time. Much of the right of way, it is supposed, will be given at a nominal sum. The estimated cost of this road, for which a favorable route is practicable, is $9,000,000. Of this amount $2,000,000 will, it is understood, be contributed by the owners of the Baltimore and Ohio Railroad. It is expected that the people along the line will raise $3,000,000, and of the remaining $4,000,000 Chicago ought certainly to provide a liberal share.

The present shortest route between Washington and Pittsburg is:

Washington to Baltimore	40 miles.
Baltimore to Harrisburg	85 "
Harrisburg to Pittsburg	253 "
Total	378 miles.

On the completion of the Connellsville and Point of Rocks Railroad the distances will be:

Washington to Point of Rocks	45
Point of Rocks to Cumberland	109
Cumberland to Pittsburg	150
Total	304

This route brings Pittsburg and Chicago about 74 miles nearer to Washington than by the shortest present route.

The Baltimore and Ohio system has hitherto suffered on account of the want of railway bridges across the Ohio, a facility in which the Pennsylvania Railroad system has possessed great superiority. This company is now building two great bridges over the Ohio river, at Parkersburg and Bellaire, which will be finished in a few weeks. These bridges are spoken of as superior structures, excelling anything of the kind in the United States, being no less than magnificent monuments of architectural skill and engineering ability, embodying alike greatness, strength and durability, such as only a powerful company like the Baltimore and Ohio could erect. Upon the completion of the bridges cars can be taken to all parts of the West without change to either freight or passengers. Heretofore barges have been provided at both places for a year past for the transfer of freight and passengers, previous to which time everything had to be transhipped.—*Cumberland Civilian.*

☞ Three Howe truss bridges are in process of construction on the line of the St. Paul and Chicago Road. At Hastings, Minn., the Vermillion river is crossed by one 128 feet long; another which is partly finished is to be stretched across Canon River Slough near Red Wing, Minn. The Canon river itself will be crossed by another bridge just commenced, 188 feet in length.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, October 15, 1870.

Stock Exchange and Money Market.

Money has been in better demand, chiefly for speculative use, at the Gold and Stock Exchanges, especially the latter. The offerings of capital thus far, however, have been quite liberal, and rates have not varied essentially, the figures on call loans having been uniformly 4@6, generally 5@6 per cent. per annum. The mercantile inquiry has been good; but all strictly prime to good business paper has met with a comparatively ready sale at from 7@9 per cent. per annum. The city banks in their last weekly returns, show a general falling off in their averages, the deposits showing a decrease of about 3⅜ millions; the legal tender reserve, of nearly ⅞ths of a million; and the specie hoard, of $675,340. The loans have been cut down nearly 1⅜ millions. The circulation has also been been contracted. The Treasury disbursements through the local office have been on an enlarged scale, and the currency balance has been reduced considerably, with a moderate decrease, reported likewise in the coin reserve. Of the 1871 five per cents, now being redeemed, by the Sub Treasurer, under the recent order, nearly two millions have already been offered to the Government, for retirement; and the amount of money thus far paid out on this account is $1,727,472. Toward the close on Wednesday Money was in more urgent request on call, and quoted at 5@7 per cent. per annum.

The specie reserve of the city banks according to the latest return is $12,597,641, against $21,513,526 same time last year. The city bank deposits are now $187,701,117, against $179,214,675 week ending Oct. 9, 1869. The legal tender reserve amounts to $50,275,226, against $52,017,588 same time last year. The circulation now stands at $32,593,209, against $24,178,925 same time last year. The loans are now $264,981,329, against $250,749,974 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $75,948,742 a day, against a daily average of $75,080,739 the preceding week. The current weeks' exchanges average about 78½ millions a day. The city banks, last week, reported a loss of $675,340 of specie, $3,354,457 of deposits, and $808,866 of legal tender notes. They reduced their loans, $1,305,272; and their circulation, $124,990.

The city bank exchanges on Wednesday were about 75⅝ millions.

The coin reserves of the Treasury Department on Monday were $98,481,014, including about 13½ millions on deposit on private account; currency balances, $26,348,433.

National Bank notes to the amount of $421,000 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $333,776,237, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,610,718 leaving, with the existing 1,612 banks, (having an aggregate capital of $427,235,701,) an actual circulation at this date, of $300,165,519. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,960,550; and for the public deposits, $15,981,500—making a total of $358,942,050. The Treasury Department last week redeemed and destroyed $512,874 of worn and mutilated fractional currency, and issued $1,393,159 of new.

The U. S. Sub-Treasury receipts, week ending with Oct. 8, were $4,232,587 in coin, (including $3,005,000 from customs duties,) and $3,553,706 in currency; payments, $4,470,301 in coin, (including $298,441 of coin interest,) and $5,822,424 in currency; balance at the close of the week, included $60,816,082, of coin, against $61,054,494 the preceding Saturday, and $5,595,328 of currency, against $7,364,046 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $627,095 in coin, (including $540,174 from customs,) and $291,072 in currency; payments $89,310 of coin (including $27,127 of coin interest), and $396,181, of currency. On Tuesday, receipts, $657,616 in coin (including $640,075 from customs), and $1,408,206 in currency; payments, $208,477 in coin (including $31,252 of coin interest) and $346,530 of cur-

rency. The balance at the close of business on Tuesday included $6,546,896 of currency, and $61,808,705 of coin, against a balance a week previous of $7,643,204 currency, and $61,808,705 coin.

The aggregate receipts of the U. S. Sub-Treasury in September were $45,989,731, including $14,704,035 from customs; aggregate payments, $57,093,400, including $3,988,005 of coin interest.

The U. S. Sub-Treasurer issued in September $1,137,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $2,-621,138 of coin certificates, received for customs.

Government revenues have been yielding more satisfactorily, since our last. The excises, during the week yielded $4,033,567; customs at the port of New York, $2,920,739, and at the outports about a million (in coin) more, making the grand total income for the week equal to about $8,-542,415 in currency. The income of the Government, from excises, since July 1, 1870, has been $55,810,153.

The Gold speculation has been on a more confident basis, and the range of the price has been from 112¾ to 114, closing on Wednesday at 113⅞ against 113⅛ the preceding Wednesday. The customs demand has been liberal. The export drain has been comparatively light. The Treasury office sold on Wednesday one million of gold at 113.45 to 113.70. The aggregate of the bids was $3,540,000.

According to the official programme of the Treasury Department for October, Government will sell Gold as follows: Wednesday, Oct. 19, $1,-000,000; Wednesday, Oct. 26, $1,000,000. And buy in Five-Twenties as follows: Thursday, Oct. 20, $2,000,000; Thursday, Oct. 27, $2,000,000.

The export drain last week was $802,174 against $465,260 week ending with Oct. 1; $1,345,408 week ending Sept. 24, less than a million week ending with Sept. 17; 1⅜ millions week ending Sept. 10; 1⅛ millions week ending Sept. 3; 2¼ millions week ending with Aug. 27th, about three millions the week ending with August 20th, 3⅞ millions the week ending with Aug. 13th, and nearly 7 millions the week ending with Aug. 6th. The shipments thus far this year have been over 50 millions, against nearly 27 millions same time in 1869; 66⅜ millions same time in 1868; 42½ millions same time in 1867; nearly 54 millions same time in 1866; and 23 millions same time in 1865. On Wednesday of the current week, the specie exports were $151,000 by the *Java*. The exchanges at the Gold Exchange Bank, which were 36½ millions on Thursday of last week, were 36¼ millions on Saturday, 39½ millions on Monday of this week, and 48 millions on Tuesday. On Wednesday they were nearly 40 millions.

The coin balance of the U. S. Sub-Treasury on Thursday morning was $62,228,589.

The customs demand for Gold last week, averaged $500,834 a day; thus far, this week, it has averaged $540,129 a day, or equal to a weekly aggregate of $3,240,774. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $19,865; and since Jan. 1, 1870, $8,259,754, against $14,565,429 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $114,038,488 against $105,872,038, same time in 1869.

The exports of specie, from this port, last week, were $802,174 against $460,248 same week last year; and since Jan. 1870, $50,032,246, against $26,932,036 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $293,441; and since Jan. 1, 1870, $67,071,-180 against $69,543,017 same time in 1869.

The customs revenue of the port on Wednesday was $388,121; and the coin interest disbursements were $45,608.

The customs revenue at the port of San Francisco, from Jan. 1 to Sept. 29th, was $6,347,000, against $6,241,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Sept. 29, were $26,115,000, against $29,067,000 same time last year.

Foreign Exchange has been depressed and lower, on a freer offering of bills and a very moderate inquiry, closing heavily. Bankers' sixty day bills on London closed on Wednesday at 108⅜@108¾; sight bills on London, 109¼@109½. The offerings of produce bills have been more liberal. The week's exports of domestic produce have been to the currency value of $4,-574,389, and since January 1, 1870, $141,559,068 against $151,976,583, same time in 1869.

Government securities have been in more demand and quoted stronger in price, particularly the later issues of the Five-Twenties, and the Ten-Forties, which closed buoyantly, on a comparatively slight offering.

State bonds have been quiet throughout the week but generally firm in price.

Railway bonds have been in moderately active request, for investment purposes at fairly supported prices. Central Pacific Sixes, have been more sought after, closing on Wednesday firmly at 90⅜@90½. The September earnings of the Central Pacific Road were $833,412 50 the largest of any month of the year, and of any month thus far in the history of the enterprise, making the average monthly earnings, thus far, in 1870, $649,919, against an average of only $472,569 a month in 1869. The earnings up to this time in the current year have shown a very encouraging increase in nearly every month of the year. The Union Pacific Sixes closed firmly on Wednesday at 83⅛@83⅜. The registered First Mortgage bonds of the Chesapeake and Ohio Railroad have been in moderate demand at 90 per cent. and accrued interest.

Railway and miscellaneous share property has been in more confident speculative demand at generally stronger though variable prices, closing however, heavily and irregularly.

The latest quotations at the London Stock Exchange compare as follows with former returns:

At. and Gt. West	26	26	—

At Frankfort on Wednesday, U. S. Five Twenties were quoted at 95.

U. S. sixes of 1881 closed here on Wednesday of the current week at 114@114⅛; U. S. Five-Twenties of 1862, 112¾@113; U. S. Five-twenties of 1864 at 111½@111⅝; U. S. Five-Twenties of 1865 at 111⅞@112; U. S. Five-twenties of 1865 consolidated, 110½@110⅝; U.S. Five Twenties of 1867, 110½@110⅝; U. S. Five-twenties of 1868, 110⅝@110⅞; U. S. Ten-forties at 106¾@107; U. S. Six per cent. currency bonds, 111⅛@111⅜.

General business has been rather more animated in the line of domestic produce. Breadstuffs and Provisions have been firmer but irregular. Naval Stores stronger, Petroleum cheaper, Cotton, much depressed by free receipts. Middling upland cotton closed heavily on Wednesday at 15¾ cts. per lb. The stock of cotton now here is given at about 25,000 bales. The receipts at the port this week, have averaged about 4,-250 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 191,775 bales, against 203,233 bales same time in 1869–'70; exports same time 44,300 bales, against 44,100 bales same time in 1869–'70; stock on hand at latest dates, 143,500 bales, against 102,775 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870 have been 12,602 pkgs., against 16,871 pkgs., same time in 1869. From Boston, 4,946 pkgs. in 1870, against 6,211 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves of good quality have been in better request and firmer; we quote the range at from 9@17c. per lb.; week's receipts, 4,595. Milch cows in more demand at $40@$100 each, receipts, 68. Veal calves have been more saleable at from 5@12½c. per lb.; receipts, 3,365. Sheep in fair request at from 4½@6¾c.; lambs at 6½@9¼c. per lb.; receipts, 33,957. Hogs have been in demand at 9@9½c, per lb., all live weight; receipts, 17,197.

Foreign merchandise has been less active, yet prices have been quoted steady, as a rule. The dry goods entries at this port, last week, were $2,963,-406, making with the general merchandise imports, a total of $6,852,635, against $7,058,078 the preceding week.

Ocean freights have been more active and firmer though irregular. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s.@2s. 3d. by steamer per bbl.; grain at 6½@7d. by sail, and 8¼@8⅝d. by steamer per bushel; cotton at ¼@⅜d. by sail and ⅜d.@½d. by steamer per lb.; and heavy goods 17s. 6d.@27s. 6d. by sail, and 20s.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 466.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending October 11th, and since the beginning of the year:

	1869.	1870.
For the week	$5,284,857	$4,574,389
Previously reported	146,691,726	136,984,679
Since Jan. 1	$151,976,583	$141,559,068

The imports for the week ending Oct. 8, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,490,685	$2,968,406
Gen. merchandise	2,413,346	3,889,229
Total for the week	$3,904,031	$6,852,635
Previously reported	236,412,729	231,508,622
Since January 1	$240,316,760	$238,361,257

The following quotations of sales of Railway

and other securities are n addition to those given elsewhere in our columns:—

New York.—Louisiana 6s, 70; do. 6s, new, 66¼; California 7s, 112⅛; Ohio 6s, 1875, 102; North Carolina 6s, special tax, 23⅜; South Carolina 6s, new, Jan. and July, 67½; Georgia 6s, 81; Arkansas 7s, issued to Little Rock and Fort Smith R.R., 68; Alabama 8s, 101½; do. 5s, 72; St. Louis and Iron Mountain 1st mort., 86; Milwaukee and St. Paul 1st mort., Iowa Div., 87½; Toledo, Peoria and Warsaw 1st mort., E. D., 85; do., W. D., 79; Chicago and Milwaukee 1st mort., 90; Albany and Susquehanna 2d mort., 92½; Central of New Jersey new bonds, 101; Ohio and Miss. consol. bonds, 87⅝; Cleveland, Painesville and Ashtabula 7s, 1892, 90½; Hannibal and St. Joseph 8s, con., 107; Quincy and Toledo 1st mort., 82½; N. Y. and N. H. R. R., 150½; do. 6s, 99; New Jersey R. R., 114½; Rome, Watertown and Ogdensburg R. R., 120; Sixth Avenue R. R., 125; American Coal, 35; Maryland Coal, 27; Western Union Tel., 39⅛; do., 7s, 92; Adams Express Co., 67½; U. S. Exp., 36½; Wells Fargo Exp., 42; Am. Mer. Union Exp., 43; Brooklyn 6s, W. L., 92¾; Central gold, 0.18; Quartz Hill gold, 0.21.

Philadelphia.—Oil Creek and Allegheny River R. R., 44¼; do., bonds, 80⅜; Pennsylvania and New York Canal 7s, 92¼; Wilmington and Reading 7s, 91; Pennsylvania Canal, 26; Sunbury and Erie 7s, 101½ West Jersey 6s, 90½; do., 7s, 95; Lehigh Nav. conv. Loan, 78; Morris Canal Boat Loan, 77; Ridge Avenue R. R., 7; Philadelphia City 6s, prior to 1862, 103½; Pennsylvania State 5s, coupon, 103½; Pittsburg 6s, 1871, 98; do. 5s, 73; N. Y. and Middle Coal Fields, 5. The latest quotations are: City 6s, 101¾@102; do. free of tax, 102@102⅛; State 5s, coupon, 103@105—; do., 6s, W. L., 104@—; do., 1st series, 104@105; do., 2d series, 105@106; do., 3d series, 110@111; Reading, 50⅞@51; do., 7s, 1893, 105@—; do., mort. 6s, 1880, 97@97½; Camden and Amboy, 115⅛@115¾; do., mort. 6s, 1889, 96⅝@97¼; do., 1883, 92¼@92¾; do., 1889, 92@92¼; Penn. R. R., 60¾@61; do. 1st mort., 102@102¾; do., 2d mort., 100½@—; Little Schuylkill R. R., 42@42½; Morris Canal, 25@30; do., pref., 65@70; do., 6s, 80@84; do., scrip 7s, 65@—; Susquehanna Canal, 5¾@6½; do., 6s, 45@46; Schuylkill Nav., 7@8½; do., pref., 16@16¼; do. 6s, 1882, 73@73¼; Elmira and Williamsport pref., 39@40; do., 7s, 1873, 92@92¼; do., 5s, 57@—; Lehigh Coal and Navigation, 33⅝@33¾; do., 6s, 1884, 82¾@83; do., R.R. Loan, 88½@89; do., Gold Loan, 88⅞@89; North Pennsylvania, 42¼@42½; do., 6s, 96@96; do., 7s, 93@94; do., Chattle 10s, 109@—; Philadelphia and Erie, 27@27½; do., 6s, 89@—; Minehill, 52@53; Catawissa, 11¼@14; do. pref., 38⅞@39; Lehigh Valley, 58⅝@58¾; do. 6s, 96⅛@—; do., 6s, reg., 98⅛@99½; Fifth and Sixth streets, (horse,) 37@40; Second and Third, 50@50¼; Thirteenth and Fifteenth, 21@21; Spruce and Pine, 24¾@26; Green and Coates, 39@40; Chestnut and Walnut, 44@44½; Hestonville, 15@15¼; Union, 43@—.

Boston.—Vermont Central 1st mort., 85; do., 2d mort., 86¾; Cincinnati, Sandusky and Cleveland R. R., 16⅛; do., 7s, 1890, 76; Mansfield and Framingham R. R., 1st mort., 7s, 90; Michigan Air-Line 8s, 1889, 106¼; Stanstead, Shefford and Chambly 7s, 82¾; Maryland and Delaware 6s, 1885, 69; Kalamazoo, Allegan and Grand Rapids 8s, 93¾; Old Colony and Newport 6s, 96; do., 7s, 1877, 103; Phila., Wil. and Balt. 6s, 1887, 94¾; Burlington and Missouri 7s, Land Grant, 1893, 90; Eastern R. R. 6s, 1889, 96; Central Pacific 7s, 1883, 100; Vermont Central and Vermont and Canada 8s, 102½; Missouri River, Fort Scott and Gulf 10s, 102; Indianapolis and Cincinnati R. R., 14¼; Conn. and Passumpsic Rivers pref., 85¼; Nashua and Lowell R. R., 133; Concord and Portsmouth R. R., 20@20½; George's Creek Coal, 60@62; Atlantic Coal, 1.50@3.00; Bare Hill, 0.00@0.20.

☞ At the recent annual election for directors of Erie Railway Company Hon. Wm. M. Tweed acting as Chairman, and H. N. Otis as Secretary. Resolutions were adopted approving the present management. The vote for the three directors to serve five years was as follows: Homer Ramsdell, 304,038; Justine D. White, 300,938; Charles G. Sisson, 300,968.

☞ The Montreal *Gazette* says that a new company is about to be formed for the purpose of constructing a line of railway from Joliette to connect with the North Shore Railway at Rawdon.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST.,
NEW YORK, Oct. 8, 1870.

☞ THE PRICE OF THE LAST ISSUES OF Five-twenties to-day is 110½—that is a $1,000 bond will bring, in cash, $1,105.

The price of Central Pacific bonds to day, is 90⅜—that is, a $1,000 bond can be bought for $903 75.

The Central Pacific Railroad is well and economically managed, and its revenues are large, certain and constantly increasing, as is shown by the following statement of its earnings since its beginning:

	Gross.	Op. Expenses.	Net.
1865..	$401,941 92	$121,669 53	$280,272 39
1866..	864,917 57	200,710 61	664 206 96
1867..	1,470,653 50	430,918 33	1,139,740 17
1868..	2 300,767 17	843,166 54	1,457,600 63
1869..	5,670,822 25	2,993,523 19	2,677,299 06

The earnings of the main line for the current year will exceed $8,000,000, and are as follows:

January	$413,104 41	June.	$729,274 46
February....	394,176 47	July	784,099 64
March	488,332 91	August...	806,040 00
April	633,758 06	Sept.	833,422 50
May	768,719 77		

The bonds are dealt in with the same facility as Five-twenty Bonds, and have a market at all the great money centres in the world, such as London, Frankfort, Amsterdam, and at the New York Stock Exchange. We unhesitatingly advise our friends and customers, who may be thinking of making investments, or exchanging their Five-twenties, to take these bonds as suitable, safe and advantageous.

We buy and sell Government Securities and Central Pacific Bonds, make collections, and allow interest on deposits. FISK & HATCH.

☞ The Philadelphia *Telegraph* says that the contract for the railroad between Thurlow Station Depot on the Philadelphia, Wilmington and Baltimore railroad, along the river Delaware to Chester, has been taken by Michael Horning, Esq., and it is to be completed within four months. The road is to be built under the provisions of the general railroad law, and the proprietors are represented by Messrs. John M. Broomall and Wm. Ward, of Chester, who are the chief parties in interest.

☞ The North Pennsylvania Railroad Company has just completed a survey for an extension of their line from Bethlehem through Northampton to Portland, on the Delaware, Lackawanna and Western Railroad; the object being to connect Philadelphia by a direct route with the Delaware Water Gap.

☞ The Harrisburg, Portsmouth, Mount Joy and Lancaster Railroad Company is ready to pay to the holders of its bonds the amount of difference between the depreciated currency payment of interest made to them on the 1st of July and coin, as the difference existed on that day—say about 12 per cent.

☞ Contracts have been made with the directors of the Montpelier and Wells River railroad company by Mr. N. C. Munson of Boston, for the entire completion of the road within two years.

Journal of Railroad Law.

RAILROAD COMPANIES—CONTRIBUTORY NEGLIGENCE.

The case of Martin *vs.* The Western Union Railroad Company, (23 Wis., 437,) was an action to recover damages for the loss of goods destroyed by fire at the City of Beloit, through the alleged negligence of the defendant. The allegation as to the negligence was as follows: that defendant ran a train of cars at an unlawful and unusual rate of speed, out of said city, and within said city limits, in a most reckless, negligent and careless manner, by opening the grates and flues under and around the locomotive engine boiler, thereby allowing fire, coal, sparks and cinders to be thrown in all directions in and about the plaintiff's premises, thereby setting fire to the plaintiff's goods. Verdict and judgment for plaintiff and defendant appealed.

The following is the able opinion of the Court delivered by

DIXON, C. J.—Where the evidence for want of which a motion for a nonsuit ought to have been granted, is afterward supplied, the error in refusing to allow the motion is cured. The judgment will not be reversed, nor a new trial granted, merely because the evidence was not before the Court when the nonsuit was asked. Barton *vs.* Kane, 17 Wis., 37. The rule applies here, and is decisive of all the grounds taken in support of the motion for nonsuit, except the last. Evidence was subsequently given that the place where the train was running, and where the fire occurred, was, as averred in the complaint, within the limits of the City of Beloit.

The last ground for the motion involves the same question subsequently presented by the instruction asked by the defendant, and which was refused, and may best be considered in connection with that instruction. The complaint in substance, alleges the negligence of the defendant in causing the fire to have consisted in running the train at an unlawful and unusual rate of speed within the city limits, and in opening the grates and flues under and around the engine boiler in a reckless, negligent and careless manner, thereby allowing fire, coal, sparks and cinders to be thrown in and about the premises occupied by the plaintiff. Of the latter allegation no proof was given; and the question is, whether the plaintiff can recover upon proof of negligence in the former particular only. Counsel for the defendant, while apparently conceding that the running of the train at an unlawful rate of speed within the city limits would be sufficient to charge the company with the loss, if that alone had been alleged, yet, as the other acts of negligence are also averred, insist that they, too, must be proved before there can be any recovery on the part of the plaintiff. We have no doubt that the danger to buildings and other adjacent property liable to injury and destruction by fire, caused by the emission of coals and sparks from the engine when in rapid motion was one of the mischiefs which the statute limiting the rate of speed through cities and villages was designed to prevent, and are consequently of opinion that for losses so occasioned by trains moving at a greater rate of speed than the statute prescribes, the company is responsible. With this view of the law, which is not seriously contested, it would not seem material to the plaintiff's right of action in this case, that the other acts of negligence set out in the complaint were not proved. It is not, as argued by counsel, the averment of one kind of negligence in the complaint and proof of another at the trial, but the averment of negligence in two different respects, either of which is sufficient to authorize a recovery, and proof upon trial in one respect only. The latter we suppose to be admissable within all the rules of pleading and evidence.

The next question arises upon the motion for a new trial, and is as to whether there was any evidence upon which the jury were authorized in finding that the train was running at a rate exceeding six miles an hour. The testimony upon this point is conflicting. The plaintiff testifies that the train was running very fast; that she never saw a freight train run so fast through the city before nor since; and that she should think it was running at least eight miles per hour. Mary Wilkinson, another witness on the part of the plaintiff, testifies that she saw the train running very fast, and throwing a good deal of fire, and that the cars were runring faster than usual, which drew her attention to the train. Two witnesses on the part of the defendant, the engineer and baggageman on board the train, testify that it was not running to exceed five miles per hour. Here, certainly, was not an entire want of evidence to support the verdict. The question was not one to be settled with the greatest certainty by the testimony of witnesses; and whether the jury should believe the plaintiff and her witness, or the witnesses of the defendant was a question for the jury to determine. There may have been circumstances attending the examination of the engineer and baggageman which led the jury to discredit them. Other facts may have had their influence, especially the strongly corroborative one as to the length of time occupied in running the train to the next station, a distance of over nine miles, in twenty-five minutes. Allowing twelve minutes for the running of the first mile at the rate of five miles per hour, according to the highest rate of speed fixed by the engineer and baggageman, and the other eight miles and upwards must have been run at the rate of nearly forty miles per hour, with a train consisting of seventeen freight cars and a caboose. With this fact before them, by the testimony of the engineer himself, the jury may very reasonably have believed that both he and the baggageman were mistaken in their estimate of the time occupied in running the first mile, and that the rate exceeded six miles per hour; and if the jury did so believe, who shall say that they were in error? Certainly we cannot, and still more certainly are we unable to say that the verdict is wholly unsupported by evidence, as we must do before the judgment can be reversed upon this ground.

The only remaining question is as to the alleged negligence of the plaintiff in permitting about one-fourth of a pane of glass to be out of the window of her house, through which the sparks are supposed to have passed and set fire to the clothing upon the inside. It does not appear when the glass was broken, or that the plaintiff knew it before the time of the fire. But suppose it had been broken for a long time, and the plaintiff knew it, it is but an exceedingly slight circumstance upon which to base the charge of negligence against her so as to prevent a recovery. The burning happened at a warm season of the year, when it is customary for most people, and convenience and comfort require them, to keep the windows of their houses wholly or partially open. Suppose, in such a case, that the plaintiff's window had, according to the general custom, been open, and the sparks had entered in that way, would it have been such a careless or improper use of her house as would have defeated the action? Are the occupants of adjacent dwellings required to exercise so much care to prevent accidents of this nature happening from trains passing at an unlawful rate of speed, that they must, contrary to common usage, keep the windows closed when it would otherwise be most convenient and comfortable to have them opened? It seems clear to us that both these questions must be answered in the negative; and if they are, then the question here presented must also receive a negative answer. If it would not have been negligence in the plaintiff to have had the windows open at the time, it clearly was not that a small part of a pane of glass was gone, and that she had neglected to have it replaced.

It follows from these views that the judgment must be affirmed.

Judgment affirmed.

List of U. S. Patents.

Issued for Improvements in Railroad Construction, Rolling Stock, &c., for the week ending Oct. 4, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

No.

107,863.—Slide Valve, George B. Brayton, Boston, Mass.

107,867.—Casting Valve, Chamber and Seat, John K. Burke, Rochester, N. Y.

107,904.—Preserving Wood, Joshua R. Hayes, Washington, D. C.

107,923.—Car Pusher, Rufus Lane, Freeport, Ills; assignor of half his right to W. G. Moore, same place.

107,928.—Hot Air Engine, Chas. P. Leavitt, New York, N. Y.

107,934.—Water Indicator and Alarm, Mirabeau, New Albany, Ills.

107,945.—Balanced Slide Valve, George F. Morse, Portland, Me.

107,950.—Railway Car Coupling, Nathan Norris, Buchanan, Mich.

107,955.—Fricton Roller for Railway Car Trucks, Jethro Peneille, Lockport, N. Y., assignor to himself and Cornelius Hood.

107,970.—Adjustable Time-Table, Loyst J. Smith, New York, N. Y., assignor to himself and H. D. Blake, same place.

107,971.—Car Coupling, same parties as above.

107,976.—Construction of Steam Boilers and Tanks, Henry J. Stein Hannibal, Mo.

107,977.—Steam Pump, Chas. L. Stevens, Galesburg, Ills., assignor to himself, Albert A. Dentan and D. G. Dentan.

107,983.—Locomotive, James Miller Ure, Glasgow, Gt. Britain.

107,988.—Railway Car Coupling, Geo. W. Wheat, Philipsburg, Pa.

107,998.—Nut Lock, Jonathan Bell, New York, N. Y.

108,016.—Rotary Engine, Samuel Gibson, Lancaster, assignor to himself and J. W. G. Wierman, York, Pa.

108,055.—Composition for covering Steam Boilers and for other purposes, John Riley, Troy, N. Y., assignor to the United States and Foreign Salamander Felting Co.

Issued for the week ending Oct. 11, 1870, and each bearing that date.

108,107—Railroad Ticket, Charles A. Chamberlain, Pittsburg, Pa.

108,123—Apparatus for bending R. R. Rail, Geo. D. Emerson, Calumet, Mich., (ante-dated Sept. 26, 1870).

108,124—Car Coupling, Lewis A. Evans, Chester, Pa., assignor to himself and W. C. Boatwright, same place.

108,130—Car Roof, John Garry, Cleveland, Ohio.

108,136—Trunnion for Steam Engine and Calendar, Thos. Hill, Vallejo, Cal.

108,137—Valve Gear for Steam Engine, Thos. Hill, Vallejo, Cal.

108,142—Railway Rail Joint, Geo. A. Huddart, Brynkir, Wales.

108,148—Rotary Engine, Henry Jamelson, Williamsburg, N. Y.

108,156—Steam Engine, Frank E. Kirby, New York, N. Y.

108,162—Governor for Steam Engine, John D. Lynde, Philadelphia, Pa.

108,188—Piston Rod Packing, Edwin A. Richmond, San Francisco, Cal., assignor to himself and Charles Watson, same place.

108,223—Nut Lock, Sheperd H. Wheeler, Dowagiac, Mich.

108,254—Car Coupling, William F. Grasler, Muncy, Pa.

108,277—Railway Car Axle Box, Geo. F. Lynch, Milwaukee, Wis.

Illinois Central Railroad.

A dispatch dated Chicago, Ill., October 11, says—"Yesterday the Illinois Central Railroad took possession of 134 miles of railroad, embraced in the recently completed Iowa Falls and Sioux City Railroad. The acceptance of this line, running from Fort Dodge to Sioux City, gives the Central Company an unbroken connection between Chicago and the principal city of the Upper Missouri. On the completion of the Sioux City and Pacific Railroad the extended line will strike the Union Pacific Railroad at Fremont, 54 miles west of Omaha. The Illinois Central is also interested in the construction of a proposed line to connect St. Paul with one of the northern termini of the Minnesota Railroad, leased by the Central Company. They are likewise extending their encouragement to the completion of two rival lines, from St. Louis to points on the Illinois Central road proper; the Belleville route, intersecting the Central at Duquoin, and the Central and Southern Railroad at Ashley."

Internal Revenue Decision.

Mr. George E. Langston, of Baltimore, recently addressed the following queries to the Commissioner of Internal Revenue, at Washington:

1. A railroad company issues bonds, say, for $1,000,000. They do not give a mortgage to secure the bondholders, but the city endorses the bonds and the company gives the city an indemnifying mortgage to secure the city from loss. What is the stamp on the mortgage? By series 5, No. 10, page 15, I suppose it is an *agreement or contract*.

2. The bonds will be put on the market from time to time as needed. What stamp will they require? Mortgage rate $1 for $1,000, or 5 cents for $100.

3. Notes under $100 are exempt from stamp duty 1st October. Does this apply to time drafts also under $100?

4. The tax or deeds of gift (section 132) ceases after 1st October. How are such documents to be stamped? As agreements 5 cents per sheet or as conveyances at estimated value of the property conveyed?

To which acting Commissioner, J. W. Douglass, replies under date of September 26, 1870, as follows:

First—"What is the stamp on the mortgage given by a railroad company to the city to secure the latter from loss for endorsing the company's bonds?" I reply that the said mortgage being given to secure a surety from loss, is taxable only as an agreement or contract. (Page 15 of series 5, No. 10.)

The second question is—"The bonds, being put on the market from time to time, as needed, what stamp will they require?" I reply that they will need 50 cents for every $500, or fractional part thereof, and 5 cents on the city's guaranty.

The third question runs—"Notes under $100 are exempted from stamp duty 1st October, does this apply to time drafts also under $100?" I reply it does not. The only papers exempted from stamp duty in act of July 14th, 1870, are promissory notes for sums less than $100, assignments of mortgages in cases where the instruments thereby secured are duly stamped, and receipts for money or for the payment of debts.

The fourth and last question reads—"The tax on deeds of gift (section 132) ceases after the 1st of October. How are such documents to be treated—as agreements 5 cents per sheet, or stamped as conveyance at estimated value of the property conveyed?" I reply that the repeal of taxes on legacies and successions does not affect stamp duties, "A deed of gift" must be stamped as a contract or agreement.

Improvement in Horse Cars.

It is well known to persons familiar with the operation of street railroads that the most laborious part of the horses' work is to get a car under headway from a dead stop, and that this alone wears and strains horses more than all their other work. This is especially the case on an upgrade, since it is almost impossible to let go the brake at just the right moment, or soon enough to avoid having the horses draw against the brake and at the same time prevent the car running back, thus adding to the draft. A remedy, it appears, has at length been found in an apparatus which was first tried upon a car of the Troy and Albany Horse Railway Company, and was very successful. The apparatus has since been attached to a car of the State Street Railway.

The device consists of a ratchet-wheel, fixed to the axle of the car, and a lever, provided with a pawl and operated by a chain and rod, through the medium of an eccentric pulley attached to the bottom of the car; the rod connects with a sliding bar, beneath the platform, forming a hook at its outer end, to which the horses are attached in the usual manner.

It is designed to attach the mechanism to each axle of a car so as to operate in both directions. When the car is reversed the pawl is raised from the ratchet-wheel by means of a cord extending to the rear platform, and thus can interfere in no way with the motion of the car in the other direction. The object of the invention is to equalize the draft, so that in starting a car the resistance would be no greater than in running it, and this result they have apparently attained.—*Albany Journal.*

Railroads of Arkansas.

MEMPHIS AND LITTLE ROCK.

Everything looks hopeful for the completion of this enterprise by the 1st of January. The piers of the White river bridges are already built above the water, and by the 10th of November all the masonry work, abutments, etc., will be completed, ready for the iron bridge, which has been ordered. In the Cache bottom the weather being favorable the work is progressing satisfactorily.

LITTLE ROCK AND FORT SMITH.

On Saturday thirty-five miles of this road were completed. The Cadron has been reached, and there now remains but fourteen miles of iron to be laid to put us in communication with Lewisburg. Track laying progresses at the rate of about a mile per day. The 5th of October, at the furthest, will find the party at Lewisburg, when regular trains will commence running. The road bed is completed and the ties put down ready for the iron for eighty miles, and thirty miles more are under contract. This carries us one hundred and ten miles from this city. Iron is constantly coming forward, and the hope is entertained that there will be no more delays on that account.

CAIRO AND FULTON.

The first twenty miles of this road on the north side of the river will be completed, ready for the iron, on the 1st of October, at which time track-laying will be commenced. Arrangements have been made with the Iron Mountain road to complete the balance of this road north of here. Six miles of railroad iron was sent to the Iron Mountain Company recently from Devalls Bluff by the contractors of the Cairo and Fulton and Fort Smith roads, to be used on this work.

From here, south, about twenty miles of the road has been located. The time of commencing work on it has not yet been fixed—*Arkansas Gazette*, Sept. 27.

Iron Trade of Lake Superior.

The following is a comparative table in gross and net tons, of the amount of iron ore carried over our two railways, up to the 1st inst.:

	Gross tons.	Net tons.
Over M. and O. R. R.	350,027	392,305
Over C. and N. W. R.	321,457	357,864
Total	671,484	750,169

The following is a comparative table showing the shipments of ore from the ports of Marquette and Escanaba, for the season, up to the 1st day of October:

Iron Ore:	Gross tons.	Net tons
From Escanaba	319,075	357,864
From Marquette	306,052	342,778
Total ore	625,127	700,642
Pig Iron:		
From Escanaba	5,557	6,224
From Marquette	20,676	23,157
Total pig iron	26,233	29,381
Total ore and pig iron	651,360	730,023

Illinois Central Railroad.

The statement of this Company for the month of September, 1870, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	5,531.56 for	$55,058 43
Acres Int. Fund Lands sold	40.00 for	440 00
Acres Free Lands sold	440.00 for	9,425 00
Total sales during month of Sept., 1870	6,011.56 for	$64,923 43
To which add Town Lot Sales		165 00
Total of all	6,011.56 for	$65,088 43
Cash collected in Sept., 1870		$206,988 95

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 267 Miles.	Total. 974 Miles.
Freight	$476,945 00	$94,878 00	$571,823 00
Passengers	170,013 63	45,372 70	215,386 33
Mails	6,375 00	1,029 08	7,404 08
Other sources	74,000 00	1,970 92	65,970 92
Tot. Sept., '70.	$727,333 63	$143,205 70	$870,584 33
Total actual earn'gs, Sept. 1869	$819,786 83	$159,613 93	$979,400 76

☞ The Jackson *Patriot* says: "The Michigan Air Line Railway Company is building a track from this city to the Fort Wayne Road, four miles South. It had been the intention to use the Fort Wayne track for the trains of both roads, but it was feared by the managers of the new road that the arrangements would cause a great deal of inconvenience. The new track will run parallel with and in close proximity to the one already down."

☞ The Parkersburg bridge over the Ohio at Parkesburg, West Virginia, connecting the Marietta and Cincinnati with the Baltimore and Ohio road, consists of thirty-six spans, and is 4,110 feet, or a little over four-fifths of a mile long. Nine of the spans, or 952 feet of the length are on the Ohio shore. The six channel span stretch over a space of 1,541 feet. On the West Virginia shore there are twenty-one spans covering a space of 1,620 feet.

☞ The St. Louis, Council Bluffs and Omaha Railroad Company, is the name of the new organization, formed by the consolidation of the Chillicothe and Brunswick, Chillicothe and Omaha, St. Louis and Council Bluffs Companies. This consolidation was effected at St. Louis after a full consultation by and representation of all the interests.

☞ The Missouri, Kansas and Texas Railroad was completed to Arlington, sixty-one miles from Sedalia, on the 27th ultimo, and trains are now running to that point regularly.

☞ The surveys for the Holyoke and Westfield (Mass.) Railroad have been completed.

THE NEW JERSEY STEEL AND IRON COMPANY,

TRENTON, N. J.,

And 17 Burling Slip, NEW-YORK,

Would call special attention to their

MARTIN STEEL,

Acknowledged by all who have used it to be the best material now made for

Firebox Plates, Locomotive Crank Pins, Piston Rods, Axles,

And all the finer machine purposes, such as

Rollers for Cotton Machinery, Lathe Screws, Sewing Machine Work, &c., &c.

The special features of this Steel are its ***Remarkable Toughness,*** its softness and entire freedom from hard spots, which obviate the necessity for annealing before turning.

The process by which this Steel is made differs entirely from any other in use, enabling it to be sold at lower prices than any other good steel, while it possesses properties hitherto unknown, and which are of the greatest importance for many uses.

TO CONTRACTORS.

THE AMERICAN AND MEXICAN RAILROAD AND TELEGRAPH COMPANY, at No. 71 Broadway, Room 31, New York, having secured the approval of the Government of Mexico of their surveyed routes from Guaymas to Hermosilla and through the States of Sonora and Chihuahua to the Rio Grande, are prepared to receive proposals for grading the road, furnishing and laying cross ties from Guaymas to Hermosilla, a distance of 80½ miles.

The proposals must be handed in on or before the first day of November next, and be made *for sections* and include excavations of rock and earth, and bridging, and be so made as to enable the Company to ascertain the cost per section as laid down on the Company's map and profile, which are now in their office for inspection. The Company reserves the right to reject any bids which in their udgment they deem advisable.

Per order of the Board of Directors.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

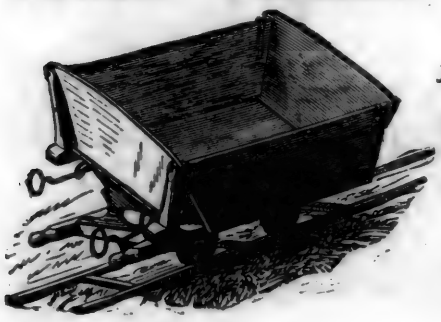
Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.



That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Macon and Augusta Railroad.

The annual meeting of the stockholders of this company was held at Augusta, Ga., on the 11th inst.—the President, George H. Hazlehurst, Esq., in the chair. Sixteen thousand three hundred and nineteen shares of stock were represented by person or proxy. The Secretary of the company read the annual report of the President as follows:

MACON, SEPTEMBER 30, 1870.

To the Stockholders of the Macon and Augusta Railroad Company:

GENTLEMEN—The annual report of the officers of the road is herewith respectfully presented to your consideration.

We were in hopes to have been enabled to announce at the time of this Convention the entire completion of your road, but in spite of the best efforts of all, this result has not been accomplished. It is a great disappointment. Delay in the reception of the iron, the great amount of work to be done, and scarcity of labor have caused the failure.

No money has been spared nor effort left untried to complete the work in time. In addition to such other contractors as could be induced to attempt contracts with free labor, the large convict force of the State, under the charge of Grant, Alexander & Co., were, at an early stage of the contract, placed on the grading. This convict force consisted of five hundred hands with near one hundred carts and teams.

The amount of work to be done embraced some one million and a quarter of yards of material to be moved, much of which proved to be solid and loose rock, some heavy masonry, a long extent of trestle work and pile bridging, 75,000 cross-ties, and an expensive bridge across the Ocmulgee River at Macon.

All of this has been completed and twenty-three miles of track laid, leaving but a few miles of track to close the gap—large gangs of track layers are engaged at either end, and should we not be delayed by the non arrival of the vessel with five miles of iron on board, now overdue, the road should certainly be finished before the end of October. This vessel was consigned to Savannah, in order that we might have the advantage of delivering the iron at the Milledgeville or Macon end as might be required.

In reviewing the contract made with the New York parties for the completion of the road (in spite of the delay in the time of completion, and our present disappointment) it is very evident, that the contract has been of great value to the company. Some near $700,000 was required in cash to finish the road. The slow sale of bonds, our sole assets with the exception of some slight collections from stockholders would have necessitated a tardy prosecution of the work, and we should utterly have failed in completing the road within any reasonable time. The contracting parties have been unable to dispose of but few of the bonds, and are to-day in advance near $400,000 in cash on the work.

Statements of the total cost of the road from Warrenton to Macon, a distance of seventy-five miles show in round numbers $2,250,000 being an average of $30,000 per mile.

While some of the payments were made in Confederate money, yet, in consideration of the fact that the prices of the work were kept down to gold rates, as have been shown in previous reports, it is but just to assume the above average as the true value of the road.

Crossing the broken country between the Ocmulgee, Oconee and Ogeeche rivers, the grading was necessarily heavy and expensive, and I feel confident that the same amount of work could not be done at any less rate at the present time.

The financial condition of the company is good. We shall open the road without one dollar of floating debt. Its bonded debt being in a mortgage bond, bearing 7 per cent. interest. principal and interest guaranteed by the Georgia Railroad on $670,000, and $100,000 not guaranteed, gives a total of $770,000.

It will become necessary to renew, or to replace with permanent embankment, the trestle work, which has been standing many years. With this view, and to make a beginning, a long arched culvert of twelve feet span has been built under the highest trestle on the road, at "Ivey Branch," preparatory to filling up the trestle. Granite of the finest quality is found convenient throughout the whole line; but the work of building the proper culverts, all of them arched, and of filling, will be expensive. It must be done, however, before we can have a good and safe roadway.

To facilitate the filling and to save the expense and difficulty of procuring large gangs of men, a steam excavator has been purchased, which is now in Charleston ready to be put to work. This will not only reduce cost, but enable the trestle to be filled in much quicker time.

Report of earnings and expenditures of the section between Camak and Milledgeville, as made by the Georgia Railroad, give the following results:

Earnings	$59,410 36
Operating expenses	51,561 22
Net earnings	$7,849 14

It is a question which must be considered by you at this convention as to what disposition is to be made of the road when completed. It would seem to be our best policy to continue the control of the road in the hands of the Georgia railroad, provided some good and equitable arrangement could be effected with the company for its working. We have but little rolling stock, in the way of engines and cars, in this respect being altogether dependent on the Georgia railroad.

An amalgamation of the capital stock of this company into that of the Georgia railroad, or a lease of the road to that company on the plan pursued by the Central road towards its branches, would unquestionably present the easiest and best method of settlement, but as the sense of the stockholders in the Georgia railroad cannot be reached until their annual convention in May next, no definite arrangement of that nature can be made until that time.

There can be but little doubt of the value of the road. To secure its greatest efficiency it must, however, be operated as one line, and the trains be made up and run through between Macon and Augusta without change or detention at Camak.

Our route as now completed gives a gain of 29 miles over the present mail route *via* Atlanta, and 41 miles over the line *via* Millen. This can be further increased to a gain of five miles by building five miles of road from Warrenton to the 41 mile post on the Georgia road. This can be done at some future day when the saving becomes more important. The total distance from Macon to Augusta is now 125 miles, which can be made as above stated 120 miles. This reduction of two

hours in the time of travel must attract and concentrate on our road travel between Augusta and Montgomery, which now parts at Augusta, going *via* Atlanta and Millen, to meet again at Opelika.

By availing ourselves of the saving in time and distance effected by this and other contemplated roads, there is little question but that the lines in interest in what is known as the Seaboard route can soon be in a condition to complete successfully for the travel which has been lost to them for so many years. It is within the recollection of many here present, that the entire travel between New York and New Orleans passed over the roads of this State. Recently, however, the greater speed, safety and comfort of the western routes *via* Louisville and Cincinnati, though more circuitous, has diverted this great source of revenue. The East Tennessee and Virginia line has secured a portion of it, but not to the same extent as the western routes.

The great secret lies in the fewer changes of cars—in the greater speed of their trains, obtained not by faster running, but by avoidance of unnecessary stops, in their luxurious sleeping cars, and by the general attention given to the wants of a traveller. Through trains are recognized as through trains, and the effort made to combine a way business with a through is never attempted.

I am induced to introduce these remarks, which are scarcely pertinent to a report, as the adoption of such a system would especially be valuable to our line, which would gain largely by the return of the former travel over the Georgia road. We present the shortest line, as shown, between Montgomery and Augusta, and must be on the great thoroughfare. In the location of the road an especial eye was had to obtaining the straightest line possible and easy curves, regardless of cost. The road bed is of sand and gravel; the track is mostly laid with a heavy T rail, with improved fish-bar fastenings, and we thus believe that we can offer to the travelling public a road which, for speed and safety, will be second to none south of the Potomac. Respectfully submitted,

GEO. H. HAZLEHURST,
President.

After the reading of the Report, a resolution was adopted requesting the President to call a meeting in May, and that in the interim the Boards of Directors be authorized to arrange for operating the road.

An election was then held for a Board of Directors, which resulted in the choice of the following gentlemen: J. V. H. Allen, J. W. Horton, J. D. Butt, J. P. King, G. H. Hazlehurst, W. J. Magrath, B. B. DeGraffenreid, Henry Moore, Geo. S. Obear, A. J. Lane, W. E. Jackson, and J. O. Mathewson.

After the meeting of the stockholders had adjourned, the Board of Directors held a meeting, at which it was determined to continue in their positions the old officers of the company until the completion of the road.

Closer Railway Connections.

Mr. Abbot of Brockville and Mr. Ellis of Prescott, have just closed a large contract for the completion of a railway which will afford additional travelling facilities from this locality. They are about to commence the construction of a road from Morristown (opposite Brockville, on the American shore) to Philadelphia, a station on the Rome and Watertown Railway, up to which point a line is rapidly being constructed from New York, and when the Morristown link and two or three other short links are completed, our citizens will be able to save one hundred miles in distance between this city and New York—over any other existing route. We observe the work is to be commenced immediately, and that the contract price reaches up towards three-quarters of a million of dollars.

The completion of this road will be of immense value to the Canada Central and Brockville and Ottawa Railways—as it is in fact a continuation of those roads and a connection with the whole American system of railways.—*Ottawa Times.*

Atlanta and West Point Railroad.

The earnings of this road for the fiscal years ending June 30, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$130,986 41	$151,358 07
" freight	203,231 85	296,700 38
" mail	8,649 96	8,649 96
" express	6,240 44	9,165 40
" U. S. Gov., etc	13,556 95	2,082 77
	$362,665 64	$467,956 58
Expenses, viz:		
Conducting transp.	$59,810 39	$69,715 55
Motive power	76,412 28	96,477 01
Maintenance of way	73,012 42	82,996 56
Maintenance of cars	8,722 93	19 609 28
Taxes, etc	4,614 31	7,100 00
	$222,572 33	$275,898 35
Earnings less expenses.	$140,093 31	$192,058 23

From which deduct extraordinary expenses in 1869–'70:

New locomotive engines	$27,000	
New cars	6,000	
Re-rolling and purchase of iron rails	20,000	
		53,000 00
Balance net profits		$139,058 23

In 1868–'69 the extraordinary expenses were $20,931 49, leaving the balance of earnings at the close of that year, $119,161 82. The percentage of ordinary expenses to gross receipts in 1869–'70 is 59, against 61.3 for the previous year. The gross earnings show an increase of $105,290 97, and the net profits an increase of $19,896 41. The President in his report says:

It will be seen, by the Superintendent's report, that the gross earnings of the year have exceeded those of the year preceding, the sum of $105,290 97, and an increase of net earnings of $19,896 41 is also shown by the same report. The stockholders are, however, properly reminded, that the sources of this increased profit are not reliable as a basis of calculation for future profits.

Since the restoration of peace, and the change of our labor system, the condition of the country has been, to some extent, abnormal, and the profits of railroads have been fluctuating and uncertain. Whilst some sources of previous profit have been partially dried up, these losses have been compensated by others, not always foreseen or expected. Whilst business has been diverted by new and competing lines, indemnity has been found in more friendly connections, and in the improved resources of the country. On this subject the Superintendent makes very judicious remarks, and the directors on this head will only add, that should our reasonable hopes be realized, and the improved all-rail line between New Orleans and Atlanta be fully realized, as contemplated by the Superintendent, we shall be more than compensated for any loss we have sustained, or may hereafter sustain from other hostile rival improvements. With this improvement, we shall have the favorite route for travel between New Orleans and the North-Atlantic cities, with which no other route will be able to compete—especially in winter—and the large transportation once furnished us by the products of the Louisiana sugar estates, will again be restored to us.

In view of the conflict between friendly and rival interests, the directors will give no confident opinion upon our future profits. It is with much confidence, however, that they venture to coincide with the opinion of the Superintendent—that we shall be able, in any probable event, to continue the payment of eight per cent. dividend, free of all taxes. From the statement of the profit and loss account of the past year, some of the stockholders may suppose that a larger dividend might have been paid. Such opinion would be erroneous, and it is very important that the subject of a legitimate net profit should be well understood by the stockholders. There is no excess of net profit if the excess of receipts beyond disbursements would be absorbed by the restoration of property. The existence of war, to say nothing of its ravages, suspended for several years the supply of material for repair, and much of our property, especially iron, has nearly reached the maximum of decay; and the same may be said of much of our rolling stock. Any apparent excess of profits, therefore, from the year's business, was needed for the restoration of property, and orders have already been given that will more than cover the apparent surplus.

The great embarrassment and injury to our business beyond West Point, by the control of the Montgomery and West Point road by the Central Railroad Company, was referred to by the Superintendent in his last year's report, and reference is again made to it in his report now submitted. The control by the Central Railroad was not the only subject of interest in relation to this important connection. The losses and destruction occasioned by the war had so crippled this road, that its value as a connecting link was greatly impaired, and, without assistance from some quarter, fears were entertained that it might become worthless. Its value, too, as a link in the great Southwestern line, to and beyond Vicksburg, could not be fully realized without completing the last link in that line east of the Mississippi, by building the short road from Montgomery to Selma. An amicable arrangement has been agreed on, by which the road from Montgomery to Selma will be shortly completed, and the whole line from West Point to Selma placed in the condition of a first-class road. This accomplished, and the two lines will be placed upon the same footing "in every particular." This line by way of Vicksburg will evidently, at no distant day, form a part of the Great Southern Pacific Line—with Marshall, Texas, as an initial point, and its Western terminus at San Diego on the Pacific! Upon the advantages of a free and open connection with this line, thus improved, it is unnecessary to dwell. This important object will not, of course, be accomplished without the expenditure of money; and as this Company is by far more interested than the Georgia Railroad, it will probably be expected that it should make a reasonable contribution to the cost.

It will be seen that the expenses and expenditures on account of the road for the last year have been heavy. They must continue to be so until our property is restored and rendered fully adequate to the prompt performance of the business of the Company.

The Superintendent reminds us that a mail has not been lost on our road in four years! This is believed to be unprecedented, and is a sufficient guaranty that the officers and employees have been generally diligent and faithful in the performance of their duties.

The company have 16 locomotives, 6 passenger, 3 baggage, 1 express, 1 cab, 1 shanty, 61 box, 18 stock, and 25 platform cars. Number of through passengers carried, 13,371; number of way passengers, 49,004—total, 62,375; against 50,252 in the previous year, an increase of 12,123. Tons of freight transported, 78,120, against 54,525 in the previous year—an increase of 28,995. The Superintendent in his report says:

Our Cotton Statement shows an increase of 25,066 bales over the previous year, of which 11,438 bales were from our local stations, including West Point, and 13,628 from the Montgomery and West Point Railroad. The latter was transported at very low rates, resulting from the oppressive discrimination against us by the Montgomery and West Point Railroad Company, briefly

adverted to in my previous report. I am advised by you that recent negotiations have resulted in removing this serious drawback to our prosperity, by placing us on equal footing with the Savannah line.

The increase in travel was mainly due to emigration from the Southern Atlantic States to Louisiana, Texas and Arkansas. I do not regard this element of travel as reliable for future estimates. The price of our principal staple, cotton, and other influences, tending to rapid and radical changes, may increase or diminish this source of income.

The general results of the operations for the year may be regarded as encouraging, having exceeded our anticipations. The future is a "tangled web," to my view, in railroad matters. Lines are being built and projected that would seem to threaten our present main reliance for income. Others are in progress that promise to return to our route much of the long tavel which it controlled in the early history of your road, but since diverted by lines offering superior facilities at low rates.

The Savannah, Griffin and North Alabama attacks our local business at Newnan. Two lines from Opelika—one towards Guntersville, the other in the direction of Tuscumbia—if completed, will share, if not control, the business between the Northwest and Columbus, which has heretofore passed over your road. The South and North Alabama, from Montgomery to Decatur, will effectually cut off the traffic we have shared from the Northwest to Montgomery. The shorter line, now nearly completed, between Augusta and Macon, will command a portion of the travel between the South-Atlantic and Gulf, of which we have heretofore had a large share.

These drawbacks will, I trust, be more than compensated by the completion of all-rail routes from Montgomery to Mobile and New Orleans on the Southwest, and Selma and Vicksburg on the West. These, with the completion of a more direct line to Richmond, now in progress, will enable us to compete successfully for the long travel between the North-Atlantic and Gulf States, and will, to some extent, re-instate our former freight relations with New Orleans.

While I am not sanguine of increased net revenue, under present law tariff rates and augmenting expenses, yet I venture to reiterate my confidence in the ability of the Company to maintain the usual dividends from legitimate profits, and have no hesitation in expressing the opinion, that the intrinsic value of the stock is equal to that of any railroad company south of the Potomac.

The Assets and liabilities of the company July 1, 1870, were as follows:

Assets:

Road outfit and real estate	$1,200,261 51
Bills receivable	26,827 20
Supply fund	2,500 00
Due by agents and connecting roads	52,706 42
Cash on hand	70,368 56
	$1,852,163 69

Liabilities:

Capital Stock	$1,232,200 00
Bonds of the company	32,000 00
Dividends unpaid	1,520 00
Due to agents and connecting roads.	3,844 03
Profit and loss	82,599 66
	$1,852,163 69

President.—Hon. John P. King.

Directors.—R. Peters, John E. Robinson, L. B. Lovelace, W. B. Berry, F. Phinizy, John F. Moreland.

General Superintendent.—L. P. Grant.

Secretary and Treasurer.—W. P. Orme.

☞ The work on the Sugar River Railroad is progressing so rapidly that it is hoped the entire line will be opened by the 4th of July next.

Western Union Telegraph.

At the recent annual meeting of the stockholders of this company the following gentlemen were elected directors for the ensuing year: Hugh Allan, Montreal, Canada; James H. Banker, New York; Roswell S. Burroughs, Albion; Ezra Cornell, Ithaca; Horace F Clark, New York; Emory Cobb, Kankakee, Ill.; Alonzo B. Cornell, New York; William E. Dodge, New York; Harrison Durkee, New York; J. Alden Ellis, Chicago; Marvin Green, Louisville; Augustus W. Greenleaf, New York: John A. Griswold, of Troy; James H. Howe, Kenosha, Wis.; Wilson G. Hunt, New York; George Jones, New York; Cambridge Livingston, New York; Edwin D. Morgan, New York; William Orton, New York; Edwards S. Stanford, Brooklyn; Augustus Schell, New York; Hiram Sibley, Rochester; Zalmon G. Simmons, Kenosha, Wis.; John Steward, New York; Moses Taylor, New York; Daniel Torrance, New York; George Walker, Springfield, Mass.; Edward B. Wesley, New York; Stillman Witt, Cleveland. On the 1st of July, 1870, this company possessed 54,109 miles of poles and 112,191 miles of wire, against 52,099 miles of poles and 104,584 miles of wire at the same time last year, being an increase of 1,910 miles of poles and 7,607 miles of wire. The gross receipts for the year ending July 1, 1870, were $7,138,787.96; and the gross expenses $4,910,772.42, making the net profits for the year, $2,227,965.54. In 1869 the net profits were $2,801,457.45—being a decrease of $573,491.91. During the past year there has been an increase of 521 offices, and 833 sets of telegraph apparatus. The number of messages transmitted during the year was 22 per cent. more than for the preceding year. The rates of tolls upon the entire volume of business done for the year ending July 1, 1870, was 20 per cent. less than for the year ending July 1, 1869. The average expense of transmission per message for the year ending July 1, 1870 was 11 2-10 per cent. less than for the year ending July 1, 1869. From October 1, 1869, when the reduced tariff went into operation, to April 30, 1870, the gross receipts were $238,228 98 less, and the expenses were $186,019 13 more than for the same months of the previous year, making a difference in the net earnings of $419,293 11. After the reduction of rates in October last the gross receipts did not come up to those of any corresponding month in the preceding year until May, when they exceeded the same month in 1869 by $6,145 07. As the cost of performing an increased amount of traffic increases in proportion to the service, the net earnings did not come up to any corresponding month in the preceding year until July, when they were in excess of the same month of 1869 by $21,281 92. From October 1, 1869, when the rates were reduced, to March 1, 1870, five months, the net earnings were $847,879 78. From March 1, 1870, to August 1, 1870, five months, the net earnings were $946,863 65, being an increase of $98,983 92, or 11 3-5 per cent. We may, however, said the President, expect much better results than these, for the business of the five months from October 1 to March 1 is generally better than for the five months from March 1 to August 1. Thus from October 1, 1868, to March 1, 1869, the net earnings were $1,207,564 93, and from March 1, 1869, to August 1, 1869, they were $1,032,124, showing that the autumn months for 1868 and 1869 were $175,440 93 better than the spring and summer months of 1869, while, for the present year the spring and summer months are nearly $100,000 better than the preceding autumn and winter months.

Louisville and Nashville Railroad.

At the annual meeting of the stockholders of this company in Louisville, Ky., on the 12th inst., the following resolution was unanimously adopted:

Resolved, That it is the sense of this meeting that the charter of the Louisville and Nashville Railroad Company be so amended that hereafter there shall be nine directors, who shall hold office for three years, the members of the directory first elected after the passage of such amendment to divide themselves by lot into three equal classes, the seats of the first class to be vacated at the end of one year, of the second at the end of two years, and of the third at the end of three years on the retiring of the first class, and annually thereafter three directors to be elected to fill the vacant seats. And the present directory is hereby requested to make timely and proper application to secure such an amendment.

H. D. Newcomb, R. A. Robinson, G. W. Norton, Thomas J. Martin, W. B. Caldwell, W. H. Smith, and James Whitworth, having received 50,869 votes, all that were cast, were unanimously elected directors.

From the Report of the President which was presented, we learn that the gross earnings of the road for the past fiscal year were $2,954,658 80, against $2,381,138 55 for the fiscal year ending June 30, 1869, an increase of $573,520 25. The net earnings for the year ending June 30, 1870, were $1,142,133 33, against $1,031,676 70 for the year ending June 30, 1869, showing an increase of the net earnings for the last year over the previous year of $110,450 57.

The bonded debt of the company, June 30, 1869, was $8,713,500. Of this amount there have been redeemed during this fiscal year $235,500, leaving the bonded debt of the company June 30, 1870, $8,478,000. This sum includes bonds of the City of Louisville, without mortgage, and consolidated mortgage bonds unsold, to the amount of $981,000—making the total mortgage debt at this date, $7,497,000.

Seven per cent. cash dividends have been declared upon the stock of the company during the fiscal year.

There have been redeemed during the year, of the mortgage bonds	$235,500 00
Expended on Lebanon Branch Extension south of Lebanon	178,845 24
Interest paid during the same period	351,930 83
Additional rolling stock and depot grounds	593,107 09
Total	$1,354,383 16

Richmond, Fredericksburg and Potomac Railroad.

At a recent meeting of the stockholders of this company at Richmond, Va., resolutions were passed authorizing a loan of $300,000 to extend the road from Brooks' station to Quantico, where connection will be made with the Alexandria and Fredericksburg railroad, which will make a continuous road from Richmond to Washington. The work on the whole line is under contract and rapidly progressing, and will be completed in twelve months. When this connection is completed trains will run through from Richmond to New York without break of bulk or change of cars.

☞ The Southern Pacific, San Francisco and San Jose, Santa Clara and Pagaro, and California Southern Railroad Companies, are consolidated under the name of the Southern Pacific Railroad.

On the Use of Cast Iron for Compressive Members, in the Construction of Iron Bridges.

A paper read before the American Society of Civil Engineers, June 15, 1870, by F. C. Lowthorp, C. E., Member of the Society.

Having recently had my attention directed to an article published in the February No., 1870, of the Journal of the Franklin Institute, of Philadelphia, Pa., over the initials 'A. P. B.' in which the writer in his attempt at criticising "a work on Iron Truss Bridges for Railroads," by Brevet Col. W. E. Merrill, U. S. A., after quoting the names of numerous authors, arrives at the strange conclusion, that cast iron is an unsafe material to use in such structures.

Believing the article in question—appearing as it did in a leading journal of science—was calculated to mislead many who are deeply interested in the subject, but whose time is so taken up in the discharge of other duties as to prevent their investigating the matter, I have been led to prepare and read before you the following facts and observations:

There have been many bridges built entirely of cast iron, which, so far as I can learn, have answered their purposes admirably. More than eighty years ago a cast iron arch bridge of 240 feet span was built at Wearmouth, England, and upwards of fifty years since another of three spans of 240 feet each, across the Thames at Southwark. Many others have since been erected in the British dominions and on the continent.

On this side of the Atlantic we have at least two notable specimens: one of two spans of 200 feet each across the Schuylkill at Philadelphia, a much admired bridge, designed by Strickland Kneass, Esq. The other a bold and remarkable, and, judging from a photograph I have seen, a handsome structure, built over Rock Creek, at Washington, D. C. This bridge has a clear span of 200 feet, a rise of 20 feet, and a width of 26 feet, 4 inches, and has two supporting arches which are formed of cast iron pipes four feet in diameter, through which is brought the entire water supply of the city. It was designed by Maj. Gen. Meigs, of the U. S. A.

I think it very remarkable indeed that A. P. B., who has enjoyed the great advantage of examining so many authors, should have done it in a manner so superficial as to overlook the results of the numerous experiments of such men as Tredgold, Hodgkinson, Whipple, and Maj. Wade, of the U. S. Ordnance Corps; as also the practical experience of such well known engineers and builders of bridges as Whipple, Bollman, Fink and others; or surely he would not have taken for granted the statements of Mr. Edward Clark, that "Cast Iron Changes its Length nearly twice as much as Wrought iron for every Ton of Imposed Load," and "that it does not recover itself fully after the load is removed, even when that load is but *one ton to the inch*." These properties A. P. B. observes, "are sufficient to give wrought iron the preference for compressive members in bridge construction."

In contradiction to the preceding, I quote the following facts: Hodgkinson, in his experiments on columns or hollow cylinders, the bearings of which were flat or at right angles with their axes, found that those of 48 diameters in length (10 feet long by 2¼ inches diameter,) required a force of 18000 lbs. per square inch to break them, and that others of 84 diameters in length (10 feet long by 3⅛ inches in diameter,) required 26,000 lbs. per square inch to break them. His experiments also demonstrated the fact that columns of the same dimensions having both ends rounded, would require but one-third, and with one end rounded and one flat end, two-thirds of the above forces to break them. In many of the hollow columns tested, at the point of fracture the metal was found to be much thicker on one side than on the other, but they appeared to be generally as strong as those whose sides were of uniform thickness, (see Francis' work on cast iron columns.) Mr. Whipple in his valuable treatise on bridges, page 52, observes, "with regard to the simple positive and negative strength of iron, it is only necessary for me to state in this place, that, as the result of a multitude of experiments, a bar of good wrought iron an inch square will sustain a positive strain of about 60,000 lbs. on the average; and a negative strain in pieces of a length not exceeding twice the least diameter, of about 90,000 lbs. Cast iron resists a positive strain equal to from 15,000 to 30,000 lbs. to the square inch, but usually not over 18,000 lbs., in fact it is seldom relied upon to sustain this kind of strain, and its power of resistance in this way is not so well determined as in the case of wrought iron. But cast iron resists a negative strain even better than wrought iron, its power of resistance being from 80,000 to 140,000 lbs., seldom less than 100,000 lbs. to the square inch, for pieces of a length not exceeding twice its least diameter. But in pieces of such dimensions as must usually be employed in bridges, fractures would take place by latteral deflection, with a much smaller force than would crush the material.

"It is therefore necessary to take into account the length and diameter, as well as the area of cross section, in order to determine the amount of negative strain which a piece of cast iron, or any other material may be relied upon to sustain."

According to the numerous experiments of Maj. Wade, of the U. S. Ordnance Corps, (see Haswell's Engineers' and Mechanics' pocket book, page 484,) we have the following as the comparative tensile, compressive, and torsional strength and hardness of wrought and cast iron:

	Tensile.	Compressive.	Torsional.	Hardness.
CAST IRON.				
Least.....	9,000	84,529	1,660	4.57
Greatest..	45,900	174,120	3,060	33.51
Mean	31,829	144,906	2,760	22.14
WROUGHT IRON.				
Least.....	38,027	40,000	1,296	12.14
Greatest..	74,592	127,720	1,836	14.45

Having had some experience in the construction of Iron Bridges, I will state some of the facts which have fallen under my own observation. During the years 1856 57 I constructed for the C. & F. R. R. Co. of Pa., across the Jordan Creek and Valley, a single track Deck Iron Bridge about 1120 feet long, and 89 feet high; the bridge consisted of eleven spans of 100 feet each, the side trusses (see figures 1, 2, 3,) were double cancel, and were divided into 12 panels each, they were 16 feet high, and were placed 10 feet apart from centre to center. Each lower chord (see fig. 4, C. C. C.) was formed of eight round bolts of wrought iron, which were connected longitudinally with screw swivels (R. R.) and laterally with combination or angle plates of cast iron (D. D.) through which the chord bolts (C. C. C.) pass, the plates being held in position by means of the jam nuts (n. n.)

The end panels had each but one chord-rod (fig 1, C. C.) which was secured to the base plates of the end posts in such a manner as to admit of the free expansion and contraction of the metal in the bridge. All of the post bearings were pivot at the bottom, and knuckle-joint or hinge at top, the posts were of cruciform section, the webs of the end posts were 12 inches wide by ⅜ of an inch thick at the middle, and tapered to about 5″x⅛″ at each end (see fig. 11,) the webs of the intermediate posts varied from 9″x⅛″ to 9″x⅜″ thick at the centre, and tapered to 4″x⅛″ and 4″x⅜″ near the ends, (see figs. 4 & 10,) enlargements, recesses, &c., were made in the posts for the passage of the main rod counter diagonals etc. (See figs. 1, 2, 3, 4, 10, 11.)

The upper chords, (see figs. 4, C. C. C. & F.) consisted of hollow cylinders strengthened with 4 longitudinal webs and were turned off to a square bearing to receive the tenon of the cap F. The plate H to which the floor beams (z. z.) are secured, is made to clamp, loosely, the upper part of the cap F, so as to admit of a free expansion and contraction of the frame of the bridge, the woodwork of the track remaining unaffected.

Cross struts and vertical cross ties were secured at every panel of the bridge, as shown in the end and intermediate sections, (see figs. 2 & 3, v. v. & s. s.) The upper part of the bridge was laterally braced throughout, but there was none in the bottom, except the end panels of each span.

The bridge was supported on trussed piers of cast and wrought iron, which varied from about 30 feet to 54 feet in height, these stood upon and were anchored fast to foundations of massive masonry, which were raised a few feet above high water mark.

The extreme end posts of the bridge rested on abutments of masonry, the back walls of which were carried up to grade. Figs. 1, 2, 3, show a general outline of the bridge and piers, and in the latter the columns P. P. P. were of cast iron of cruciform section, excepting the ends which were cylindrical, and were turned off to fit into each other with tenon and socket joints at the junction of each section of the piers. At bottom each column rested upon a pivot base which was bolted to the coping of the masonry.

The cross struts, which were of round, wrought iron, 2¼ inches in diameter, passed through the columns; they had two screw nuts at each end, (for struts, see s. s. s.) for the purpose of retaining in position the columns and the eyes of the diagonal tie rods, t. t. t.

On the top of each sett of columns (four constituting a sett) was placed a cast iron frame, which for convenience, I call a spider frame. The spider frames were adjusted and held in position by means of four 2¼ inch vertical screw bolts, each about 15 inches long, the bottoms of which were rounded and set in recesses in the top of the columns, the nuts being let into recesses in the underside of the spider frames. Pivot bearings were cast on the top of the spider frames for the end posts of the several spans of the bridge; the spider frames were also connected to each other by the cross struts, tie rods, and a cast iron cornice; the whole being secured to the masonry by means of the guy rods (g. g.) All of the posts and struts of the bridge were used as they came from the foundry, no machine work being required. The difference in the lengths of the posts being adjusted by means of wrought iron washers placed on the pivots.

All the main and counter diagonals, also all of the diagonal tie braces, both in the bridge and the piers, had eyes at each end, but were connected and adjusted with screw swivels. All of the screw ends of the bolts in the bridge and piers, except the struts of the latter, were enlarged.

The contract with the Company required all of the wrought iron work of the bridge to be tested with a tensile strain of 22,400 lbs. per sectional inch; and as there were between 5,000 and 6,000 bolts, it was rather a serious matter. During the operation of testing, several hundreds of the bolts broke in the welded parts, most of them in the eyes, only one broke in the screw part, a highly crystallized ¾ inch bolt.

I recollect one instance in which a full sett of chord rods for one or two panels broke while being tested; they had been welded, or rather an attempt had been made to weld them, and although before testing it could scarcely be seen where they had been united, so very smoothly and nicely had the work been executed, yet after being pulled apart it was scarcely perceptible where there had been any adhesion. On a subsequent occasion while experimenting with a working model of my testing machine, at the Locomotive and Machine Works of Trenton, N. J., I requested the foreman of the smiths' shop to procure a round bar of wrought iron one inch in diameter, about four feet long, and to have an eye formed at each end of the same; cautioning him to see that the welds were perfect. When he returned with the bar I asked, are you sure that the welds are perfect? to which he replied, "I will guarantee them," The bar was placed in the machine and power applied until the force reached 16,000 lbs. when one of the eyes broke, and Maj. Anderson, of Fort Sumpter notoriety, who was witnessing the operation, narrowly escaped having

his leg broken by the cross head flying back. Upon examining the fracture, not more than two-thirds of the weld was found to be sound; on seeing which, the Major remarked, "that shows the importance of having *all welded work* tested."

While testing wrought iron bolts I have noticed in some instances bars have been broken when under a strain of about 60,000 lbs. per square inch presenting a fractured surface of fully one-third crystaline texture, the elongation of the bar being quite small. In one instance, two bars, each 12 feet long, were tested, the one after the other, each bar broke near the middle after elongating about 11 inches under a strain not exceeding 40,000 lbs. per square inch. At the point of fracture the bars were reduced probably 3-32nds of an inch in diameter, the surfaces of the fractured part were entirely fibrous and were too hot to handle without burning the hands.

The Jordan Iron Bridge at the time of its completion was one of the longest, if not the longest in the United States. There were comparatively few Iron Truss Bridges in the country at that time, and they were looked upon rather in the light of an experiment than otherwise.

The first stone of the masonry for the Bridge was laid August 27, 1856, and during the month of July, 1857, it was completed, and was tested with a load of 2,520 lbs. per foot lineal, or 112½ tons gross was placed upon one span and successively pushed and pulled over all the spans for the space of about one hour and a half, to the entire satisfaction of the officers of the company. This Bridge has been in use about thirteen years; and I was recently informed by Joshua Hunt, Esq., the President, that it is now in perfect order, and has cost nothing thus far to keep the iron work in repair.

The extension of iron under a force of 22,400 lbs. to the square inch was uniformly about 1-16 of an inch to every five feet in length, and the contraction precisely the same upon the removal of the strain.

The results of the testing proved conclusively the uncertainty of welded work, and the reliability of screw bolts; and I have ever since felt it to be my duty to use as small an amount of the former as possible. I allow no welds to be made in either the lower chord rods, or the main and counter diagonals of my bridges. Of course I use screw nuts, some of which are made by welding, but the force exerted on the weld can never exceed the one-fourth of that on the bolt, and may answer its purpose even though not quite sound. The cutting of the thread moreover, will test the soundness of the weld, which can readily be ascertained by inspection after the cutting. The breaking of a nut, however, rarely occurs, even though the power exerted should be greater than that which takes place in practical working.

While the second span was being erected I discovered some singular looking spots on the webs of several of the posts, which upon examination proved to be sand flaws, commonly termed honey combed, filled with a mixture of sulpher and plumbago. I had such posts removed, and at the request of the President of the Company, sent one of them—an end post—(see fig. 11,) to Cataqua, where it was placed in a horizontal position in a hydraulic press, and subjected to a compressive strain of 160,000 lbs., which produced little or no deflection in it.

A defective intermediate post was placed in my own testing machine, and subjected to a compressive strain of about 53,700 lbs., which caused a downward deflection of the post of about two inches, more or less, from which it partially recovered on removing the strain.

At the foundry where cast, a sound intermediate post was placed upon props, (see fig. 10,) blocks of wood were placed each side the vertical web at the centre, a rectangular mass of iron of 4,000 lbs. weight was laid on top the blocks, and was mounted by three men of about 150 lbs each. The men then surged up and down awhile, breaking the vertical web from the bottom up to the cross web at a point about one foot from the centre of the post. Five men then got on, and after surging awhile broke it in two. Another of the same kind of posts was tried with precisely the same results. The last two experiments indicate a positive strain of more than 32,500 lbs., and a negative strain of more than 66,000 lbs. to the square inch, not taking the surging into account.

I built a bridge for the Central R. R. of New Jersey, at Bound Brook, the end bearings of the upper chord of which, have neither been turned, planed, or had a tool on them, and yet these parts are constantly undergoing a compressive strain of 14,000 lbs. per square inch.

Another bridge of 92 feet spans on the line of the Newark and New York R. R., when loaded with 2,500 lbs. per foot, lineal, on each track, produces a strain on the upper chord of 19,000 lbs. per square inch, in both cases the elasticity of the metal remains perfect. Several years ago I erected an iron public road bridge, across the Lehigh river at Easton, Pa., the bridge consisted of two spans of 132 feet each; each span had three supporting trusses, there being two carriage-ways, and two outside footwalks; each carriage-way was 11⅛ feet wide, and each footwalk 4 feet wide. The floor beams and all parts acting by compression were of cast iron, and all those acting by tenison of wrought iron. The joists and flooring were of wood. Over this bridge there has been a great deal of heavy teaming, the street railroad is also laid over it. I have been credibly informed that during the late civil war, the troops marched over it keeping step to the music of the fife and drum, and that too, while the bridge was otherwise crowded with human beings. I thought it was rather a foolhardy experiment, as it was quite light and not designed to be so used. I now think that all such bridges should be constructed with such a contingency in view, for should one break down when so laden, the result would be terrible.

The facts I have stated prove beyond a doubt in my opinion, the reliability of cast iron for compressive members in bridge construction, either alone as in an arch, or in combination with wrought iron or steel as in a truss.

(To be continued.)

Commerce of San Francisco.

Our exports of treasure for the first nine months of 1870, compared with those for the similar period in 1869, were as follows;

	1869.	1870.
New York	$10,891,840	$10,513,948
England	9,570,280	8,845,745
France	1,499,874	190,400
China	4,510,713	4,384,961
Japan	2,433,497	1,378,099
Phillipine Islands	8,000	.....
Chili	.....	487,510
Peru	30,780	682,087
Central America	979,487	15,000
Panama	544,191	225,497
British Columbia	29,100	.....
Total	$30,488,762	$26,723,256

The amount of treasure exported from San Francisco in the first nine months of 1868 was $29,058,100, against $31,727,000 for the same time in 1867, and $34,690,000 in 1866.

The annexed table sets forth the character of our treasure exports for the first nine months of 1869 and 1870:

	1869.	1870.
Gold Bars	$11,671,425	$7,571,335
Silver bars	8,930,104	8,864,680
Gold coin	6,784,183	7,208,791
Silver coin	79,000	.....
Gold dust	23,598	6,605
Mexican dollars	1,780,199	3,058,560
Doubloons	6,208	.....
Legal tenders	214,095	13,284
Total	$30,488,762	$26,723,255

The comparison shows a decrease of $4,100,000 in gold bullion, and an increase of $414,000 in gold coin, and $278,000 in Mexican coin. The amount of fine gold exported for the same time in 1868, was $15,536,870.

We give a summary of the export trade of this port for the past nine months, together with a comparison for the corresponding period last year. By months the exports have been as follows:

	Merchandise.	Treasure.	Total.
January	$1,156,888	$3,274,744	$4,431,532
February	981,726	3,199,519	4,181,245
March	1,185,972	3,780,047	4,966,019
April	1,557,854	3,282,929	4,840,283
May	1,096,919	1,736,321	2,832,240
June	911,974	2,704,961	3,616,935
July	1,665,901	3,330,214	4,996,115
August	1,404,845	2,132,641	3,537,486
September	1,557,149	3,281,980	4,839,129
Total	$11,517,728	$26,723,256	$38,240,984

The value of the merchandise shipped hence by sea for the quarter ending Sept. 30, was $4,628,000; against $6,498,600 for the same time in 1869, $6,405,900 in 1868, $6,160,200 in 1867, and $4,107,100 in 1866. Our treasure exports for the past quarter amounted to $3,744,800, against $9,442,500 same quarter in 1869, and $3,196,900 same quarter in 1868. During the first nine months of 1869 our combined exports of merchandise and treasure amounted to $40,732,700, against $45,209,600 same time in 1868, $48,017,800 same time in 1867, and $46,841,600 same time in 1866.

The value of our foreign imports for the nine months under review may be approximately stated at $12,000,000. This is exclusive of the goods received here in bond in transit to other markets outside of California.

There is no way of arriving at the value of our domestic imports, though since Jan. 1 the Panama steamers have brought us free goods to the amount of $3,514,000 in currency, and also merchandise to the value of $124,856 in transit for China. The weight of the goods received by the way of Cape Horn for the same period amounted to 120,000 tons. A large quantity of freight has also been received from the Atlantic States over the railroad. The usual supplies of produce have also been received from various sources on the Pacific coast.

The arrivals of tonnage from all quarters during the past nine months compare as follows with the same period last year:

	1869		1870	
From	Vessels.	Tons.	Vessels.	Tons.
Dom'tic Pacific ports	2,211	440,207	2,230	442,189
Dom'tic Atlantic p'ts.	124	131,950	67	74,588
Foreign ports	346	308,635	341	276,465
Total	2,685	880,792	2,638	793,192

The following table shows the monthly demand for duties on foreign imports at this port and the collections of internal revenue in the San Francisco District for the first three-quarters of the year:

1870.	Customs Receipts.	Internal Revenue.
January	$491,351	$214,646
February	595,991	186,507
March	802,810	285,618
April	679,480	220,098
May	629,126	268,507
June	800,428	514,570
July	682,789	483 395
August	769,963	249,124
September	828,727	292,194
Total	$6,180,119	$2,709,659

The amounts compare as follows with those for the corresponding period in previous years,

	1867.	1868.	1869.
Customs	$5,993,004	$6,560,731	$6,841,866
Excise	3,691,784	3,289,073	2,656,826
Total	$9,684,788	$9,849,804	$8,897,692

The amount collected for internal revenue has been growing less for two years, and will be still smaller in the future.—*San Francisco Bulletin.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, October 22, 1870.

Stock Exchange and Money Market.

The last city bank statement was more favorable than had been anticipated, having shown an increase of ¼th of a million in the legal tender reserve, with only a moderate decrease in the specie item, and the deposits. The loans and circulation were enlarged. The supply of Money on call has been more liberal at from 5@7, generally at 5@6 per cent., with a fairly active speculative inquiry noted, chiefly for Stock Exchange purposes. There has been a free currency for prime to good mercantile paper at fron 7@9 per cent. per annum, with a comparatively moderate offering reported of names grading up to prime. The U. S. Sub Treasury added about 1¼ millions to each of its coin and currency balances. Of the 1871 five per cents, now being redeemed, by the Sub Treasurer, under the recent order, over two millions have already been offered to the Government, for retirement.

In the new London banking house of Messrs. Jay Cooke & Co., Hon. Hugh McCulloch, who is to leave for Europe at an early day, will have as his associate partner, Mr. J. H. Puleston, the accomplished and popular senior partner in the banking firm of Puleston, Raymond & Co., of this city.

The specie reserve of the city banks according to the latest return is $11,610,708, against $20,399,070 same time last year. The city bank deposits are now $187,489,715, against $178,642,936 week ending Oct. 16, 1869. The legal tender reserve amounts to $50,526,279, against $53,229,504 same time last year. The circulation now stands at $32,967,705, against $24,217,114 same time last year. The loans are now $265,275,290, against $248,537,984 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $87,257,885 a day, against a daily average of $75,948,742 the preceding week. The current weeks' exchanges average about 99¾ millions a day. The city banks, last week, reported a loss of $986,933 of specie, and $211,402 of deposits, with a gain of $251,053 of legal tender notes. They increased their loans, $294,461; and their circulation, $374,496.

The city bank exchanges on Wednesday were about 85⅝ millions.

The coin reserves of the Treasury Department on Monday were $98,131,000, including about 12⅜ millions on deposit on private account; currency balances, $25,260,000.

National Bank notes to the amount of $293,701 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $334,069,938, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,807,529 leaving, with the existing 1,612 banks, (having an aggregate capital of $427,235,701,) an actual circulation at this date, of $300,262,409. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $343,592,950; and for the public deposits, $15,981,500—making a total of $359,574,450. The Treasury Department last week redeemed and destroyed $507,500 of worn and mutilated fractional currency, and issued $280,509 of new.

The U. S. Sub-Treasury receipts, week ending with Oct. 15, were $4,444,468 in coin, (including $3,103,000 from customs duties,) and $5,513,509 in currency; payments, $3,181,184 in coin, (including $303,006 of coin interest,) and $4,295,036 in currency; balance at the close of the week, included $62,080,094, of coin, against $60,816,082 the preceding Saturday, and $6,813,809 of currency, against $5,595,328 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $500,338 in coin, (including $343,624 from customs,) and $995,656 in currency; payments $367,797 of coin (including $27,868 of coin interest), and $316,280, of currency. On Tuesday, receipts, $548,674 in coin (including $494,882 from customs), and $212,147 in currency; payments, $119,838 in coin (including $24,579 of coin interest) and $404,146 of currency. The balance at the close of business on Tuesday included $7,301,183 of currency, and $62,641,472 of coin, against a balance a week

previous of $6,546,896 currency, and $62,641,472 coin.

The aggregate receipts of the U. S. Sub-Treasury in September were $45,989,731, including $14,704,035 from customs; aggregate payments, $57,093,400, including $3,988,005 of coin interest.

The U. S. Sub-Treasurer issued in September $1,137,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $2,726,714 of coin certificates, received for customs.

Government revenues have made a fair average yield to the Treasury, since our last. The excises, during the week yielded about 3½ millions; customs at the port of New York, $2,973,714, and at the outports about a million (in coin) more, making the grand total income for the week equal to about $7,970,400 in currency. The income of the Government, from excises, since July 1, 1870, has been about 59 millions.

Gold has been offered more freely and has been quoted lower, ranging from 112½ to 114¼; and closing on Wednesday at 113¼, as against 113⅞ the preceding Wednesday. There has been a less confident speculative call; and less urgency has been noted in the customs and export demand. Government marketed a million of Gold on Wednesday at 112 60@112 77. The aggregate of the bids was $2,811,300. Toward the close, a stronger feeling was apparent in the Government, under freer speculative purchases.

The Gold Exchange held its annual election on Monday, choosing the following officers, and the usual standing committees: President, H. S. Camblos; First Vice President, T. A. Hoyt; Second Vice President, W. M. Whittemore; Secretary, T. P. Akers; Treasurer, R. L. Edwards. The aggregate receipts of the Exchange, last financial year, were $56,276; expenditures, $16,827.

According to the official programme of the Treasury Department for October, Government will sell Gold as follows: Wednesday, Oct. 26, $1,000,000. And buy in Five-Twenties as follows: Thursday, Oct. 27, $2,000,000.

The export drain last week was $654,323 against $802,174 week ending with Oct. 8; $465,260 week ending Oct. 1; $1,345,408 week ending Sept. 24, less than a million week ending with Sept. 17; 1⅜ millions week ending Sept. 10; 1⅛ millions week ending Sept. 3; 2¼ millions week ending with Aug. 27th, about three millions the week ending with August 20th, 3⅞ millions the week ending with Aug. 13th, and nearly 7 millions the week ending with Aug. 6th. The shipments thus far this year have been over 50⅝ millions, against 27⅜ millions same time in 1869; 66½ millions same time in 1868; 43 millions same time in 1867; nearly 54⅛ millions same time in 1866; and 23¾ millions same time in 1865. On Wednesday of the current week, the specie exports were only $179,778. The exchanges at the Gold Exchange Bank, which were 76⅛ millions on Thursday of last week, were 87⅝ millions on Saturday, nearly 53 millions on Monday of this week, and only 26½ millions on Tuesday. On Wednesday they were over 56 millions.

The coin balance of the U. S. Sub-Treasury on Thursday morning was about 62½ millions.

The customs demand for Gold last week, averaged $517,167 a day; thus far, this week, it has averaged $419,008 a day, or equal to a weekly aggregate of $2,514,048. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $229,257; and since Jan. 1, 1870, $8,489,011, against $14,702,820 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $117,269,670 against $109,039,230, same time in 1869.

The exports of specie, from this port, last week, were $654,323 against $1,010,518 same week last year; and since Jan. 1870, $50,686,569, against $27,383,284 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $303,006; and since Jan. 1, 1870, $67,374,186 against $69,783,452 same time in 1869.

The customs revenue of the port on Wednesday was ———; and the coin interest disbursements were about $31,000.

The customs revenue at the port of San Francisco, from Jan. 1 to Oct. 8th, was $6,816,000, against $6,701,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Oct. 8th, were $26,831,000, against $29,417,000 same time last year.

Foreign Exchange has been more active, and quoted firmer, closing strong. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 109½@109¾. The offerings of produce bills have been fair. The week's exports of domestic produce have been to the currency value of $3,196,133, and since January 1, 1870, $144,755,201 against $156,125,800, same time in 1869.

Government securities have been more generally sought after, partly on speculative account, but chiefly for investment purposes; and prices have been quoted stronger, though not very decidedly higher. The offerings have been quite moderate at the going rates.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113⅞@114; U. S. Five-Twenties of 1862, 112⅞@113; U. S. Five-twenties of 1864 at 111⅝@111¾; U. S. Five-Twenties of 1865 at 112⅛@112¼; U. S. Five-twenties of 1865 consolidated, 110½@110⅝; U.S. Five Twenties of 1867, 110⅛@110⅜; U. S. Five-twenties of 1868, 110⅜@110⅞; U. S. Ten-forties at 106¾@106⅞; U. S. Six per cent. currency bonds, 111⅛@111⅜.

State bonds have been lightly dealt in throughout the week, but have been quoted generally firm in price.

Railway and miscellaneous share property has been in decidedly more active speculative demand at generally higher, though unsettled prices,—closing, however, quite heavily, under a pressure to realize, chiefly on speculative account.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 5.	Oct. 12.	Oct. 19.
Cuosols	92⅛	—	92⅝
U. S. 5-20's of 1862	91⅛	91	*89½

Erie	18	18	18¾
Ill. Central	113	—	114
At. and Gt. West	26	—	30

* Ex-Coupon.

Railway bonds have been in rather better request, for investment purposes at firm prices. Central Pacific Sixes, have been more sought after, closing on Wednesday at 90⅜@90½. The Union Pacific Sixes closed firmly on Wednesday at 83⅛@83⅜. The registered First Mortgage bonds of the Chesapeake and Ohio Railroad have been in demand at 90 per cent. and accrued interest.

At Frankfort on Wednesday, U. S. Five Twenties were quoted at 95⅛.

General business has shown more activity in the domestic produce line, but at variable prices. Middling upland cotton closed tamely on Wednesday at 16⅛ cts. per lb. The stock of cotton now here is given at about 27,000 bales. The receipts at the port this week, have averaged about 5,600 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 269,850 bales, against 270,800 bales same time in 1869-'70; exports same time 73,850 bales, against 79,100 bales same time in 1869-'70; stock on hand at latest dates, 177,350 bales, against 127,775 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870 have been 12,986 pkgs., against 18,299 pkgs., same time in 1869. From Boston, 5,010 pkgs. in 1870, against 6,489 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves of good quality have been in less request and lower; we quote the range at from 8@16½c. per lb.; week's receipts, 9,263. Milch cows in demand at $40@$100 each, receipts, 113. Veal calves have been less saleable at from 8½@11½c. per lb.; receipts, 2,684. Sheep in less request at from 4½@6¾c.; lambs at 6½@9c. per lb.; receipts, 42,494. Swine have been in demand at 8⅜@8¾c, per lb.. all live weight; receipts, 22,515.

Foreign goods have been less freely dealt in at about steady rates. The dry goods entries at this port, last week, were $2,259,031, making with the general merchandise imports, a total of $5,018,214, against $6,852,635 the preceding week.

Ocean freights have been quoted stronger, but have not been remarkably active, the scarcity of ship room checking engagements. For Liverpool we quote flour at 2s. by sail, and 2s. 6d. by steamer per bbl.; grain at 8d. by sail, and 9d. by steamer per bushel; cotton at ¼@$\frac{5}{16}$d. by sail and ½d. @$\frac{9}{16}$d. by steamer per lb.; and heavy goods 20s. @27s. 6d. by sail, and 25s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday, 478.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending October 18th, and since the beginning of the year:

	1869.	1870.
For the week	$4,149,217	$3,196,133
Previously reported	151,976,583	141,559,068
Since Jan. 1	$156,125,800	$144,755,201

The imports for the week ending Oct. 15, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,319,456	$2,259,031
Gen. merchandise	2,418,333	2,759,183
Total for the week	$3,737,789	$5,018,214
Previously reported	240,316,760	238,361,257
Since January 1	$244,054,549	$243,379,471

☞ At the annual meeting of the stockholders of the Rockford, Rock Island and St. Louis Railroad Company held in Rock Island on the 12th inst., the following persons were elected directors for the ensuing year: H. H. Boody, Leo Lehman, Henry Budge, D. A. Boody, and O. D. Ashley, New York; J. R. Young, Chicago; Calvin Truesdale, Rock Island; John Moses, Winchester, and David Turnbull, Monmouth. J. R. Young was subsequently elected President, and John P. Whitehead, Secretary.

☞ The Common Council of Portland, Me., have passed an order placing upon equality with the existing mortgage of $700,000, upon the Portland and Rochester Railroad, held by the city, another mortgage of $350,000, to be negotiated by the road, making, in fact, one complete joint mortgage of $1,050,000, fully secured by the entire property of the road. This will enable the company at once to finish and equip the road to Rochester.

☞ Stephen Kenrick, Samuel P. Dow, B. F. Martin, Joseph B. Walker, S. N. Bell have been elected directors of the Concord and Portsmouth railroad company.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES. No. 5 NASSAU ST.,
NEW YORK, Oct. 15, 1870.

☞ THERE IS NOW A CLEAR PROFIT OF 20 per cent. in an exchange of United States 5 20 bonds for the Central Pacific Railroad bonds—in other words, for every $5,000 of the former there may be obtained $6,000 of the latter bonds, bearing the same rate of interest (6 per cent. in coin), not subject to be called in for twenty-five years, and founded upon a security sufficient to satisfy the most critical investors.

The Central Pacific Railroad is one of the most prominent and productive lines on the Continent, and its Securities have a ready and active market, both in this country and in Europe. They can always be converted into money as readily as the bonds of the Government, and their stability and safety are thoroughly established and universally recognised.

Having originally negotiated these bonds, and knowing their value, we make a specialty of dealing in them, as in Government securities, and have no hesitation in recommending them to our friends and customers contemplating investments or the exchange of Five-Twenties.

FISK & HATCH.

Proposed Bridge Across the Delaware.

A board of officers, consisting of Gen. J. C. Woodruff, Col. J. D. Kurtz and Major W. R. King, of the Corps of Engineers of the United States Army, met on the 11th inst., at the office of the United States Engineer, No. 208 South Fifth street, Philadelphia, for the purpose of inquiring into the feasibility of erecting the Speakman drawbridge across the Delaware, and hearing any objections that might be offered. The plan proposed is for a suspension bridge, having a draw with three floors or roadways, diverging from the main floor of the bridge. It is intended that at least one of the draws shall be closed all the time, vessels entering at one end before the draw is opened at the other. Mr. Wm. E. Cramp was before the Board and presented various objections to the bridge, the principal ones being the obstruction of the river by the piers, this causing the ice to lodge, and the inadequate width of the proposed draw, it being seventy feet, while the width of the new city ice boat, for example, is sixty-eight feet, which would render it impossible for her to pass through with safety, having a vessel in tow during the winte rseason. He stated that navigators object very strongly to drawbridges of any sort, and this seemed to be an aggravated form of drawbridge, and no navigator would at any rate attempt to pass through unless all three of the floors were raised at once.

☞ Twenty-five per cent. of the principal of the Repair bonds of the Chesapeake and Ohio Canal Company, guaranteed by the State of Virginia, with interest to the 1st instant on the said 25 per cent. of the principal, will be paid on presentation of the bonds at the banking-house of Alex. Brown & Sons, Baltimore.

☞ It is stated that the Portland and Ogdensburg Railroad will extend to Steep Falls, in Baldwin, 28 miles from Portland, this fall. The rest of the road will be completed to Fryeburg, in order to lay the rails as soon as the ground settles in the spring.

List of U. S. Patents.

Issued for Improvements in Railroad Construction, Rolling Stock, &c., for the week ending Oct. 18, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

Reissue—4,158.—Preserving and Hardening Wood, assignees of John L. Samuels, Pat. No. 60,794, dated Jan. 1. 1867.

☞ The New Haven *Journal* in an article advocating town aid to the new air line railroad between New York and Boston, says:

The Boston, Hartford and Erie road has gone into new hands, and there is every reason to believe that the connecting link between Willimantic and Putnam will soon be completed. Work has already been resumed, and it is reported to be the determination of the new managers to finish this part of their line during the present year. This done, and our own road (the Air Line) completed to Willimantic, the old dream of a new and shorter line to Boston will have been realized. The road beyond Middletown is all graded except about six miles, and the whole work can be finished in a few months if our citizens will show some of the spirit manifested by towns along the line.

Journal of Railroad Law.

RAILROAD COMPANIES—DAMAGES FOR NEGLIGENCE—WHEN SERVANT CANNOT RECOVER OF COMPANY FOR INJURY CAUSED BY FELLOW SERVANT.

The case of Cooper Admr. *vs.* The Milwaukee and Prairie du Chien Railway Company, (23 Wis., 668,) was an action by an administrator, under the statute, for injuries to the person of his decedent, causing death. John Cooper the deceased, while in the employ of the defendant as a brakeman, and serving as such on a train, was killed in consequence of the train running into a gap in the road, caused by the removal of rails for the purpose of making repairs. The complaint charges the company with negligence in not keeping the road in a safe condition and in not having, by its officers and agents engaged upon said repairs, caused proper notice of the defect to be given to said train, and in not employing a sufficient number of workmen to make said repairs, and in employing a competent and trustworthy person to superintend them. It appears that the break in the road was some thirty or forty rods west of a bridge, about six hundred feet long, across the Rock river, on the line of the defendant's road; that the train came from the east; that there is a pretty sharp curve some seventy-five or eighty rods east of the bridge, and a descending grade from the curve to the bridge; and that the train, consisting of sixteen or seventeen cars, besides the caboose, was loaded with wood; that the day was wet and dark, and the track slippery; and there was no notification of the break given to the train except by a flag from four to six rods west of the bridge, which was not more than about two feet high, and which the engineer did not observe until he approached the east end of the bridge, when it was raised and waived by hand. It further appears that the workmen engaged in repairing the road took up three rails at once, and after the train came in sight succeeded in getting down only two before it reached that point. The other evidence need not be stated.

The following is the able opinion of the Court delivered by

DIXON, C. J.—It was no doubt negligence in the flagmen to put up the flag west of the bridge, and so near to the place where the rails were taken up. If he had crossed the bridge, and gone to the first curve east of it, and put up the flag there, so that it could have been seen upon the straight line of the road beyond, it seems morally certain that the fatal accident of which the plaintiff complains and by which his intestate lost his life, would never have happened. It may also have been negligence in the section foreman, that he did not direct the flagman to go the proper place beyond the bridge, or see that he did so; and, not having done that, he may have been still further negligent in permitting so many rails to be taken up at a time. But all this is to no purpose so long as it is not shown that the company, its officers or agents, were negligent in the employment of these persons, or in retaining them in its service. The negligence of the company its officers or agents in employing careless and unfit servants, is the grist of the action, and unless this be shown, there can be no recovery. To establish such negligence, either a want of proper care in the employment of proper servants in the first instance must be shown, or else it must be shown that unfit persons were retained in the service of the company with the knowledge of its officers or agents or under such circumstance, that, in the exercise of reasonable care and prudence the officers or agents ought to have known their unfitness, and to have dismissed them on that account. It was for want of such proof as this that the court below ordered the nonsuit, and, upon careful consideration of the evidence, we must say that we think the judgment ought not to be disturbed. Aside from the proof of negligence in the servants on the occasion in question, which is clearly not enough to charge the company, there is not the slightest evidence showing, or tending to show, negligence on the part of the company in the employment of those servants. They had been in the service of the company for a long time, and, for all that appears, had always before been faithful and diligent in the discharge of their duties, and fully competent, so that there was no reason to discharge them, or upon which to base the charge of negligence against the officers or agents of the company, the judgment should be affirmed.

PAINE, J., *dissenting*.—I concede that within the current of the authorities upon this subject, there was no proof to charge the company with negligence in employing or retaining the servants, through whose negligence the death in this case was occasioned. But, for the reasons given in Chamberlain *vs.* The Mil.& Miss. R.R. Co., 11, Wis. 238, I do not assent to the rule of law established by those authorities. This case also comes within the exception sustained by several cases referred to in that opinion, which have held that a servant may recover for an injury occasioned by the negligence of another servant, if the latter was engaged in a different department of the service, the taking up and relaying the track is no part of the ordinary business of running the cars. It is not like the duty of a switchman in that respect. It is as though the company had found it necessary to take down and rebuild a bridge, and had through their bridge builders, taken down the bridge, and neglected to give notice to approaching trains. There are a number of cases which decide, and others intimate, that in such cases, the company would be responsible. As shown in the opinion referred to, I do not think the distinction which these cases establish is sound upon principle, but that the company ought to be liable in every case for an injury occasioned by the negligence of its servants, without any fault by the party injured. But at the same time I would avail myself of any class of cases which approach that position though not coming up to it. I do not desire here to go into any review of the authorities, or any elaborate discussion of the question but only to indicate the ground of my dissent. I think the judgment should be reversed.

By the Court. Judgment affirmed.

☞ The Bay Ridge and Hempstead Plains Railroad will now run through the towns of New Lots, East New York and Woodhaven. From the last named place it will take a southeasterly course, running through Jamaica, South, and Springfield to Valley Stream, and thence to Hempstead. Mr. A. T. Stewart has ordered its extension to Mineola, and laborers are at work completing it.

New Chain-Stopper.

The underwriters' steam tug, Charles Pearson, Captain Nash, having lately been overhauled and put in fine order, made a short excursion in the harbor, yesterday, with a small party of the owners and a few others on board. This boat is the strongest built and most powerful sea going tug in the country, and there is no other so serviceable in rendering assistance to grounded or disabled vessels, in all weather. The recent alterations in this boat include the introduction of new boilers, and a propeller especially adapted to her service. Another, and one of especial value, is the appliance of Emery & Cheney's elastic indicating chain-stopper, an invention now successfully in use upon about thirty vessels. Its object is to prevent sudden strains upon the cable, which when a vessel is lying at anchor in a heavy gale, are often sufficient to part the chain, entailing the loss of the anchor, and perhaps of the vessel, and those on board. With this appliance the cable does not pull from the windlass but from a stopper or rachet which bears upon rubber springs. During the trip this invention was put to a severe test by dragging the anchor, and although the strain was tremendous, no shaking or racking was perceptible on the boat. The trial was satisfactory in all respects, and the invention received the unqualified commendation of all present. This stopper also received a practical test last week off Cape Ann, which afforded a still better illustration of its value. The Charles Pearson went down to the assistance of the disabled brig Ocean Belle, and, with the latter made fast to her, lay safely at anchor in a very heavy sea throughout Friday night. Without this stopper their position would have been extremely perilous, but with it, not the slightest accident occurred. Its value is fast becoming recognized, and it would not be surprising if, in a short time, it is considered as essential to a vessel as a rudder.—*Boston Adv.*, Oct. 12.

Cotton Crop of the United States.

We present to the commercial world this morning the annual statement of the cotton crop of the United States for the year ending August 31, 1870, as prepared by the Charleston *Courier*. It is hardly necessary for us to say that it has been compiled with great care from authentic information received from our correspondents in all the great cotton centres of the country. We lay it before our readers, feeling confident that it shows the product of the great staple the past year as correctly as possible.

The summing up of the crop of 1869–70, as shown by our statement, is 3,203,828 bales, an increase in production of 845,459 bales over 1868–69. This increase has been mainly absorbed by European countries, as will be seen by the annexed comparative statement of foreign exports for the past two years.

	1869.	1870.
To Great Britain	989,491	1,478,849
To France	224,186	346,430
To North of Europe, Spain, &c	233,650	348,844
Total	1,447,327	2,174,123
		1,447,327
Increase		726,796

After making the necessary deductions there is left for home consumption, North and South, 964,842 bales. We put down for Southern consumption 112,000 bales, which includes 12,000 bales taken for consumption in Virginia and counted in the exports from that State, leaving for Northern consumption 852,842 bales, against 840,720 in 1869, showing an increase of 12,122 bales.

From a letter dated 1st inst. received from B. F. Nourse, of Boston, chairman of the statistical committee of the Manufactures' and Planters' Association of the United States, an increase of one per cent. in Northern consumption is assumed the past year over that of 1868–69, which shows an increase of 8,407 bales, thus making, according to Mr. Nourse's assumption, the past year's consumption 849,127 bales. Our figures show the Northern consumption the past year to be 852,842 bales, a difference of only 3,715 bales.

The value of the crop of the past year (1869–70) may be put down in round numbers at $325,000,000. This immense amount of money has been of incalculable benefit to the entire country.

The summing up of the crop, as developed in our statement, exceeds the estimate of the most sanguine in the early part of the past season from a half to three-quarters of a million of bales, which proves the utter fallacy of the many advance statements of growing crops, which are heralded throughout Europe and the Northern States for the purpose of affecting prices. Such statements work great injury to the planter, as well as to the buyer and consumer.—*Charleston Courier.*

Boston, Hartford and Erie Railroad.

The new directors of this road propose to reorganize it by selling the entire road from Boston to Fishkill, either under foreclosure of the mortgages or other proceedings, and the same purchased for the benefit of the parties coming into the arrangement. A purchasing committee of five, to be appointed. A new first mortgage covering the whole line of road from Boston to Fishkill, including all the branch lines, will be issued secured by this mortgage with thirty-five years to run, sinking fund accumulative of one per cent. per annum, bear seven per cent. annual interest, payable semi-annually, and shall have the power of voting one vote for every $1,000 of bonded debt represented.

The mortgage will be for $10,000,000, and will be devoted to taking up present underlying bonds, completing the road, and satisfying 30 per cent. on guaranteed bonds. $6,000,000 shall be offered to the present Burdell bondholders at 80 per cent. on their face, and such as are not subscribed for at that price, before thirty days from issuing the present plan, shall be offered to the stockholders for ten days thereafter, and those not then taken shall be sold by the purchasing committee to the general public.

New preferred stock will be issued bearing interest not exceeding 7 per cent. at such a rate as the net earnings suffice to pay, after satisfying the interest and sinking funds on the mortgaged bonds; which may vote as ordinary stock on other roads, one vote for every $100. "Net earnings" are to mean such surplus of the earnings as remain after paying expenses of operating and carrying on its business, including all taxes, assessments, and payment on incumbrances of completing, repairing or replacing the railway, its equipments, &c., so that it shall be in high condition, and to provide such additional equipments as shall be necessary.

The preferred stock will be for $13 000,000 distributed thus: 60 per cent. on face of guaranteed bonds; 60 per cent. on ordinary Burdell bonds; and $1,000,000 for contingencies. The new stock will amount to $10 000,000, distributed between contractors claims, floating debt, 20 per cent. on face of present stock and contingencies. The common stock shall be issued in shares of $100 each, and shall have the power of voting the same as preferred stock. No other bonds than those above specified shall be created, nor shall any debt be contracted exceeding in the aggregate at any one time five per cent. on par amount of the capital stock of said company, unless the same shall have been previously authorized by a vote of two-thirds of the stock and bondholders at a meeting duly held.—*Boston Commercial Bulletin.*

Chicago and Northwestern Railway.

The following is the comparative statement of the earnings and expenses of the Chicago and Northwestern Railway, for the first quarter of the fiscal years 1869 and 1870:

	Gross Earnings.	Operating expenses, interest, Rents, &c.	Net Income.
	1869.	1869.	1869.
June	$1,251,950 64	$976,433 15	$275,517 49
July	1,157,056 38	1,045,553 21	111,503 17
Aug.	1,037,973 75	790,606 83	247,366 92
Total	$3,446,980 77	$2,812,593 19	$634,387 58
	1870.	1870.	1870.
June	$1,139,284 13	$788,987 96	$350,296 17
July	1,034,392 88	933,033 47	96,359 41
Aug.	1,227,512 89	662,336 34	565,176 55
Total	$3,401,189 90	$2,389,357 77	$1,011,832 13
Increase			$377,444 55
Decre'se	$45,790 87	$423,235 42	
Balance to credit of inc. account May 31, 1870			$541,424 29
Net earnings, June, July and August, 1870			1,011,832 13
Total earnings, as of August 31, 1870			$1,553,256 42

Railroads in Iowa.

The number of miles of railroad in operation in this State at the beginning of the present year was 2,094, of which 643 miles were built during the year 1869. Last year was considered an exceptional one, as it witnessed the completion of two of the great east and west lines across the State, and few, even of the best informed of our citizens on this subject, supposed that the number of miles completed in 1869 would be surpassed, or equalled, by the operations of 1870. But the prospect now is, notwithstanding the check several enterprises have received on account of the European war, that the number of miles completed this year will be greater than that of last. The following table is our estimate of the number of miles that will be finished this year by the different companies named:

Burlington and Missouri River	65
Chicago and Southwestern	100
Midland	25
Iowa Falls and Sioux City	120
Milwaukee and St. Paul	87
Davenport and St. Paul	40
Burlington, Cedar Rapids and Minnesota	105
Iowa Central	125
North Missouri	25
Des Moines Valley	15
Total	707

There are several other companies who have the work of grading and bridging well advanced on their several lines, and may get down more or less iron this year; but as we wished to give none not reasonably certain to accomplish what we state, we have not included them in the above estimate. Of this number are the Burlington and Southwestern, which will have forty miles of grading done before the close of the year, with a fair prospect of having twenty miles of iron down within that time; the Keokuk, Iowa City and St. Paul, who also have a considerable amount of grading done; the Sabula, Ackley and Dakota; the Albia, Knoxville and Des Moines; the Des Moines and Indianola; the Dubuque and Minnesota, and some others.

The year 1870 will close with not less than twenty-eight hundred miles of completed railroads in Iowa, and enough more graded or under contract with a fair prospect for completion in 1871 to make the whole amount up to thirty-five hundred miles.—*Burlington Hawkeye.*

Opening of the One Hundred and Twenty-fifth Street Railroad.

The One Hundred and Twenty-fifth street Railroad was formally opened on the 15th inst., by Mr. Robert Squires its proprietor. The Legislature of last year passed an act to authorizing the Commissioners of the Sinking Fund to sell the franchise of this road, and on the 18th of July it was purchased by Mr. Squires for $67,000. Operations on the road were commenced on the 25th of August, and a double track was laid from Third avenue to the Hudson River Railroad station at Manhattanville. The franchise requires that as soon as Tenth-avenue is graded and paved the track shall be extended along Tenth-avenue to Spuyten Duyvil Creek. One Hundred and Twenty-fifth street is well built up, and the road will doubtless be a great convenience to inhabitants along the line, as well as those who reside at Manhattanville. The road intersects the Third and Eighth avenues, the Hudson River, the Harlem and Highbridge boats, and other means of conveyance in the upper part of the City. The cars are of a new pattern, intended to be operated without the aid of a conductor. The car is provided with a patent fare-box, into which the passenger puts the exact fare. If unprovided with change the driver accommodates him, and thus the proprietor of the road is assured of receiving his full due. The fare will be five cents. Depots have been constructed at Harlem Bridge, and provision is made at the new depot of the Third-avenue Road, at Third-avenue and One Hundred and Thirtieth-street, for the cars and horses of the road. It is expected that next Summer a ferry will be run from the foot of One-Hundred and Twenty-fifth street to Fort Lee.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st of September, inclusive, during the years 1869 and 1870, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1869..	349,300	11,614,000	4,959,800	30,900
1870..	290,000	10,563,600	3,533,700	388,800
Dec..	59,300	1,050,400	1,063,100	*357,900

* Increase.

Of the barley received this year, 306,400 bushels is new crop. By reducing the wheat to flour the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a decrease equal to 269,880 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of September in the years indicated:

	1868.	1869.	1870.
Canal opened—	April 23.	May 6.	May 10.
Flour, bbls.	185,800	349,300	290,000
Wheat, bushels..	6,621,700	11,614,000	10,563,600
Corn, bushels...	13,256,400	4,596,800	3,538,700
Barley, bushels.	771,400	30,900	388,800
Oats, bushels...	6,581,800	2,220,200	3,523,400
Rye, bushels....	304,900	231,200	358,700
Malt, bushels...	340,900	175,300	555,200
Feed, lbs.....	.....	7,766,800	7,918,400

☞ The Baltimore and Ohio Railroad Company has declared a dividend of 4 per cent. on the stock of the Main Stem, payable on and after the 31st inst., clear of United States tax—also a dividend of 5 per cent. on the stock of the Washington Branch for the half year ended 30th September, payable on and after 17th instant, clear of United States tax.

The Great Vanderbilt Depot.

The new railway depot being erected at the corner of Forty-second street and Fourth-avenue, is progressing satisfactorily, although it will not be sufficiently completed to be occupied by the 1st of January, as originally contemplated by Commodore Vanderbilt, at whose expense it is being built.

The new depot, without exception, will be the largest in the United States, and is to be the receiving depot of the Hudson River, New York Central, Harlem and New Haven lines. It is built with red brick and iron, its architecture being in the Renaissance style, and when completed will be a compact and handsome structure, covering altogether 166,800 square feet.

Over the main entrance is a likeness of the great Commodore, placed in a niche, and at each corner of the building will be a tower 110 feet high, and one in the centre 120 feet high. At present all the offices and waiting rooms are erected, and with the exception of the roof and inside fitting, are complete. These front the intended new street, are on the west side of the building, and are over 300 feet in length.

The car house fronts Forty-second street, and is now nearly finished. A large number of men are now engaged upon the immense arched roof, which is to be of glass and iron, with large iron girders. It will be 685 feet in length, and the span of the arch 200 feet. It is expected that this roof will be finished by the end of January. Inside this building will be laid out twelve tracks leading from the train entrance at the north end of the building to a board platform, forty feet in width, across the southern end of the apartment.

As soon as the entire building is completed, the passenger trains of the Hudson river and New York Central will be withdrawn from the Thirtieth street depot, and all trains from the north and east will enter the City *via* Harlem and Fourth avenue. The Harlem and New Haven Railroads will send their freight to the new depot, at St. John's Park.

☞ The net earnings of the Richmond and York River railroad for the year ending September 20, 1870, were $24,915. The company has regularly paid its accrued interest on its first mortgage bonds, and with a proper and unrestrained development of its legitimate business, will soon be able to meet and regularly provide for its second mortgage interest, and gradually extinguish its floating debt. The extension of the road to the Chesapeake Bay is expected to be completed during the coming year.

☞ The Boston *Advertiser* says the Supreme Court has ordered the receivers of the Concord Railroad to pay the State tax on the corporation, amounting to about fifty thousand dollars, and it will probably soon order a semi-annual dividend to stockholders, not to exceed five per cent. of its net earnings.

☞ The Supreme Court at Concord, N. H., on the 15th inst., issued an order to the receivers of the Concord Railroad to pay over to the Treasurer of that corporation the sum of seventy-five thousand dollars for the purpose of paying the semi-annual dividend of five per cent. to the stockholders.

☞ Track laying on the extension of the Pittsburg and Connellsville railroad between Connellsville and Cumberland is now progressing at both ends of the line. It is expected that the entire line of rail will be finished in January next.

☞ The Gettysburg (Pa.) railroad, with its appurtenances and franchises, was sold at public auction, in Philadelphia, last week, James A. Townsend, of New Haven, Conn., becoming the purchaser, at $181,000.

☞ The earnings of the Albany and Susquehanna railroad for the four months ending August, amounted to $363,156 07, an increase over the four corresponding months of last year of $110,176 89.

☞ George Wells, George E. Franklin, Joseph H. Nicholson, Frank H. Stockett, James R. Howison and Luther Giddings have been elected directors of the Annapolis and Elkridge Railroad Company.

☞ Bronson C. Rumsey has been chosen President, Henry A. Richmond Vice President, and H. L. Lyman Secretary and Treasurer of the Buffalo and Washington Railroad Company.

☞ T. E. Sickles of Omaha has been appointed Superintendent of the Union Pacific Railroad, in place of Col. C. G. Hammond.

☞ It is said that the tenth section of the Intercolonial Railway, near Runout, will be completed by the 27th of October.

☞ The Southside (L. I.) Railroad Company are making arrangements for the construction of a double track from Bushwick to Valley Stream.

☞ The Erie Railway extension from Buffalo to Suspension Bridge will be finished and in operation by the middle of November.

TO CONTRACTORS.

THE AMERICAN AND MEXICAN RAILROAD AND TELEGRAPH COMPANY, at No. 71 Broadway, Room 31, New York, having secured the approval of the Government of Mexico of their surveyed routes from Guaymas to Hermosilla and through the States of Sonora and Chihuahua to the Rio Grande, are prepared to receive proposals for grading the road, furnishing and laying cross ties from Guaymas to Hermosilla, a distance of 80½ miles.

The proposals must be handed in on or before the first day of November next, and be made *for sections* and include excavations of rock and earth, and bridging, and be so made as to enable the Company to ascertain the cost per section as laid down on the Company's map and profile, which are now in their office for inspection. The Company reserves the right to reject any bids which in their judgment they deem advisable.

Per order of the Board of Directors.
Office hours 10 A. M. to 3 P. M.

JOSEPH BRITTON.
WM. H. DEGROOT,
WM. B. MAXSON,
Executive Committee.

To Contractors.

SEALED PROPOSALS will be received until October 31st, 1870, for Grading and Masonry of the Alexandria and Fredericksburg Railway, extending from Alexandria to a connection with the Richmond, Fredericksburg and Potomac Railroad, a distance of about 20 miles.

Proposals may be made for one or more sections of about one mile each.

Payments in cash, eighty (80) per cent. monthly, and balance on completion of contracts.

Plans and Specifications may be seen at Engineer's Office, Alexandria, Virginia on and after October 24th. Proposals to be addressed to

G. B. ROBERTS,
President A. & F. R. W. Co.,
Alexandria, Va.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York Saturday, October 29, 1870.

Western Maryland Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 19th inst. Mayor Banks represented the City of Baltimore, and Col. Geo. Schley, of Hagerstown, represented Washington county. On motion, Hon. John Lee Chapman was called to the chair, and Abraham Stoner appointed Secretary. Upon the call of stock it appeared that 8,255 shares were represented, the same being a majority of the stock. An election for five Directors to serve for the ensuing year was held, and the following gentlemen chosen: Isaac Motter and John Welty, of Washington county; Hon. Joshua Biggs, of Frederick county; G. W. Harris and Col John K. Longwell, of Carroll county. The annual Report of the President was submitted and read as follows:

REPORT OF THE PRESIDENT.

Herewith are submitted, in compliance with section 8 of the charter, the annual reports of D. Preston Parr, Esq., Secretary and Treasurer, and John T. Rigney, Esq., Superintendent; the one showing the financial condition of the Company to be in a favorable position, and the other that notwithstanding the general depression in mercantile affairs and failure of agricultural products, the revenue of the road has decidedly increased, and that the decline in revenue from freight has been overbalanced by the receipts from passenger fare.

Since your last annual meeting the City Council of Baltimore passed ordinance No. 11, providing for the endorsement of $1,400,000 of the bonds of this Company, the proceeds thereof to be applied to the construction and completion of an independent line from Baltimore to Williamsport under certain specified restrictions and conditions.

The Board are happy to inform you that all the provisions required by said ordinance have been strictly complied with to the entire satisfaction of the Commissioners of Finance of the City of Baltimore, and that the first delivery of $100,000 of the bonds has been made to the Finance Committee of this Company.

Your Board has entered into contracts with responsible parties for the construction of the entire road from Baltimore to Williamsport, at such prices as, in the judgment of our chief engineer, R. B. Osborne, Esq., will insure its completion within a reasonable time. A large force of workmen have been actively engaged upon the heaviest portions of the line since August, and the work is progressing entirely satisfactorily. The track is now laid up to the Monocacy, and the bridge superstructure across that stream will be completed in less than two weeks, and unless some unforeseen difficulty arises, the road will be in running operation to the town of Mechanicstown by the first of the year.

Your Board regrets to announce that on the 19th of April Wendell Bollman, Esq., under the pressure of private engagements, felt compelled to resign his position as President of the Company, and thereby deprive us of his valuable services. On the 17th May Mr. George M. Bokee, one of the Directors on the part of the city, was elected President. On the 5th July the Board adopted the suggestion of a majority of its Finance Committee to request the bondholders to fund the overdue and unmatured coupons up to January, 1873, in an 8 per cent. certificate, and are pleased to report that a very large portion of the bondholders have consented to the proposition, and there is fair prospect of all complying with the request.

While congratulating you upon the evident improvement in the general affairs of the Company and the favorable prospect, under an approving Providence, of successfully completing the entire line of road from Baltimore to Williamsport by the period fixed for your next annual meeting, the Board desires to acknowledge its obligations to Hon. R. T. Banks, Mayor of Baltimore, for his uniform kindness and courtesy and his hearty co-operation and assistance in all measures calculated to improve the condition of the Company.

They are also indebted to the officers and employees for the energy and promptness displayed in the discharge of the duties of their various positions.

GEORGE M. BOKEE, President.

October 18, 1870.

REPORT OF THE GENERAL SUPERINTENDENT.

The report of the General Superintendent was presented, and, on motion, its reading dispensed with. It shows the number of passengers carried during the year to have been 112,862, and freight in the same time, 112,104,296 pounds; also number of barrels of flour, 28,614. The further statement is made that the trains have been running with regularity and promptness, making their proper connections, comparing in this respect favorably with those of any other road running out of Baltimore.

A remarkable freedom from accident is indicated. There has been expended on repairs of the present bed of the road during the year, in new rails, cross-ties, ballast, bridges, &c., the sum of $44,011.16.

The gross annual earnings of the road amount to $137,927.60, and the expenditures $111,794.20, showing a net profit of $26,133.40, and an increase over last year of $854.32. It is worthy of notice that whilst the income from freights, as on all roads, fell off, that derived from passenger fare materially increased.

Albany, Sand Lake and Stephentown Railway.

Articles of association of the Albany, Sand Lake and Stephentown Railway company were filed in the office of the Secretary of State of the State of New York, on the 1st of October. This road is to be constructed from East Albany to the Massachusetts State Line, in the town of Stephentown, a distance of thirty miles, to connect with a road which is in contemplation in Massachusetts, leading to and through the Hoosac tunnel. The amount of the capital stock of the new road will be $000,000. The following are the directors: James Aken, Albert R. FOX, Collins Arnold and Eber W. Carmichael, of Sandlake; George Maguire and W. C. Prankard of Brooklyn; William E. Pratt of Washington, D. C.; George Ellis of Tarrytown; James K. Averill, Horatio F. Averill, Wa!worth D. Crane, Mahlon S. Frost, and Robert B. Almy of New York city.

☞ The earnings of the Union Pacific railroad in September, 1870, were $728,520.93; and the expenses, $286,158.16—leaving net income, $442,362.77.

Bridge over the Mississippi at Keokuk.

The Keystone Bridge Company will have this structure completed in November. It will be 3,200 feet long, with a curved embankment approach 600 feet long, crossing the levee by an iron bridge, which connects it with the Des Moines Valley Railroad, on the Iowa side. On the Illinois side the approach is 750 feet long. Five piers are completed, and three others, including the pier for the draw, are commenced. The eight spans from the east end, will be 150 feet each in the clear, till about in the middle of the river, where there will be two spans of about 250 feet each. Then comes the "draw" span, 160 feet clear on the square between each side of the pivot pier and the "rest" piers. The superstructure is turned out by the Union Iron Mills, of Pittsburg.—*Chicago Railway Review.*

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JULY 31, 1870.

The receipts on capital account during the half-year ending 31st July, 1870, amounted to £5,149 7s. 8d., and consist of balance of arrears of calls on original shares, instalments on preference stock, &c., as detailed in capital account No. 1. The outlay on capital account amounted to £20,513 18s., which includes cost of additional sidings at Suspension bridge, Hamilton, London and Petrolia; new car repair shop at London; additions to engine shed at Suspension bridge; new machinery and building for rolling mill; expenditure on account of new locomotives, being additional stock, &c., the particulars of which are shown in the engineer's and mechanical superintendent's reports. The aggregate expenditure to 31st July amounted to £5,507,954 17s. 7d., leaving a balance at the credit of capital account of £81,448 4s. 5d. The receipts and expenditure on revenue account for the half-year have been as follows:

Gross receipts		£408,900
Working expenses, including renewals		251,824
		£157,076
From which is deducted—		
Interest on bonds, &c, (less interest received)	£42,858	
Discount and charges on conversion of American funds, &c	25,282	
Loss on working Erie and Niagara railway	402	
Amount set aside for renewal of Ferry steamers	2,000	
Balance of account paid to Grand Trunk Company for use of Esplanade and station at Toronto	2,159	
Special vote to Directors	1,500	
		74,201
		£82,875
Add profit on working Galt and Guelph railway	561	
Balance from last half year	2,054	
		2,615
Available for dividend		£85,490

The half year's dividend on the 5 per cent. preference stock amounts to £11,452 19s., leaving a balance of £74,036 13s. 10d. From this balance the Directors recommend a dividend on the ordinary shares at the rate of 4 per cent. per annum, free of income-tax, payable in London on 26th October, which will absorb £70,733 18s., and leave a balance of £3,302 15s. 10d. to be carried forward to the next half year. The renewal fund for the ferry steamers stands on 31st July at £18,271 11s. 6d. The discount and charges on the conversion of American currency for the half year amount to £25,282 5s. 1d., as compared with £53,781 15s. in the corresponding half year. The average rate of conversions has been 114⅝, the average price of gold in the same period being 116⅛. The amount of assets in American funds at 31st July was $220,121, as compared with $182,009 at the commencement of the half year. The following table exhibits the receipts and expenses for seven corresponding half years:

RECEIPTS.

Half year ending	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
July, 1864	125,282	189,081	577	314,940
July, 1865	139,821	144,028	716	284,565
July, 1866	172,731	169,577	854	343,162
July, 1867	165,367	199,221	1,116	365,704
July, 1868	155,082	200,619	948	356.649
July, 1869	157,930	226,200	937	385,068
July, 1870	153,863	254,230	807	408,900

EXPENSES.

	Including renewals. £	Per cent. of gross receipts.
July, 1864	171,452	54.44
July, 1865	158,804	55.81
July, 1866	175,747	51.21
July, 1867	182,768	49.98
July, 1868	208,462	58.45
July, 1869	232,768	60.46
July, 1870	251,824	61.58

The aggregate traffic receipts, compared with the corresponding half year, exhibit a gross increase of £23,962 15s. 8d., as follows:

Increase in local passenger traffic		£8,478
" freight and live stock		27,920
		£36,393
Decrease in through pass traffic	£11,561	
" freight and live stock	356	
" mails & express fr'ght	514	
		12,431
		£23,963

The following is a summary of the revenue results of the past half year compared with those of the corresponding period of 1869:

Passenger earnings per mile—	1870. cents.	1869. cents.
Receipts per way passenger	2.778	2.858
" through "	2.821	2.239
Freight earnings per mile—		
Receipts per ton way freight	3.165	2.796
" through "	1.368	1.515
Average receipts per train mile	$1.87	$1.95
Ordinary working expenses per train mile	1.12	1.13

The receipts for through freight and live stock have therefore during the half year shown a lower average rate per ton per mile than in the corresponding half year. The gross earnings of this description of traffic show a decrease of £356, whilst the tonnage carried has increased 10½ per cent. The Directors are, however, glad to report that the rates are now restored to about their former tariff. The cost of ordinary working expenses per train mile for seven corresponding half years is as follows:

	Sterling.	
July 31, 1864	4	5
July 31, 1865	5	0¾
July 31, 1866	4	9
July 31, 1867	4	2¾
July 31, 1868	4	8¾
July 31, 1869	4	8
July 31, 1870	4	7

It will be observed that the amount expended during the half year on maintenance and renewals is greatly in excess of the corresponding half year. The engineer refers at length to the causes which required this outlay, and the Directors deem it absolutely necessary that the track should be maintained in a thoroughly efficient condition. Since the opening of the narrow gauge route over the main line in January, 1866, the traffic has been hauled by broad gauge engines. This system of a mixed gauge has not been found to work satisfactorily, and it involves the maintenance and renewal of a triple line of rails. At the last Session of the Parliament of the Dominion of Canada, a clause was introduced into an amended act which was then pending, whereby so much of the act of 1851 as required the company to construct the railway and branches with a gauge of 5ft. 6in. was repealed, and authority given to alter the gauge to that of 4ft. 8½in., as more convenient and economical. Preparations are now being made to take up the outside rail from Windsor to Komoka, 100 miles, and to sell the worn out portion of the iron. The proceeds will be applied to the purchase of narrow gauge locomotives, of which 16 are ordered and will shortly be delivered by American makers, and 5 additional engines are under construction in the company's shops. The remainder of the outside rail on the main line and branches will be taken up as soon as the broad gauge locomotives are either converted into narrow gauge or disposed of. Very great economy will result from working and maintaining a single track. The alliance between this company, the Michigan Central, and the Detroit and Milwaukee Railroad Companies, for the division of the joint through traffic in certain fixed proportions, has worked most satisfactorily, and has been productive of many collateral advantages; but as the arrangement is based upon average annual results, it is thought desirable to wait until the expiration of the year before the adjustment is made. It will be remembered that at a special general meeting held on the 6th July last, the proprietors concurred in the recommendation of the board to construct a line of railway from Glencoe station to Fort Erie, opposite the city of Buffalo. There can be no question as to the policy of this decision, and circumstances have justified its adoption. A company has been organised under the auspices of the Great Western, by the title of "The Canada Air Line Company;" the capital stock has been subscribed for, a board of Directors nominated, surveys have been made, and plans and specifications prepared. A first section of 38 miles in length has been contracted for by public tender on favorable terms. The course of public events has lately been unfavorable to the promulgation of a scheme to raise the capital necessary for the construction of the line, but the shareholders will be asked, as a preliminary measure, to ratify an agreement for the amalgamation of the Air Line Company with the Great Western, whereby the shares and securities of both companies will become assimilated. A scheme, which is nearly matured, will then be issued to the proprietors for raising the new capital, in a mode which will not press on the earnings of the Great Western, but will rather improve the ordinary shares of the company. The board have to announce the retirement of Mr. T. Faulconer, and the election of Mr. Edward H. Green as a director of the company. The amended act, to which reference has been made (33 Vict. cap. 50), authorises the shareholders to elect a third auditor, resident in Canada, who shall have free access to the books and papers of the company. A properly qualified gentleman will be put in nomination to undertake the office. Four of the present board of directors go out of office, who are Mr. G. Smith, Mr. W. Weir, Hon. W. McMaster and Mr. D. McInnes, but they are eligible and offer themselves for re-election. The receipts and expenditures of the Detroit and Milwaukee Railroad for the half year ended June 30, 1870, have been as follows: Gross earnings, £138,776 12s. 8d.; working expenses, £96,554 1s. 8d.; net revenue, £42,222 11s.—which is sufficient to meet the interest on the ordinary bonds of the company, but will not permit of the payment of dividend on the preference shares held by this company. New lines recently opened in the State of Michigan have considerably interfered with the local traffic of the Detroit and Milwaukee road. In conclusion, the greatly improved system of organization and management, with a narrow gauge track in good order, improved freight rates, and diminished price of gold, encourage the directors to anticipate with confidence a prosperous future for the undertaking.

The following is the report of Messrs John

Young and Sidney Smith, the auditors: We have examined the foregoing accounts and find them in accordance with the books and vouchers. We have recently received the further explanations which, at the date of our last report, we required from the Engineer and the Mechanical Superintendent on the subject of an annual charge for the repair and renewal of the permanent way and works and the rolling stock, but they both strongly recommended the postponement of the question for a short time, on the ground that in the present transitional state of the line and rolling stock, any attempt on their part to arrive at a reliable estimate of the future cost of repairs and renewals would be perfectly futile. What is meant by the "transitional state of the line" we understand to be, the entire removal of the outer broad gauge line; the great improvement being effected in the permanent way in the narrow gauge by re-laying with steel rails, etc.; and as regards the plant, the adaptation of part of the broad gauge rolling stock to the narrow gauge, and the sale and replacement of the remainder. These important changes will, in the opinion of the Engineer and the Mechanical Superintendent, very materially affect the wear and tear both of the line and the rolling stock. This being their opinion, we must admit that there is ground for postponing the question until these alterations have been effected; but we have no hesitation in saying that, until the principle has been adopted of charging the revenue of each half-year with a fair and legitimate amount for the repairs and renewals of the line and rolling stock, whether that amount has been expended or not, there will be no immunity from the irregular expenditure which, at times, becomes chargeable to revenue, and so seriously affects the dividends of particular half years. The correspondence on this important subject will be valuable when we come to deal with the question. In the meantime, it can be seen at the company's offices by any shareholder who may wish to peruse it. As regards the accounts for the past half year, we have to remark that the cost of the maintenance of way has again been very heavy. The cause of this is fully explained in the Engineer's report. The cost of the repairs and renewal of the rolling stock is £5,749 12s. 6d. less than it was in the corresponding half year. The same system has been followed as in the previous half years of charging only the amount actually expended. The reduction, we understand, is to some extent attributable to the contemplated changes already referred to. As stated in the Mechanical Superintendent's report, two shunting engines have been sold during the past half year, reducing the stock of engines from 99 to 97. No credit is given in the capital account for the cost or the proceeds of these engines; but the amount of the proceeds (less a sum debited from the mechanical department) is included in the balance sheet in the item on the credit side, "balances due by the company, &c," and, we are informed by the directors, will be dealt with when the broad gauge engines have all been converted into narrow gauge ones, or otherwise disposed of, and the mode in which they are to be replaced has been determined upon.

Knox and Lincoln Railroad.

The annual report of this company shows that the funds necessary for the completion of the road are lacking the sum of $475,000. The expenditures have been judiciously made; and the engineer's report very satisfactorily explains the difference which is found between original estimates and the actual cost of construction. A comparative statement of two estimates, one made August 12, 1868, and one made September 1, 1870, shows precisely each item of difference, the principal of which are earth excavation, ballast and shrinkage, $125,138; rock excavation, $140,177; bridge masonry, $24,186; bridging, $21,850. On the other hand, the cost for the track, main and side, is put at $82,000 less than the first estimate; land and land damages $11,000 less; engines $4,000 and passenger cars $8,000 less.

Connecticut and Passumpsic Rivers R. R.

The receipts from operations of this road for the thirteen months ending June 30, 1870, were as follows:

From passengers		$195,970 56
" freights		365,251 29
" mails		12,043 42
" express		7,340 00
" rents		4,546 05
		$585,151 32
Expenses, viz:		
Road department	$168,365 39	
Rolling stock	54,176 54	
Stations and buildings	22,696 39	
Freight department	29,593 80	
Passenger department	21,613 24	
General expenses	49,683 65	
Miscellaneous	59,558 83	
		405,687 84
Balance		$179,463 48

The company have 15 locomotives, 11 passenger, 7 baggage, 147 box, 92 rack, 13 coal, 147 platform, 10 ore, 2 derrick, 20 gravel, 28 hand, 18 wood, 1 drovers' and 4 freight saloon cars, valued at $401,045. Value of materials on hand, $124,691 65.

There has been added to the equipment during the year 2 locomotives, 16 box, 43 platform and 21 rack cars. One rack and three platform cars have been rebuilt. In repairs of track, 813 tons new and re-rolled iron, 8,652 repaired rails, and 42,342 sleepers have been used. The report says:

Equipment (additional), amounting to $79,998 23, has been built at our repair shops and charged to construction.

Two dividends of three per cent. each have been declared, amounting to $133,826 33, including government tax.

The bonded debt of the company has been reduced $25,000.

The financial year has heretofore closed May 31st, but by our contract for the lease of the Massawippi Valley Railroad, the first day of July was the time named to take possession, and it was therefore deemed advisable to change the time for the commencement of the financial year from June 1st to July 1st. Consequently this report embraces the earnings for thirteen months ending June 30, 1870.

Included in the expenses are the following extraordinary items:

Passenger depot at Newport	$3,004 07
Freight depot at Newport	1,964 82
Wharves and land at Newport	3,443 83
Car house at Lyndonville	2,616 00
Memphremagog house	4,940 24
Freshet	21,000 00
Amounting to	$36,968 96

There is also included in expenses, the cost of three bridges near Barton Landing, to take the place of piling, and 400 tons more rails and 12,373 more sleepers than we used the previous year.

The October freshet caused a falling off in the receipts of that month of $23,900, and the damage caused by the same amounted to $25,000. At Norwich, the bridge and abutment, thirty feet high, which were carried away, have been replaced by a deck bridge of nearly twice the length of the former one. At South Newbury, where a similar disaster occurred, the same precaution has been taken, by increasing the length of the bridge.

At Lyndon, where two bridges were carried away, the location of track was changed, making it unnecessary to rebuild. In replacing culverts and water-ways which were damaged, pains have been taken to provide as far as possible against similar freshets by enlarging.

Experience has demonstrated the fact, that a first-class road-bed is essential to economy; and we have not only put our road-bed in a better condition than ever heretofore, but have kept the rolling stock in good condition.

The Massawippi Valley Railway was not finished July 1st, as per contract, but the main line between North Derby and Lennoxville was so far completed as to be operated with safety, and passenger and freight trains were put on that portion of the road on the first day of July. The business, thus far, confirms the opinion heretofore expressed, that the extension of the line to the Grand Trunk Railway, at Lennoxville, will add materially to the business of our whole line.

The number of miles run by passenger trains during the year was 94,811; by freight trains, 88,230; by construction and wood trains, 28,293 —total miles run, 210,834. Number of passengers carried, 122,619; do. carried one mile, 3,760,543. Tons of freight carried, 91,709; do. carried one mile, 5,448,558.

Trial Balance, August 19, 1870.

Construction	$3,082,176 91
Notes receivable	8,921 98
Superintendent, including stock and materials on hand, and sundry accounts unsettled	144,395 91
Wood lots	5,378 14
Agents for collections	1,371 00
Cash	7,925 39
Excise tax	71 60
Memphremagog House	47,621 88
	$3,297,862 81
Lyndon lands	$17,554 07
Coupons uncalled for	2,108 50
Dividends	984 34
Reserve	91,704 92
Stock issued	2,122,900 00
Bonded debt	475,000 00
Notes payable	481,000 00
Trustees of sinking fund	102,000 00
Partial payments ac't subscription	3,868 23
U. S. Government	1,252 75
	$3,297,862 81

President.—Henry Keyes.

Directors.—Henry Keyes, Josiah Stickney, Emmons Raymond, William Thomas, Gardner C. Brown, Thomas Tpham, Benj. P. Cheney, F. M. Weld, Elijah Cleveland, Henry Chase, Timo. P. Redfield, Albert Knight, Benj. Pomroy.

Vice President.—Josiah Stickney.

Treasurer.—N. P. Lovering.

Secretary.—Elijah Cleveland.

Superintendent.—A. H. Perry.

Troy and Susquehanna R. R.

Articles of association of this company were filed in the office of the Secretary of State on the 15th of October. The road is to be constructed from the city of Troy, N. Y., to intersect the Albany and Susquehanna railroad at Knowersville, Albany county, a distance of twenty miles. Amount of capital stock, eight hundred thousand dollars. Names of directors: Joseph W. Fuller, John A. Griswold, James Forsyth, Hannibal Green, Daniel Robinson, Chester Griswold, William Kemp, J. Townsend Burden, Charles W. Tillinghast, Francis S. Thayer, G. Parish Ogden, Uri Gilbert and Walter P. Warren, of Troy.

☞ Work on the Athol and Enfield (Mass.) Railroad is progressing very rapidly, and hands are completing the grading at the terminus in Athol. There is every prospect that the rails will be laid before the snow falls.

On the Use of Cast Iron for Compressive Members, in the Construction of Iron Bridges.

A paper read before the American Society of Civil Engineers, June 15, 1870, by F. C. Lowthorp, C. E., Member of the Society.

(Continued from page 1185.)

Cast iron, it is true, is liable to defects such as unequal thickness in the sides of hollow columns, cold-shuts, honey-combs, etc., all of which can be readily detected by competent, practical men. Wrought iron also is liable to defects, as it comes from the mills or forges, it may be cold-short, or it may be imperfectly worked and welded, and when required to be worked into different forms the welds are quite uncertain.

From what I have observed and read in regard to the compressibility, tenacity, and elasticity of wrought and cast iron, I am led to infer that if a bar of each 1 foot long by 2 inches square be acted upon compressively, the latter will yield the most at first, but as the pressure is increased it will yield less and less until its power of resistance becomes greater than that of the wrought iron, when the latter will give way.

It has been suggested to my mind that tensively wrought iron may have greater elastic power than cast, while compressively the latter may posses the greater. Tensively, sponge has a very slight elastic power, but very great compressively. With India Rubber the case is just the reverse.

But the testing of cast iron in solid bars or masses, is by no means, in my opinion, a fair test of its strength as used in bridge building. It is well known by practical iron workers that the outside or surface of castings is harder than the interior of the mass, and much stronger both tensively and compressively, consequently the casting of it in hollow cylinders and hollow squares, the H, the X, or cruciform, and various other shapes, adds greatly to its strength, (see figs. 12, 13, 14, 15, 16 & 17,) each of which has a sectional area of one square inch, and a length of ten inches. According to Mr. Whipple's tables, the safe compressive load for columns indicated by the figures alluded to, varies from 13,000 lbs. for the square solid one, fig. 12, to 21,800 lbs. for the hollow cylinder, fig. 16. I am unable to state the tensile strength of the columns of the various forms alluded to, but am led to believe that the quality of metal and area of section being the same, the greater the surface the greater the strength.

The advantages of cast iron as a material in bridge construction, consists not only in its great power of resistance to compressive forces, but also in its susceptibility of being cast into any possible shape desired, at the smallest cost; and the percentage of corrosion in cast iron is very much less than in wrought iron.

In order to illustrate the advantages afforded by the use of cast iron in bridge construction in place of wrought iron alone, I will compare the details of a bridge designed by Mr. Linville with one designed by myself; the photographs of the latter are hanging on your walls: By the "Linville Bridge," I mean that generally known as the "Keystone Co's Bridge," which is by some, *called a wrought iron bridge*. In this bridge the chords, A A, (figs. 6 & 7) consists of eye bolts made of flat bar iron, connected at each panel with round pins, (B B) of wrought iron or steel, on which rests the lower ends of the posts, (M M) and to which are attached the main and counter diagonals, H H & I. The upper chords (F F) are formed by placing between two horizontal plates, two H (h) and two ⌴ trough beams of wrought iron. [In a bridge of a similar character at Easton, Pa., the top and bottom plates of the chord vary from ¼ of an inch to ¾ of an inch, more or less, in thickness, and about 21 inches wide.) The angle blocks G G, which form the upper bearings of the main and counter diagonals are made ofc ast iron; they are hollow and are attached to the chord plates by means of dowel projections cast on their bottom sides, which fit into recesses cut into the plates for the purpose. The floor beams which are of wood, rest either on the bottom or top chord plates.

In my bridge, (see figs. 8 & 9) the lower chord is formed of six round bars of wrought iron, (a a a &c.) which are passed through the combination plate or angle block (b b) and are connected longitudinally with sleeve screw nuts (m m) and laterally with the plate (b b), the latter being held in position by the jam nuts (n n n.)

The chord rods (a a a,) being proportioned to the strain, the ends of the smaller ones are enlarged so as to screw into the sleeve nuts of the next larger in size.

The floor beams (c. c.) which are of wrought iron, are suspended from, and bolted fast to the combination plates.

The upper chord (h. i. g.) is made of cast iron, and is hollow and cylindrical in form, excepting the part forming a cap over the post, which is also hollow, but of rectangular form and very thick. The cap is provided with angle bearings (P. P.) on top for the nuts or the heads of the main and counter diagonals (k. k. l. l.,) and beneath with suitable recess and bearing for the top of the post, and bearings on the sides for the lateral diagonal tie bolts (t. t.) and cross struts (s. s.)

The ends of the sections of the upper chords, and of the tops and bottoms of the intermediate posts are turned off so as to afford good bearings at right angles with their axes.

In order to obtain greater stiffness in the posts and upper chords, they are made largest in the middle, and where, as in the present instance, the post is for a double cancel truss, a middle piece (e. e.) is inserted. This piece it will be seen, has an opening for the passage of the main and counter diagonals. It is made very strong and the top and bottom parts close the hollow ends (f. & d.) of the shaft of the post, so that no moisture can enter. The ends of the main and counter diagonals are enlarged on account of cutting the screws.

Having described the details of the two bridges, I will proceed to show the advantages which I think the one possesses over the other.

In the Linville bridge, the lower chord bolts must be drilled exact, or they will not have a bearing, and being flat, expose about ⅔ more surface for painting and corrosion than would round bars of equal area. The whole strain is thrown upon the connecting pins at every panel. Should one of the chords, main or counter diagonals break, it could not be replaced except with great difficulty and danger, as the least spreading of the truss would prevent the pins reentering the eye holes.

In my bridge the lower chord-rods, although placed in position and bolted together, when there is no strain on them are independent of each other, and should any of them, or the main and counter diagonals break, they may be replaced without the necessity of falsework. All of the rods can be thoroughly protected with paint, and the bolts being round they present the smallest surface possible for corrosion or painting.

The only cross strain in a combination plate, is that of one set of main diagonals. The combination plate affords a safe support for the floor beams, and a square bearing for the bottoms of the intermediate posts, thereby rendering the *whole strength* of the *posts* available.

In the Linville bridge, the whole length of the interior and exterior of the shaft of the post M. M. from E. to E. is exposed to corrosion, and there is little or no chance afforded for repainting the interior.

Although in the drawing, which is a correct copy of a lithograph of the Linville bridge sent me, the important parts C. & D. are represented as of wrought iron, all I have seen or examined were made of cast iron, and the post having one round bearing, loses one-third of its legitimate strength.

In my bridges no moisture can enter the posts, and the bearing being flat and at right angles to their axes, their whole strength is available.

Any one must perceive at a glance that the upper chord of the Linville bridge, being composed of several members in sections, present a great amount of surface, both on the exterior and interior, subject to corrosion, more than double what there is on the upper chord of my bridge.

In conversation with the late Mr. Roebling, a short time previous to his death, he remarked to me, "I do not like the upper chord of the Keystone Co's bridge, I see no possible way to prevent interior corrosion.

A few years since, Prof. McGowan, (I think that was the name,) before a scientific association in London, remarked in allusion to the wrought iron bridges of Great Britain, "Our Iron Bridges are gradually melting away, forty tons of rust having been removed from the outside of the Brittania bridge, which does not indicate nearly the whole amount of corrosion, as that of the interior has not been taken into consideration."

Mr. L., in order to secure a square bearing for the nuts of the upper ends of his main and counter diagonals, uses a cast iron angle block (G. G. figs. 6 & 7.,) some of which broke on the Easton bridge, I have been informed, during the process of erecting and adjusting; had they formed a part of the chord itself, such an accident could not have occurred.

In placing the angle block G. on top of the chord, as is done by Mr. L., a large amount of the effective strength of the chord is lost, for it will be perceived that if a force acting on the main diagonals H. H. be resolved into the counter-acting vertical and horizontal forces, the latter will be found exerting itself along the upper surface of the top chord, instead of the central axis of the same, the tendency of which is to buckle it. For a common, but much worse example, see fig. 5.

In a top chord 21 inches wide, Mr. L. can use but two main, and one counter diagonal. In my bridge the upper chord which is of cast iron, is composed of one member in sections and the bearings for the mains and counters are always so arranged that the resolution of their forces into the vertical and horizontal ones invariably caused the latter to be exerted along the line of their axes. In an upper chord of 15 or 16 inches diameter or width, I can use double the number of main and counter diagonals of equal size, that Mr. L. can in his chord of 21 inches, and my chord has the further advantage of angle bearings which cannot break. As there is safety in numbers there certainly must be more in double than in half the number of bolts.

However much Mr. Edwin A. Clarke may distrust the use of cast iron in bridges, Mr. Linville has shown great confidence in it, or he would not have made his end posts, and main and counter diagonal bearings entirely of it, as also all of the intermed iate post bearings, as he has done in all of the bridges built for the Penn. Central R. R. Co., across the Schuylkill river, including the one for the Junction R. R., which has a span of 250 feet. Indeed it would be highly criminal for any engineer or builder to use cast iron in parts of such vital importance if he thought it unsafe.

It may be said a post of cast iron will not withstand the battering of an engine when it runs off the track. *No posts* can withstand such concussion, unless constructed for the express purpose, which would require such an amount of material as would prohibit their erection.

In my opinion every track of a railroad over a bridge should be protected with guard rails of iron, so arranged as to prevent the wheels leaving the track, by confining the flanges of the wheels of the cars in position, the efficacy of which arrangement may be seen in the very short curves around which our street railroad cars pass with perfect safety.

Although foreign to the subject of bridges, still inasmuch as the strength of cast iron as a material for bridge and other building purposes is the matter in question, I think there will be no impropriety in asking, Without cast iron for gearing purposes, what would become of the countless factories, machine shops, rolling and other mills, which have caused our towns and cities to resound with the hum of life and activity? Or in what

possible way can cast iron be more severely tested, than when used in the form of wheels for railway cars heavily loaded, and dashing along over rough railroads with the velocity of the wind? Yet there is more danger of the breaking of a wrought iron rail, than a cast iron wheel.

In the use of cast iron or other materials in bridge construction, it will not do to be governed by theory and figures alone, good judgment formed by observation and practical experience, is highly necessary in proportioning the various parts; for instance, we may choose between a column of 6 or 10 inches in diameter, in the first, the area necessary may require the sides of the column to be ½ an inch thick, whereas the area of the latter would require the sides to be but ¼ of an inch thick, both of which are according to theory and calculation. Both experience and prudence would dictate the use of the smaller column as best calculated to withstand the vibration and shocks that might be looked for.

Although I consider it exceedingly unwise to reject cast iron for compressive purposes, instances may occur in which wrought iron might be preferable. In all such cases the engineer will of course be governed by circumstances.

The practical experience of most engineers and builders, will justify me in the assertion that there is much more to be feared from defects in wrought iron used for tensile, than in cast iron used for compressive purposes.

So far as my own experience goes, which has been of many years and over a tolerably broad field, I have endeavored to give you a true statement, as I have also, so far as my time would permit, of such facts as have a bearing upon the subject, which I have been able to collect from the experiments and writings of others.

TRENTON, N. J., June 1, 1870.

N. B.—Since reading the above paper, I have received the following:

EASTON, Pa., July 7, 1870.

F. C. LOWTHORP, Esq.,

Dear Sir:

Yesterday, we found, that with the L. V. Engine, Tioga, weighing 32 tons, exclusive of Tender, on the centre of the Bridge, that the deflection was 1-10 of an inch.

Yours,

W. FIRMSTONE, Agent.

The bridge alluded to was a single track through, of 129 feet span, with trusses 10′ 9″ high. The compressive members being of cast iron.

The exceedingly small amount of deflection is due to the effect of counter bracing.

Martinsburg and Potomac Railroad.

At a meeting of the President and Directors of the Martinsburg and Potomac Company convened at Martinsburg on the 29th of September, 1870, Hon. Charles J. Faulkner, President of the Company, presented to the Board the result of his recent mission to Philadelphia, in substance as follows:

He said, that the President and Directors of the Cumberland Valley Railroad assembled in Philadelphia at the office of the Pennsylvania Central on Tuesday, the 27th of the month, to take into consideration the expediency of extending its connections into the Valley of Virginia, and to determine what aid, if any, it would give to the Martinsburg and Potomac Railroad. John Edgar Thomson, President, and Thomas A. Scott, Vice President, of the Pennsylvania Central were present, acting on behalf of their road. No doubt was expressed by any one as to the expediency of extending the railroad connections of Pennsylvania from the Potomac River by Martinsburg to Winchester, and all concurrrd in the selection of that route. No hesitation was expressed as to their obligation to construct, exclusively from their own resources, a permanent *bridge* across the Potomac river at Powell's Bend, and of their readiness to proceed at once to the construction of that bridge. Entire satisfaction was expressed at the local aid, $10,000 per mile, contributed by the county of Berkeley, and there was a full and distinct admission of the obligations upon their part *to advance the residue necessary to the construction of the road.* Up to this point there was an entire concurrence of views between the Pennsylvania companies and himself. But Vice President Scott here enquired in what form he, Mr. Faulkner, expected that aid to be rendered? Mr. Faulkner replied by a *subscription* on the part of the Pennsylvania Company to the stock of the Martinsburg Company for the full amount necessary to construct the road beyond what had been subscribed by the county of Berkeley. This gave rise to considerable discussion, in which Messrs. Thomson, Scott, Biddle and others of the Board participated on the one side, and Mr. Faulkner on the other. They expressed their perfect readiness to advance the money on the corporate bonds of the company, but were reluctant to make a *subscription*, as it would be establishing a precedent which would embarrass them in their future operations in Pennsylvania. Mr. Faulkner contended that he always understood the aid to be rendered was to be by a *subscription;* that this understanding on his part was expressed in all his communications official or unofficial with the Company; that no correction of that impression had ever been made in any reply addressed to him; that he had so announced to the voters of Berkeley county in his remarks accompanying the ordinance, a copy of which had been forwarded to the officers of both companies, and that he could not feel himself at liberty to accept or carry out any other arrangement, certainly, not without the instructions of the voters, or some clear and unequivocal expression of the people of Berkeley county. After some farther discussion a resolution was proposed by Vice President Scott and submitted to the Board pledging the Company to construct the bridge across the Potomac, and to co-operate with the counties in advancing the necessary funds on the corporate bonds of the Martinsburg and Potomac Railroad Company to complete the road to Winchester, which was unanimously adopted.

Mr. Faulkner said that he could not now make any distinct or specific recommendations to the Board. He could not at this time recommend an acceptance or a rejection of the proposition submitted. That the contract had yet to be drawn up in its details between the President of the Cumberland Valley Railroad and himself. That many of the most objectional features of the proposition made to us might be obviated when the details of the contract were considered, and that he would withhold any recommendation until the contract was ready to be laid before the Board. Opposed as he was to the present form in which aid was tendered to us, he had nevertheless forwarded to President Watts his views of certain matters of detail which might obviate much that was objectionable. When he received the full views of the Pennsylvania companies he would call another meeting of the Board and submit the subject to its consideration.

Whilst therefore the result of that meeting was not satisfactory to him, and he will yet struggle to modify and change its policy, yet, it need not discourage those who look alone to the matter of the mere construction of the road; for if he can effect no change in the action of the Pennsylvania companies, and the contract when perfected in its details, shall receive the approbation of the voters of Berkeley county, expressed through public meetings or other reliable sources of information, he could under that arrangement, safely guarantee the construction of the road to Martinsburg by the 4th of July next.

☞ The report of the directors of the Dexter and Newport Railroad shows that $18,000 have been received on the lease of the Maine Central Railroad, and that $10,500 have been paid on interest on town scrip, leaving $7,500 to be divided among the holders of $121,700 of stock, or about six per cent.

Chicago and Northwestern Railway.

The following is the comparative statement of the earnings and expenses of the Chicago and Northwestern Railway, for the first four months of the fiscal years 1869 and 1870:

	Gross Earnings.	Operating expenses, interest, Rents, &c.	Net Income.
	1869.	1869.	1869.
June...	$1,251,950 64	$976,433 15	$275,517 49
July ..	1,157,056 38	1,045,553 21	111,503 17
Aug...	1,037,978 75	790,606 83	247,366 92
Sept...	1,305,672 75	836,534 86	469,137 89
Total..	$4,752,658 52	$3,649,128 05	$1,103,525 47
	1870.	1870.	1870.
June...	$1,139,284 13	$788,987 96	$350,296 17
July ..	1,034,392 88	938,033 47	96,359 41
Aug...	1,227,512 89	662,336 34	565,176 55
Sept...	1,259,282 10	692,663 83	566,618 27
Total..	$4,660,472 00	$3,082,021 60	$1,578,450 40
Increase	.....	.....	$474,924 93
Decre'se	$92,181 52	$567,103 45	.....

Balance to credit of inc. account May 31, 1870..... $541,424 29

Net earnings, June, July, August and September, 1870..... 1,578,450 40

Total earnings, as of September 30, 1870..... $2,119,874 69

Defaulting Tennessee Railroads.

The Tennessee state authorities give notice that on the third day of November the state's interest in the defaulting railroads named below will be sold at public auction at Nashville. The following is the indebtedness of each of the roads to the state:

Edgefield and Kentucky	$1,394,053 34
Cincinnati, Cumberland Gap and Charleston	1 530,787 32
Knoxville and Kentucky	2,000,788 00
McMinville and Manchester	1,014,955 60
Memphis, Clarksville and Louisville.	2,283,611 92
Nashville and Northwestern	4,215,466 66
Rogersville and Jeffersonville	893,928 80
Winchester and Alabama	1,661,683 39
Knoxville and Charleston	757,600 00
Evansville, Henderson and Nashville	218,000 00
East Tennessee and Western North Carolina	412,000 00
South Western	300,000 00
Total	$16,277,825 08

Bridgeport and Bedford Railroad.

The work on the new railroad from Bedford to Bridgeport, on the line of the extension of the Pittsburg and Connellsville Railroad to Cumberland, has been awarded to the contractors, and ground was broken at Bedford on Monday morning last amidst the great enthusiasm of the people. The first ground was broken by one of the Judges of the county courts, and speeches, music, and a general suspension of business marked the occasion. The people turned out *en masse*, and the commencement of a long looked for railroad connecting the flourishing town of Bedford with the outside world was appropriately celebrated.—*Pittsburg Chronicle, Oct.* 19.

☞ F. E. Perkins, Esq., formerly Master Mechanic of the Vermont Central Railroad, and more recently Superintendent of the motive power and rolling stock of the Union Pacific Railroad, has received the appointment of Superintendent of the Southern Pacific Railroad, and has already left Boston, where he has been temporarily sojourning, for St. Louis, the headquarters of the road.

☞ The rails on the Houlton Branch (Me.) Railroad are now all laid, and the cars will soon pass over the road.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, October 29, 1870.

Stock Exchange and Money Market.

Money worked quite comfortably for the borrowing interests at 4@6 per cent. on call, and 7@9 per cent. per annum, in the discount line, up to Tuesday of the current week, when, through some speculative manipulations of the floating supply of capital, the call loan rate was run up to the full legal figure of 7 per cent., as the minimum quotation, which rate was maintained on Wednesday, to the more active borrowers, with an urgent inquiry noted for accommodation, the market closing with indications of increased stringency. The city banks made a handsome addition, last week, to their legal tender and deposit lines, and reported a moderate gain of specie. They enlarged their loans and reduced their circulation slightly. The U. S. Sub Treasury lost about half a million of specie, and gained $529,395 of currency, during the week. The balances of gold under the control of the Treasury Department, at all offices, at the close of business on Saturday, were $99,507,000, including $12,508,000 represented by outstanding coin certificates, leaving a net coin reserve of about $87,000,000 in the ownership of the Government, as against some $88,000,000 a week earlier. The Treasury currency balances have been reduced to $21,583,984, against $25,260,000 at the close of the previous week. The customs revenue at this port for the week was $2,405,687, or about $400,000 a day, and the specie export was $556,180, while the outflow of coin from the Treasury Office, through the sale of a million of Government gold on Wednesday, and the week's disbursements of $766,695 of coin-interest, partly on the November account, with the rebate, and $466,000 in further redemptions of the 1871 bonds, has been about $2,233,000.

The specie reserve of the city banks according to the latest return is $11,948,113, against $19,399,701 same time last year. The city bank deposits are now $189,578,983, against $175,798,919 week ending Oct. 23, 1869. The legal tender reserve amounts to $52,390,812, against $52 037,604 same time last year. The circulation now stands at $32,517,026, against $24,204,485 same time last year. The loans are now $265,665,396, against $249,395,073 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $87,883,145 a day, against a daily average of $87,257,885 the preceding week. The current weeks' exchanges average about 85⅝ millions a day. The city banks, last week, reported a gain of $337,405 of specie, $2,089,268 of deposits, and $1,864,533 of legal tender notes. They increased their loans $389,606; and reduced their circulation, $450,669

The city bank exchanges on Wednesday were about 96⅞ millions.

The coin reserves of the Treasury Department on Monday were $99,507,000, including about 12½ millions on deposit on private account; currency balances, $21,583,984.

National Bank notes to the amount of $471,330 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $334,541,268 against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,710,259 leaving, with the existing 1,612 banks, (having an aggregate capital of $427,235,701,) an actual circulation at this date, of $300,831,009. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $343,921,550; and for the public deposits, $15,906 500—making a total of $359,828,050. The Treasury Department, last week redeemed and destroyed $683,200 of worn and mutilated fractional currency, and issued $455,444 of new.

The U. S. Sub-Treasury receipts, week ending with Oct. 22, were $3,634,997 in coin, (including $2,403,000 from customs duties,) and $6,442,129 in currency; payments, $4,078,150 in coin, (including $766,695 of coin interest,) and $5,916,734 in currency; balance at the close of the week, included $61,636,942, of coin, against $62,080,094 the preceding Saturday, and $7,339,196 of currency, against $6,813,800 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $1,049,406 in coin, (including $289,475 from customs,) and $246,848 in cur-

rency; payments $466,874 of coin (including $39,000 of coin interest), and $332,479, of currency. On Tuesday, receipts, $1,014,771 in coin (including $248,296 from customs), and $213,056 in currency; payments, $163,115 in coin (including $35,000 of coin interest) and $271,797 of currency. The balance at the close of business on Tuesday included $7,194,823 of currency, and $63,071,130 of coin, against a balance a week previous of $7,801,183 currency, and $62,641,472 coin.

The aggregate receipts of the U. S. Sub-Treasury in September were $45,989,781, including $14,704,035 from customs; aggregate payments, $57,093,400, including $3,988,005 of coin interest.

The U. S. Sub-Treasurer issued in September $1,137,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $1,860,946 of coin certificates, received for customs.

Government revenues have been on a reduced scale, since our last. The excises, during the week yielded about three millions; customs at the port of New York, $2,307,554, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $6,495,998 in currency. The income of the Government, from excises, since July 1, 1870, has been about 62 millions.

Early in the week, the feature of the Gold movement was the unusual stringency in the gold loan market, the supply of cash gold having been very limited, and under very strong control, enabling lenders to impose on mercantile, as well as on speculative interests, extraordinary rates for the temporary use of coin, pending the proximate liberal disbursements without rebate by the Treasury on account of the November interest on the Public Debt. The pressure was most severe late on Saturday. On Monday, under orders from Secretary Boutwell, the U. S. Sub-Treasurer at this port commenced the payment of the November interest, without rebate. The adoption of this measure is likely to be of much benefit to the legitimate financial and commercial interests. Under the new orders, $2,513,678 of unrebated interest were disbursed on Monday and Tuesday; and $616,429 on Wednesday. There had been previously paid out in this city $1,356,397 50, of rebated November interest. On Wednesday, Government marketed a million of gold at from 111 75¾@111 86. The bids reached an aggregate of $4,237,100. The actual sales of gold through the week at the Gold Exchange were on a limited scale, and the speculation was without spirit. The range of the price was from 111⅛@113¼, and the closing quotation on Wednesday was 112, as against at 113¼ the preceding Wednesday. The customs and export demand was less urgent.

Under to the official programme of the Treasury Department for October, Government closed its Gold sales for the month as follows: Wednesday, Oct. 26, $1,000,000. And its Five-Twenty purchases as follows: Thursday, Oct. 27, $2,000,000.

The export drain last week was $556,180 against $654,323 week ending with Oct. 15; $802,174 week ending with Oct. 8; $465,260 week ending with Oct. 1; $1,345,408 week ending Sept. 24, less than a million week ending with Sept. 17; 1⅜ millions week ending Sept. 10; 1⅛ millions week ending Sept. 3; 2¼ millions week ending with Aug. 27th, about three millions the week ending with August 20th, 3⅞ millions the week ending with Aug. 13th, and nearly 7 millions the week ending with Aug. 6th.. The shipments thus far this year have been about 51¼ millions, against 28⅜ millions same time in 1869; 66⅞ millions same time in 1868; over 43 millions same time in 1867; nearly 54⅛ millions same time in 1866; and 24¼ millions same time in 1865. On Wednesday of the current week, the specie exports were only $179,778. The exchanges at the Gold Exchange Bank, which were 60⅝ millions on Thursday of last week, were 89 millions on Saturday, nearly 82 millions on Monday of this week, and nearly 99 millions on Tuesday. On Wednesday they were 64⅛ millions.

The coin balance of the U. S. Sub-Treasury on Thursday morning was about 63½ millions.

The customs demand for Gold last week, averaged $384 592 a day; thus far, this week, it has averaged $266,885 a day, or equal to a weekly aggregate of $1,601,310. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $4,699; and since Jan. 1, 1870, $8,493,710, against $14,737,936 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $119,675,357 against $111,534,527, same time in 1869.

The exports of specie, from this port, last week, were $556,181 against $170,238 same week last year; and since Jan. 1870, $51,242,749, against $28,393,797 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $766,695; and since Jan. 1, 1870, $68,140,881 against $69,975,654 same time in 1869.

The customs revenue of the port on Wednesday was $347,000; and the coin interest disbursements were about $416,429.

The customs revenue at the port of San Francisco, from Jan. 1 to Oct. 14th, was $6,935,000, against $6,803,000 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Oct. 14th, were $28,797,422, against $30,964,059 same time last year.

Foreign Exchange has been in reduced supply and more demand closing stronger. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, 109⅝@109⅞. The offerings of produce bills have been rather freer. The week's exports of domestic produce have been to the currency value of $4,337,058, and since January 1, 1870, $149,092,259 against $160,123,594, same time in 1869.

Government securities have been more request and toward the close generally quoted stronger in price on a light offering and growing demand from investment buyers, and under the further purchase and retirement of two millions of Five-twenties by the Treasury Office on Thursday. The later dealings show a tame, but steady movement, influenced slightly by the increased activity on Monday.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113⅝@113¾; U. S. Five-Twenties of 1862, 112⅝@112⅞; U. S. Five-twenties of 1864 at 111½@111⅝; U.S. Five-Twenties of 1865 at 111⅝@111⅞; U. S. Five-twenties of 1865 consolidated, 110⅜@110½; U.S. Five Twenties of 1867, 110⅜@110½; U. S. Five-twenties of 1868, 110½@110¾; U. S. Ten-forties at 106½@106¾; U. S. Six per cent. currency bonds, 111⅛@111⅜.

State bonds have been in light demand, most of the week, but have been quoted generally steady in price.

Railway and miscellaneous share property has been fairly active but unusually variable in price, closing tame and weak.

Railway bonds have been in good investment request, at firm prices. Central Pacific Sixes have been more active, closing on Wednesday at 90⅝@90¾. The Union Pacific Sixes closed firmly on Wednesday at 83@83⅛. The registered First Mortgage bonds of the Chesapeake and Ohio Railroad have been in moderate demand at 90 per cent. and accrued interest.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 12.	Oct. 19.	Oct. 26.
Cuosols	—	92⅝	92⅛

* Ex-Coupon.

At Frankfort on Wednesday, U. S. Five Twenties were quoted at 95⅝.

At the auction sale of Scranton Coal on Wednesday, 90,000 tons were sold at reduced prices, ranging from $3.85@$5.05, as against $4@$5.40 in September.

General business has been quite active for the season, particularly so in Cotton and Breadstuffs but at unsettled prices. Middling upland cotton closed tamely on Wednesday at 16⅞ cts. per lb. The stock of cotton now here is given at about 27,500 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts at all the ports, since Sept. 1, 1870, have been 352,150 bales, gainst 348,170 bales same time in 1869–'70; exports same time 115,500 bales, against 113,000 bales same time in 1869–'70; stock on hand at latest dates, 115,500 bales, against 155,800 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870 have been 13,127 pkgs., against 18,337 pkgs., same time in 1869. From Boston, 5,052 pkgs. in 1870, against 6,512 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves of good quality have been in moderate request and lower; we quote the range at from 8@16¼c. per lb.; week's receipts, 9,787. Milch cows quiet at $40@$100 each, receipts, 125. Veal calves have been in fair demand at from 5½@13c. per lb.; receipts, 2,942. Sheep in better request at from 4¼@7c.; lambs at 6½@9c. per lb.; receipts, 46,259. Swine have been in less demand at 8@8½c, per lb.. all live weight; receipts, 23,337.

Foreign goods have been moderately dealt in at generally steady rates. The dry goods entries at this port, last week, were $2,229,190, making with the general merchandise imports, a total of $6,310,229 against $5,018,214 the preceding week.

Ocean freights have been more active and quoted stronger. For Liverpool we quote flour at 2s. 3d. by sail, and 2s. 7½d.@2s. 9d. by steamer per bbl.; grain at 9@9½d. by sail, and 9½.@10d.

by steamer per bushel; cotton at ¼@$\frac{5}{16}$d. by sail and ½d.@$\frac{9}{16}$d. by steamer per lb.; and heavy goods 20s.@27s. 6d. by sail, and 25s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday, 465.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending October 25th, and since the beginning of the year:

	1869.	1870.
For the week.....	$4,997,794	$4,337,058
Previously reported..	156,125,800	144,755,201
Since Jan. 1.....	$160,123,594	$149,092,259

The imports for the week ending Oct. 22, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,618,658	$2,229,190
Gen. merchandise..... ..	2,807,173	4,081,039
Total for the week.....	$4,425,831	$6,310,229
Previously reported....	244,054,549	243,379,471
Since January 1.....	$248,480,380	$249,689,706

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST.,
NEW YORK, Oct. 24, 1870.

☞ THE FUNDING OF UNITED STATES FIVE-TWENTIES into a first-class security, paying the same rate of interest (six per cent., gold), and which cannot be called in under twenty-five years without the consent of the holder, may now be effected at a clear profit of about twenty per cent., by exchanging them for the FIRST MORTGAGE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY.

The five-twenties of 1867 are selling to-day at 110⅜, and the Central Pacific Bonds at 90¾; $1,000 of the former will buy $1,000 of the latter, and leave nearly $200 for use or for re-investment; or $5,000 of the former, paying $300 in gold annually, will buy $6,000 of the latter, paying $360 in gold annually, and leave a balance in cash of over $90.

The Central Pacific is a completed, thoroughly-built, well-managed road, doing a large business, and earning an immense revenue. The bonds are well and favorably known, and constantly dealt in, both here and in the chief financial centres of Europe, and they can be disposed of at a quoted market price with the same facility as Government bonds, and are daily quoted at the Stock Exchange.

Having originally negotiated these bonds, and being thoroughly acquainted with their soundness and value, we have introduced them as a specialty in our regular business in connection with our dealings in Government securities, and recommend them without hesitation to our friends and customers desiring to make investments or to fund their five-twenties upon advantageous terms, without reduction of interest.

FISK & HATCH.

☞ We invite attention to the Advertisement of Mr. JOHN S. SCHULTZE, Receiver of the Novelty Iron Works, in another column of this week's issue.

☞ W. Milnor Roberts, Associate Chief Engineer of the Illinois and St. Louis Bridge Co., has been appointed Chief Engineer of the Northern Pacific Railroad, and will enter upon the duties of that position on the 1st of November.

☞ Dudley M. Steele has been elected President, and Milton Tootle Vice President of the St. Joseph and Denver Railroad Company.

☞ The earnings of the Chicago, Cincinnati and Louisville Railroad, for September 1870, amounted to $14,553 96.

☞ The Calumet Mining Company has declared a dividend of $5 per share, payable Nov. 15. The Hecla Mining Company has declared a dividend of $5 per share, payable Nov. 5.

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLIGENCE—BURDEN OF PROOF—WATCHMAN.

The facts in the late case of The Indianapolis and Cincinnati Railroad Company *vs.* Paramore, (31 Ind., 143,) are fully and clearly stated in the following opinion by

ELLIOTT, C. J.—Paramore, the plaintiff below, recovered a judgment against the Railroad company, from which the latter appeals.

It appears from the record that the recovery was had upon either the second or third paragraph of the complaint, demurrers to these were overruled: and this ruling presents the first question in the case. The averments are substantially the same in each. We state the facts as presented by the third paragraph. It alleges that the railroad company, by its agent, contracted and agreed with the plaintiff that if he would deliver on the line of the company's railroad track, at or near the town of New Point, in the County of Decatur, and at such places as were indicated by such agent, a quantity of cord-wood for the use of the company, that the latter would, at reasonable times, and at least once a month, measure and pay for the same a fair cash price, that in pursuance of said contract and in accordance with the instructions of said agent, the plaintiff did in September, 1865, deliver as directed, one hundred and twenty cords of wood, of the value of five hundred dollars, of which the defendant had notice. Yet the defendant failed and refused to measure said wood for a long time, to wit, for more than one month; and that before the same was measured it was totally burned up and destroyed by fire, originating from a locomotive engine of the defendant, and caused by the fault, carelessness and negligence of the employees of the defendant, etc.

The first paragraph is on contract for wood sold and delivered to the railroad company. The second and third are treated by counsel of both parties, in this court, as paragraphs in tort resting on the allegation that the agents and employees of the railroad company, in charge of the locomotive, by carelessness and negligence in running the same, set fire to and thereby destroyed the plaintiff's wood; and the objection urged to their sufficiency is, that it is not averred that the wood was destroyed without the fault or negligence of the plaintiff. A contract between the parties in reference to the wood, and its delivery on the line of the railroad under the direction of the defendant's agent, are clearly alleged, as well as the failure of the defendant to measure and pay for the wood within the time limited, and no substantial objection to them as paragraphs on contract is apparent. But assuming that it may be inferred that, under the alleged agreement, the wood remained the property of the plaintiff until it was measured and paid for, and before that was done it was destroyed by fire caused by the carelessness and negligence of the servants and employees of the railroad company in running its locomotive on the track of its road, we think the averments are sufficient to exclude the idea that any negligence on the part of the plaintiff contributed to the result. It cannot be inferred from the facts alleged that the plaintiff was in any wise an actor in the matter of the fire. It is averred, that he deposited the wood on the line of the railroad under the direction of the defendant's agent. He had no connection with, or charge over, the locomotive from which it is alleged the fire originated. The injury was not to him personally, but to his inanimate property, and for aught that appears, in his absence; and it is averred, that the injury was caused by the negligence and carelessness of the defendant's servants and employees. It is very dissimilar to a case where the action is brought for a personal injury to a passenger on a train, or to one, not a passenger, who is struck or run over by a passing train, on which the plaintiff is necessarily present, and an actor, and where his own negligence may readily contribute to the injury.

The cause was tried by a jury. After the verdict for the plaintiff was returned, the railroad company filed a motion in writing for a new trial, which the court overruled. One of the reasons urged for a new trial was, that the verdict of the jury was contrary to the evidence. Overruling the motion for a new trial is assigned for error.

The evidence is before us, from which it appears that the railroad company had a wood-shed at New Point one hundred feet long, on the north side of the track, and on the north side of the shed an open space used as a wood yard, on which was ricked, in the fall of 1865, about one thousand cords of wood, part of which belonged to the company, and the residue to several other persons. The ricks extended to near the shed, leaving a wagon way between the wood and the shed.

Paramore, the plaintiff below, in the fall of 1865, (finishing it some time in November,) hauled and ricked up in said wood-yard one hundred and three cords of wood, which he intended for the railroad company, but had no contract with it for the sale of the wood. A number of persons, including the plaintiff, had frequently hauled and ricked wood there, and when the company needed it for use the amount desired was measured and paid for, but until that was done it remained the property of those who furnished it.

The plaintiff's wood in controversy was deposited there in the same manner, and had not been measured, received, or paid for by the company, when, on the 6th of January, 1866, the wood-shed accidentally caught fire and burned down. The fire was communicated from the shed to the wood, the greater part of which, including all the plaintiff's except about fifteen cords, was burned up. The plaintiff himself testified, that he had no contract with the company under which the wood was delivered; that he had been putting out wood ever since the road was built, and never had a contract with the company. And the jury found specially, that the wood was the property of the plaintiff, Paramore, when it was burned up. So that the recovery must be sustained, if at all, on the ground that the fire was caused and communicated to the wood by the carelessness and negligence of the company's servants and employees.

The evidence does not show how the fire originated. A quantity of dry wood had been sawed and piled up at the south side of the shed, close to the track, for the use of the passing trains. The fire was first discovered in this pile of wood, which was then burning rapidly, but it communicated immediately afterwards to the shed, which was of light dry material. The day was dry and windy, and the flame spread with great rapidity, and in a very short space of time the whole shed presented a sheet of flame, which it was impossible to arrest. The agent of the company, whose office was but a short distance from the wood-shed, gathered together fifty or sixty hands as soon as possible after the fire was discovered, who used every possible effort to save the wood, but the greater part of it was burned.

It might perhaps be inferred that the fire originated in some way from a locomotive; but the only evidence from which such an inference can be drawn is, that two trains, one a passenger and the other a freight train, had passed that point but a short time before the fire was discovered. But if it is inferred the fire thus originated, still there is not a particle of evidence to show that it was caused by any defect or imperfection of the machinery, or by any want of care or prudence on the part of those having charge of the trains, unless such negligence is to be inferred, *prima facie*, from the fact of the fire, thus throwing on the defendant the burden of disproving negligence, without any affirmative evidence to establish its existence. The American cases, except in those States where it is regulated by statute, seem generally to concur in holding, that no such inference can arise from the fact alone that a fire is thus produced. See Redf. Railw., § 125, 5, and cases there cited.

The use of such engines in operating railways is authorized by law, and why should the presumption of negligence arise from the fact of fire being communicated by them? It will scarcely be denied that they are liable, unavoidably, to communicate fire, especially during very dry periods, to combustible matter near the track; and we see no reason why the mere fact that a fire is thus caused should raise a presumption of negligence. It is undoubtedly the duty of railroad companies to use machinery that is properly constructed with a view to prevent fire from being thus communicated, and the engines should be operated with care and skill to the same end. And if fire is communicated by an engine, caused by a failure to use proper preventives, or by the carelessness of employees, the company is liable for the consequences; but as negligence, in either respect, involves a wrong, it should not be inferred without proof, the burden of which rests on the party alleging it.

It is however insisted on the part of the appellee, that it was the duty of the railroad company, under the circumstances, to have kept a guard or watchman constantly stationed at the wood-shed to guard against accidents by fire, and that a failure to do so was such culpable negligence as to render the company liable. It appears from the evidence that the fall and fore part of the winter of 1865 was an unusually dry season, and that in some way, fire was communicated to the roof of the wood-shed, on at least two occasions, but was extinguished without injury, and the company thereafter kept a watchman stationed there until a week or ten days of the time the wood was burned, when a change occurred in the weather; it rained, and perhaps snow fell, and the watch was discontinued. It subsequently became dry again, and the fire occurred on a dry, windy day.

The plaintiff at the time of hauling the wood to

the yard was fully aware of the danger from fire, and knew that fire had been, and was liable to be, communicated to the shed, and in depositing his wood there, assumed the risk of its being burned by unavoidable accident, to which the place rendered it liable; not as is claimed by appellant's counsel, that he was thereby guilty of such negligence as to bar a recovery for its destruction by the negligence of the railroad company or its employees. That was the proper place to deposit the wood for market, and whilst in doing so the plaintiff assumed the risk of its being burned by unavoidable accident, he was not thereby guilty of negligence, and if the fire was communicated to it by the negligence of the company or those in its employ, the company would be liable. It was the duty of the company to use reasonable precautions by providing properly constructed machinery, and the duty of its servants to use reasonable care and diligence in its use, to avoid the communication of fire to the shed and wood; but no reason is perceived why the company was under any more obligation than the plaintiff to be at the expense of keeping a watchman stationed there, or protect the shed and wood and extinguish any fire that might be kindled by unavoidable accident. Every proprietor adjoining a railroad may lawfully deposit his property or goods or erect valuable buildings on his own premises, in close proximity to such road; but in doing so he takes upon himself the risk of danger of fire being communicated thereto without the fault of the railroad company or its servants. And the existence of such danger does not impose on the company any obligation to incur the expense of a guard. The establishment of such a principle would require railroad companies to station guards along the whole line of their roads.

The principle applicable to such cases is, that a party in the exercise of his legal rights must use reasonable and proper care to avoid injury to others. But if such care be exercised, and an injury unavoidably results to others, no liability attaches. Clark *vs.* Foot, 8 Johns., 421.

We think a new trial should have been awarded.

Judgment reversed, with costs, and the case remanded for a new trial.

Intercolonial Railway.

A telegram to Sanford Fleming, Esq., from Amherst, on Friday last, announced that the Provinces of Nova Scotia and New Brunswick were linked together by the railway, Mr. Schrieber having on that morning run a locomotive from the New Brunswick Eastern Extension line over the Missiquash bridge into Columbia county. It is expected that in four or five weeks from to-day, the cars will run regularly to Amherst. We understand that the railway commissioners, after being over the line, report progress on the three Nova Scotia sections as being most satisfactory; and it is confidently expected that, with the exception of, perhaps, a small gap of a few miles about the Folly Mountain, there will be regular communication by rail between Halifax and St. John before the close of 1871. On the Quebec end of the line, the work is also said to be progressing favorably; and we are informed that one section, that for which Mr. Duncan McDonald, of Montreal, has the contract, is about completed, and ready to be handed over to the Commissioners. In two years from the present time, we shall probably have continuous communication by rail, through Dominion territory, from Halifax to Montreal; but months before the Intercolonial will be completed, we shall probably enjoy the same accommodation through New Brunswick and the State of Maine, by means of the Western Extension.—*Halifax Citizen, Oct.* 10.

Atlantic and Great Western Railway.

Statement of bonds and debentures in circulation, and of deposits of same, and assents of Proprietors in support of the Official Scheme of Re-organization, dated May 18, 1870:

Bonds and Debentures Issued.	Total issue in Circulation.	Deposits.	Assents.	Total.
New York—1st mortgage bonds	$702,500	$438,500	$10,000	$448,500
Pennsylvania—1st mortgage bonds	1,570,700	1,025,800	181,200	1,207,000
Ohio—1st mortgage bonds	3,427,800	405,000	32,000	437,000
New York—2d mortgage bonds	643,800	377,800	12,000	389,800

* This amount depends on the settlement of open accounts for which they are authorised to be issued.

† This amount represents the liabilities only, exclusive of the Share Capital.

St. Louis and Southeastern Railway.

The company building this line of railway was organized under special act of the Legislature of Illinois, March 24, 1869, with authority to build from East St. Louis by way of Mt. Vernon, McLeansboro and Equality to the Ohio river at Shawneetown, a distance of 140 miles.

The first division, extending from East St. Louis to Mt. Vernon, crossing the Illinois Central at Ashley, will be put in operation on the first day of November next, the distance being 75 miles. One section of the Eastern division, extending from Shawneetown to Equality, 12 miles, will also be completed at the same time. It is the intention of the company to finish the whole road next year, and probably, to aid in the construction of the Shawneetown and Madisonville Straight Line Railroad, which will connect with the Evansville, Henderson and Nashville Railroad, now about completed. The distance from St. Louis to Nashville, Tenn., by this new and almost air-line route, will be 284 miles, and cannot be practically shortened.

At Mt. Vernon, the proposed St. Louis and Louisville Railroad will connect, and when built, will reduce the distance between these two great cities to about 250 miles. The construction of this important link has been commenced, and one section is to be put in operation during the current year.

The local aid upon this railway line will exceed $1,500,000. The remainder of the means required to complete the road is raised by preferred stock and an issue of first mortgage, convertible bonds, amounting to about $15,000 per mile, which was placed in the hands of Messrs. George Opdyke & Co., of New York, the company's financial agents.

The coal fields opposite St. Louis and near the Ohio river, will afford a very large business for the road. At Equality, the Salines are now worked successfully, and will undoubtedly be developed to a very large extent—R. R. *Record.*

Land Grant Railroads.

In the official list of Land Grant Railroads in the United States, published in our issue of Oct. 15th, page 1154, under the head of "California"—"Southern Pacific, from San Jose to a point on Colorado River"—the "estimated quantity undisposed of" should read 3,000,000, instead of "300,000" acres as printed. A careful comparison of our printed copy with the original, now in the hands of Hon. Wm. Lawrence, of Bellefontaine, Ohio, Member of Congress from that District, reveals but this one error. The amendment to the Homestead Law of May 20, 1862, approved July 15, 1870, giving to soldiers and sailors homesteads in alternate reserved sections of public lands along our western railroads, which was also published by us in connection with the list referred to above, was introduced into Congress by Judge Lawrence.

North Shore (L. I.) Railroad.

Articles of Association of the North Shore Railroad of Long Island were filed in the office of the Secretary of State of the State of New York, on the 21st of September. Amount of capital stock five millions of dollars. Length of road one hundred miles, to commence at Jamaica and run through the villages of Manhasset, Roslyn, Glen Cove, Locust Valley, Oyster Bay, Cold Spring, Huntington, Centreport, Northport, Middleville, Smithtown, Stoney Brook, Port Jefferson, Bating Hollow, Southold, Greenport, Marion and Orient—also a branch from Jamaica to Newtown Creek. The directors are: Daniel D. Remsen and R. W. Leavitt, Flushing; Charles McAuley, Thos. A. Wellford, John P. Smith, R. W. Adams, Wm. B. Mabon, Henry Holcomb, Howell Smith and Francis Weeks, of Brooklyn; Robert Rodgers, of Huntington; John B. Stratton, of Ringewood; and Ogden P. Pell, of New York city.

☞ Mr. G. K. Jewett, President of the European and North American Railway Company for extension westward from St. John, says that there are between five and six hundred men at work grading the line in the State of Maine; and it is expected that the grading will be completed by May or June next. The line is already finished from St. John to the Maine frontier, and the part now in progress will complete the connecting link between the railway systems of New Brunswick and the United States.

☞ A special meeting of the stockholders of the Portland and Ogdensburg railroad was held in Portland on the 21st inst., to consider the best method of raising means for the completion of the road to Bartlett. There were 7,589 shares represented, about three-fourths of the entire stock. A vote was passed authorizing the directors, if they deem it expedient, to issue bonds to an amount not exceeding $800,000, secured by a mortgage on the road.

☞ The Augusta *Journal* says that the Androscoggin railroad is now under excellent management, and has for the past year paid 6 per cent. clear of government tax, and that this will, at some future day, be the thoroughfare from Portland to Quebec, it being some 90 miles nearer than the route travelled now.

List of U. S. Patents.

Issued for Improvements relating to Railroad Construction, Rolling Stock, &c., for the week ending Oct. 25, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

Parkton and Manchester Railroad.

On Saturday, in company with Chief Engineer J. S. Gitt, we passed over one mile of the work of the Parkton and Manchester Railroad, from Irving College, at the east end of Manchester, to Falkenstein's tannery. We found this portion of work graded and ready for laying the track, except a ravine which is to be bridged with trestle work. Mr. Gitt informed us that five miles of the road, with the exception of trestle work and culverts, have been finished from Parkton in the direction of Manchester. The distance from Parkton to Manchester, by the route taken, is fourteen miles, from which it is seen that eight miles of the road are yet to be graded. When finished the distance from Manchester to Baltimore will be by railroad forty-two miles. The entire distance is through a picturesque and romantic region, and no doubt it will become a favorite route for those who seek the smaller towns during the intense heat of summer. The total cost of putting this road in complete running order will probably reach $275,000.—*Manchester (Md.) Gazette.*

☞ The Boston *Journal* says that the injunction issued by Judge Shepley of the U. S. Court on the petition for the bankruptcy of the Boston, Hartford and Erie Railroad Corporation is sweeping and stops the work of Mr. Munson, the contractor, for the present. The petition for the bankruptcy contained the usual allegations of fraudulent preference of creditors, &c. A hearing upon it is assigned for November 2.

Michigan State Bonds.

A correspondent wishes to know if Michigan State bonds are a profitable or safe investment. We must answer that they certainly are. The interest on them is as punctually paid as governments, and the security is superior, as while there has been much talk of repudiation elsewhere, no one has as much as breathed of such a thing in their regard. There are now three classes of Michigan bonds upon the market. Those of a general nature, which may be classed as various, and which are payable in 1878, amounting to $316,000; these bonds bear interest at 6 per cent., and it is payable in January and July of each year. They can be purchased at 97, and are consequently a good investment. In the second place we have another 6 per cent. in the two million loan, payable in 1883, and interest drawn at the same periods. This is peculiarly profitable as a permanent investment, since it can be purchased at 92½, thus drawing 7½ per cent. as the figures gained when the bonds come to par, which must happen long before the expiration of the loan. The present amount of this loan is $1,946,000. The third class of State bonds is the war loan and amounts to $1,563,500. It carries 7 per cent., runs to 1890, sells at 97, and the interest is payable in May and November. We would rather see accumulated capital invested in manufactures and in developing the resources of the country, but to those who wish to invest in State bonds, we say that Michigan furnishes a very fair field for such investment.—*Detroit Journal of Commerce.*

☞ Mr. J. S. Gitt, the engineer appointed to survey the route of the New Freedom and Bachman Valley railroad, has surveyed about five miles, and reports that the heaviest grade will not be over 75 feet to the mile, and that the cost for grading the first three miles will not exceed $3,000 per mile. The road is 8¾ miles long, and is to run from the Chestnut Hill Ore Banks to Westminster, and will tap the Western Maryland railroad at the switch near the engine house, a short distance below that place.

☞ Major Myers, engineer of the Richmond, Fredericksburg and Potomac railroad, advertises for proposals to furnish material for the extension of the road to Quantico. One thousand piles, from forty to fifty feet in length, are wanted. Also, two hundred and seventy-five thousand feet of bridge timber and twenty five thousand crossties. The branch is being built on schedule time. The corporators for the line to Alexandria are before the Legislature asking for a change in their charter to the effect that they may build first between Washington and Alexandria, instead of between Alexandria and Brooke's Station.—*Fredericksburg (Va.) Herald.*

☞ On the 30th of September last there was a balance in the Pennsylvania State Treasury of $1,237,948. The amount of State debt at the same time was $31,238,389, of which $8,077,045 bore gold interest, and $22,900,000 bore currency interest. The amount of loan payable on demand was $597,295.

☞ A statement in detail of the comparative earnings of the Cincinnati, Sandusky and Cleveland Railroad for the three months of July, August and September, give the net earnings for 1869 at $126,893 58, and for 1870 at $106,680 34; decrease in 1870, $20,213 24.

☞ The Commissioners for the construction of the Intercolonial Railway, in Canada, advertise in London for tenders for the supply of 40,000 tons of Bessemer steel rails, such rails to be delivered during 1871 and 1872, together with the necessary fish-plates, bolts, and nuts.

☞ The contract for building the superstructure of the railroad and wagon bridge across the Mississippi River at Davenport, Iowa, has been awarded to Smith, Latrobe & Co., of Baltimore, Md., for the sum of $469,000.

ENGINES, TOOLS, MACHINERY, &c., FOR SALE

AT

THE NOVELTY IRON WORKS,

foot of East 12th St., New York,

—Embracing ENGINES, PLANERS' LATHES, SMITHS' and BOILER MAKERS' TOOLS, MACHINERY and PATTERNS, &c., &c., of the most approved kinds. Also

6 HIGH-PRESSURE ENGINES, partly finished;

2 STEVENSON-PATENT TURBINE WATER-WHEELS, 66-inch diameter;

and 1 MARINE BEAM ENGINE, 66 inches by 10 feet stroke.

Send for Catalogue.

JOHN S. SCHULTZE,

Receiver of the Novelty Iron Works.

Oct. 29, 1870.

Notice of Dissolution.

THE CO PARTNERSHIP heretofore existing between KELLOGG, CLARKE & CO., Engineers, contractors and builders of Iron Bridges, Roofs and Viaducts, is this day dissolved by mutual consent. Unfinished contracts will be executed by their successors, CLARKE, REEVES & CO., who will pay all debts and receipt for all moneys due the late firm.

Philadelphia, October 22, 1870.

FOR SALE—56 and 50 pounds English Rails here, and at New Orleans; and also to arrive at both ports.
HEYERDAHL, SCHONBERG & CO.,
32 Pine Street, New York.

RAILROAD IRON.

2,000 TONS 50 LBS. ERIE PATTERN, BEST Crawshays make. Now in yard and for sale by

49 Walnut St., Cinl., O.

CHEAP PAINTING.—
1/2 COST LEAD
100 lbs. of the PECORA COMPANY'S COLORED PAINT (costing $12.50) will paint as much as 250 lbs. of Lead, and wear longer. For particulars, address S. BOWEN, Sec'y., No. 150 North 4th St., Philada. or 75 Maiden Lane, N. Y.

Established 1820.

William J. Young & Sons,

Mathematical & Engineering

Instrument Manufacturers,

43 NORTH SEVENTH STREET,

PHILADELPHIA.

THE Firm of WM. J. YOUNG & CO., MATHEMATICAL INSTRUMENT Makers, consisting of WM. J. YOUNG & CHAS. S. HELLER, was dissolved shortly before the death of Wm. J. Young. The undersigned, the late Partner of said Firm, (who was with Mr. Young continuously for 15 years), will continue in the same line of business at No. 33 North Seventh Street, (corner of Filbert).

CHARLES S. HELLER.

Philadelphia August 1, 1870.

THOMAS D. STETSON, Solicitor of American and Foreign Patents, and Professional Expert in Patent Cases. No. 5 Tryon Row, New York.

TO CONTRACTORS.

THE AMERICAN AND MEXICAN RAILROAD AND TELEGRAPH COMPANY, at No. 71 Broadway, Room 31, New York, having secured the approval of the Government of Mexico of their surveyed routes from Guaymas to Hermosilla and through the States of Sonora and Chihuahua to the Rio Grande, are prepared to receive proposals for grading the road, furnishing and laying cross ties from Guaymas to Hermosilla, a distance of 80½ miles.

The proposals must be handed in on or before the first day of November next, and be made *for sections* and include excavations of rock and earth, and bridging, and be so made as to enable the Company to ascertain the cost per section as laid down on the Company's map and profile, which are now in their office for inspection. The Company reserves the right to reject any bids which in their judgment they deem advisable.

Per order of the Board of Directors.
Office hours 10 A. M. to 3 P. M.

JOSEPH BRITTON.
WM. H. DEGROOT,
WM. B. MAXSON,
Executive Committee.

To Contractors.

SEALED PROPOSALS will be received until October 31st, 1870, for Grading and Masonry of the Alexandria and Fredericksburg Railway, extending from Alexandria to a connection with the Richmond, Fredericksburg and Potomac Railroad, a distance of about 30 miles.

Proposals may be made for one or more sections of about one mile each.

Payments in cash, eighty (80) per cent. monthly, and balance on completion of contracts.

Plans and Specifications may be seen at Engineer's Office, Alexandria, Virginia on and after October 24th. Proposals to be addressed to

G. B. ROBERTS,
President A. & F. R. W. Co.,
Alexandria, Va.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

The Portland and Rochester Railroad.

The importance of a railroad, and its utility as a transportation route, are not always determined by its length in geographical miles or the cost of its construction. On the contrary, some short roads, from the peculiarities of their situation and the importance of their connections, render a service to the country that is of more importance to its industrial and commercial development than that often rendered by great through routes extending over half the continent. An instance of this is found in the Portland and Rochester Railroad, a short line of about fifty-two miles, extending from Rochester, New Hampshire, to Portland, Maine, but forming the connecting link in the chain of direct communication between New York and Halifax, by a shorter and more direct route than that now followed by way of Boston; besides establishing a new and more direct connection between the railroad system of the State of Maine—embracing in existing and projected lines some eight hundred miles of road—and that of the entire country. The only present connection between these two systems is that established by the Portland, Saco and Portsmouth road, which is not only inadequate to the business expected of it, but which, having a monopoly of the Maine traffic, might take advantage of its position to charge monopoly rates upon both passengers and freights. The prevention of this monopoly and the establishment of a healthy and legitimate competition for the Maine traffic by the opening of a more direct route to New York and the West, is one feature of the enterprise, which is sufficient to secure for it a recognition as one of the most important railroad enterprises now in progress in New England.

But while the value of the Portland and Rochester road as a new outlet for the traffic of the network of railroads centering at Portland is very great, its importance as a part of the new through route from New York to Portland and Halifax is far greater, as will be seen from a glance at its many connections, both lateral and terminal. Besides the local railroads of Maine, its eastern connections open for its traffic direct communication with Halifax *via* the Kennebec and Portland, and the Maine Central and the European and North American Railroads, together forming a chain of direct communication between Portland and Halifax. At its western terminus its connections, branching in a southerly and southwestly direction, are many and important. What these connections are, and their relative value as tributaries to the business of the Portland and Rochester road, can only be briefly indicated within the necessarily restricted limits of this article. The Worcester and Nashua road, now building, establishes direct communication with Nashua, N. H., from which point the Worcester and Nashua and the Norwich and Worcester and Worcester and Providence roads establish direct communication with New London and Providence, thus opening a new route to Portland and Halifax for the Eastern traffic of the New London and Providence steamers. From Rochester the Cochecho Railroad, the Boston, Concord and Montreal, the Vermont and Canada, and the Ogdensburg Railroads, open a direct connection with Montreal and Ogdensburg, N. Y., while the Concord and Rochester road, soon to be placed under contract, will give a short and direct line to Rutland, Vt., and the entire West. The completion of the Worcester and Nashua, and the Portland and Rochester roads, will also open a new and direct route to the most desirable section of the White Mountain region, which will secure for it a large and profitable summer travel. From Groton Junction, a connection *via* Fitchburg, by the Vermont and Massachusetts Railroad will be established with the Hoosac Tunnel, now rapidly approaching completion, and the West. From Rochester, again, the Boston and Maine, and the Eastern roads, offer competing routes to Boston, while a third connection is made with the same city, *via* the Nashua and Boston and the Lowell roads, at Nashua. Another connection with the West is also obtained at Worcester, Msss., *via* the Boston and Albany road. With this city the connections are the most direct possible, shortening the distance to Portland by about forty miles, and avoiding the delays and difficulties incurred by both passengers and freights following the existing route *via* Boston. The completion of the road to Rochester, and the building of the Nashua and Rochester road—for which the capital is now nearly provided through subscriptions to the capital stock—will complete the connection between Portland and New York *via* the Sound steamers, as we have shown, the Springfield line, the new Connecticut Air-Line route, and the Boston, Hartford and Erie road, when the latter shall be completed to Palmer. Thus, while the distance between New York and Portland is materially reduced, the delay and expense of transhipping freight at Boston, and transferring passengers through the city from station to station, will be entirely obviated. The same favorable conditions will attract for the new route a large amount of through business to Halifax. Continuous rail communication to Halifax shortens the time consumed in a voyage to Europe by three or four days, and it is quite certain that a large portion of the European travel will follow the new route, being shorter, quicker and more convenient than passage to and from this port direct. These favorable conditions, and the network of important connections, insure for the Portland and Rochester road and its continuation, the Nashua and Rochester road, an extensive and largely profitable business in both through and local traffic, and give them a prominent rank among the most important railroads now building in the New England States. A glance at a good railroad map, giving the new road and the connections we have indicated, will show more perfectly

than we have been able to do the importance of this link in the chain of direct through communication between New York and Portland.

The financial condition and prospects of the Portland and Rochester Railroad Company, and of the Nashua and Rochester Railroad Company, whose interests are closely linked with it, are unusually favorable and promising. The former of these roads is making satisfactory progress towards completion, and it is the intention of the managers of the enterprise to open the entire line to business before the close of the current year. To facilitate the completion of the work the Directors have decided to issue a limited number of first mortgage bonds, of convenient denominations of $200, $500 and $1,000. These bonds are to run 17 years, bearing interest at the rate of 7 per cent. per annum. With the loan granted the company by the City of Portland, they constitute the only lien upon the company's property. This issue of bonds, to the amount of $350,000, is made with the entire concurrence of the City of Portland; a formal vote of the city council, approved by the Mayor, having placed them upon the same footing in the first mortgage security as the loan of $200,000 made by the city itself, and thus making $1,050,000 including the current issue of new bonds, the entire amount of the mortgage upon the property of the company. The management of the enterprise is in good hands, and the road, as far as completed, has been built in the most thorough and substantial manner—the section now in operation enjoying a large and profitable local trade which is in itself sufficient to insure the financial success of the line. Though less advanced, the prospects of the Nashua and Rochester road may be considered equally favorable. Most of the large companies owning and operating the roads which form its principal connections are represented in its management, and largely interested in its progress; and its completion will be effected without unnecessary delay, if money and business enterprise can together accomplish this desirable result.

From the facts above briefly outlined, and many others of which we are compelled to omit the mention, it is evident that the Portland and Rochester road will prove one of the most useful, as well as profitable, railway lines in the Eastern States. Lightly encumbered, and possessing extraordinary facilities for the command of a large and profitable traffic in through and local freights and passenger travel, its prospects are certainly as good as could be desired by the most prudent investor. The mortgage issued as a security upon the bonds soon to be offered in the Eastern markets, is executed to Messrs. H. J. Libby, Frederick Fox and John A. Waterman, Directors, who have been elected as Trustees for the bondholders. These bonds are in all respects a first-class security, and the importance of the road, and of its continuation from Rochester to Nashua, is sufficient to insure for them the favorable attention of the enterprising capitalists of New England.

☞ The First National Bank of Altoona, Pa., has offered to exchange $130,000 of five-twenty six per cent. bonds for an equal amount of the new five per cents authorized by the recent act of Congress, in furtherance of the refunding of the national debt.

Old Colony and Newport Railroad.

The income of this road for the years ending May 31, 1869 and 1870, was as follows:

	1869.	1870.
From passengers	$835,064 97	$951,572 72
" freight	476,292 47	482,684 52
" expresses	54,937 24	64,718 05
" rents	22,612 10	26,519 96
" mails	13,647 98	6,564 89
" miscellaneous	113 99	2,169 00
" extra baggage	1,626 62	2,166 60
	$1,404,295 87	$1,536,895 24
Expenses, viz:		
Passenger department	$134,631 08	$139,183 90
Merchandise "	114,518 22	123,118 48
Locomotive "	234,868 69	254,713 14
Maintenance of way	192,045 89	229,385 29
General expenses	85,107 27	112,688 18
Miscellaneous	39,672 79	40,270 80
	$800,843 94	$899,359 74
Earnings less exp.	$603,451 43	$637,035 50
From which deduct:		
Town, City and State taxes	$67,584 14	
U. S. tax on gross receipts	25,880 10	
Interest and coupons paid.	183,948 02	
		277,412 26
Net income		$359,623 24
Balance of income per last report (less debt charged off, $15,000, and U. S. tax on surplus, $1,714 95)		211,140 84
Total		$570,768 58
Deduct dividends January and July $3 per share each, and U. S. tax		312,726 32
Balance May 31, 1870		$258,037 26

Compared with the previous year the gross receipts show an increase of $182,099 87; with an increase in working expenses of $98,515 80—making the increase in net earnings $83,584 07. The amount paid for interest and taxes, (not including tax on dividends,) is $20,512 51 in excess of the previous year. The increase of net income, after payment of interest and taxes, is therefore $13,071 56.

The increase in the number of passengers carried was 651,621, in the mileage of do., 2,450,416, and in the amount received therefrom, $116,507 75. The increase in tons carried was 19,057, and in receipts therefrom, $6,392 05. Of the increase from passenger receipts, $67,137 99 was from the local business. The local freight receipts have increased $9,299 20. The freight receipts from connecting lines decreased $2,907 15. The increase in number of miles run by trains was 42,531. The report says:

Three new locomotives, five passenger cars and thirteen freight cars have been added to the rolling stock.

Eight locomotives, ten passenger cars, eight freight cars, and twelve gravel cars have been rebuilt.

These repairs and alterations, with other repairs, make our rolling stock in better condition than it was last year.

About 700 tons of new rails and 34,000 new sleepers have been used in repairing the track, and 1,600 tons of rails have been taken up, repaired, and relaid. This, with the ordinary repairs, has kept our track in good condition.

The new passenger depot, engine house, and turn-table in process of construction last year at Plymouth, together with large additions to the freight depots and improvements to the depot grounds, have been completed, affording convenient and ample depot accommodations for the business of that city.

Considerable additions and improvements have been made to our depot accommodations at Fall River, especially for the New York business, in connection with the steamboat line.

The increased expense of operating the road the past year, amounting to about $98,000, is accounted for by the increase of taxes, of miles run by trains, new depots, and repairs of buildings, road, and bridges.

The cost of repairing the damages to the road, bridges and buildings, caused by the great gale of September last, was about $20,000.

The new arrangement for New York business has worked well, and the receipts have been satisfactory, although the rates of freight were very low during a part of the year. The depression in business has lessened our income from freight.

The local business of the Dighton and Somerset branch has increased about $14,000 during the past year.

No change has been made, since the last report, in the land at South Boston.

Some further reductions have been made during the past year in the rates of fares and freight, season tickets, &c., and some increase in the number of trains. At the present time, our rates are as low, and our accommodations and facilities as great, as on other railroads terminating in Boston. The results of the present policy in this respect is shown in the continued increase of our business.

The trains have been run with regularity, and without accident to property. Two passengers have been fatally injured: one of whom jumped from an express train while in motion, and the other fell from the steps of a car. But little damage has been done to property of any kind; and the road, with all its appurtenances, has been well kept up, and is now in good condition.

The directors have deemed it expedient to purchase the Quincy Granite Railway, in order to extend the Mount Hope branch of this road to Belknap Square in Quincy. It is believed that this extension will, in future, afford us considerable freight business in connection with the quarries, and that there is already sufficient population upon the line to pay the expenses of passenger trains. The length of the proposed branch is about 3¼ miles, all but about one-half mile of which is graded ready for the rails. It is estimated to cost, including depots, &c., about $75,000.

The Duxbury and Cohasset Railroad Company, having received town subscriptions to its capital stock, which will insure the construction of its road, and it being important that it should form an extension of the South Shore Railroad, the directors have thought it for the interest of this corporation to assist the South Shore Railroad Company in providing for their stock subscription of $125,000.

Citizens of New Bedford, Fairhaven, Acushnet, Rochester, Freetown, Lakeville, and Middleboro' have obtained a charter for a railroad from New Bedford to Middleboro', forming a shorter and more convenient route for travel between those points and Boston. Its location is very favorable, and the road can be built for a comparatively small sum. If the parties in interest succeed in procuring sufficient subscriptions for stock to insure the building of the road, the directors consider that it will be expedient for this corporation to aid in its construction in the manner and to the extent provided in its charter.

The equipment of the road is as follows: 27 passenger and 11 freight locomotives; 69 passenger, 18 baggage, 167 long box, 199 long platform, 9 cattle, 7 short box, 37 short platform and 90 coal and gravel cars. Number of miles run by passenger trains, 613,252; by freight trains, 270,978; by gravel trains, etc., 38,168—total, 922,398. Number of passengers carried, 2,783,969; do., carried one mile, 42,664,450. Tons of merchan-

dise carried, 843,774; do., carried one mile, 9,791,472.

President.—HON. ONSLOW STEARNS.

Directors.—Onslow Stearns, Uriel Crocker, Benjamin Finch, Francis B. Hays, Oliver Ames, Samuel L. Crocker, John S. Brayton, Minot Tirrell and Royal W. Turner.

Treasurer.—JOHN M. WASHBURN.

Superintendent.—W. H. BULLOCK.

Southern Transcontinental Railway Co.

At a meeting of the corporators elected by the Legislature of the State of Texas to organize the Southern Transcontinental Railway Company, held in this city on the 31st ult., the following gentlemen were unanimously elected directors: Marshall O. Roberts, New York; John C. Fremont, New York; E. B. Hart, New York; H. W. Gray; New York; Edward Weston, New York; W. R. Stewart, New York; Ames Van Wart, New York; J. W. Forney, Pennsylvania; J. B. Bowman, Kentucky; Geo. Maney, Tennessee; C. F. Holly, New Mexico; R. M. Bishop, Ohio; J. W. Throckmorton, Texas; B. F. Grafton, Texas; G. H. Giddings, Texas; H. G. Stebbins, New York; W. R. Travers, New York; John J. Astor, New York; Edwards Pierrepont, New York; N. P. Banks, Massachusetts; J. D. Cameron, Pennsylvania; Z. F. Smith, Kentucky; W. S. Sherrod, Alabama; M. C. Hunter, Indiana; S. W. Morton, Kentucky; W. M. Harrison, Texas; W. T. Clark, Texas; J. M. Tebbetts, Arkansas; E. W. Rice, Iowa. The officers are: Marshall O. Roberts, President; Col. Henry G. Stebbins, Vice President; Wm. R. Travers, Treasurer; John D. Defrees, Secretary; and R. M. Corwine, Attorney.

Baltimore and Potomac Railroad.

The contracts for the construction of the Baltimore and Potomac Railroad through Charles county are now being made. The right of way has been secured, but in a few instances in which the land belongs to the estates of decedents, condemnation by juries are required. This will be attended to during the present week. On next Monday the contracts for the grading of the Alexandria and Fredericksburg Railroad, a branch of the Baltimore and Potomac, will be let. As soon as the construction of that part of the road running through Charles county is provided for, the grading between the city limits and the Patapsco will be begun.—*Balt. Am.*

☞ The railroad between Winona and Mankato, Minn., has been completed and opened for traffic.

Comparative Economy of Iron and Steel Rails.

BY ASAHEL WELCH, C. E.

Thy unit of value used in the following investigation is that of a mile of rails; without regard to how it is made up of tons per mile or rate per ton.

We shall have occasion to speak of value in each of its three ordinary senses, always distinguishing which; otherwise our results will be conflicting. The greatest difficulty met with in the study of our subject, arose from the ambiguity of this term.

The *intrinsic value* of a mile of rails is measured by their capacity for usefulness, and that, mainly by their endurance; and that depends on their material, size, form and quality. It does not vary, and it does not distinguish between present and future usefulness.

The *exchangeable value* is measured by price, which depends not only on intrinsic value, but on many other things, and varies frequently.

The *economic value*, as we shall call it, is measured by the combined capacity and opportunity for usefulness, that is, the actual usefulness where used, under actual circumstances. It is the value to the user. Future usefulness and future expenses chargeable against it, must be reduced to present equivalents. It may vary by variation of traffic, that is of opportunity for usefulness. It is this kind of value with which we have principally to do. We shall use the word in this sense when not otherwise stated.

An engineer who speaks of value, is likely to mean *intrinsic* value; a merchant, *exchangeable*; a shareholder, or his representative, *economic* value.

Those who have ruined their employers by splendid engineering, have done so because they neglected the distinction between the intrinsic and economic values of their work. They have created capacity for usefulness entirely disproportionate to the opportunity for usefulness.

That is the best engineering which accomplishes the purpose most economically. The present enquiry is therefore a proper one for engineers. They err who look only at intrinsic values.

A heavy steel rail, laid in a car shed, has many times the intrinsic and four or five times the exchangeable value of a light iron rail; but for use in that place, scarcely any more economic value.

These values, though widely different, are related. Economic value depends partly on intrinsic, and so in that direction is indirectly related to exchangeable value, which is also partly dependent on intrinsic. Economic value is directly affected by future prices, which control the cost of renewal or replacement.

We shall speak of the duration of rails without distinguishing between the effects of endurance, amount of traffic, weight of machinery, or speed of trains. These and other things must be carefully considered in determining the data to be used in the calculations.

Except when otherwise stated, traffic, and therefore values as well as prices, will be considered constant.

The economic value of a short-lived superstructure is most affected by endurance; that of a long-lived one, by interest, on which depends the present values of future quantities. If one mile of rails will last one month, and another ten months, on the same road, and the cost of renewal in each case is equivalent to a total loss of the rails, then, for that road, the latter is worth nearly ten times as much as the former. But if one will last ten years, till money doubles, and the other ten times as long, then the latter, for that road, is not worth quite twice as much as the former.

The present value of the second decade of the life time of a rail, is only half that of the first; of the third decade, only a quarter, and of the tenth, less than a five hundredth part of that of the first.

On a road where iron rails will last six or eight years, it is therefore of comparatively little consequence whether steel will last half a dozen, or a dozen times as long.

As the value of the rails for a particular road depends not only on their endurance, but also on the amount of traffic they are to carry in some specified time, that is, on their opportunity for usefulness, it is important to estimate correctly, not only what they are able to carry, but what there will be for them to carry. An error in estimate of traffic on any road, is also an error in estimate of value of rails for that road.

It greatly facilitates the comparison of the values of rails, or other things of different duration, with constant traffic or constant tendency to deterioration, to compare both with those that under the same circumstances will last forever. The relations of the destructibles to the indestructibles are simpler than their relations to each other.

The practical question has generally been, and often continues to be, not, which is most economical for perpetuation, but whether iron should be used first, while traffic is light and money scarce, and steel dear, and then, when worn out, be replaced by steel.

Let $\imath$ be the value of a mile of iron, or other inferior or light rails for perpetuation, and $\jmath$ for replacement by some superior rails, that in the place to be provided for will last through the time τ; s the value of steel, steel headed, or some superior or heavier rails that will last a longer time τ'; and v the value of a mile that under the same circumstances will last forever.

Let λ and λ' be the losses at the times τ and τ' respectively for renewals; including re-rolling, transportation, relaying, interruptions, repairs and interest thereon up to the time of renewal, risks and all other expenses and inconveniences; and δ the decrease in economic value of the superior rails at the time when the inferior are worn out.

If interest is compounded more than once in the unit of time then r the real rate will be more than the nominal rate.

Let r be the rate in cents of interest for the unit of time; $a = (1+r)^{\tau} - 1$ the rate of accumulated interest for the time τ, and a' for the time τ'; and a'' the rate for a time equal to $\tau' - \tau$.

Then supposing traffic and cost of renewals constant, $a v = a \imath + \lambda$ and $a' v = a' s + \lambda'$ Hence

(I.) $$v = \imath + \frac{\lambda}{a} = s + \frac{\lambda'}{a'}$$

(II.) $$\imath = v - \frac{\lambda}{a} = s + \frac{\lambda'}{a'} - \frac{\lambda}{a}$$

(III.) $$s = v - \frac{\lambda'}{a'} = \imath + \frac{\lambda}{a} - \frac{\lambda'}{a'}$$

The whole current cost for each unit of time $= r v$; which consists of two parts, the interest $r \imath$ or $r s$, which is paid as it accrues, and the economic depreciation $\frac{r\lambda}{a}$ or $\frac{r\lambda'}{a'}$ the payment of which, with the interest on it, is postponed till the rails are worn out.

The whole current cost that accrues during the the lifetime of the rails is, $a v$ or $a' v$, consisting of interest $a \imath$ or $a' s$, and losses on renewal λ or λ'.

The present value of the loss λ is $\frac{\lambda}{a+1}$:

(IV.) The present value of λ and its successors forever $= \frac{\lambda}{a}$

The present value of the accumulated interest and loss at the time τ is,

(V.) $\frac{a\imath + \lambda}{a+1}$, which is sometimes a convenient measure of the expensiveness of the rail.

The *physical* depreciation and consequent decrease in intrinsic value of a steel rail, when the iron rail is worn out, is,

(VI.) $\frac{\tau\lambda'}{\lambda'}$; but the *economic* depreciation and decrease in economic value, δ is

(VII.) $\delta = \frac{a\lambda'}{a'} = a v - a s$, supposing traffic constant.

If an iron rail will last till money doubles, and a steel rail four times as long, the physical depreciation of the steel, when the iron is worn out, is one-fourth of the cost of renewal; but the economic depreciation, the decrease in value to the owner, is only one-fifteenth of that cost. For, supposing the present value of the first decade to be 8; that of the second will be 4; of the third 2; and of the fourth 1; and the sum of present values of the first three decades will be 14; that of all four decades only 15; so that the value to the owner, is reduced only one-fifteenth by a reduction of one-fourth of the duration of the rail.

If the loss on renewal is a percentage m on i or m' on s, then

$$\text{(VIII.)}\quad i = \frac{a\,v}{a+m} = \frac{a\,s\,(a'+m')}{a'(a+m)} = \frac{a\,s}{a+m} + \frac{a\,m'\,s}{a'(a+m)}$$

Steel partly worn, that will still last just as long as new iron, is not necessarily worth the same as new iron, because worn out steel is probably worth more than worn out iron. So partly worn heavy rails that will last just as long as light new rails are worth more, because the worn out heavy are worth more than the worn out light rails.

The value of the partly worn steel is $s - d$, and the current cost for their residuary lifetime is,

$$\text{(IX.)}\quad a''\,s + L' - (a''+1)d.$$

If the price p of the iron is not the same as its economic value i, as compared with steel, the advantage or disadvantage of the iron is of course the difference between p and i; and the current cost for the unit of time becomes $r\,p + \frac{r\,L}{a}$.

But p in that case cannot be substituted for i in the foregoing equations.

Any future changes in the prices of rails to be perpetuated are most conveniently provided for by increasing or decreasing the values of L and L'.

In comparing steel with iron to be replaced by steel, it is necessary to take the changes in price into the calculation. Let q be the expected price of steel at the time of replacement; and let b = balance of value of the worn out iron rails over the cost of removal, and of laying down the steel to replace them, together with all the attendant risks, inconveniences and expenses. Then to make iron for replacement equally advantageous with steel

$$\text{(X.)}\quad j = s + \frac{b+d-q}{a+1}.$$ Or, if the price of steel is constant, $j = \frac{a\,v+b}{a+1} = \frac{a\,s+b+d}{a+1}$

If the traffic is expected to vary, the time must be cut up into periods coextensive with the lifetimes of the iron rails, throughout any one of which the traffic must be considered uniform, and the depreciations and values at the end of each period found by the preceding rules.

When the traffic varies, the depreciation in value of the steel has no relation to interest past, but only to future interest. It must be found by comparing the remaining duration of the partly worn steel under the expected circumstances, with that of new steel. Then a'' being the rate of accrued interest for a time equal to the difference between the residuary lifetime of the partly worn steel and new steel, and that of new steel put down at the same time being a', the depreciation of the partly worn steel is

$$\text{(XI.)}\quad d = \frac{L'}{1+a''} - \frac{a''\,L'}{a'(1+a'')}.$$

The loss from the value of new steel on renewal being L', that from the value of partly worn steel will be $L' - d$.

When the traffic varies, the value of v varies of course with each change.

Simple and obvious when stated, as the foregoing views and rules are, they were arrived at through calculations much more complex, and sometimes apparently conflicting.

These rules, and the tables deduced from them, do not aid in determining data, nor in any degree supersede experience and sound judgment. But as there are two channels of error, one of judgment and another of calculation, convenient formulæ reduce such chances to one; or at least, diminish the second.

In the following tables some illustrations of the applications of the formulæ, some results and some numbers useful in finding other results are given.

Table 1.

Quantities frequently represented in the foregoing formulæ. Steel supposed to last eight times as long as Iron. Traffic constant.

T Dura'n of iron rails.	a or a' Rate of accrued inter't.	$\frac{L}{a} = \frac{4000}{a}$ Pres't val. of loss on renewals.	$\frac{L'}{a} = \frac{5000}{a}$ Pres't val. of loss on renewals.	T' Correspondi'g dura'n steel rails.	$\frac{a\,L'}{a'} = d$ Depreciat'n steel.

The values of iron for replacement, in the foregoing table, are different from those in Table 2, Col. 3, for the reason that in the latter the price of steel is considered constant, while in this table it is constantly declining.

In these tables the losses preceding and attendant on renewal of iron rails, are assumed at $4000. With light rails and not very heavy traffic this is ample to cover all inconveniences. With heavy

rails and frequent trains to be interrupted, the cost and inconvenience will be much more. The loss on renewal of steel is assumed to be $5000. That will depend partly on the cost of new steel, and that on the import duties, which are not yet settled. We have assumed that it will be $9000 per mile, which contemplates an advance in duties sufficient to counterbalance the decline in premium on gold. The value of worn out steel is as yet quite uncertain. These, like all other data, must be ascertained for each case, and corrected on new information.

The percentage of difference between $4000 and any other value of L, will also be the percentage of difference between the numbers in third column of table I., and the numbers deduced from such other value.

It is obvious from inspection of table IV., that iron rails to be replaced by steel have heretofore been found more economical than steel; provided, that those laid in 1867 would last two or three years, those laid in 1868, a year or two, and those laid in 1869 half a dozen years.

But in 1870 it is equally obvious that steel is more economical than iron that will last even ten or a dozen years, if our data for the future are at all correct.

As a good iron rail will last several times as long as a poor one, and there is no standard of quality, it is impossible to say how much longer steel will last than iron. It will last more than twenty times as long as much of the iron laid during the during the past ten years. In the tables it is assumed to last eight times as long. On most roads, for the reasons already given, this question is of but little importance.

If the cost of renewal or replacement is a fixed sum, then the difference between the values of iron and steel is also a fixed sum; and there should always be the same difference between the prices. If the cost of renewal is a percentage, the values do and the prices should differ by a percentage.

These formulæ may be used in comparing the ultimate economy of bridges, buildings, vessels, and other things of different cost and durability used for the same purposes.

If single headed rails cost $7500 and last five years, and double headed, with the chairs they set on, $10,000 and last twice as long, and if the expenses of renewals are $4000 and $5000 respectively, then $p = 7500$. $s = 10000$. $L = 4000$. $L' = 5000$. $a = 0{\cdot}411$ and $a' = 0{\cdot}99$ and (neglecting the cost of reversal and constant cost of wedging the double headed.)

$$I = s + \frac{L'}{a'} + \frac{L}{a} = 10000 + \frac{5000}{0{\cdot}99} + \frac{4000}{0.411} = 10000$$

$+ 5051 - 9782 = 5219$. So that the double headed has the advantage of $p - I = 7500 - 5319 = 2181$ over the single headed for perpetuation.

Suppose that a wooden bridge will cost $10,000, and last sixteen years; and that the repairs, insurance, watching, and all expenses on it, with the interest on those expenses up to the time of renewal, and the cost of removal and the inconveniences, all together, amount to $5000, over the value of the old materials; and that a permanent bridge can then be built at the same cost as at first. Then $I = 10000$. $L = 10000 + 5000 = 15000$ and $a = 2$. Substituting these in the equation $V = I + \frac{L}{a}$, we have $10000 + \frac{15000}{2} = 17500$, equal to the value of a bridge that will last forever.

When the business is very heavy, the inconvenience of renewals, and the risks from fire or accident of temporary structures, are of course controlling considerations. If the interruption caused by the burning of the wooden bridge would involve a loss of $50,000, and the annual chance of burning is one in a hundred, then the annual risk of $500 capitalized, adds $7042 to the difference between the values, making that of the indestructible bridge $24,642.

As traffic generally increases faster than is expected, (though profits do not) steel rails and permanent structures become more advantageous than the calculations. They also have the advantage of safely allowing increased weights and speeds, which may become important.

On the other hand, where safety is not involved, and interruption would not cause serious loss, and especially where, (as happens so often in this country,) changes of route or plan are liable to be made, and where calculation makes the ultimate economy nearly equal, it is best to adopt the cheaper rail or structure. This is especially the case in station buildings and shops. Dead capital and outlay for a future generation better able to help itself than we are to help it, are thus avoided.

Our calculations are made on interest a 7 per cent., compounded semi-annually. Few railroad companies borrow at lower rates, many at much higher. Of course the calculations for each road must be based on the actual rate.

The writer having had much occasion to deal with these questions, has arranged the foregoing rules and tables for his own convenience. He presents them for publication, hoping they may sometimes abridge the labor of others who have to deal with the same questions.

Comparisons such as that of the ultimate economy of the wooden and stone bridges are often judged of in this country, though perhaps not often formally made. But an eminent European Engineer told the writer, some years ago, that the idea of such a comparison was entirely new to him.

Union Pacific Railroad.

The earnings, expenses and net profits of the Union Pacific railroad company from May to September, inclusive, in the years 1869 and 1870, were as follows:

1870.	Earnings.	Expenses.	Net Income.
May..	$802,586 09	$479,640 61	$322,945 48
June..	746,450 01	419,151 81	327,298 20

Decrease in expenses.....			524,132 65
Net increase of profits for five months.			$604,635 53

East Tennessee, Virginia and Georgia R.R.

The report of this company for the year ending June 30, 1870, shows the earnings to be $1,278,863 80, and ordinary expenses $716,182 12, leaving net earninge $562,681 68—from which should be deducted $146,882 15 for new rails, new cars, wood lands, masonry, etc. The working expenses were 56 per cent. of gross earnings. The roadbed is in fine condition. The assets of the road are $9,777,034. Its profit account shows $2,562,957. The road extends from Dalton, Ga., through East Tennessee to the Virginia State line.

☞ The construction of the Shepaug Valley (Conn.) Railroad has been awarded to a Pennsylvania company, for $370,000. It is the intention to have the road completed during the next season.

☞ The gross funded debt of the City of Savannah, Ga., is $2,326,280. The resources of the city are $2,763,980. The value of the taxable real estate is over $14,600,000, an increase of $2,500,000 in a year.

☞ MOBILE AND MONTGOMERY RAILROAD COMPANY EIGHT PER CENT. FIRST MORTGAGE BONDS. PRINCIPAL and INTEREST payable IN GOLD. INDORSED BY STATE OF ALABAMA.

We offer the above-named Bonds for sale, and, for the following reasons, confidently recommend them as a most desirable investment.

1. THEY ARE A FIRST MORTGAGE UPON A ROAD ALREADY COMPLETED, THOROUGHLY EQUIPPED AND IN SUCCESSFUL OPERATION. The object in placing this Mortgage upon the Road, and of selling these Bonds, is to build an extension of 15 miles from Tensas, the present terminus, into the City of Mobile, which connection is now made by boat. This extension will give entire through Rail connection to *Mobile* and *New Orleans*, thus saving the cost and trouble of steamboat service, and delay of breaking bulk both at Tensas and Mobile. The Road, including 15 miles extension, is 182 miles long.

2. THE MORTGAGE IS AT A LOWER RATE PER MILE THAN ANY SIMILAR BOND NOW OFFERING, being for little over $18,000 per mile—less than the Iron and Rolling Stock are actually worth. The cost of the Road is over $30,000 per mile.

3. The Road forms the only railroad connection between Montgomery, the capital of the State of Alabama, and Mobile, its chief commercial city, making it exactly the Hudson River Railroad of Alabama, besides being a link in the great through-coast line between New Orleans, Mobile, Montgomery, Savannah, Charleston, Richmond and New York, or the interior line between the same points, via Augusta, Charlotte and Danville.

4. The Net Earnings of the Road have regularly increased at the rate of about 20 per cent. per annum since the organization in 1867, *and are NOW much more than enough to pay the interest upon all the bonds authorized to be issued*, more than one-half of which are in the hands of the Company. These earnings will be largely increased upon the completion of the Mobile and New Orleans Road, which is to be opened for through travel in about four weeks, and probably more than double upon completion of proposed extension of 15 miles.

5. They are indorsed by the State of Alabama, whose high credit is well known, her 8 per cent. currency bonds now selling at par.

6. They bear 8 per cent. interest, both *principal and interest payable in Gold*, interest payable semi-annually in the City of New York in May and November.

7. OVER ONE MILLION OF THESE BONDS ARE ALREADY PLACED—a single well-known and careful investor (Judge Onderdonk, of Long Island,) after personal examination of the Road and its resources, taking $100,000 as a permanent investment, and Executors of Estates and Banking Institutions investing in amounts of from $20,000 to $50,000 each.

8. Only $450,000 are on the market. These are offered by the undersigned at the low price of 95 and accrued interest, in currency.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 5, 1870.

Stock Exchange and Money Market.

The Money market has been fairly active, through the week. The offerings of capital have been comparatively liberal for the season, and the prevailing rates have been 5@6 per cent. on call, though exceptional transactions have been reported as low as 4, and as high as 7 per cent. There has been a very moderate supply of prime mercantile paper on the market, and a good inquiry has been noted for the higher grades at 7@8½ per cent. per annum. The City banks, in their last weekly return, showed a gain of nearly three and a half millions in the deposit line, with an addition of over a million to the specie average, and of about five-eighths of a million to the reserve of legal tender notes. At the Treasury Office, the aggregate cash (coin and currency) balances, as officially reported, were about two and three fourth millions more than at the close of the preceding week, standing at $71,760,815 on Saturday evening, against $68,976,187 the previous Saturday. The customs revenue at this port for the week was $2,072,535, reflecting the diminished importations; and the specie export was only $303,562. The outflow of coin from the Treasury Office, through the sale of a million of Government gold on Wednesday, the 26th ult., and the week's disbursements of $3,872,386 of coin-interest, on the November account, without rebate, and $49,-000 in further redemptions of the 1871 bonds, has been $4,921,386. The Treasury Debt exhibit for Nov. 1, makes the coin balances in control of the Department $103,131,073, including $13,666,500, represented by outstanding coin-certificates. The reduction of the public indebtedness, during October, was $5,129,297, and since March 1, 1870, $96,544,122.

The specie reserve of the city banks according to the latest return is $13,108,406, against $21,928,046 same time last year. The city bank deposits are now $193,077,808, against $180,-828,832 week ending Oct. 30 1869. The legal tender reserve amounts to $53,009,099, against $53,177,883 same time last year. The circulation now stands at $32,420,509, against $24,136,249 same time last year. The loans are now $265,-979,485, against $250,948,883 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $88,233,140 a day, against a daily average of $87,257,885 the preceding week. The current weeks' exchanges average about 88⅜ millions a day. The city banks, last week, reported a gain of $1,160,293 of specie, $3,498,825 of deposits, and $618,287 of legal tender notes. They increased their loans $314,089; and reduced their circulation, $96,557.

The coin reserves of the Treasury Department on Monday were $103,131,073, including about 13⅝ millions on deposit on private account; currency balances, $26,815,384.

National Bank notes to the amount of $641,170 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $335,182,438, against $282,-565,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $33,293,079 leaving, with the existing 1,612 banks, (having an aggregate capital of $427,235,701,) an actual circulation at this date, of $301,889,359. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $344,596,-550; and for the public deposits, $16,481,050—making a total of $361,078,600. The Treasury Department last week redeemed and destroyed $333,516 of worn and mutilated fractional currency, and issued $974,875 of new.

The U. S. Sub-Treasury receipts, week ending with Oct. 29, were $6,022,434 in coin, (including $2,070,000 from customs duties,) and $4,497,301 in currency; payments, $2,487,642 in coin, (including $———— of coin interest,) and $5,247,416 in currency; balance at the close of the week, included $65,171,734, of coin, against $61,636,942 the preceding Saturday, and $6,589,081 of currency, against $7,339,196 at the close of the preceding week. The business of the Office on the first two days of the current week, was as follows. On Monday, receipts, $540,422 in coin, (including $502,000 from customs,) and $416,983 in currency; payments $56,293 of coin (including

—— of coin interest), and $536,572, of currency. On Tuesday, receipts, $428,102 in coin (including $406,000 from customs), and $807,274 in currency; payments, $4,243,359 in coin (including $4,186,299 of coin interest) and $305,725 of currency. The balance at the close of business on Tuesday included $6,971,041 of currency, and $61,840 106 of coin, against a balance a week previous of $7,194,823 currency, and $63,071,130 coin.

The aggregate receipts of the U. S. Sub-Treasury in October were $51,530,870, including $11,-724,402 from customs; aggregate payments, $47,-417,035, including $2,112,636 of coin interest.

The U. S. Sub-Treasurer issued in October $4,984,500 of coin certificates.

The U. S. Sub-Treasurer retired, last week, $1,-776,661 of coin certificates, received for customs.

Government revenues have been yielding less satisfactorily. The excises, during the week yielded about 2¾ millions; customs at the port of New York, $1,932,661, and at the outports about $650,000 (in coin) more, making the grand total income for the week equal to about $5,655,-493 in currency. The income of the Government, from excises, since July 1, 1870, has been about 64 millions.

Gold has been in less confident speculative demand and has receded from 112⅛@110⅞, under the more liberal offerings, largely of the November coin interest disbursements on account of the public debt. The customs and export call has been less active. Toward the close, the tendency was decidedly downward, and the final quotation on Wednesday was 110⅞, against 112 the preceding Wednesday. Early on Monday, the Government financial programme for November was made public. It provided for sales, during the current month, of five millions of Gold, as follows: Wednesday, November 2, $1,000,000; Wednesday, November 9, $1,000,000; Wednesday, November 16, $1,000,000; Wednesday, November 23, $1,000,000; Wednesday, November 30, $1,000,000. And purchases of four millions of Five Twenties, as follows: Thursday, November 3, $1,000,000; Thursday, November 10, $1,000,000; Thursday, November 17, $1,000,000; Thursday, November 24, $1,000,000. On Wednesday, Government marketed $1,755,000 of gold at from 111.01 45@111 05. The bids reached an aggregate of $5,025,000. This was the opening sale of the month, under the November programme. The aggregate of the November interest obligations on the public debt is $23,851,629, of which the New York office has already paid off $1,356,397 with and $5,060,000 without rebate. There has been less stringency in the Gold Loan market, and rates have been more comfortable for borrowers.

The export drain last week was $303,562 against $556,180 week ending Oct. 22; $654,323 week ending with Oct. 15; $802,174 week ending with Oct. 8; and $465,260 week ending with Oct. 1. The shipments thus far this year have been about 51⅛ millions, against 28⅝ millions same time in 1869; 66⅞ millions same time in 1868; 43¼ millions same time in 1867; nearly 54¾ millions same time in 1866; and 25⅛ millions same time in 1865. The exchanges at the Gold Exchange Bank, which were 53¼ millions on Thursday of last week, were 52½ millions on Saturday, 32⅛ millions on Monday of this week, and nearly 62⅞ millions on Tuesday. On Wednesday they were 46⅛ millions.

The customs demand for Gold last week, averaged $345,000 a day; thus far, this week, it has averaged $454,000, a day, or equal to a weekly aggregate of $2,624,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $133,668; and since Jan. 1, 1870, $8,627,378, against $14,711,836 same time in 1869. The total customs revenue of the Government, in coin, at this port, since Jan. 1, has been $121,747,892 against $113,442,993, same time in 1869.

The exports of specie, from this port, last week, were $303,562 against $684,658 same week last year; and since Jan. 1870, $51,546,311, against $28,564,035 same time in 1869. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $3,872,386; and since Jan. 1, 1870, $72,013,-267 against $76,939,086 same time in 1869.

The customs revenue at the port of San Francisco, from Jan. 1 to Oct. 20th, was $6,587,383, against $6,863,709 same time last year.

The specie exports by steamer and railway, from San Francisco, from Jan. 1, 1870 to Oct. 20th, were $28,317,627, against $32,648,012 same time last year.

The foreign exchange market has been quoted firmer, with quite moderate offerings of bills reported. The demand, however, has been on a restricted scale, and has been mainly for remittances on account of the November 5-20 coupons, received from foreign owners. Bankers' sixty day bills on London closed on Wednesday at 109⅛@109⅜; sight bills on London, 109¾@110. The offerings of produce bills have been rather freer. The week's exports of domestic produce have been to the currency value of $3,856,-163, and since January 1, 1870, $152,948,422 against $164,255,751, same time in 1869.

The dealings in the Public Funds have been comparatively limited, in the open market, since our last; and influenced, in part, by the fall in Gold, prices have yielded a fraction, closing dull, but about steady at the modified rates for all issues, save the Ten-Forties, which attracted considerable attention, in view of the decision of the Secretary of the Treasury to allow issues of currency to the extent of 90 per cent. of the face value of those bonds, or equal to that allowed upon the six per cent. bonds. This arrangement will probably lead to an extensive substitution by the banks of Ten-forties in place of the Six per cents, now deposited as the basis of circulation.

Government closed the October bond purchases by buying in two millions of Five-twenties on Thursday of last week, out of an aggregate offering of about 8¼ millions, at equal to about the open market rates. It commenced its November purchases on Thursday of the current week.

U. S. sixes of 1881 closed here on Wednesday of the current week at 113⅛@113¾; U. S. Five-Twenties of 1862, ex-coupon 109@109⅛; U. S. Five-twenties of 1864 ex-coupon at 107⅞@108; U. S. Five-Twenties of 1865 ex-coupon at 108@108⅛; U. S. Five-twenties of 1865 consolidated, 110⅛@110¼; U. S. Five-Twenties of 1867, 110⅛@110¼; U. S. Five-twenties of 1868, 110⅜@110⅝; U. S. Ten-forties at 106⅞@107; U. S. Six per cent. currency bonds, 111@111¼.

State bonds have been in limited demand, through the week, but have been quoted about steady.

Railway bonds have been in fair investment request, at well supported prices. Central Pacific Sixes have been quite active, closing buoyantly on Wednesday at 91@91⅛. The Union Pacific Sixes closed on Wednesday at 82⅞@83. The registered First Mortgage bonds of the Chesapeake and Ohio Railroad have been in moderate demand for investment purposes at 90 per cent. and accrued interest.

Railway and miscellaneous share property has been moderately active but quite variable in price, closing dull and irregular.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 19.	Oct. 26.	Nov. 2.
Consols	92⅝	92½	92¾
U. S. 5-20's of 1862...	*89½	89⅛	89¼

* Ex-Coupon.

At Frankfort on Wednesday, U. S. Five Twenties were quoted at 95⅝.

There has been less animation in the line of foreign goods without any marked changes in values. The dry goods entries at this port, last week, were $1,918,931, making with the general merchandise imports, a total of $5,272,080 against $6,310,229 the preceding week.

Ocean freights have been fairly active and quoted firmer. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. by steamer per bbl.; grain at 9@9¼d. by sail, and 10@10¼d. by steamer per bushel; cotton at ¼@$\frac{5}{16}$d. by sail and ½d.@$\frac{9}{16}$d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@45s. by steamer, per ton. Total number of vessels in port on Wednesday, 457.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending November 1st, and since the beginning of the year:

	1869.	1870.
For the week....	$4,182,157	$3,856,163
Previously reported..	160,123,594	149,092,259
Since Jan. 1	$164,255,751	$152,948,422

The imports for the week ending Oct. 29, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,630,309	$1,913,931
Gen. merchandise.....	2,422,111	3,358,149
Total for the week.....	$4,052,420	$5,272,080
Previously reported....	248,480,380	249,689,700
Since January 1.....	$252,532,800	$254,961,780

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Arkansas 7s issued to Little Rock and Fort Smith R. R., 66; South Carolina 6s, new Jan. and July, 67; N. Y. State 7s, Bounty loan reg., 107½; Ohio 6s, 1881, 108; Pacific R. R. 7s, guar. by Mo., 96; Ohio and Miss. consol. bonds,

87⅜; Toledo, Peoria and Warsaw W. D., 80; do. 2d mort., 66; New York and New Haven R. R., 155; do., scrip, 143½; do. 6s, 97; Peninsula R. R. 7s, 90; Jefferson R. R. 1st mort., 90¾; Morris and Essex const. bonds, 89; Cleveland, Painesville and Ashtabula 7s, new, 91¾; Great Western 1st mort., 1888, 89; Joliet and Chicago 8s, 106; North Missouri 1st mort., 86¼; St. Louis, Jacksonville and Chicago 1st mort., 92; Albany and Susq. 2d mort., 98; Norwich and Worcester R.R., 104; Western Union Telegraph, 39¾; Am. Mer. Union Exp., 44; Adams Express, 67⅛; Wells Fargo Exp., 37; U. S. Exp., 35; Brooklyn 6s, W. L., 93⅛; American Coal, 36; Central gold, 0.15; Grass Valley gold, 0.26; Smith and Parmalee gold, 0.69.

Philadelphia.—West Jersey 7s, 95¼; Lehigh Nav. conv. loan, 78½; Wilmington and Reading 7s, 90¼; Philadelphia and Reading 6s, 1848-'80, 97½; Pennsylvania and New York Canal 7s, 91½; Sunbury and Erie 7s, 101½; Harrisburg and Lancaster 6s, 95; Connecting R. R. bonds, 83; Oil Creek and Allegheny River R. R., 45; do., 7s, 81; Delaware Division Canal, 45; Tioga, 50; Philadelphia City 6s, prior to 1862, 103; Shamokin Coal, 4½; Big Mt. Coal, 5½; Fulton Coal, 4½. The latest quotations are: City 6s, 101½@102¼; do. free of tax, 102¼@102⅜; State 6s, coupon, 103@104; do. 6s, W. L., 104¼@105; do. 1st series, 104@105½; do., 2d series, 105½@106½; do., 3d series, 109@110; Reading, 50¼@50¼; do., 7s, 1898, 102½@103½; do., mort. 6s, 1880, 97@97½; Camden and Amboy, 115⅝@115⅞; do., mort. 6s, 1889, 94@94½; do., 1883, 92@93; do., 1889, 92@93; Penn. R. R., 58@58⅛; do., 1st mort., 105@—; do., 2d mort., 100½@101½; Little Schuylkill R. R., 42⅛@42⅞; Morris Canal, 25@30; do. pref., 65@70; do., 6s, 80@84; do., scrip 7s, 65@—; Susquehanna Canal, 5¾@6½; do., 6s, 45@47; Schuylkill Nav., 7@8; do., pref., 16@16½; do. 6s, 1882, 73¼@74; Elmira and Williamsport pref., 39@40; do., 7s, 1873, 92@92¼; do., 5s, 58@60; Lehigh Coal and Navigation, 82⅛@82⅛; do., 6s, 1884, 83@83½; do., R. R. Loan, 87@88; do., Gold Loan, 89@89⅛; North Pennsylvania, 42½@43; do., 6s, 98@100; do., 7s, 89⅛@90¾; do., Chattle 10s, 111@—; Philadelphia and Erie, 26¼@26⅜; do., 6s, 91@—; Minehill, 51½@52; Catawissa, 12@15; do. pref., 38½@38¾; Lehigh Valley, 57⅞@58; do. 6s, 100½@—; do., 6s, reg., 99@99½; Fifth and Sixth streets, (horse,) 37@40; Second and Third, 51@52; Thirteenth and Fifteenth, 22@23; Spruce and Pine, 24@25; Green and Coates, 38@40; Chestnut and Walnut, 44@45; Hestonville, 14½@15; Union, 43@—.

Boston.—Old Colony and Newport 6s, 96; Phila., Wil. and Balt. 6s, 1887, 94¾; Cedar Rapids and Missouri 7s, 1916, 88¼; Cincinnati, Sandusky and Cleveland R. R., 17¼; do., 7s, 1890, 73½; Eastern R. R. 6s, 1874, 99; Vermont Central 1st mort., 85; Vermont Central and Vermont and Canada 8s, 102¾; Mansfield and Framingham R. R. 7s, 93½; Dixon, Peoria and Hannibal R. R. 8s, 1889, 97; Indianapolis, Bloomington and Western 7s, 82½; Vermont and Massachusetts 6s, 1883, 92¼; Burlington and Missouri River R. R., 8s, 1889, 102½; Norwich and Worcester R. R., 103½; Eastern (N. H.) R. R., 117¼; Indianapolis and Cincinnati R. R., 7; Conn. and Pass. Rivers pref., 84; Summit Branch, 36¼; Boston Water Power Co., 16; Cary Imp., 8; Massachusetts 5s, 1894, gold, 95¼; do., 6s, 1872, gold, 106⅞; New Hampshire 6s, 1884, 95⅝; Maine 6s, 1889, 97⅜; Boston 6s, 1880, currency, 100½; do., 5s, 1877, gold, 95½; Worcester 6s, 1880@1885, 99¼; Albany 6s, 1896, 92; Bangor 6s, 1874, 95; Portland 6s, 1877, 95¼; do., 1887, 90¾; St. Louis 6s, 1888, 85¾; Hartford 6s, 1889, 96¾; Brooklyn 7s, 1904, 100⅛; do., 6s, 1892, 92¼; Chicago 7s, 98; St. Louis Co. 7s, 1885, 95; Cincinnati 6s, 1886, 92; Cook Co., Ills., 7s, 1880, 97¾; Hancock Mining Co., 1⅜.

Baltimore.—Orange and Alexandria 3d mort. 8s, 82; do., 4th mort., 73⅛; Western Maryland 2d pref. bonds, 62; Northern Central 6s, 1900, gold, 94; Maryland Defense bonds, 103; Virginia 6s, old, reg., 50⅜; Bare Hill Mining Co., 0.09. The latest quotations are: Pittsburg and Connellsville 7s, 1898, 91¾@92⅝; Baltimore and Ohio, 126@127; do., 6s, 1875, 94@95; do., 1880, 93½@94¾; do., 1885, 91⅛@92; Northern Central, 42@43⅛; do., 6s, 1885, 93@94; do., 1900, 87@87¾; do., 6s, 1900, gold, 92@93½; Parkersburg Branch, —@—; N. W. Va. 1st mort., 94@95; do., 2d mort., 95@—; do., 3d mort., 1885, —@91; Marietta and Cincinnati 7s, 1892, 92@93; do. 2d mort., 71½@72½; Central Ohio, 25@25; do., 1st mort., 83@—; Western Md. 6s, 1890, 75@77; do., guar., by Baltimore City, 90@92½; do., 2d mort., guar., 88@—; do. 6s, pref., 61¾@63½; do. 6s, guar., by Washington Co., 80@85; Richmond and Danville bonds, 75@77; Orange and Alexandria 1st mort., 6s, 82@82; do., 2d mort., 6s, 74½@75; do, 3d mort., 8s, 81@82½; do., 4th mort., 8s, 73¼@73½; Orange, Alex. and Manassas 7s, 75@76; Virginia and Tennessee 8s, 83@83½; do., 6s, 1st mort., 81@84; do., 6s, 2d mort., 73@75; Baltimore 6s, 1875, 91⅛@91½; do., 1884, 90⅞@91; do., 1886, 91¾@92; do., 1890, 92@92½; do., 1893, 93@94; do., 1900, 91⅛@91¾; do., 5s, 1838-'70, 75@79; Memphis City 6s, 56@58; Maryland Defense Loan, 1883, 102¾@103; City Passenger R. R., 19@21; George's Creek Coal, 60@62; Atlantic Coal, 1.50@3.00; Bare Hill, 0.09@1.00.

THE CENTRAL RAILROAD OF IOWA, connecting St. Louis and St. Paul, and running through the finest portion of Iowa, is now nearly completed. The remaining million of its 7 per cent. gold First Mortgage Bonds is now offered at 90 and accrued interest. Parties who desire a strictly first-class investment in one of the very best roads in the county are invited to examine into the merits of this security. It pays fully one-third more interest than governments, which are taken in exchange at the highest market rate.

W. B. SHATTUCK, Treasurer,
32 Pine-st., New York.

After a full examination, we have accepted an Agency for the sale of the above First Mortgage Bonds, and desire to recommend them to our customers AS A THOROUGHLY SAFE AS WELL AS PROFITABLE INVESTMENT. JAY COOKE & Co.

Pamphlets, with map, may be obtained, and subscriptions will be received at the COMPANY'S OFFICES, No. 32 Pine-st., New York; at offices of JAY COOKE & Co., New York, Philadelphia and Washington; the BANK OF NORTH AMERICA, and banking houses of HOWES & MACY, New York.

☞ The Seaboard and Roanoke Railroad Company has declared a semi-annual dividend of 4 per cent., clear of United States tax.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST.,
NEW YORK, NOV. 1, 1870.

☞ THE FUNDING OF UNITED STATES FIVE-TWENTIES into a first-class security, paying the same rate of interest (six per cent., gold), and which cannot be called in under twenty-five years without the consent of the holder, may now be effected at a clear profit of about twenty per cent., by exchanging them for the FIRST MORTGAGE BONDS OF THE CENTRAL PACIFIC RAILROAD COMPANY.

The five-twenties of 1867 are selling to-day at 110, and the Central Pacific Bonds at 91; $1,000 of the former will buy $1,000 of the latter, and leave nearly $200 for use or for re-investment; or $5,000 of the former, paying $300 in gold annually, will buy $6,000 of the latter, paying $360 in gold annually, and leave a balance in cash of about $50.

The Central Pacific is a completed, thoroughly-built, well-managed road, doing a large business, and earning an immense revenue. The bonds are well and favorably known, and constantly dealt in, both here and in the chief financial centres of Europe, and they can be disposed of at a quoted market price with the same facility as Government bonds, and are daily quoted at the Stock Exchange.

Having originally negotiated these bonds, and being thoroughly acquainted with their soundness and value, we have introduced them as a specialty in our regular business in connection with our dealings in Government securities, and recommend them without hesitation to our friends and customers desiring to make investments or to fund their five-twenties upon advantageous terms, without reduction of interest.

FISK & HATCH.

☞ CONNECTICUT LOAN.—FIRST MORTGAGE SEVEN PER CENT. BONDS OF THE GRAND THROUGH ROUTE from NEW YORK TO BOSTON—issued by the NEW HAVEN, MIDDLETOWN AND WILLIMANTIC R. R. CO. OF CONNECTICUT.

The work on the Road has progressed steadily during the Summer and Fall. More than three-quarters of the line is finished; trains are running regularly between New Haven and Middletown, and it is believed the whole will be open for through business during the coming Spring.

The earnings on the section now in operation prove the capacity of the Road to pay largely over and above its interest liability.

THE NECESSARY FUNDS TO COMPLETE THE UNFINISHED WORK ARE SECURED, WHICH INSURES THE EARLY OPENING OF THE LINE, AND MAKES THE INVESTMENT AS DESIRABLE AS ON A ROAD ALREADY IN OPERATION.

PRICE PAR AND INTEREST.

Bonds can be obtained of any Bank or Banker, or by sending to ourselves.

HATCH & FOOTE,
Bankers and Dealers in Government Securities,
No. 12 WALL ST.

☞ The last rail, completing the Mobile and Chattanooga Railroad between Mobile and New Orleans, was laid on the 29th ult.

Grand Rapids and Indiana Railroad.

The practical, formal opening of a railroad by which more than two hundred miles of direct communication are added to the trade of our city, is an event of more than passing interest.

We have already, through our correspondence, called the attention of our citizens to this work; now, through the sagacity and courtesy of its managers an excursion throws it open to their inspection.

This great work of internal improvement is designed untimately to form a prominent link in the chain of intercommunication with China and the East Indies generally through the short route of the Northern Pacific Railroad.

Its immediate and to us more important mission is to open to our markets the rich agricultural products of the garden state of the West, its vast fields of pine and other lumber, its stores of plaster, and even the immense resources of iron and copper will be rendered more valuable and available for our purposes.

Like similar projects undertaken some twenty years ago, the line now known as the Grand Rapids and Indiana Railroad, consisted of some three or more corporations, which were merged in 1857. The auspices were considered favorable and under prudent and sagacious management the road might have been placed upon sound financial basis and completed years ago. It issued bonds based upon its land grant; it received liberal donations from villages and other municipal corporations, and citizens subscribed to its stock. Its finances were not husbanded nor judiciously expended, and its bonds, getting into the hands of financiers whose reputation would not admit of their getting further, the company fell into discredit.

Thus it dragged until it came into the hands of Judge Hanna, of Fort Wayne, in 1866, who was elected President in that year. Those who know the reputation and practical ability of this lamented official do not doubt that the measure he planned would have eventuated successfully. His untimely demise, however, destroyed all hopes in that quarter,—the Hon. J. K. Edgerton, of Fort Wayne, became the Judge's successor as President.

Mr. Edgerton brought with him an extended reputation in railroad operations, and a character for honor and integrity unimpeachable and unimpeached. He obtained the assistance of Messrs. Talcott & Co., of Chicago, as contractors, gentlemen of wealth and character, well known in railroad circles. For two long and dreary years the President of the road and the contractors prosecuted the work under the greatest financial embarrassment and discouragement. Promises of aid and assistance, upon which they relied, only met with disappointment, and a most powerful and well planned scheme was laid to defeat the completion of the road, and secure for its projectors the land grant and franchises of the Grand Rapids and Indiana Railroad. Nearly one hundred miles of railroad, parallel to its line, were constructed and legislation obtained, providing for the contingency of the transfer to this adverse interest. Talcott & Co. completed twenty miles of the railroad, from Grand Rapids north, to Cedar Springs in 1867, and although most of the grading, ties, &c., for fifty miles south from Grand Rapids were prepared, the road was brought nearly to a stand still in 1868. The hearts of the schemers rejoiced, but at this junction came the Continental Improvement Company.

This Company, organized in Pennsylvania, with General G. W. Cass for its President, began its operations on the 1st day of May, 1869. In sixty days it had cleared forests, levelled hills, filled morasses, bridged rivers, and constructed complete and equipped, twenty miles of first-class railroad. A work unprecedented even in these days of Pacific energy and engineering. The road was constructed under a receiver, the Hon. Jesse L. Williams, of Fort Wayne (it had found its way into court), by contractors Messrs. Talcott & Co., of Chicago; Mr. Jas. Zimmerman, a Pennsylvanian from Lancaster county, was also one of the contracting party, and Mr. Williams called upon Mr. Godfrey, of Grand Rapids, to assist in a part of the work. The friends of the company were agreeably surprised, and the enemies astounded and confounded. At this stage of proceedings, the parties who had undertaken to gobble the whole of the land grant saw their chances growing small by degrees, with imperturbable cheek, proposed to "withdraw their opposition, provided the Continental Improvement would divide the land grant with them! As the late Col. Diehl would say, "there has been no *divy* as yet."

The Company then began to look around and examine their property, of which they had little knowledge through their own agents. Ties and timber, delivered many years before, had rotted on the ground. Other, more recently obtained, had been taken by dishonest individuals, they had been used to repair highways, and one lot of seven thousand cross ties carried off bodily to another railroad and sold to another company. There were many unliquidated accounts and many more were claimed. Deeds for right of way had never been recorded and many had been lost or destroyed, and all sorts of claims, legitimate and illegitimate, were made by property owners and interested parties. Our townsman, Mr. D. H. Williams was engaged in securing the timber and property of the company between Fort Wayne and Grand Rapids, and the President of the Railroad Company, assisted by Mr. Williams and others, unravelled and adjusted the almost inextricable confusion into which the right of way question had become involved. In the meanwhile the Continental Company organized the Land Department under the supervision of the Hon. William A. Howard of Detroit, as Commissioner, assisted by the Hon. P. R. L. Pierce, of Grand Rapids. They also placed the company upon a sound financial basis, issuing bonds guaranteed by the Pittsburg, Fort Wayne and Chicago Railway, and for the payment of which they mortgaged their property and pledged the proceeds of the sale of their lands. These securities have already taken rank amongst the first-class securities of the country, and have been taken by moneyed men for investment, and have never been seen in the market in this country. Work was resumed upon the railroad north of Fort Wayne, and early in June, 1870, the road was completed and cars running to Sturgis, fifty-six miles north of Fort Wayne. At about the same date a further section of twenty miles north of Grand Rapids was opened through Big Rapids on the Muskegon river to the City of Paris, which is the present terminus of the road at the north. The excursionists will pass over more than two hundred miles of railroad, all but twenty of which were mainly constructed and entirely completed by a company organized in Pennsylvania, much of the capital being owned here and the officers and the board of directors, with a single exception, Col. Thomas A. Scott, being residents of this city. The officers of the Continental Improvement Company are G. W. Cass, President; Wm. Thaw, Vice President; and W. R. Shelby, Secretary and Treasurer.

By a contract with the Pittsburg, Fort Wayne and Chicago Railroad Co., assumed by the consent of all parties by the Pennsylvania Railroad Co., that company controls the stock of the Grand Rapids and Indiana Railroad Company, and its management is under the control of J. N. McCullough, Esq., as General Manager, who is also General Manager of the Pittsburg, Fort Wayne and Chicago Railway, (Pennsylvania Railroad lessee.)

The officers are J. N. McCullough, Esq., General Manager; Charles E. Gorham, Fort Wayne, General Superintendent; William P. Shinn, Pittsburg, General Freight Agent; F. L. Myres, Chicago, General Passenger Agent. These all hold corresponding situations on the Pittsburg, Fort Wayne and Chicago Railway. They are assisted by H. D. Wallen, of Fort Wayne, and J. L. Shaw, of Grand Rapids, Assistant Superintendents, and E. P. Vining, of Grand Rapids, Freight Agent, and F. Gorham, of Fort Wayne, Auditor.

Thus Pennsylvania capital and Pittsburg energy has permeated this, hitherto to us, inaccessible region, and restored order out of chaos, and a well organized and equipped railroad now reaches two hundred miles into a country with which we have not had much intercourse. More than half a million of dollars has already been paid to Pittsburg mechanics to build and equip this road. Directly and indirectly, this improvement has been the means of the disbursement of a million of dollars in this vicinity, and yet we could probably count upon our fingers all who have ever heard that there was such a railroad in existence.

As we remarked before, this railroad is designed to connect Fort Wayne in Indiana with the Straits of Mackinac in Michigan. It is literally a back bone passing through the left centre of the latter State for a distance of one hundred miles through one of the proverbially fertile regions of the country, if not of the world.

A correspondent of this paper during the year 1869, wrote as follows of this region:

A BEAUTIFUL COUNTRY.

"Three miles to the north, Fawn river is crossed, and one mile beyond this is the boundary line between the States of Indiana and Michigan. We leave the Mongoguanong Prairie and enter upon the prairies of Michigan, the first of which is Oxbow Prairie, outlying the one in which is located the village of Sturgis. Unlike the general prairie region of the Western States, the praries of Michigan are underlaid with a gravelly soil, and are almost unaffected by excessive rains or protracted drouth. Notwithstanding the heavy rains which have proven so disastrous the past season to the corn crop of the West generally, owing to the facts above stated, the crop of that cereal upon the prairies of Michigan and of Northern Indiana will be a good average. Winter wheat and fruit, so precarious on the Western prairies, are here sure and profitable. The rich fields of golden wheat, and the trees bending with their loads of luscious fruit, which meet one's gaze in this region, fill the unaccustomed eye with wonder at the profusion with which these gifts of a bountiful Creator have been bestowed upon this favored locality. A generation has not passed since this soil was reclaimed from the savage; yet beautiful villages, highly improved farms, excellent schools, well filled colleges of high rank, long lines of deposit in country banks, show that this community is intelligent, industrious and prosperous; and a contemporary says, speaking of the Nottawa Prairie: 'Michigan abounds, as is well known, with prairies limited in extent as compared with those vast tracts in Illinois and other western States, but equally rich in soil and susceptible of raising winter wheat, fruit and other crops, which fail farther west. Amongst the richest in soil and most picturesque in appearance, is Nottawa Prairie, in St. Joseph county. On the north it is bounded by the St. Joseph river, the luxuriant foliage of the forest trees upon the banks forming a relief to the otherwise somewhat monotonous landscape of the prairie.'"

The City of Fort Wayne, the southern terminus of the road, is located on Wabash and Erie Canal, at the crossing of the Pittsburg, Fort Wayne and Chicago Railway, the Toledo, Wabash and Western, the Cincinnati and Munice, and the Jackson, Lansing and Saginaw Railroads. It contains thirty thousand inhabitants, and is already a place of commercial and manufacturing importance. It will be a very favorable point for the distribution of the immense lumber, plaster and other traffic of the Grand Rapids and Indiana Railroad.

Kendallville is twenty-six miles from Fort Wayne, on the Michigan Southern "Air Line railroad," and is the leading business point in Noble county, Indiana. It contains about five thousand inhabitants, and is one of the most important shipping points between Toledo and Chicago.

Rome City is situated seven miles northwest

from Kendallville, at the outlet of an extensive system of lakes, which cover many miles of ground, and which form a reservoir for a water power which has at this point a fall of twenty-six feet; it is already improved with woolen factories, flouring mills, &c., which, when fully developed, will make this an important point. The village is located on a fine elevated plateau, with a gravelly soil, and there are chalybeate springs, which are said to possess great medicinal virtues. The beautiful lakes, affording many miles for the sports of sailing or rowing, and fishing; delightfully shaded banks, admirably adapted for walks and picturesque drives, seem to justify anticipations which steps have already been taken to realize, to wit: To erect buildings and make it a summer resort for persons seeking health and recreation.

La Grange is the county seat of the rich and fertile county of the same name. This is a very pleasant and prosperous village, situated upon the verge of the beautiful and productive prairie region developed upon the north and west.

Northward six miles brings us to the beautiful village of Lima, situated in the midst of the Mongoguanong Prairie, on the Pigeon river.

Stugis is fifty-six miles north from Fort Wayne, located upon Sturgis prairie. The Grand Rapids and Indiana railroad crosses the Michigan Southern railroad at this place.

Seven miles north from Sturgis is the picturesque village of Nottawa, delightfully situated on the banks of Sand Lake. Two miles further northward the "Michigan Air Line" Railroad is crossed, a road designed to shorted the distance between Detroit and Chicago upon the Michigan Central Railroad, by cutting off a detour made by the latter to the northward, to reach the villages of Marshall, Battle Creek, Kalamazoo, etc.

Kalamazoo is one of the most beautiful villages in the State, or for that matter, in the country, or anywhere else. There are many blocks of stores, &c., and some very beautiful private residences. The building material chiefly used are the cream-colored, or so called "Milwaukee" brick. It has gas works and Holley water works, and its principal streets are paved with Nicholson pavement. It is the county seat of Kalamazoo county, and the State Lunatic Asylum is located here. It is now an important railroad centre, no less than five roads meeting at this point—Michigan Central, Grand Rapids and Indiana, the Kalamazoo and the White Pigeon; the Kalamazoo and South Haven; the Kalamazoo, Allegan and Grand Rapids; besides these, running from Port Huron, Michigan, to Chicago, Illinois, crosses the Grand Rapids and Indiana, a few miles south of this place.

The Railroad Company design the erection of an engine house, and such other shops and buildings as may be required upon grounds in the south part of the village, donated by Hon. Charles E. Stuart and others.

The branch of the Michigan Southern Railroad is crossed again at Plainwell, eleven miles north from Kalamazoo.

Grand Rapids is the city second in wealth and population in the State of Michigan only to the City of Detroit. It is situated at the head of navigation of the Grand river, which furnishes at this point almost an unlimited amount of power, by means of the rapids or falls, extending along the river three miles. The beds of plaster near this city are almost inexhaustible and now yield about one hundred thousand tons per annum. At this place are located the offices of the Company. Hon. W. A. Howard, formerly member of Congress from Michigan, is Commissioner of the Land Office. The office of Mr. Shaw, Assistant Superintendent, is also located here.

Mr. McQuewan, the well known lumber merchant from this city, has established, in company with Messrs. Long, extensive mills at Grand Rapids.

The country, after leaving the Grand river, assumes the usual feature of a new region just beginning to be developed. The immense piles of lumber, the shingles and lath, exhibit the staple upon which the country will rely for its immediate prosperity. Embryo villages mark the line of the road in great profusion, and the school houses, church spires and the sign-boards show evidences that literature and religion, commerce and manufactures are already established.

We enter now upon the munificent domain of the Company, the Land Grant of the Company, thirty miles in width on each side of the road, and comprising altogether more than one million two hundred thousand acres of pine timber lands and agricultural lands, estimated to be worth the round sum of twelve millions of dollars.

Big Rapids, on the Muskegon is looked upon as the city of the future in this region. Pennsylvania enterprise has established itself here; the leading and most enterprising citizen, Mr. John Brown, was formerly in the lumber business in this vicinity, and is well known to many of our citizens.

The Continental Improvement Company, believing that the interests of the railroad would be advanced by the speedy opening and cultivation of their unimproved lands, early in the summer of this year sent the Rev. Dr. Tustin, of St. Mark's (Episcopal) church in Grand Rapids, to Norway, for the purpose of inducing emigration to their lands. His mission has been successful. Sixty males have already arrived, to be employed on the railroad during the winter, and to enter upon their lands in the spring. The families of these immigrants will follow them in the spring, and a large colony will probably be established eventually, as several hundred are preparing to follow at suitable intervals. Liberal provision for their transportation and comfort have been made by the railroad companies, who assist those requiring assistance, to be repaid by labor.

We cannot conclude this article without referring to some of the advantages that will accrue to persons residing along the line of this new road, by thus being brought into direct communication with Pittsburgh. Our city has long been recognized as the great manufacturing center of the country, and the completion of this new line of travel and transportation brings those distant localities to our very doors, and will enable them to reap many benefits of which they would have otherwise been deprived. Our manufacturers are prepared to meet and supply all the many wants incident to the settlement of a new country, or the requirements for the development and progress of the many thriving cities and villages located along the road. Our iron manufactures include every imaginable article known to the iron trade, all of which can be supplied on terms more desirable than can be offered in any other place. Our machinists, who are skilled and experienced in the construction of machinery of all kinds, are prepared to supply every demand for engines, saw and grist mills, portable mills, planing machines, and the thousands of other machines which may be required, and can furnish them of such quality of workmanship and at such prices as will defy competition. Our extensive window glass and glass ware manufacturers are also prepared to fill orders no matter how large, while the numerous other articles, impossible to specify which are manufactured here will all find ready sale in the new market thus opened. The residents of the agricultural districts will find all the celebrated inventions, to facilitate and lighten the labors of agriculturists, such as plows, mowers, reapers, horse rakes, sowers, drills, presses, cane mills, etc., manufactured here in great variety and in superior style.

No doubt all the more important articles manufactured here have long been in use throughout the length and breadth of the country traversed by this new road, but now the consumers will have the opportunity of purchasing direct from our manufacturers, and can have their purchases shipped direct without being subjected to the annoyances of dealing through second parties and the delays incident to roundabout means of transportations. Indeed the advantages which will be gained by those living along the line of the road by direct communication with this city cannot be overestimated, and we feel confident that this will become more and more appreciated every day.—*Pittsburg Chronicle, Oct. 25.*

Mobile and Montgomery Railroad.

Messrs. SOUTTER & Co., No. 53 William street offer for sale at 95 and accrued interest, in currency, the unmarketed balance of $450,000 of the First Mortgage Eight per cent. gold bonds of the Mobile and Montgomery Railroad Company. The purpose of the loan is to complete the connecting link of the road between Tensas, the present terminus, and the City of Mobile,—fifteen miles,—and thus to establish through rail connection to Mobile and New Orleans. The road, when extended to Mobile, will be 182 miles in length. The cost of the road is given at over $30,000 a mile, while the mortgage is very little more than $13,000 per mile. The road is the only connecting line of railway between Montgomery and Mobile, and is an important link in the great through coast line between New Orleans, Mobile, Montgomery, Savannah, Charleston, Richmond and New York, or the interior line between the same points, via Augusta, Charlotte and Danville. The net earnings of the road are reported as having regularly increased at the rate of about 20 per cent. per annum since the organization in 1867, and are now much more than enough to pay the interest upon all the bonds authorized to be issued, more than one half of which are in the hands of the company. The State of Alabama gives its indorsement to the bonds of the Company, which are made payable, principal and interest, in gold—the interest semi annually, in May and November, in the city of New York. The bonds are confidently recommended by the bankers of the Company as a most desirable investment. The November interest on these bonds will be paid by Messrs. SOUTTER & Co.

☞ The Chesapeake and Ohio Canal Company have paid the twenty-five per cent. dividend of $55,000 on the principal of the repair bonds, and have $40,000 remaining in the treasury. Another dividend of $55,000 on the repair bonds it is proposed to pay on the 1st of January.

List of U. S. Patents.

Issued for Improvements Railroad Construction, Rolling Stock, &c., for the week ending Nov. 1st, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

No.

108,777.—Spring Seat for Railway Cars, Thomas J. Gifford, Salem, Mass.

108,789.—Railway Car Axle Lubricator, Charles Hyatt, Buffalo, N. Y., assignor for ⅔ of his right to Joseph N. Milchan and Edward Schlenker, same place.

108,792.—Time Signalling Apparatus for Railroads, John G. Johnson, Coombe Fields, England.

108,810.—Dumping Car, William Merrington and Nathan Kirkwood, McKeeseport, Pa.

108,814.—Pile for Engineering Purposes, Thomas W. H. Moseley, Boston, Mass.

108,825.—Car Wheel, John Raddin, Lynn, Mass.

108,830.—Railway Car Brake, James L. G. Rice, Cambridge, Mass.

108,894.—Railway Snow Shovel, John W. Elliot, Toronto, Canada.

108,899.—Locomotive Smoke Stack, Eugene Fontaine, Fort Wayne, Ind., assignor to himself and Wm. Roberts, same place.

108,927.—Lock Nut, John Miller, Jr., Marshalltown, Iowa.

REISSUE.

4,172.—Corrugated Iron Bridge, Richard Montgomery, New York, N. Y. Patent No. 25,210, dated August 23, 1859.

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLIGENCE—ATTEMPTING TO CROSS RAILROAD TRACKS—WHAT IS ORDINARY CARE.

The late case of Langhoff *vs.* The Milwaukee and Prairie Du Chien Railway Company and another (23 Wis. 48,) was an action under the statute against the Milwaukee and Prairie Du Chien and the Chicago and Northwestern Railway Companies, for the killing of Mary E. Langhoff, plaintiff's intestate, by trains on defendants' roads, at a street crossing in the City of Janesville, through the negligence, as is alleged, of defendants' servants, and while said trains were running at an unlawful rate of speed and racing with each other upon adjoining tracks at said crossing. The separate answers of the defendants deny most of the material averments of the complaint and allege negligence on the part of the deceased. The evidence on the new trial was very voluminous and will not be stated here. The jury found for the plaintiff, and assessed the damages at $10,000. The defendant moved for a new trial, on the ground, among others, that the verdict was based upon insufficient evidence; and, the motion having been denied, they appealed from the judgment. The following is the opinion of the court delivered by

DIXON, C. J.—When this cause was formerly here on appeal from the judgment of nonsuit (19 Wis., 489,) we said that, were we satisfied from the evidence that the deceased knew the speed at which the trains were moving, or that she could reasonably have calculated it, or that she knew that there were two trains running nearly side by side over the two roads, we might then agree that the nonsuit was proper. The cause has now been fully tried on its merits, and much testimony upon these points taken which did not before appear; and from this testimony we are quite satisfied there can be no recovery in the action. It not only appears that Mrs. Langhoff must have seen and known that the two trains were approaching side by side, or nearly so, but also that with the exercise of any care on her part she must have known that they were running at a much greater rate of speed than usual. The additional testimony not only convinces us of these facts, but it shows that, looking at the trains, she paused for a moment at or near the tracks, as if to consider whether she might safely proceed or not. She proceeded, and the fatal result shows the recklessness of her conduct. No prudent person would have attempted the passage under such circumstances; and the inference of negligence is so clear and unavoidable that no jury can be justified in returning a verdict for the plaintiff. People who knowingly and deliberately take such risks must suffer the consequences of their own want of care or errors of judgment. Without, therefore, dwelling upon the evidence, which we deem to be unnecessary, we must reverse the judgment, and remand the cause for a new trial.

Judgment reversed.

New Haven, Middletown and Willimantic Railroad.

The Bonds of the New Haven, Middletown and Willimantic Railroad Co., advertised by Messrs. HATCH & FOOTE, seems to be exceedingly attractive as an investment. They are amply secured, pay a liberal interest, and to Connecticut investors a very large return, being free from State and local taxes there. The gentlemen forming the Board of Directors are among the most prominent men in Connecticut, and their support to the enterprise is a guarantee of its soundness and strength. The line, the Company say, will be open early next year, and when in operation will, without doubt, form one of the pleasantest and safest, as well as the quickest and most direct routes between the two financial and commercial centres of America.

☞ The receipts into the Treasury of the City of Philadelphia during the three months of July, August and September amounted to $2,409,004, which, with $2,099,266 on hand, makes an aggregate of resources for the quarter of $4,508,270. The disbursements for the same time were $3,158,432, leaving in the Treasury on the 1st October $1,349,837.

☞ The work of straightening the track of the West Jersey Railroad from Mantua Station below Woodbury to Glasboro', is now completed. By this improvement the heavy grades along that portion of the road are obviated. The track where relaying is needed is being laid with steel rails twenty feet long, and costing $60 a piece.

☞ Joshua Brown has been re-elected President, Joseph H. Nicholson Secretary, and John F. Baldwin Treasurer, of the Annapolis and Elkridge Railroad Company.

Western Lands Opened up for Settlement.

One of the vast resources which the United States have beyond other nations, is its landed possessions. West of the Mississippi, there are hundreds of millions of acres of good lands awaiting settlement—sufficient, if sold, to pay the entire national debt. A considerable portion of these lands have passed into the hands of railroad companies, who thus become immediately interested in the building of the roads, the sale of the adjoining lands, and their settlement by a peaceful, industrious and thrifty population. Acting under the wise policy that the railroads would confer a new value on the public lands (which without the roads would remain long unsold), Congress has granted alternate sections of land along several lines of road, and has doubled the minimum price of the remaining sections, so that the Treasury will ultimately receive just as much for its lands, and will have stimulated the construction of new lines of communication and industry besides.

The most notable example of the beneficence of this course is afforded by the Central Pacific Railroad Company, which was enabled, by moneyed assistance of the Government, to build their magnificent Trunk line of nearly a thousand miles, with but a very light financial burden; and now that their road is thoroughly equipped, and earning nearly a million a month, are ready to offer their lands for sale. This Company have, adjacent to their main line, 2,000,000 acres of excellent lands in California, 4,000,000 acres in Nevada and 1,000,000 acres in Utah. Along the line of the California and Oregon Branch they have also 2,500,000 acres, and along the line of the San Joaquin Valley Branch nearly 1,000,000 acres, or more than 10,000,000 acres in all. These lands, which the Company are offering to settlers at from $2.50 to $10 per acre, will ultimately realize to the Company a sum equal to the original cost of their road, and prove a magnificent return for the foresight and courage they showed in undertaking the construction of the road through an uninhabited waste. Half a million of Europeans come annually to our shores, and here is an inviting choice of every variety of lands offered to them at insignificant prices. Fifty years hence, the Pacific coast will boast of 5,000,000 population, and San Francisco will be supreme on the Pacific coast, following hard after New York in wealth and commerce.

Office of the MOBILE AND MONTGOMERY RAILROAD COMPANY, October 20th 1870.

THE INTEREST ON THE FIRST MORTGAGE EIGHT PER CT. GOLD BONDS,

OF THE

Mobile and Montgomery Railroad Company,

Due November 1, 1870, will be paid at the office of

SOUTTER & CO.,

53 William Street, NEW YORK,

CHARLES T. POLLARD, President.

Office of the Mobile and Ohio Railroad Company.

THE COUPONS OF STERLING BONDS AND Interest bonds of this Company, due November 1, 1870, will be paid to English holders at the office of C. M. LAMPSON & Co., 64 Queen Street, London; to holders in the Northern States at the office of SOUTTER & Co., 53 William Street, New York, and to holders in the Southern States at the office of the Company in Mobile.

A. MURDOCK,
President Mobile & Ohio Railroad Company

To Contractors.

SEALED PROPOSALS will be received until the 15th of November next for the grading, masonry and bridging of the Duxbury and Cohasset Railroad from the South Shore Railroad, in Cohasset, Mass., about 18 miles, to Duxbury, Mass.

The work will be let entire or in sections, as may be desired.

The company reserves the right to reject all bids not satisfactory.

Plans, profiles and specifications may be seen at the office of the company in the depot at Cohasset, or at the office of the Old Colony and Newport Railway in Boston.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Railroad Progress in New England.—A Through Route to Halifax.

Several important railroad enterprises, designed to furnish new and more direct connections between important points, and to bring the principal agricultural and manufacturing districts into closer communication with this market, are making satisfactory progress in the East, and the next few years will witness the addition of many important roads to the railroad system of New England. Among the most important of these new roads are those forming a series of connecting links extending from this city to Portland, Maine, by the most direct route practicable; and which, with the existing railroads in Maine, and the European and North American Railroads, now building, will constitute a new through route from this city to Halifax. The advantages of this over existing routes to Portland are that it is shorter by some sixty miles than the most direct line *via* Boston, and that the travel and traffic which it is designed to accommodate will avoid the detentions and inconveniences now incurred at the last named city. Passengers destined to points further East, or coming westward through Boston, are now required to leave the cars on one side of the city, and be transferred by stages, hacks or private conveyances to the opposite side. This is a serious inconvenience to the traveling public, but the expense of unloading, transporting and re-loading through freights in the same manner is a still more important consideration, and one which will probably attract for the new route a greater part of the through traffic. The new roads needed to complete this chain of through communication are all making satisfactory progress. The route consists of the following roads: the New York and New Haven Railroad, to New Haven; the new Connecticut Air Line from New Haven to Daysville, *via* Willimantic; the Norwich and Worcester road from Daysville, at which point it is intersected by the Air Line, to Worcester; the Worcester and Nashua road connecting the two cities after which it is named; and the Nashua and Rochester and the Portland and Rochester roads, the former projected, and the latter nearly finished, to Portland, Maine. From Portland the route is continued by the Portland and Kennebec and Penobscot and Kenebec to Milford, Maine, from which point the European and North American roads will complete the connection with Halifax.

Most of the roads forming this route are already in successful operation, and the remaining links will be opened to business without unnecessary delay. The Connecticut Air Line is pushing rapidly toward completion, the Portland and Rochester road will be opened before the end of the present year, while the Nashua and Rochester enterprise is in good hands, and its construction will be begun at an early day. Most of the connecting roads tributary to its business are represented in its management, and the financial condition and prospects of the company are encouraging. The European and North American enterprise is also in a prosperous condition. The section of this line lying within the State of Maine, which, with the section crossing the provinces of New Brunswick and Nova Scotia, is designed to form a continuous line from Bangor, Maine, to St. Johns and Point du Chesne, N. B., and Halifax, N. S., is progressing rapidly. The provincial section, which is built by the Government of New Brunswick and owned by the Dominion of Canada, 140 miles in length, is partially completed, and the through communication at this end of the route will soon be opened.

Besides a profitable local traffic, to which the entire section traversed is tributary, the new route will command a profitable business in through freights to and from Maine and the British provinces. The westward and southward bound traffic of the entire railroad system of Maine, which embraces some seven hundred miles of road in operation at the present time, is now dependent for an outlet upon a single road, the Portland, Saco and Portsmouth. An unfair advantage might be taken of the monopoly thus enjoyed, by the establishment of a tariff of excessive freight rates and passenger fares upon this road, and as its carrying capacity is inadequate to the demands upon it, the competition which will follow the opening of the Portland and Rochester road for both Boston and through business will be found doubly beneficial to the business community and traveling public. It is also expected that the new route will attract a profitable business in European freights and travel. The saving of from three to four days in ocean transit between New York and Great Britain is an important item. The cost of transhipment and overland freightage will probably prevent the forwarding of heavy freights by rail, but passengers, light freights and mails, carried by the ocean steamers touching at Halifax, will doubtless take advantage of the saving of time thus effected.

Besides the new roads we have mentioned, a number of others, of greater or less importance, are building throughout the New England States. Among the most important of these is the Boston, Hartford, and Erie road, although the financial complications of the company have seriously interfered with the progress of the work and indefinitely delayed its ultimate completion. The Boston, Harford and Erie Company was originally organized for the purpose of opening a through railroad line, by the consolidation of existing and the construction of new roads, from Boston *via* Willimantic, Hartford and Waterbury, to Fishkill on the Hudson. For this purpose provision was made for the consolidation of the Norfolk County and the Hartford, Providence and Fishkill roads with the Massachusetts lines. To complete the line from Fishkill to Boston the consolidated company were to construct a line from Mechanicsville, Conn., to Willimantic, 26 miles, and another from Waterbury, Conn., to Fishkill, in this State, both of which are now in progress. A third line of 18 miles is also to be constructed from Southbridge to Palmer, to establish a connection with the Boston and Albany road. The total length of railroad embraced in this consolidation will be about 400 miles, but the completion of the work according to the original plan has, we fear, been long delayed by the disastrous financial operations of the managers of the enterprise. The Company has not yet availed itself of the right to purchase the Hartford, Providence and Fishkill, and the Norfolk county roads, although the latter is operated under a lease as part of the main line of the Boston, Hartford and Erie road. Under a new management, the affairs of the Company are being gradually brought into better shape, and there is

no reasonable doubt of the ultimate completion of the consolidated through route provided for in its charter.

A number of railroads are also building in the East for the accommodation of local travel and traffic, and as connecting links between established lines. Among these may be mentioned a short road from Rutland to White River Junction, connecting the Rutland and Vermont with the Vermont Central and the Northern roads; another from Cavendish, Vt., to Bradford, N. H., extending the Concord and Clarendon road to Rutland; another from Montpelier to Wells River, connecting a bend of the Vermont Central with the junction of the Boston, Concord and Montreal and the White Mountain roads; another from Keene to Hillsboro, in New Hampshire; another from Concord to Rochester in the same State; and several others designed for the accommodation of an exclusively local business. Many others are projected, some of great importance, but their construction is still a matter of doubt and some years, at least, must elapse before they are fairly undertaken. At the beginning of the present year the railroad mileage of the six New England States was 4,301 miles. The most active interest is everywhere shown in the extension of railroad facilities in all directions, and the completion of the roads now in hand will effect many important additions to the railroad system of this section.—*N. Y. Daily Bulletin.*

Commerce of New York.

The foreign imports at New York for the month of September 1869 and 1870, are officially stated as follows:

	1869.	1870.
Entered for consumpt'n.	$12,938,666	$17,745,075
Do. for warehousing	8,840,059	7,748,840
Free goods	1,200,764	1,409,353
Specie and bullion	1,364,904	592,496
Total entered at port	$24,344,393	$27,495,764
Withdrawn fr. wareh'use	11,121,143	10,732,135

The foreign imports at New York for the nine months from January 1, were:

	1869.	1870.
Entered for consumpt'n.	$122,050,107	$129,923,147
Do. for warehousing	102,664,623	93,136,652
Free goods	11,610,631	9,980,838
Specie and bullion	11,738,578	8,381,171
Total entered at port	$248,063,039	$241,421,808
Withdrawn fr. wareh'se	83,966,198	90,935,835

The revenue from customs at New York for nine months from January 1, were:

	1869.	1870.
In Sept	$11,975,804 75	$14,182,516 12
Pr. eight months	87,357,518 77	93,253,165 37
Nine months	$99,333,323 52	$107,435,681 49

The exports from New York to foreign ports in the month of September, were:

	1869.	1870.
Domestic produce	$16,610,324	$15,157,390
Foreign free goods	16,960	11,451
Do. dutiable	699,680	923,627
Specie and bullion	1,763,171	4,616,856
Total exports	$18,990,135	$20,709,324
Do. exclusive of specie	17,226,964	16,092,468

The exports from New York to foreign pors for nine months from January 1, were:

	1869.	1870.
Domestic produce	$134,728,340	$126,422,006
Foreign free goods	255,206	332,895
Do. dutiable	5,222,036	7,777,750
Specie and bullion	26,717,628	48,927,983
Total exports	$166,923,210	$183,460,634
Do. exclusive of specie	140,205,582	134,582,651

☞ The Essex Company has declared a dividend of $4 per share, payable Nov. 15.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JUNE 30, 1870.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain, have been		£704,567
Deduct—ordinary working expenses (being at the rate of 69.96 per ct., against 67.59 of the corresponding half of last year)	£492,921	
Renewals, &c., of the permanent way and works in the half-year debited to revenue	66,781	
		559,702
Leaving an available balance earned in the half year of		£144,865
Deduct—Loss on American currency		7,157
Balance		£137,708

in comparison with 116,783*l.* at the corresponding period of 1869.

To this sum of 137,708*l.* has to be added the balance carried from the net revenue account of last half-year of 1,618*l.*, making a total balance of 139,326*l.* From this, however, has to be deducted the amount of postal and military revenue due for the half-year to the postal bondholders of 19,722*l.*, leaving the balance of 119,604*l.* applicable for the following payments, viz:

Interest, &c., paid on lands	£1,847	
On mortgage to Bank of Upper Canada	4,423	
On loans, bankers' balances, promissory notes, European exchange, &c.	8,356	
On British American Land Company's debentures	616	
On Montreal Seminary debentures	616	
On Island Pond debentures	2,700	
Half-yearly instalment on Portland Sinking Fund	2,369	
		£15,930
Atlantic and St. Lawrence lease (in full)	34,515	
Detroit lease (in full)	11,250	
Montreal and Champlain	9,218	
Buffalo and Lake Huron	22,500	
1st Equipment bond interest	15,000	
2d " " "	2,550	
		95,033
Balance		8,639
		£119,603

Comparing this half-year with the corresponding period of 1869, there is an increase of 1,935*l.* in the passenger receipts, and of 28,011*l.* in the freight receipts, making a total increase in the gross receipts of 29,946*l.* The number of passengers carried was 700,884, against 655,850, and the gross freight tonnage conveyed was 612,959, against 520,881, showing an increase in passenger traffic of 6.78 per cent., and in goods traffic of 17.67 per cent.

But the average receipt per passenger was only 6s. 5d. against 6s. 9d., and per ton of goods, only 15s. against 16s. 6d. These figures explain the reason why the receipts have not increased in the same proportion with the traffic carried, and Mr. Brydges accounts for this state of things in the following words: "As regards rates for property from the east to the west—*i. e.*, on manufactured and imported goods, which are of course the most valuable we carry, the rates in many cases during the whole half-year were almost nominal. As compared with the half-year ending June, 1869, the rates for a very considerable period were in the proportion of 25c. per 100*l.* between New York or Boston and Chicago in 1870, as against $1.00 per 100*l.* in 1869—that is to say, that for a considerable period of the half-year a very valuable portion of our traffic had to be carried at only 25 per cent. of the rates which were in force in the year previously. From the west the reduction was not so great, but it averaged 15 to 25 per cent., and of course upon the much larger quantity of business moved from the west to the east, it inflicted a very serious loss indeed upon our gross receipts. Cattle rates were also largely reduced. The usual rates per car from Detroit to Buffalo are $35 to $40. During a large part of last half-year they were from $10 to $12 a car. We have carried an increased tonnage of close upon 18 per cent. in weight, and with proper and reasonable rates that increased tonnage ought to have given us at least 30,000*l.* more gross money than it did—all of which would, of course, have been profit. The same general statement applies to passenger traffic. Early in the season, the quarrels between the great New York lines forced a reduction in the passenger fares between Boston and Chicago from $24 to $18, or 25 per cent. Those rates have remained low during the whole of the busy period of the half-year ending 30th June, 1870."

It would thus appear that the company have lost during the half-year as much as 30,000*l.*, not of gross receipts, but of net profit, principally by the unfortunate competition which has existed between great American lines, and partly by the low prices of produce. The Fenian invasion of May and June also caused an interruption of business for a considerable length of time.

The aggregate expenses for the half-year, including renewals, amounted to 559,702*l.*, or 79.43 per cent. of the receipts, as against 79.01 per cent.; and excluding the renewals, the ordinary working expenses were 69.96 per cent. of the receipts, against 67.59 per cent. for the corresponding period of 1869. The excess expenditure of the half-year was 36,963*l.*, of which sum about 40 per cent. is chargeable to the locomotive and carriage departments, 33 per cent. to the traffic department, and the remainder to hire of rolling stock. This excess is due to extra train mileage for the greater amount of traffic carried, the engine mileage having thus been increased by 189,955 miles and the car mileage by nearly 3,000,000 of miles. The expenses of the traffic department were unavoidably increased in like manner, partly for the service of this extra mileage, but partly also by the outlay for extra watchmen and precautionary measures rendered necessary at the time of the Fenian invasion for protection of the railway. The unfavorable comparisons of the percentages of working expenses between this half-year and the corresponding half-year of 1869 are therefore due principally to the low rates and fares which have prevailed. It will be observed, on the other hand, that in the charge of maintenance there is a reduction of 2,292*l.*, arising, in spite of the extra traffic, from the improved condition of the permanent way.

The number of miles relaid with new iron in the half-year was forty-nine, the number of new ties put into the track was 29,973, and 33,836 cubic yards of ballast were laid upon 20 miles. The steel rails sent out this year are in course of being laid in the railway west of Montreal, and they will all be in the line before the winter sets in. The accounts received thus far of these steel rails are very satisfactory, and arrangements are in progress for an additional supply of 6,000 tons for next season.

The loss upon the conversion of the receipts in American currency is less than it has been since June, 1863, and there is every reason to hope, not only that this reduction will be permanent, but also that this item will disappear altogether at no distant period from the company's accounts.

The items charged as additions to capital during the half-year are fully set forth in the accounts, and explain themselves. Out of the total balance of 50,614*l.*, there is a sum of 37,288*l.* for completion of the payment for the new engines purchased in Glasgow, and another sum of 9,190*l.* for the balance of purchase-money of the Toronto rolling mill.

The construction of the Intercolonial is being pushed forward with vigor, the whole line being now under contract, and the progress already made leaves little doubt that portions of it will be opened next year, and the remainder by the end of 1872. The Commissioners have already adver-

tised for tenders for 40,000 tons of steel rails, and are otherwise building the railway in a substantial manner, with a view to its occupying, in connection with the Grand Trunk system, a prominent position amongst the great "through routes" between the Western States and the Atlantic Ocean.

[A table here shows the gross and net earnings from January, 1861, to June, 1870, inclusive, in mixed currency and gold, the expenditure on renewals, and the direct loss sustained by the company by the depreciation of American currency. The total of renewals amounts to 1,045,717*l.*, and of loss on American currency to 478,418*l.*]

In pursuance of the powers conferred by a clause inserted for the purpose in the Canadian act of Parliament which was passed during the last session (for confirming the agreement with the Buffalo), the directors have entered into an agreement with the International Bridge for the lease for 999 years of their bridge and all its appurtenances, as well as for the assignment of all the tolls, rights, powers, and franchises of the company, upon payment by the Grand Trunk of an annual sum of 20,000*l.*, about 16,000*l.* of which constitute rent, and the remaining 4,000*l.* sinking fund for the redemption of the capital. This sum will be paid by half-yearly instalments to commence from the 1st day of January, 1872, by which date the bridge is contracted to be open for traffic. The progress already made, and which was secured by the loan of 20,000*l.* authorized to be made to the Bridge at the meeting held in April last, is satisfactory, and the whole of the work intended to be carried out this year is in an advanced state. Upwards of 50,000*l.* will probably be expended by the close of the present year, and the directors hope to be in a position to lay before the proprietors at the approaching half-yearly meeting the proposals for raising the Bridge capital.

The directors have to express their deep regret at the death of Mr. Morland, the late Canadian auditor, who was for many years a faithful servant to the proprietors. It appeared to the two remaining auditors that efforts should be made to procure in Canada for the last half-year's accounts the services of a gentleman of commercial eminence and independence, and accordingly, with the concurrence of the board, application was made to the Bank of British North America to permit their manager at Montreal, Mr. Hooper, to act *pro tem.* as auditor in Canada, and he writes as follows to his London colleagues:—"I have made a special audit of the Grand Trunk accounts for the half-year which ended on 30th June last. I have given an official certificate of the correctness of the accounts, and I only desire to add for your information, that I have gone through all the general books of the company here, and that every facility has been accorded me during the period of my examination and investigation by the company's officers, and all desired information and requisite assistance freely given. The books are well kept, and as closely written up as the nature of the work will permit, and the constituted checks on the accounts I consider to be well devised and efficient, and regularly observed by the officers. The system adopted of paying all liabilities by cheque on the authority of a warrant duly signed, as well as that of deposit being made direct by the company's cashiers themselves to the credit of the company with its bankers, are fundamental safeguards of a most important character. The stock books, accounts of stores, stationery, &c., accounts between departments, and the periodical returns from stations, appear to be all in order, and the various checks in regard to them well calculated to prevent irregularity."

The directors have watched the working of this half-year with anxiety, and have considered its results with the greater care, because they believe the present to be an important crisis in the history of the undertaking. They have, with the assistance and co-operation of the proprietors, done all that was possible in restoring the credit of the company, in paying off the debts and liabilities by which it was embarrassed in previous years, in improving the condition of the permanent way and rolling stock, and in adding liberally to the plant and buildings. They have thus been able to perform far more than appeared to any one to be possible twelve months ago; and after concluding a permanent agreement on fair terms with the Buffalo, they hoped for a great and immediate improvement, not only in the gross receipts, but also in the net profits of the undertaking. The former they consider to be of no importance, excepting in so far as they contribute to the latter; and an increased return to the proprietors is the primary object which they have kept and will keep steadily before them. They have up to the present time experienced much disappointment. The increase in the gross receipts, as compared with the corresponding half-year of 1869, has been only 29,946*l.*; and the increase in the net receipts only 12,384*l.* These are results very different from those which they considered themselves justified in anticipating; though they are quite as good as they were able to hope for when they found, during the half-year, the various disadvantages under which the executive in Canada were laboring. The low fares and rates which have ruled, more or less, during the half-year were dependent on competition between their rivals, on the prices of and demand for produce, and on other circumstances which were entirely beyond their own control or that of their officers; and there must sooner or later be a material improvement in this respect. The Fenian invasion, which diminished their traffic and disorganized their staff, they had no means of averting. Meanwhile, the International bridge over the Niagara river at Buffalo is steadily progressing; the Intercolonial is being rapidly constructed; the loss by discount on American currency has materially decreased, and there are other symptoms of hopeful augury for the future. The extra resources which have been supplied for rendering the route more attractive, and for increasing the traffic, have not yet had time to bear fruit. The line is being prepared in all respects for the time when paying rates and fares combined with an important increase of traffic must produce the effects to which all who are interested in it can only now look forward. Taking a calm view of its prospects as a whole, it is so far satisfactory to remember that an important advance has been made towards general improvement. The undertaking is now in a thoroughly sound and stable condition. It is entirely free from debt, and with a turning tide of reasonably paying rates and fares, there must come that measure of prosperity for which the directors have so anxiously labored, and which the proprietors have so long expected.

West Wisconsin Railroad.

On the 28th of October, the subjoined report on this railroad was posted on the Bulletin Board of the Chamber of Commerce of Chicago, Illinois:

To S. H. McCrea, Esq., President Board of Trade, Chicago:

SIR: The undersigned, your delegates present at the recent celebration of the completion and opening of the West Wisconsin Railroad to the city of Eau Claire, beg leave respectfully to report: That this new line of railroad impressed your delegates as being of very great importance to this city—important to a degree not hitherto appreciated by our citizens generally. The line extending from Tomah, on the La Crosse Division of the Milwaukee and St. Paul Railroad, to St. Paul—is a link of about 160 miles, in an almost air line, between this city and St. Paul, and, with the completion of the Chicago and North-Western Railroad from Madison to Tomah, gives a direct line hence to St. Paul, about 100 miles shorter than any present or projected route. The Chippewa Valley, through which the West Wisconsin Railroad runs, is rich in agricultural resources, and also the centre of an enormous lumbering interest; and, while this section of country has hitherto been greatly isolated from intercourse with the general commercial world, the opening of this new means of traffic should largely turn its valuable trade to our benefit, and we are persuaded that a reasonable amount of effort will secure to us a large business, profitable alike to us and to the residents of that portion of Wisconsin.

Your delegates cannot close their report without acknowledging the very kind and hospitable manner in which they were received and entertained by the people of Eau Claire, and also to the Chicago and North Western Railroad and the Milwaukee and St. Paul Railroad Companies, for their kindly extended courtesies.

And, in conclusion, we beg leave respectfully to submit for adoption by the Board of Trade the accompanying resolutions, as expressive of the sense of this board touching the enterprise, the partial completion of which gave rise to our visit, as your representatives to Eau Claire.

Regretting the delay that has occurred in presenting this report, which has been occasioned by the necessary absence from the city of one of the undersigned, we are very respectfully,

WM. E. RICHARDSON,
S. T. WEBSTER,
Delegates.

The following resolutions were duly passed by the Chamber:

WHEREAS, This board has learned of the completion of another link in the line of the West Wisconsin Railroad, opening it to traffic from Tomah to Eau Claire—more than one-half its entire length—and are gratified to learn that the remainder is being rapidly pushed to completion, the whole line being expected to be in operation during 1871; and,

WHEREAS, We regard the completion of this line, with its connections, as one of the first importance, not only to that portion of Wisconsin through which it passes, but also to the northern portion of Minnesota and the great Northwest beyond, as well as the City of Chicago, shortening, as it will, the route between us and the City of St. Paul by about 100 miles, and forming almost an air line, in connection with the Chicago and North Western Railroad; therefore,

Resolved, That to the enterprising projectors of this line the thanks of the business men of this city are especially due for the perseverance and vigor they have displayed in pressing forward their undertaking thus far, and, in view of the important advantages to result therefrom, we respectfully urge them to use proper means to ensure the early completion of the entire work.

Resolved, That the substantial basis upon which the enterprise rests, and the liberal aid secured to it from the State of Wisconsin, as well as its prospective large and valuable trade to be transacted through the medium of the West Wisconsin Railroad, we respectfully suggest to the management of the Chicago and North Western Railroad Company the necessity of completing the line of their road from Madison to Tomah without delay.

The West Wisconsin is a land grant road, having 6,400 acres to the mile. The company issues sterling bonds to the amount of £800,000, with interest at 7 per cent., payable in gold. The bonds are a first mortgage upon the road and lands, and are due in fifteen years after issuance. The committee, in their report, did not state that the road is run by the Milwaukee and St. Paul Railroad, for half the gross receipts; but, while such an arrangement exists, the Chicago and North Western Railroad may not be eager to complete the connection between Madison and Tomah, Wis., the road under their control, immediate self interest would dictate the course recommended by the committee.

☞ EMMONS RAYMOND, Esq., of Boston, has been elected President of the Connecticut and Passumpsic Rivers Railroad Company in place of Hon. Henry Keyes, deceased.

List of U. S. Patents.

Issued for Improvements in Railroad Construction, Rolling Stock, &c., for the week ending Nov. 8th, 1870, and each bearing that date. Reported weekly for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

No.

108,598.—Spark Catcher and Consumer, Darwin Beach, Oskosh, Wis.

108,982.—Valve Gear for Locomotives and other steam Engines, William B. Doddridge, Hebron, Ind.

108,986.—Screw Spike for Railroads, Alpheus C. Dunn and Isaac L. Dunn, New York, N. Y.

108,987.—Lock Nut, Philip Dyer Jr., Abram Parker and William B. Way, Pontiac, Mich.

108,999.—Piston Packing, John Gates, Portland, Oregon.

109,001.—Laterally sliding Throttle Valve, William Glass, Brooklyn, N. Y.

109,018.—Composition for coating bearings, Peter J. Kelley, New York, N. Y.

109,020.—Dumping Car, Sidney D. King, Middletown, N. Y., assignor to himself and James M. Welch, Bradford, Pa.

109,058.—Balance Slide Valve, Alex. K. Rider, New York, N. Y., assignor to himself, Cornelius H. Delameter and George H. Reynolds, same place.

109,086.—Steam Gauge and Safety Valve, Isaac N. Whittlesey, Mount Vernon, Ind.

109,119.—Railway Sleeping Car, Joseph S. Du Bois, St. Louis, Mo., assignor to himself and Thomas Dorwin, Leavenworth, Kansas.

109,141.—Railway Switch, John Miner and Silas Merrick, New Brighton, Pa.

109,143.—Railroad Car Stove, John Oliphant, Spring Hill Furnance, Pa.

109,159.—Journal Box for Cars, Ernest Von Jemsen, Omaha, Nebraska.

Detroit and Milwaukee Railroad.

The earnings of this road for the years ending December 31, 1868 and 1869, compare as follows:

	1868.	1869.
From passengers	$704,477 63	$694,251 49
" freight & live stock	864,281 92	871,281 80
" mails and sundries	50,828 36	46,934 89
" rents	4,697 23	3,150 09
" Lake steamers	93,858 58	.....
	$1,718,093 72	$1,615,618 27
Expenses, viz:		
Maintenance of way	$302,044 69	$325,684 67
Locomotive power	205,803 10	193,041 81
Cars	76,987 52	89,104 73
Passenger traffic	95,725 08	84,522 96
Freight traffic	143,088 30	155,075 65
General charges	39,827 27	44,588 46
Taxes and insurance	56,737 96	57,382 98
Lake steamers	93,427 14	.....
	$1,013,636 06	$949,351 26
Net earnings	$704,457 66	$666,267 01
Add balance Dec. 31, 1868		103,429 61
		$769,696 62
From this amount deduct—		
Interest on bonds	$498,983 21	
Commerc'l Bank of Canada	20,000 00	
Divid'd on prefer'ce shares	146,650 00	
		665,633 21
Balance carried to next year		$104,063 41

It will be observed in the above account that the "Lake steamer account" is omitted in 1869, the steam ferry-boats having passed into other hands. Comparing the earnings, exclusive of Ferry account, those for 1869 are less than those for 1868 by $3,616 87. The expenses, also excluding the Ferry account, were greater by $29,143 34. The falling off in the net earnings of the road in 1869 was therefore $37,759 21. The working expenses in 1869 were 55.20 per cent. of the gross receipts, being 2.04 per cent. more than the rate in 1868. This increase is chiefly due to the large renewals of way effected during the year.

The Detroit and Milwaukee Railroad is virtually an extension of the Great Western Railway of Canada across the Peninsula of Michigan, and leased and operated by that company. Its termini are Detroit and Grand Haven, distant from each other 189 miles. At Grand Haven it connects with steamers on Lake Michigan sailing regularly for Milwaukee, a distance of 85 miles. These steamers were formerly owned by the company, but are now, as before stated, owned and operated by a distinct organization. In relation to this change and other matters the official report says:

In the report for the year 1868, the Directors stated the loss of the steamship "Milwaukee," one of the Company's ferry steamers on Lake Michigan, and mentioned that they had adopted new arrangements for the transfer of freight and passengers across that lake. These arrangements have been consummated, and the business is now performed by Mr. Nathan Engelmann, of Milwaukee, in a manner satisfactory to the public and the company. The steamer "Detroit," the consort of the "Milwaukee," in the transit service, has been sold, and the proceeds credited to capital account.

The event of the year in the company's history has been the change of the terminus at Grand Haven, from the west to the east side of the Grand River. For several years past the company has experienced much inconvenience from the shifting of the sand dunes, at the base of which its track was laid to the harbor at Grand Haven, involving a large current expenditure in clearing the track from sand. In the early part of 1868, a strong desire was manifested by the freemen of the city of Grand Haven, which lies wholly on the east side of the river, to have the line changed, so as to cross the Grand River at Ferrysburg, nearly two miles from its terminus, and run directly into the city, and such aid and facilities were proffered that the directors did not hesitate to accept and act upon them. The new line has been made; an iron swing bridge has been erected across the channel; about twelve acres of land, securing an extensive front on the river, obtained in fee; the station house completed, and the freight warehouse, engine house and other necessary buildings commenced. The sum of $133,236 49 has been expended. It is estimated that $47,000 will be required to finish the work. The city of Grand Haven contributes $53,000 in its bonds towards the cost.

In order to realize the benefits of the uniform gauge afforded by the Great Western "third rail," a new freight line called "The Milwaukee Line," was organized last May, each company between Grand Haven and New York contributing a certain number of box cars, specially lettered, and the success of the line is fully established, the demand for cars being in excess of the supply.

The Kalamazoo and Grand Rapids Railroad was opened for traffic between those places on 17th March, 1869, giving a new route to the east and west, and to a certain extent competing with us by opening up new markets; but notwithstanding this fact, our passenger earnings at Grand Rapids show, for the year, an increase. In the beginning of the present year three new lines have been opened near us:—the Grand River Valley Railroad, from Grand Rapids to Jackson; the Ionia and Lansing Railroad, from Ionia to Lansing; and the Michigan Lake Shore Railroad, from Ferrysburg to Muskegon; the two former roads being competitors to us, while the latter will be a feeder to this company.

The company's rolling stock consists of 34 locomotives and 578 cars, of the latter 30 are first class passenger, 21 mail and baggage, 337 box freight, 187 flat freight, and 3 other cars. The number of miles run by trains was in 1868, 600,913 and in 1869, 614,243; passengers carried in 1868, 431,632 and in 1869, 447,041; and tons of freight carried in 1868, 286,931 and in 1869, 317,115.

The capital account at the close of 1869 stood as shown in the following exhibit:

Ordinary stock		$452,350 00
Preference shares 11,900 at $50		2,095,000 00

The actual cost of road, rolling stock, &c., including payments from net revenue, amounted at date to $11,467,220.

President.—CHARLES C. TROWBRIDGE.

Vice President.—JOSEPH PRICE.

Directors.—Charles C. Trowbridge, Joseph Price, Henry N. Walker, Edmund A. Brush, Christian H. Buhl, Donald McInnes, James Hamilton, Æmilius Irving, Hugh Allan.

Gen'l Superintendent.—THOMAS BELL.

Secretary.—JAMES H. MUIR.

New York Agents.—M. K. JESUP & Co.

☞ At a meeting of the stockholders of the Indianapolis, Cincinnati and Lafayette Railroad Company in Cincinnati, on the 7th inst., the following gentlemen were unanimously elected directors: M. E. Ingalls, Wm. P. Harris, and Thomas H. Perkins of Boston; John S. Kennedy, George Bliss and William A. Booth of New York; W. A. Rockwood of Indianapolis; A. B. Lewis of Lawrenceburg, and W. N. Smith of Cincinnati. M. E. Ingalls was elected President *pro tem.*, and A. Worth Secretary. An investigation into the history and workings of the company from the beginning was ordered, and W. S. Groesbeck and Arron F. Perry were appointed an advisory com-

mittee on the part of the stockholders to aid in the investigation.

Mobile and Montgomery Railroad.

The receipts from operations of this road for the years ending April 30, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$165,420 49	$227,528 27
" freight	216,652 62	304,692 51
" express	14,867 42	21,545 49
" Governm't transp.	20,000 00	2,974 01
" mails	18,600 00	18,600 00
" incidentals	10,381 26	4,342 20
	$444,921 79	$579,682 48
Expenses, viz:		
Conducting transp.	$97,061 22	$120,478 41
Motive power	80,044 80	108,670 56
Maintenance of way	106,732 06	158,169 72
Maintenance of cars	30,731 22	44,346 41
Steamboat expenses	29,525 58	39,167 98
Taxes	4,021 44	21,678 49
	$348,116 82	$492,531 52
Net receipts	$96,805 47	$87,150 96

It will be seen that the gross receipts were $579,682 48—an increase over those of the previous year of $133,760 69, or about 23 per cent. The total operating expenses were $426,676 99; and the receipts over and above operating expenses, $153,005 49. From this should be deducted the sum of $44,176 04 expended for 679 tons of new rails, and $21,678 49 for taxes—leaving the net amount, as above, $87,150 96. The ordinary operating expenses have been 73.64, and the total expenses about 85 per cent. of the gross receipts. This result produces no dividends for the stockholders, but provides amply for the interest of the indebtedness of the company. The President in his report says:

The net earnings for the year ending April 30, 1870, as shown by the report of the Superintendent, provides for the purchase of 679 tons of new rails; for the payment of interest on the outstanding debts of every description upon which it had to be paid up to the close of the fiscal year; and leaving a balance of $2,181 04 due to preferred stock, which is placed on the books of the company, to the credit of that account, the sum being too small to make a dividend. It assumes the character of a special fund, borrowed from the preferred stockholder, and it is hoped the net earnings of the coming year will so add to it as to enable us by June 1st, 1871, to declare a dividend on this class of the capital stock.

Upon reference to the condensed general statement of the condition of the company, which accompanies this report, it will be seen, comparing it with the statement of last year, that a large amount of the debt then outstanding in the name of the old companies has been arranged.

There was then outstanding in the name of the Alabama and Florida Railroad Co	$609,310 57
Mobile and Great Northern Railroad Company	72,039 16
Making total	$681,349 73
There is now outstanding in the name of the Alabama and Florida Railroad Company	$126,800 00
Mobile and Great Northern Railroad Company	27,000 00
Total now outstanding	$153,800 00

Of the debts due by the Alabama and Florida Railroad Company $58,800 is on second and third mortgage bonds, that have never been presented, and the holders are unknown to the company. They will no doubt come in during the year.

The remainder of the debt is for the first mortgage bonds of the Mobile and Great Northern Railroad Company, and the bonds of the Alabama and Florida Railroad Company, endorsed by the directors of said company. As the terms for settling this indebtedness have been agreed upon, it is probable that by the end of the year, there will be no debt outstanding in the name of the old companies.

The first mortgage bonds of the Mobile and Montgomery R.R. Co., issued in 1868 for	$1,250,000
Have been used to the amount of	894,000
Leaving in hand	$356,000

Which could have been sold, but it was deemed advisable not to do so, for on looking into the badly worn condition of the iron, especially through the Prairie, the immediate necessity for purchasing a large amount to relay the track, and the pressing want of more engines and cars to do the work required of the road, and of increased freight houses at Montgomery, satisfied the board, that the proceeds of the bonds remaining on hand would not meet these demands; and, as it had further become necessary to extend the road into the city of Mobile, to preserve its position against projected competing lines, and as the only means of doing all this, the Board directed that application should be made to the Legislature for the necessary aid.

A bill was prepared and placed before the Legislature, passed and approved by the Governor on the 25th February, 1870, authorizing the endorsement by the State of the first mortgage bonds of the company for $2,500,000; $1,000,000 to be used in paying off the mortgage and judgment liens on the road; $500,000 for repairs and improvement of the road between Montgomery and Tensas, and increase of outfit and equipment; and the remaining $1,000,000 for extending the road from Tensas to the city of Mobile.

The bonds have been prepared, dated April 25th, 1870; are payable May 1st, 1900, with interest at the rate of 8 per cent. per annum, payable semi-annually from May 1st, 1870.

All the necessary arrangements are being made to comply with the provisions of the Act of the Legislature, and the Board have every reason to expect that by the first of August next, they will be complied with, and the company be in possession of the endorsed bonds, so as to be enabled to have the contractors at work on the extension of the road from Tensas to Mobile.

Contracts have been made for 2,000 tons of rails to be delivered in June, July and August, for repairs of the road between Montgomery and Tensas, for six locomotives and 110 new freight cars, and by the first of November the road will be in a better working condition than at any time in its history; and, for the first time, with an outfit and equipment sufficient to do the work required of it.

The company was most fortunate in procuring the aid of the State, and we feel satisfied that in giving the aid, the State has run no risk. The bonds to be endorsed by the State will be a first and only lien on the road, outfit and equipment, which will have cost the company, when the road is completed to the city of Mobile $5,600,000, a fraction over $30,000 per mile. The State being responsible for only $2,500,000, about $13,700 per mile, it must be perfectly safe, if railroad property in the State is to have any value. Our road, when completed, will have a very strong position, and will be made doubly so by the completion of the road from New Orleans, as we must have very large increase in our through travel from that direction, and the completion of the South and North Alabama Railroad, now rapidly progressing, and which will no doubt be opened to Elyton by the close of the year, and Decatur by the time our road is finished to Mobile, will give us a connection with the iron and coal fields of the State, and make your road a part of the shortest line from the Gulf to Nashville and Louisville.

The thorough repair and improvement of the Montgomery and West Point Railroad, so as to make it a first-class road, giving to it a better chance for the travel to and from the East and North, must largely increase the business of this road, and within three years the Board hope to see the stock of the company, both preferred and common, placed permanently on the list of dividend paying railroad stocks.

At the date of the report, April 30, 1870, the company had 24 locomotives, 6 first-class and 5 second-class passenger, 3 baggage and mail, 3 express, 12 freight, 106 box, 46 platform, 6 ditching 6 wood, 6 shanty, 41 pole, and 4 crank cars.

The financial condition of the company, April 30, 1870, was as follows:

Liabilities.		
Capital stock:		
Capital common stock		$1,139,900 00
Ala. & Fla. R. R. Co. common stock unexchanged		90,400 00
M. & G. N. R. R. Co. common stock unexchanged		32,300 00

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

Years ending.	Railroad: Main Line.	Railroad: Branch Lines.	Railroad: 2d Track and Sidings.	Railroad: Railroad in progress.	Rolling Stock: Cars: Engines.	Cars: Pass.	Cars: R. M. E.	Cars: Freight. RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."
